The Wine of Solitude Irene Nemirovsky 2014-12-17 Introspective and poignant, The Wine of Solitude is the most autobiographical of all of the novels from the celebrated author of Suite Française. Beginning in a fictionalized Kiev, The Wine of Solitude follows the Karol family through the Great War and the Russian Revolution, as the young Hélène grows from a dreamy, unhappy child into a strongwilled young woman. From the hot Kiev summers to the cruel winters of St Petersburg and eventually to springtime in Paris, the would-be writer Hélène blossoms, despite her mother's neglect, into a clear-eyed observer of the life around her. Here is a powerful tale of disillusionment – the story of an upbringing that produces a young woman as hard as a diamond, prepared to wreak a shattering revenge on her mother. Digital Darwinism Tom Goodwin 2018-04-03 Digital Darwinism takes a closer look at disruptive thinking to inspire those who want to be the best at digital transformation. Change across business is accelerating, but the lifespan of companies is decreasing as leaders face a growing abundance of decisions to make, data to process and technology that threatens even the most established business models. These forces could destroy your company or, with the right strategy in place, help you transform it into a market leader. Digital Darwinism lends a guiding hand through the turbulence, offering practical strategies while sounding a call to action that lights a fire underneath complacency to inspire creative change. Digital Darwinism shines a light on the future by exploring technology, society and lessons from the past so you can understand how to adapt, what to embrace and what to ignore. Tom Goodwin proves that assumptions the business world has previously made about "digital" are wrong: incremental change isn't good enough, adding technology at the edges won't work and digital isn't a thing - it's everything. If you want your organization to succeed in the post-digital age, you need to be enlightened by Digital Darwinism.

Choosing Futures Nicholas Foskett 2002-11-01 Education is becoming more competitive - choice in education is now a key issue. This book will help parents, schools, colleges, universities and policy makers understand how education and training markets work. *Choosing Futures* offers a wide ranging perspective on how young people, and their parents, make choices as they travel through a lifetime of education and training. The authors challenge traditional

views of how choices are made of primary school, secondary school, college, university and career, which assume that choices are rational and objective. Instead this book reveals how choices depend upon a range of factors: *young people's personal experiences *individual and family histories *perceptions of education and careers. The book compares choice for 5 to 11 year olds, and for 16 and 18 year olds; drawing out models of the decision making process, and at the same time the consequences on schools, colleges and individuals of 'enhanced choice'.

Mr Blue: Memoirs of a Renegade Edward Bunker 2012-07-27 Edward Bunker's life is beyond the imaginings of most fiction writers. He was born in Hollywood, California, the son of a stagehand and Busby Berkeley chorus girl, whose early divorce propelled him into a series of boarding homes and military schools. From the age of five he repeatedly ran away, roaming the city streets at night. A proud character, combined with an IQ of 152, resulted in a series of altercations with the authorities. He became the youngest ever inmate of San Quentin at the age of seventeen, and there he learned survival skills and faced down the toughest prisoners in the system. He was befriended by Mrs Louise Wallis, a former star of the silent screen and wife of movie mogul, Hal Wallis, who produced films starring Bogart, Cagney, Edward G. Robinson and George Raft. She introduced Bunker to her circle of friends, including Jack Dempsey, Tennessee Williams, Aldous Huxley and William Randolph Hearst, whose guest he was at San Simeon. A parole violation resulted in a spell crossing America as a fugitive on the FBI's most wanted list. His eventual capture led to Folsom prison. Encouraged by the example of Dostoevsky, Cervantes and Caryl Chessman, and by the kindness of Mrs Wallis, he determined to write his way out of prison. Bunker's first published novel, *No Beast So Fierce*, viewed by many including Quentin Tarantino as the finest crime novel ever written, changed his fortunes. It was filmed as *Straight Time*, starring Dustin Hoffman. He has written three other novels, *The Animal Factory*, *Little Boy Blue* and *Dog Eat Dog*, (all published by No Exit) admired by writers as diverse as William Styron and James Ellroy. He received an Oscar nomination for the screenplay of *Runaway Train*, and has appeared in a score of films, most notably his legendary role as Mr Blue in *Reservoir Dogs*. This blistering narrative is a memoir like no other.

Lady Susan Jane Austen 2016-02-20 A Unique Female Character Blinded By Wealth "My dear Alicia, of what a mistake were you guilty in marrying a man of his age! Just old enough to be formal, ungovernable, and to have the gout; too old to be agreeable, too young to die." - Jane Austen, *Lady Susan* Lady Susan is a widowed woman who seeks her one true love: wealth. She wants the best possible suitor not only for her but also for her untamed teenage daughter. To fulfill her quest, using her intelligence, she tries to seduce every worthy man, no matter the consequences. How will she end up? A Fine Dark Line Joe R. Lansdale 2011-07-28 During a sweltering East Texas summer, 13-year-old Stanley Mitchel Jr. begins a journey of awakening. His family runs the town's drive-in movie theater, where Stanley spends his time helping out, reading ten-cent comics, playing with his dog Nub and generally living a boy's life, circa 1958. When Stanley discovers a cache of old love-letters and starts to unravel a local mystery, however, he finds himself confronting secrets of ghosts, women, sex, race and his own courage. As he tells it, "I felt as if something living inside of me had been stolen, taken away and mistreated, then returned without all of its legs." Ultimately, it's a story about taking a clear-eyed look behind the veil and acknowledging the

truth of things, without succumbing to them.

The Stupidity Paradox Mats Alvesson 2016-06-02 Functional stupidity can be catastrophic. It can cause organisational collapse, financial meltdown and technical disaster. And there are countless, more everyday examples of organisations accepting the dubious, the absurd and the downright idiotic, from unsustainable management fads to the cult of leadership or an over-reliance on brand and image. And yet a dose of stupidity can be useful and produce good, short-term results: it can nurture harmony, encourage people to get on with the job and drive success. This is the stupidity paradox. The Stupidity Paradox tackles head-on the pros and cons of functional stupidity. You'll discover what makes a workplace mindless, why being stupid might be a good thing in the short term but a disaster in the longer term, and how to make your workplace a little less stupid by challenging thoughtless conformity. It shows how harmony and action in the workplace can be balanced with a culture of questioning and challenge. The book is a wake-up call for smart organisations and smarter people. It encourages us to use our intelligence fully for the sake of personal satisfaction, organisational success and the flourishing of society as a whole.

Making Democracy Work Robert D. Putnam 1994-05-27 Why do some democratic governments succeed and others fail? In a book that has received attention from policymakers and civic activists in America and around the world, Robert Putnam and his collaborators offer empirical evidence for the importance of "civic community" in developing successful institutions. Their focus is on a unique experiment begun in 1970 when Italy created new governments for each of its regions. After spending two decades analyzing the efficacy of these governments in such fields as agriculture, housing, and health services, they reveal patterns of associationism, trust, and cooperation that facilitate good governance and economic prosperity.

Back to Blackbrick Sarah Moore Fitzgerald 2013-09-03 Cosmo must journey to the past to understand his future in this humorous, heartbreaking, and brilliantly original debut novel. Cosmo's granddad used to be the cleverest person he ever knew. That is, until his granddad's mind began to fail. In a rare moment of clarity, his granddad gives Cosmo a key and pleads with Cosmo to go to the South Gates of Blackbrick Abbey, where his granddad promises an "answer to everything." In the dead of night, Cosmo does just that. When Cosmo unlocks the rusty old gates, he is whisked back to Blackbrick of years past, along with his granddad—now just sixteen-years old and sharp as a tack—beautiful Maggie, and the absolutely dreadful Corporamore family. But much more than time travel adventure awaits Cosmo on the old, sprawling estate: he'll also discover revealing truths about his granddad, his family, and himself. Abounding with humor and heart, this extraordinary novel is an original, unforgettable story about lost memories, lost times, and lost lives, reclaimed.

Virtual Art Oliver Grau 2004-09-17 An overview of the art historical antecedents to virtual reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a

totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the phenomenon of virtual reality beyond the hype. Grau shows how each epoch used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near Primaporta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 The Battle of Sedan, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies, Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe, Paul Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

A Computational Approach to Statistical Arguments in Ecology and Evolution

George F. Estabrook 2011-09-29 Scientists need statistics. Increasingly this is accomplished using computational approaches. Freeing readers from the constraints, mysterious formulas and sophisticated mathematics of classical statistics, this book is ideal for researchers who want to take control of their own statistical arguments. It demonstrates how to use spreadsheet macros to calculate the probability distribution predicted for any statistic by any hypothesis. This enables readers to use anything that can be calculated (or observed) from their data as a test statistic and hypothesize any probabilistic mechanism that can generate data sets similar in structure to the one observed. A wide range of natural examples drawn from ecology, evolution, anthropology, palaeontology and related fields give valuable insights into the application of the described techniques, while complete example macros and useful procedures demonstrate the methods in action and provide starting points for readers to use or modify in their own research.

Networked Lee Rainie 2014-02-14 How social networks, the personalized Internet, and always-on mobile connectivity are transforming—and expanding—social life. Daily life is connected life, its rhythms driven by endless email pings and

responses, the chimes and beeps of continually arriving text messages, tweets and retweets, Facebook updates, pictures and videos to post and discuss. Our perpetual connectedness gives us endless opportunities to be part of the give-and-take of networking. Some worry that this new environment makes us isolated and lonely. But in *Networked*, Lee Rainie and Barry Wellman show how the large, loosely knit social circles of networked individuals expand opportunities for learning, problem solving, decision making, and personal interaction. The new social operating system of “networked individualism” liberates us from the restrictions of tightly knit groups; it also requires us to develop networking skills and strategies, work on maintaining ties, and balance multiple overlapping networks. Rainie and Wellman outline the “triple revolution” that has brought on this transformation: the rise of social networking, the capacity of the Internet to empower individuals, and the always-on connectivity of mobile devices. Drawing on extensive evidence, they examine how the move to networked individualism has expanded personal relationships beyond households and neighborhoods; transformed work into less hierarchical, more team-driven enterprises; encouraged individuals to create and share content; and changed the way people obtain information. Rainie and Wellman guide us through the challenges and opportunities of living in the evolving world of networked individuals.

The Day After Roswell Philip Corso 2012-12-11 Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

Sustainable Development Report 2021 Jeffrey Sachs 2021-10-14 The Sustainable Development Report 2021 features the SDG Index and Dashboards, the first and widely used tool to assess country performance on the UN Agenda 2030 and the Sustainable Development Goals. The report analyses and outlines what needs to happen for the Decade of Action and Delivery of the SDGs. In order to build back better following the Covid-19 pandemic, especially low-income countries will need increased fiscal space. The report frames the implementation of the SDGs in terms of six broad transformations. The authors examine country performance on the SDGs for 193 countries using a wide array of indicators, and calculate future trajectories, presenting a number of best practices to achieve

the historic Agenda 2030. The views expressed in this report do not reflect the views of any organizations, agency or programme of the United Nations. This title is available as Open Access on Cambridge Core.

Collect the Wworld. the Artist As Archivist in the Internet Age Domenico Quaranta 2011-10 The last decade has seen an incredible growth in the production and distribution of images and other cultural artefacts. The internet is the place where all these cultural products are stored, classified, voted, collected and trashed. What is the impact of this process on art making and on the artist? Which kind of dialogue is going on between amateur practices and codified languages? How does art respond to the society of information? This is a book about endless archives, image collections, bees plundering from flower to flower and hunters crawling through the online wilderness. Alterazioni Video, Kari Altmann, Cory Arcangel, Gazira Babeli, Kevin Bewersdorf, Luca Bolognesi, Natalie Bookchin, Petra Cortright, Aleksandra Domanovic, Harm van den Dorpel, Constant Dullaart, Hans-Peter Feldmann, Elisa Giardina Papa, Travis Hallenbeck, Jodi, Oliver Laric, Olia Lialina & Dragan Espenshied, Guthrie Lonergan, Eva and Franco Mattes, Seth Price, Jon Rafman, Claudia Rossini, Evan Roth, Travess Smalley, Ryan Trecartin.

Baking With Kafka Tom Gauld 2021-05-04 A best-of collection of literary humour cartoons from the critically-acclaimed Guardian cartoonist In his inimitable style, British cartoonist Tom Gauld has opened comics to a crossover audience and challenged perceptions of what the medium can be. Noted as a "book-lover's cartoonist," Gauld's weekly strips in The Guardian, Britain's most well-regarded newspaper, stitch together the worlds of literary criticism and pop culture to create brilliantly executed, concise comics. Simultaneously silly and serious, Gauld adds an undeniable lightness to traditionally highbrow themes. From sarcastic panels about the health hazards of being a best-selling writer to a list of magical items for fantasy writers (such as the Amulet of Attraction, which summons mainstream acceptance, Hollywood money, and fresh coffee), Gauld's cartoons are timely and droll—his trademark British humour, impeccable timing, and distinctive visual style sets him apart from the rest. Lauded both for his frequent contributions to New Scientist, The Guardian and The New York Times, and his Eisner-nominated graphic novels, Tom Gauld is one of the most celebrated cartoonists working today. In Baking with Kafka, he

proves this with one witty, sly, ridiculous comic after another.

Schiaparelli & Prada Andrew Bolton 2012 "The Met's Spring 2012 Costume Institute exhibition, Schiaparelli and Prada: Impossible Conversations, explores the striking affinities between Elsa Schiaparelli and Miuccia Prada, two Italian designers from different eras. Inspired by Miguel Covarrubia's "Impossible Interviews" for Vanity Fair in the 1930s, the exhibition features orchestrated conversations between these iconic women to suggest new readings of their most innovative work. Iconic ensembles will be presented with videos of simulated conversations between Schiaparelli and Prada directed by Baz Luhrmann, focusing on how both women explore similar themes in their work through very different approaches"--Publisher's website.

Vaclav and Lena Haley Tanner 2011-05-17 Set in New York's Russian émigré community, Vaclav & Lena is a timeless love story from a stunningly gifted young novelist. Vaclav and Lena, both the children of Russian émigrés, are at the same time from radically different worlds. While Vaclav's burgeoning love of performing magic is indulged by hard-working parents pursuing the American dream, troubled orphan Lena is caught in a domestic situation no child should suffer through. Taken in as one of her own by Vaclav's big-hearted mother, Lena might finally be able to blossom; in the naive young magician's eyes, she is destined to be his "faithful assistant"...but after a horrific discovery, the two are ripped apart without even a goodbye. Years later, they meet again. But will their past once more conspire to keep them apart?

Visualising Facebook Daniel Miller 2017-03-07 Since the growth of social media, human communication has become much more visual. This book presents a scholarly analysis of the images people post on a regular basis to Facebook. By including hundreds of examples, readers can see for themselves the differences between postings from a village north of London, and those from a small town in Trinidad. Why do women respond so differently to becoming a mother in England from the way they do in Trinidad? How are values such as carnival and suburbia expressed visually? Based on an examination of over 20,000 images, the authors argue that phenomena such as selfies and memes must be analysed in their local context. The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations, and explores the changing role of photography from that of recording and representation, to that of communication, where an image not only documents an experience but also enhances it, making the moment itself more exciting.

Negotiating Our Way Up Collective Bargaining in a Changing World of Work OECD 2019-11-18 Collective bargaining and workers' voice are often discussed in the past rather than in the future tense, but can they play a role in the context of a rapidly changing world of work? This report provides a comprehensive

assessment of the functioning of collective bargaining systems and workers' voice arrangements across OECD countries, and new insights on their effect on labour market performance today.

Digital Anthropology Heather A. Horst 2013-08-01 Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life. Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.
