A Room of One's Own Virginia Woolf 2020-10-29 In October 1928 Virginia Woolf was asked to deliver speeches at Newnham and Girton Colleges on the subject of 'Women and Fiction'; she spoke about her conviction that 'a woman must have money and a room of her own if she is to write fiction'. The following year, the two speeches were published as A Room of One's Own, and became one of the foremost feminist texts. Knitted into a polished argument are several threads of great importance – women and learning, writing and poverty – which helped to establish much of feminist thought on the importance of education and money for women's independence. In the same breath, Woolf brushes aside critics and sends out a call for solidarity and independence – a call which sent ripples well into the next century.

'Brilliant interweaving of personal experience, imaginative musing and political clarity' – Kate Mosse, The Guardian 'Probably the most influential piece of non-fictional writing by a woman in this century.' – Hermione Lee, The Financial Times

The Thousand and One Nights M. S. Mahdi 1995 Almost three centuries have passed since the oldest manuscript of "The Thousand and One Nights" arrived in Europe. Since then, the "Nights" have occupied the minds of scholars world-wide, in particular the questions of origin, composition, language and literary form. In this book, Muhsin Mahdi, whose critical edition of the text brought so much praise, explores the complex literary history of the "Nights," bringing to fruition the search for the archetype that constituted the core of the surviving editions, and treating the fascinating story of the growth of the collection of stories that we now know as "The Thousand and One Nights,"

Bombay Smiles Jaume Sanllorente "Sanllorente's story, reminiscent of Greg Mortenson's Three Cups of Tea, is remarkable and uplifting."—Booklist In 2003, Jaume Sanllorente was a young journalist leading an active and exciting life in Barcelona—no more idealistic than any other young professional. Then a travel agent convinced him to spend his vacation in India. Amazed by what he saw in the land of sacred cows and shocking poverty, Jaume was transformed. That experience lead him to reconsider the world he lived in and caused him to think that he might do something to make it a little better. He devoted himself to helping a small orphanage in Bombay, one that was about to close its doors and send its forty children back to the streets (and the brothels) from which they had been rescued. Jaume seized the moment, determined not to let that happen. As a consequence, he changed his life, and much more as well. In *Bombay Smiles*, Jaume Sanllorente gives us an insightful and loving vision of a country of great contrasts. He reveals that the secret of his own happiness is in seeking happiness for others. *Bombay Smiles* is a story of loneliness, ransoms, dangers, injustices, threats of death, and acts of courage, which give an example to follow in spite of the adversities one might meet. It is a lesson of wise love, surrender,

sacrifice, and hope, which invites us to start on the path toward a better world.

Machine Learning Applications in Electromagnetics and Antenna Array Processing Manel Martínez-Ramón
2021-04-30 This practical resource provides an overview of machine learning (ML) approaches as applied to electromagnetics and antenna array processing. Detailed coverage of the main trends in ML, including uniform and random array processing (beamforming and detection of angle of arrival), antenna optimization, wave propagation, remote sensing, radar, and other aspects of electromagnetic design are explored. An introduction to machine learning principles and the most common machine learning architectures and algorithms used today in electromagnetics and other applications is presented, including basic neural networks, gaussian processes, support vector machines, kernel methods, deep learning, convolutional neural networks, and generative adversarial networks. Applications in electromagnetics and antenna array processing that are solved using machine learning are discussed, including antennas, remote sensing, and target classification.

The Metal of the Dead Concha Espina 2003 "The human dimension in the novel revolves around the romantic entanglements of three youthful women whose different personalities reflect their regional provenance in a somewhat stereotypical manner: Aurora is a sweet blond woman from Spain's northern highlands, Rosario is a professional newspaper reporter from Madrid, and Casilda is a dark-haired and passionate Andalusian beauty."--BOOK JACKET.

An Account, Much Abbreviated, of the Destruction of the Indies Bartolomé De Las Casas 2003-09-15 Fifty years after the arrival of Columbus, at the height of Spain's conquest of the West Indies, Spanish bishop and colonist Bartolomé de Las Casas dedicated his *Brevísima Relación de la Destrucción de las Indias* to Philip II of Spain. An impassioned plea on behalf of the native peoples of the West Indies, the *Brevísima Relación* catalogues in horrific detail atrocities it attributes to the king's colonists in the New World. The result is a withering indictment of the conquerors that has cast a 500-year shadow over the subsequent

history of that world and the European colonization of it.

The Most Foreign Country Alejandra Pizarnik 2017 Poetry. Translated from the Spanish by Yvette Siegert. First published in 1955 and now translated for the first time into English, THE MOST FOREIGN COUNTRY is Alejandra Pizarnik's debut collection. Here, the nineteen year old poet begins to explore the themes that will shape and define her vision: the solitude of the poetic self, the longing for artistic depth, and the tenuous nearness of death. By turns probing and playful, bold and difficult, Pizarnik's earliest poems teem with an exuberant desire "to grab hold of everything" and to create a language that tests the limits of origin, paradox, and death."

Experimental Cell Biology of Taste and Olfaction Andrew I. Spielman 1995-07-12 Experimental Cell Biology of Taste and Olfaction examines and adapts methods from a variety of established fields, such as neurophysiology, receptor biochemistry and cellular imaging to provide comprehensive coverage of current techniques and protocols in chemosensory cell biology. Written for both newcomers and established scientists, this volume offers numerous tips for problem solving and suggests ways to avoid the most common, and costly, mistakes made by researchers. This book covers general aspects such as tissue collection and preparation, as well as specific, up-to-date methods used in taste and olfactory morphology,

immunology, biochemistry, biophysics, electrophysiology and molecular biology. The explosion of knowledge and the increased interest in these areas make this book an important reference work for all scientists, students, and teachers in this and related fields

Nineteen Eighty-Four George Orwell 2021-01-09 "Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Frankenstein (Modern English Translation) Mary Shelley 2019-05 Carefully edited for modern readers to allow for easier reading Obsessed with the secret of creation, Swiss scientist Dr. Victor Frankenstein

cobbles together a body he's determined to bring to life. And one fateful night, he does. When the creature opens his eyes, the doctor is repulsed: his vision of perfection is, in fact, a hideous monster. Dr. Frankenstein abandons his creation, but the monster won't be ignored, setting in motion a chain of violence and terror that shadows Victor to his death. Mary Shelley's *Frankenstein*, a gripping story about the ethics of creation and the consequences of trauma, is one of the most influential Gothic novels in British literature. It is as relevant today as it is haunting.

The Latin American Ecocultural Reader Jennifer French 2020-11-15 The Latin American Ecocultural Reader is a comprehensive anthology of literary and cultural texts about the natural world. The selections, drawn from throughout the Spanish-speaking countries and Brazil, span from the early colonial period to the present. Editors Jennifer French and Gisela Heffes present work by canonical figures, including José Martí, Bartolomé de las Casas, Rubén Darío, and Alfonsina Storni, in the context of our current state of environmental crisis, prompting new interpretations of their celebrated writings. They also present contemporary work that illuminates the marginalized environmental cultures of women, indigenous, and Afro-Latin American populations. Each selection is introduced with a short essay on the author and the salience of their work; the selections are arranged into eight parts, each of which begins with an introductory essay that speaks to the political, economic, and environmental history of the time and provides interpretative cues for the selections that follow. The editors also include a general introduction with a concise overview of the field of ecocriticism as it has developed since the 1990s. They argue that various strands of environmental thought—recognizable today as extractivism, eco-feminism, Amerindian ontologies, and so forth—can be traced back through the centuries to the earliest colonial period, when Europeans first described the Americas as an edenic “New World” and appropriated the bodies of enslaved Indians and Africans to exploit its natural bounty.

Concerning the Angels Rafael Alberti 1995 First published in Spain in the summer of 1929, *Concerning the Angels* (*Sobre los angeles*) is the great Spanish poet Rafael Alberti's masterpiece, on a par with T.S. Eliot's *The Waste Land*, Pablo Neruda's *Residencia en la tierra*, and Federico Garcia Lorca's *Poeta en Nueva York*. It marks a major departure from the light-hearted tone of the poet's earlier verse, which was notably influenced by Andalusian folksong. This bilingual text is at once intensely imaginative and intimately realistic, a lyrical illumination of the poet's "dark night of the soul." Rafael Alberti, born in 1902, is the last surviving member of the so-called Generation of 1927 that included such notable Spanish poets Federico Garcia Lorca, Vicente Alexandre, Pedro Salinas, Jorge Guillen, and Luis Cernuda. Christopher Sawyer-Laucanno lives in Massachusetts and teaches in the program in Writing and Humanistic Studies at MIT.

Selected Poetry of Francisco de Quevedo Francisco de Quevedo 2009-08-01 Francisco de Quevedo (1580–1645), one of the greatest poets of the Spanish Golden Age, was the master of the baroque style known as "conceptismo," a complex form of expression fueled by elaborate conceits and constant wordplay as well as ethical and philosophical concerns. Although scattered translations of his works have appeared in English, there is currently no comprehensive collection available that samples each of the genres in which Quevedo excelled—metaphysical and moral poetry, grave elegies and moving epitaphs, amorous sonnets and melancholic psalms, playful romances and profane burlesques. In this book, Christopher Johnson gathers together a generous selection of forty-six poems—in bilingual Spanish-English format on facing pages—that highlights the range of Quevedo's technical expertise and themes. Johnson's ingenious solutions to rendering the difficult seventeenth-century Spanish into poetic English will be invaluable to students and scholars of European history, literature, and translation, as well as poetry lovers wishing to reacquaint themselves with an old master.

The Poetry of Thought: From Hellenism to Celan George Steiner 2012-01-24 From the distinguished polymath George Steiner comes a profound and illuminating vision of the inseparability of Western philosophy and its living language. With his hallmark forceful discernment, George Steiner presents in *The Poetry of Thought* his magnum opus: an examination of more than two millennia of Western culture, staking out his claim for the essential oneness of great thought and great style. Sweeping yet precise, moving from essential detail to bracing illustration, Steiner spans the entire history of philosophy in the West as it entwines with literature, finding that, as Sartre stated, in all philosophy there is “a hidden literary prose.” “The poetic genius of abstract thought,” Steiner believes, “is lit, is made audible. Argument, even analytic, has its drumbeat. It is made ode. What voices the closing movements of Hegel’s *Phenomenology* better than Edith Piaf’s non de non, a twofold negation which Hegel would have prized? This essay is an attempt to listen more closely.”

The Complete Poetry César Vallejo 2009-12-14 "César Vallejo is the greatest Catholic poet since Dante—and by Catholic I mean universal."—Thomas Merton, author of *The Seven Storey Mountain* "An astonishing accomplishment. Eshleman's translation is writhing with energy."—Forrest Gander, author of *Eye Against Eye* "Vallejo has emerged for us as the greatest of the great South American poets—a crucial figure in the making of the total body of twentieth-century world poetry. In Clayton Eshleman's spectacular translation, now complete, this most tangled and most rewarding of poets comes at us full blast and no holds barred. A tribute to the power of the imagination as it manifests through language in a world where meaning has always to be fought for and, as here, retrieved against the odds."—Jerome Rothenberg, co-editor of *Poems for the Millennium* "Every great poet should be so lucky as to have a translator as gifted and heroic as Clayton Eshleman, who seems to have gotten inside Vallejo's poems and translated them from the inside out. The result is spectacular, or as one poem says, 'green and happy and

dangerous."—Ron Padgett, translator of Complete Poems by Blaise Cendrars "César Vallejo was one of the essential poets of the twentieth century, a heartbreaking and groundbreaking writer, and this gathering of the many years of imaginative work by Clayton Eshleman is one of Vallejo's essential locations in the English tongue."—Robert Hass, former Poet Laureate of the United States "This is a crucially important translation of one of the poetic geniuses of the twentieth century." —William Rowe, author of Poets of Contemporary Latin America: History and the Inner Life "Only the dauntless perseverance and the love with which the translator has dedicated so many years of his life to this task can explain why the English version conveys, in all its boldness and vigor, the unmistakable voice of César Vallejo."—Mario Vargas Llosa

7 Best Short Stories by James Joyce James Joyce 2019-04-29 James Joyce was an Irish, modernist writer who wrote in a ground-breaking style that was known both for its complexity and explicit content. He also participated in the early days of poetic modernism in the English language, being considered by Ezra Pound one of the most eminent poets of imagism. Although Joyce has lived outside his native Irish island for most of adult life, his Irish identity was essential to his work and provide him with all the ambiance and much of the theme of his work. His fictional universe is rooted heavily in Dublin and reflects his family life and events, friendships and enmities from school and college times. In this way, he is at the same time one of the most cosmopolitan and one of the most particularists of the modernist authors of English language. In this anthology the critic August Nemo presents seven short stories that bring the most emblematic elements of the style of this important author: The Sisters * Eveline * Araby * A Painful Case * The Dead * Two Gallants * After the Race

Inner Paths to Outer Space Rick Strassman 2008-03-27 An investigation into experiences of other realms of existence and contact with otherworldly beings • Examines how contact with alien life-forms can be obtained through the “inner space” dimensions of our minds • Presents evidence that other worlds experienced through consciousness-altering technologies are often as real as those perceived with our five senses • Correlates science fiction’s imaginal realms with psychedelic research For thousands of years, voyagers of inner space--spiritual seekers, shamans, and psychoactive drug users--have returned from their inner imaginal travels reporting encounters with alien intelligences. Inner Paths to Outer Space

presents an innovative examination of how we can reach these other dimensions of existence and contact otherworldly beings. Based on their more than 60 combined years of research into the function of the brain, the authors reveal how psychoactive substances such as DMT allow the brain to bypass our five basic senses to unlock a multidimensional realm of existence where otherworldly communication occurs. They contend that our centuries-old search for alien life-forms has been misdirected and that the alien worlds reflected in visionary science fiction actually mirror the inner space world of our minds. The authors show that these “alien” worlds encountered through altered states of human awareness, either through the use of psychedelics or other methods, possess a sense of reality as great as, or greater than, those of the ordinary awareness perceived by our five senses.
