Buyology Martin Lindstrom 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.

Lectures on Faith Joseph Smith (Jr.) 1988 This special edition of the *Lectures on Faith* from Zion’s Camp Books is formatted for convenience on an eReader, with more than 100 internal links to scriptures and citations. We hope it will give you a great reading experience! The *Lectures on Faith* were originally prepared as materials for the School of the Prophets in Kirtland, Ohio in 1834 and were included in the Doctrine and Covenants from 1835 to 1921. Although the *Lectures on Faith* have never been accepted as revelation by the body of the church (and so were removed from the Doctrine and Covenants in 1921), they contain important doctrinal insights that can help anyone seeking to learn more about faith and come closer to Heavenly Father and Jesus Christ. President Joseph Fielding Smith noted, “I suppose that the rising generation knows little about the *Lectures on Faith*. . . . In my own judgment, these *Lectures* are of great value and should be studied. . . . I consider them to be of extreme value in the study of the gospel of Jesus Christ.” (Joseph Fielding Smith, *Seek Ye Earnestly*. Salt Lake City: Deseret Book, 1970.) Elder Bruce R. McConkie of the Quorum of the Twelve Apostles has stated the lectures contain “some of the best lesson material ever prepared on the Godhead; on the character, perfections, and attributes of God; on faith, miracles, and sacrifice. They can be studied with great profit by all gospel scholars.” (Bruce R. McConkie, *Mormon Doctrine*. Salt Lake City: Bookcraft, 1966.)

Free Culture Lawrence Lessig 2016-07-30 Lawrence Lessig, “the most important

thinker on intellectual property in the Internet era”, masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can’t do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

Data Science from Scratch Joel Grus 2015-04-14 Data science libraries, frameworks, modules, and toolkits are great for doing data science, but they’re also a good way to dive into the discipline without actually understanding data science. In this book, you’ll learn how many of the most fundamental data science tools and algorithms work by implementing them from scratch. If you have an aptitude for mathematics and some programming skills, author Joel Grus will help you get comfortable with the math and statistics at the core of data science, and with hacking skills you need to get started as a data scientist. Today’s messy glut of data holds answers to questions no one’s even thought to ask. This book provides you with the know-how to dig those answers out. Get a crash course in Python Learn the basics of linear algebra, statistics, and probability—and understand how and when they're used in data science Collect, explore, clean, munge, and manipulate data Dive into the fundamentals of machine learning Implement models such as k-nearest Neighbors, Naive Bayes, linear and logistic regression, decision trees, neural networks, and clustering Explore recommender systems, natural language processing, network analysis, MapReduce, and databases

UNESCO General History of Africa, Vol. VI, Abridged Edition J. F. Ade Ajayi 1998-07 Volume VI of this acclaimed series is now available in an abridged paperback edition. The result of years of work by scholars from all over the world, The UNESCO General History of Africa reflects how the different peoples of Africa view their civilizations and shows the historical relationships between the various parts of the continent. Historical connections with other continents demonstrate Africa's contribution to the development of human civilization. Each volume is lavishly illustrated and contains a comprehensive bibliography. Volume VI covers the period from the beginning of the nineteenth century to the onset of the European "scramble" for colonial territory in the 1880s. In spite of a growing European commercial, religious, and political presence during the first three quarters of the century, outside influences were felt indirectly by most African societies, and they made a number of

culturally distinctive attempts to modernize, expand, and develop. These are detailed in four thematic chapters, twenty-three chapters detailing developments in specific areas, and two concluding chapters tracing the African diaspora and assessing the state of the Continent's political, economic, and cultural development on the eve of the European conquest.

Secrets of the Millionaire Mind T. Harv Eker 2009-10-13 Secrets of the Millionaire Mind reveals the missing link between wanting success and achieving it! Have you ever wondered why some people seem to get rich easily, while others are destined for a life of financial struggle? Is the difference found in their education, intelligence, skills, timing, work habits, contacts, luck, or their choice of jobs, businesses, or investments? The shocking answer is: None of the above! In his groundbreaking *Secrets of the Millionaire Mind*, T. Harv Eker states: "Give me five minutes, and I can predict your financial future for the rest of your life!" Eker does this by identifying your "money and success blueprint." We all have a personal money blueprint ingrained in our subconscious minds, and it is this blueprint, more than anything, that will determine our financial lives. You can know everything about marketing, sales, negotiations, stocks, real estate, and the world of finance, but if your money blueprint is not set for a high level of success, you will never have a lot of money—and if somehow you do, you will most likely lose it! The good news is that now you can actually reset your money blueprint to create natural and automatic success. *Secrets of the Millionaire Mind* is two books in one. Part I explains how your money blueprint works. Through Eker's rare combination of street smarts, humor, and heart, you will learn how your childhood influences have shaped your financial destiny. You will also learn how to identify your own money blueprint and "revise" it to not only create success but, more important, to keep and continually grow it. In Part II you will be introduced to seventeen "Wealth Files," which describe exactly how rich people think and act differently than most poor and middle-class people. Each Wealth File includes action steps for you to practice in the real world in order to dramatically increase your income and accumulate wealth. If you are not doing as well financially as you would like, you will have to change your money blueprint. Unfortunately your current money blueprint will tend to stay with you for the rest of your life, unless you identify and revise it, and that's exactly what you will do with the help of this extraordinary book. According to T. Harv Eker, it's simple. If you think like rich people think and do what rich people do, chances are you'll get rich too!

Lagoa Santa Karst: Brazil's Iconic Karst Region Augusto S. Auler 2020-01-22 This book discusses the Lagoa Santa Karst, which has been internationally known since the pioneering studies of the Danish naturalist Peter Lund in the early 1800s. It covers the speleogenesis, geology, vegetation, fauna, hydrogeology, geomorphology, and anthropogenic use of the Lagoa Santa Karst and is the first English-language book on this major karst area. The area, which has been at the heart of the debate on the origin and age of human colonization in the Americas, is characterized by a classical and scenic karst landscape with limestone cliffs, karst lakes and karst plains, in addition to numerous solution dolines. More than 1,000 caves have been documented in the area, many with significant archeological and paleontological value. Despite its great importance, the Lagoa Santa Karst faces severe environmental threats due to limestone mining and the expansion of the metropolis of Belo Horizonte and its surrounding towns. The growing recognition of the area's remarkable significance has led to increasing concern, and a number of protected areas have now been established, improving the conservation status of this landmark karst area.

Barren Lives Graciliano Ramos 2011-05-18 A peasant family, driven by the drought, walks to exhaustion through an arid land. As they shelter at a deserted ranch, the drought is broken and they linger, tending cattle for the absentee ranch owner, until the onset of another drought forces them to move on, homeless wanderers again. Yet, like the desert plants that defeat all rigors of wind and weather, the family maintains its will to survive in the harsh and solitary land. Intimately acquainted with the region of which he writes and keenly appreciative of the character of its inhabitants, into whose minds he has penetrated as few before him, Graciliano Ramos depicts them in a

style whose austerity well becomes the spareness of the subject, creating a gallery of figures that rank as classic in contemporary Brazilian literature.

700 Conscientiology Experiments Waldo Vieira 2018-08-22 A reference work on conscientiology, this treatise, with more than 5,000 entries in the bibliography, first published in Portuguese in 1994, presents the reader with the bases of the neoscience conscientiology. The author proposes 300 tests for self-application, dealing with topics of great relevance such as assistance, the theory of thosene (thought, sentiment and energy), and the theories of inversion and existential recycling, among others. The work presents conscientiology as the science applied to the study of consciousness (ego, personality) in an integral approach, with all its vehicles of manifestation (bodies), previous existences and attributes. The content being deepened and presented in a theoretical and practical way, so a reader understands the importance of this knowledge to their life. The science of conscientiology utilizes the best of the main lines of human knowledge: common sense, religion, philosophy, political ideology and conventional science; and is based on multidimensional self-experience, having consciousness as both the instrument and object of research.
