Narrative in English Conversation Christoph Rühlemann 2014-01-09 Storytelling is a fundamental mode of everyday interaction. This book is based upon the Narrative Corpus (NC), a specialized corpus of naturally occurring narratives, and provides new paths for its study. Christoph Rühlemann uses the NC's narrative-specific annotation and XPath and XQuery, query languages that allow the retrieval of complex data structures, to facilitate large-scale quantitative investigations into how narrators and recipients collaborate in storytelling. Empirical analyses are validated using R, a programming language and environment for statistical computing and graphics. Using this unique data and methodological base,

Rühlemann reveals new insights, including the discovery of turntaking patterns specific to narrative, the first investigation of textual colligation in spoken data, the unearthing of how speech reports, as discourse units, form striking patterns at utterance level, and the identification of the story climax as the sequential context in which recipient dialogue is preferentially positioned.

Literary Dollars and Social Sense Ronald J. Zboray 2013-10-08 Prior to the Civil War, publishing in America underwent a transformation from a genteel artisan trade supported by civic patronage and religious groups to a thriving, cut-throat national industry propelled by profit. *Literary Dollars and Social Sense* represents an important chapter in the historical experience of print culture, it illuminates the phenomenon of amateur writing and delineates the access points of the emerging mass market for print for distributors consumers and writers. It challenges the conventional assumptions that the literary public had little trouble embracing the new literary marketing that emerged at mid-century. The book uncover the tensions that author's faced between literature's role in the traditional moral economy and the lure of literary dollars for personal gain and fame. This book marks an important example in how scholars understand and conduct research in American literature.

The Empathy Diaries Sherry Turkle 2022-03-01 Winner of the 2021 National Jewish Book Award in Autobiography & Memoir! "A beautiful book... an instant classic of the genre." –Dwight Garner, New York Times • A New York Times Critics' Top Book of 2021 • A New York Times Book Review Editors' Choice • Named a Best Nonfiction Book of 2021 by Kirkus MIT psychologist and bestselling author of *Reclaiming Conversation* and *Alone Together*, Sherry Turkle's intimate memoir of love and work For decades, Sherry

Turkle has shown how we remake ourselves in the mirror of our machines. Here, she illuminates our present search for authentic connection in a time of uncharted challenges. Turkle has spent a career composing an intimate ethnography of our digital world; now, marked by insight, humility, and compassion, we have her own. In this vivid and poignant narrative, Turkle ties together her coming-of-age and her pathbreaking research on technology, empathy, and ethics. Growing up in postwar Brooklyn, Turkle searched for clues to her identity in a house filled with mysteries. She mastered the codes that governed her mother's secretive life. She learned never to ask about her absent scientist father--and never to use his name, her name. Before empathy became a way to find connection, it was her strategy for survival. Turkle's intellect and curiosity brought her to worlds on the threshold of change. She learned friendship at a Harvard-Radcliffe on the cusp of coeducation during the antiwar movement, she mourned the loss of her mother in Paris as students returned from the 1968 barricades, and she followed her ambition while fighting for her place as a woman and a humanist at MIT. There, Turkle found turbulent love and chronicled the wonders of the new computer culture, even as she warned of its threat to our most essential human connections. *The Empathy Diaries* captures all this in rich detail--and offers a master class in finding meaning through a life's work.

When Listeners Talk Rod Gardner 2001-01-01 Listeners are usually considered recipients in conversational interaction, whose main activity is to take in messages from other speakers. In this view, the listening activity is separate from speaking. Another view is that listeners and speakers are equal co-participants in conversations who construct the talk together. In support of this latter view, one finds a group of vocalisations which are quintessentially listener talk – little conversational objects such as uh-

huh, oh, mm, yeah, right and mm-hm. These utterances do not have meanings in a conventional dictionary sense, but are nevertheless loaded with complex and subtle information about the stance listeners take to what they are hearing, information that is gleaned not only from their phonetic form, but also from their complex prosodic shape and their placement and timing within the flow of talk. This book summarises eight of these objects, and explores one, mm, in depth.
