Exile and Return Jonathan Stökl 2015-08-31 Many books of the Hebrew Bible were either composed in some form or edited during the Exilic and post-Exilic periods among a community that was to identify itself as returning from Babylonian captivity. At the same time, a dearth of contemporary written evidence from Judah/Yehud and its environs renders any particular understanding of the process within its social, cultural and political context virtually impossible. This has led some to label the period a dark age or black box – as obscure as it is essential for understanding the history of Judaism. In recent years, however, archaeologists and historians have stepped up their effort to look for and study material remains from the period and integrate the local history of Yehud, the return from Exile, and the restoration of Jerusalem’s temple more firmly within the regional, and indeed global, developments of the time. At the same time, Assyriologists have also been introducing a wide range of cuneiform material that illuminates the economy, literary traditions, practices of literacy and the ideologies of the Babylonian host society – factors that affected those taken into Exile in variable, changing and multiple ways. This volume of essays seeks to exploit these various advances.

Jikoni Ravinder Bhogal 2020-07-09 Jikoni means 'kitchen' in Kiswahili, a word that perfectly captures Ravinder Bhogal's approach to food. Ravinder was born in Kenya to Indian parents; when she moved to London as a child, the cooking of her new home collided with a heritage that crossed continents. What materialised was a playful approach to the world's larder, and Ravinder's recipes do indeed have a rebellious soul. They are lawless concoctions that draw their influences from one tradition and then another – Cauliflower Popcorn with Black Vinegar Dipping Sauce; Spicy Aubergine Salad with Peanuts, Herbs and Jaggery Fox Nuts; Skate with Lime Pickle Brown Butter; Tempura Samphire and Nori; Lamb and Aubergine Fatteh; or utterly irresistible Banana Cake accompanied by Miso Butterscotch and Ovaltine Kulfi. These proudly inauthentic recipes are what you might loosely call 'immigrant cuisine', with evocative stories from a past that illustrates the powerful relationship between food, people, place and identity. The tastes and smells of this brazen new world are sophisticated, welcoming, fresh, exciting and bold.

Apocalypticism and Mysticism in Ancient Judaism and Early Christianity John J. Collins 2018-09-24 The nature and origin of Jewish mysticism is a controversial subject. This volume explores the subject by examining both the Hebrew and Aramaic tradition (Dead Sea Scrolls, 1 Enoch) and the Greek philosophical tradition (Philo) and also examines the Christian transformation of Jewish mysticism in Paul and Revelation. It provides for a nuanced treatment that differentiates different strands of thought that may

be considered mystical. The Hebrew tradition is mythical in nature and concerned with various ways of being in the presence of God. The Greek tradition allows for a greater degree of unification and participation in the divine. The New Testament texts are generally closer to the Greek tradition, although Greek philosophy would have a huge effect on later Christian mysticism. The book is intended for scholars and advanced students of ancient Judaism and early Christianity.

The Concept of Argument Harald R. Wohlrapp 2014-06-26 Arguing that our attachment to Aristotelian modes of discourse makes a revision of their conceptual foundations long overdue, the author proposes the consideration of unacknowledged factors that play a central role in argument itself. These are in particular the subjective imprint and the dynamics of argumentation. Their inclusion in a four-dimensional framework (subjective-objective, structural-procedural) and the focus on thesis validity allow for a more realistic view of our discourse practice. Exhaustive analyses of fascinating historical and contemporary arguments are provided. These range from Columbus's advocacy of the Western Passage to India, over the trial of King Louis XVI during the French Revolution, to today's highly charged controversies surrounding euthanasia and embryo research. Excavating foundational issues such as the purpose of argument itself (assent of an audience or critical examination of validity claims) and the contested role of argument as a generator of knowledge, the book culminates in a discussion of the relationship between rationality and reasonableness and criticizes the restrictions of 'rational' argument relying on fixed logical, economic or cultural criteria that in reality are mutable. Here, a true, open argument requires the infusion of Paul Lorenzen's principle of 'transsubjectivity', which recognizes but transcends the partiality of the individual and which can be seen in the pragmatic and expanding consensus that humanity can control itself to safeguard the future of a fragile, damaged world.

A Small Part Of History Peggy Elliott 2008-09-04 *A SMALL PART OF HISTORY* tells the story of one of the most epic journeys the settlers of America ever made, and finally does so from a woman's perspective. Remarkable. Inspiring. Heartbreaking. In the summer of 1845 Rebecca Springer and her family join the Oregon wagon train in search of land thousands of miles away. It's a hard and dangerous journey through blizzards and searing heat, over prairies, desert plains and mountains and, at times, it seems as if it will never end. But an unbreakable bond develops amongst the travelling women as they are tested, physically and emotionally, and their shared experiences of new life and tragic death will bring them closer than blood ever could. How the west was won and the terrible price that was paid. *A Small Part of History* is an epic, heartfelt story of courage in the face of appalling adversity, and a haunting

portrayal of how America was forged. Above all, it is a story of people and how the ties that bind us most strongly are those of friendship, of family and of love.

Cooking Light Soups & Stews Cooking Light 2021-09-03 There's something about piping hot soup ladled into a bowl that signifies total comfort. Maybe it's the aroma of a rich stew simmering on the stovetop or the pleasure of spooning into a velvety cream soup. Because slow cookers and multicookers continue to be popular with soup lovers, over half of these recipes can be prepared in one of those convenient appliances, and those recipes are flagged throughout the book. And as always with Cooking Light, comfort doesn't mean excessive calories or fat—only simple satisfaction.

Returning to Reims Didier Eribon 2018-06-07 'A deeply intelligent and searching book, one that makes you re-consider the narrative of your own life and reframe the story you tell yourself' Hilary Mantel "There was a question that had come to trouble me a bit earlier, once I had taken the first steps on this return journey to Reims... Why, when I have had such an intense experience of forms of shame related to class ... why had it never occurred to me to take up this problem in a book?" Returning to Reims is a breathtaking memoir of return, a family story of class, sexuality, gender and of the shifting political allegiances of the French working classes. A phenomenon in France and a huge bestseller in Germany, Didier Eribon has written the defining memoir of our times.

Hegel's Naturalism Terry Pinkard 2013-11 Terry Pinkard draws on Hegel's central works as well as his lectures on aesthetics, the history of philosophy, and the philosophy of history in this deeply informed and original exploration of Hegel's naturalism. As Pinkard explains, Hegel's version of naturalism was in fact drawn from Aristotelian naturalism: Hegel fused Aristotle's conception of nature with his insistence that the origin and development of philosophy has empirical physics as its presupposition. As a result, Hegel found that, although modern nature must be understood as a whole to be non-purposive, there is nonetheless a place for Aristotelian purposiveness within such nature. Such a naturalism provides the framework for explaining how we are both natural organisms and also practically minded (self-determining, rationally responsive, reason-giving) beings. In arguing for this point, Hegel shows that the kind of self-division which is characteristic of human agency also provides human agents with an updated version of an Aristotelian final end of life. Pinkard treats this conception of the final end of "being at one with oneself" in two parts. The first part focuses on Hegel's account of agency in naturalist terms and how it is that agency

requires such a self-division, while the second part explores how Hegel thinks a historical narration is essential for understanding what this kind of self-division has come to require of itself. In making his case, Hegel argues that both the antinomies of philosophical thought and the essential fragmentation of modern life are all not to be understood as overcome in a higher order unity in the "State." On the contrary, Hegel demonstrates that modern institutions do not resolve such tensions any more than a comprehensive philosophical account can resolve them theoretically. The job of modern practices and institutions (and at a reflective level the task of modern philosophy) is to help us understand and live with precisely the unresolvability of these oppositions. Therefore, Pinkard explains, Hegel is not the totality theorist he has been taken to be, nor is he an "identity thinker," à la Adorno. He is an anti-totality thinker.

Experiments in Ethics Kwame Anthony Appiah 2010-03-30 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He

traces an intellectual genealogy of the burgeoning discipline of “experimental philosophy,” provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.
