New Community Networks Douglas Schuler 1996 In an era of declining communities, grassroots activists all over the world are building community networks designed to reinvigorate communities by encouraging dialogue and providing a forum for voices that too often go unheard. Via new computer networking technology, new communities can now connect electronically to pursue activities such as community and public health projects, long-distance learning, performances, and "virtual spaces." *New Community Networks* is a unique contribution to the literature on social uses of technology. It provides practical how-to advice and discusses the rationale, concerns, and directions of socially-directed technology. This book should be read by government officials, librarians, policy analysts, educators, journalists, social service

administrators, students, social and political activists, and - in fact - by anyone concerned about our communities and the uses of technology in our society. Highlights: provides a helpful reference for people trying to develop and sustain their own community networks; details issues critical for the success of a community-based network; includes case studies from the Santa Monica PEN project, Community Memory in Berkeley, the Cleveland FreeNet, and the Big Sky Telegraph system in rural Montana; explains short- and long-term issues about community networks; and offers an extensive reference section and numerous appendices providing handy access to a plethora of information related to community networks.

Mandalas of the World Rudiger Dahlke 2004-09 Both beautiful and enlightening, these 100 mandalas are among the most significant in history, derived from nature and the world's great spiritual traditions. With each mandala comes detailed background information, as well as a suggested meditation to use as you color it in. The patterns provided for your brush or ink markers include the rose window from a Gothic cathedral in Switzerland; the tenth tarot card, known as the Wheel of Destiny; the symbol that stands for T'ai Chi; and dozens more. Over and over again, through the mere act of looking and drawing, the magical circles and gorgeous designs will provide spiritual sustenance and pleasure.

Postwar Europe and the Eurovision Song Contest Dean Vuletic 2018-01-25 Postwar Europe and the Eurovision Song Contest examines how the Eurovision Song Contest has reflected and become intertwined with the history of postwar Europe from a political perspective. Established in 1956, the Eurovision Song Contest is the world's largest popular music event and one of the most popular television programmes in Europe, currently attracting a global audience of around 200 million people. Eurovision is often mocked as cultural kitsch because of its over-the-top performances and frivolous song lyrics. Yet there is no cultural medium that connects Europeans more than popular music, the development of which has always been tied to cultural, economic, political, social and technological change – making Eurovision the ideal tool to explain the history of Europe in the last sixty years. This book uses Eurovision as a vehicle to address topics ranging from the Cold War, liberal democracy and communism to nationalism, European integration, economic prosperity and human rights. It analyses these subjects through their cultural, political and social relationships with Eurovision entries as expressed through lyrics and music, as well as by examining public debates that have accompanied the selection of the entries and the organisation of the contest itself. Postwar Europe and the Eurovision Song Contest also considers how states have used Eurovision to define their identities in a European context, be it to assert their national distinctiveness, highlight political issues or affirm their Europeanism or Euroscepticism in the context of European integration. Based on original sources, including hitherto unpublished archival documents from international broadcasting organisations, this is a novel historical study of interest to anyone keen to know more about the postwar history of Europe and its cultural history in particular.

Key Concepts in Ethnography Karen O'Reilly 2008-11-13 "An accessible and entertaining read, useful to anybody interested in the ethnographic method." - Paul Miller, University of Cumbria "A very good introduction to ethnographic research, particularly useful for first time researchers." - Heather Macdonald, Chester University "The perfect introductory guide for students embarking on qualitative research for the first time... This should be of aid to the ethnographic novice in their navigating what is a theoretically complex and changing methodological field." - Patrick Turner, London Metropolitan University An accessible, authoritative, non-nonsense guide to the key concepts in one of the most widely used methodologies in social science: Ethnography, this book: Explores and summarises the basic and related issues in ethnography that are covered nowhere else in a single text. Examines key topics like sampling, generalising, participant observation and rapport, as well as embracing new fields such as virtual, visual and multi-sited ethnography and issues such as reflexivity, writing and ethics. Presents each concept comprehensively yet critically, alongside relevant examples. This is not quite an encyclopaedia but far more than a dictionary. It is comprehensive yet brief. It is small and neat, easy to hold and flick through. It is what students and researchers have been waiting for.

Island Summers Tilly Culme-Seymour 2013-07-04 'My grandmother bought the island. The year was 1947 and she was thirty-three, a couple of years older than I am now. She was the visionary sort of person who can make something magical out of very little.' From the moment that Tilly's grandmother, Mor-mor, set eyes on the rocky outline of Småøyhølmene, it captured her imagination. Legend has it that she bought the island in exchange for a mink coat. Every summer from then on, she and her young family would escape from their life in the English countryside to its rugged outcrops and sparkling waters. Mor-mor loved Småøyhølmene fiercely. Lean and chic, she smoked voraciously and would scandalise the local islanders by roaming around naked, flanked by her standard black poodle, Cheri. Her children spent their days running wild, thieving for gull eggs, rowing on the lagoon, and foraging for island raspberries, which Mor-mor would sandwich together with whipped cream to make into a sukkerkake. Thirty-five years later, Tilly spent her first summer on Småøyhølmene. Her Mamma kept up the rituals that she herself had learnt from Mor-mor, and Tilly discovered in the island a living link between her family's past and its present. Glittering and bittersweet, this is the captivating story of the women who made Småøyhølmene their own: a land of childhood adventures, of magical summers, and of Tilly's first romance.

Hidden: Animals in the Anthropocene Jo-Anne McArthur 2020-11-17 A collection of stunning images from some of the world's leading photographers of animals in the human environment. HIDDEN: Animals in the Anthropocene is an unflinching book of photography about our conflict with non-human animals around the globe. Through the lenses of thirty award-winning photojournalists, HIDDEN shines a light on the invisible animals in our lives: those with whom we have a close relationship and yet fail to see. The animals we eat and wear; the animals we use for research, work, and for entertainment; the animals we sacrifice in the name of tradition and religion. HIDDEN is a historical document, a memorial, and an indictment of what is and should never again be. Showcased by award-winning designer David Griffin, HIDDEN represents the work of thirty photojournalists who have documented--and continue to document--animal stories. Their exhaustive and in-depth work has resulted in some of the most compelling and historic images of animals ever seen. Among them are (in alphabetical order): Aaron Gekoski, Aitor Garmendia, Amy Jones, Andrew Skowron, Britta Jaschinski, Daniel Beltrá, Djurattsalliansen, Francesco Pistilli, Jan van Ijken, Joan de la Malla, Jo-Anne McArthur, Jose Valle, Kelly Guerin, Kristo Muurimaa, Konrad Lozinski, Louise Jorgensen, Luis Tato, Murdo MacLeod, Paul Hilton, Sabine Grootendorst, Selene Magnolia, Stefano Belacchi, Tamara

Kenneally, and Timo Stammberger. "The photojournalists featured in Hidden have entered some of the darkest, most unsettling places in the world. The images they have captured are a searing reminder of our unpardonable behavior towards animals and will serve as beacons of change for years to come."--Joaquin Phoenix, actor "I am, quite simply, in awe of these photographers. In a way, they are like war photographers, except witness to a war that so many people choose to suppress that exists. This takes enormous inner strength and bloody-minded determination, because they cannot save any of the animals that they photograph; they can only hope that their photos will help illuminate the mass extermination that unfolds every second of every day across the planet. To me, they are heroes. Not just for one day, but over and over and over again."--Nick Brandt, photographer

How to Simplify Your Life Werner Tiki Kustermacher 2004-03-23 Practical wisdom on work, money, health, and relationships The international bestseller How to Simplify Your Life offers concrete advice on achieving happiness in a time of economic contraction and uncertainty. Philosophy and the Climate Crisis Byron Williston 2020-10-12 This book explores how the history of philosophy can orient us to the new reality brought on by the climate crisis. If we understand the climate crisis as a deeply existential one, it can help to examine the way past philosophers responded to similar crises in their times. This book explores five past crises, each involving a unique form of collective trauma. These events--war, occupation, exile, scientific revolution and political revolution--inspired the philosophers to remake the whole world in thought, to construct a metaphysics. Williston distills a key intellectual innovation from each metaphysical system: • That political power must be constrained by knowledge of the climate system (Plato) • That ethical and political reasoning must be informed by care or love of the ecological whole (Augustine) • That we must enhance the design of the technosphere (Descartes) • That we must conceive the Earth as an internally complex system (Spinoza) • And that we must grant rights to anyone or anything--ultimately the Earth system itself--whose vital interests are threatened by the effects of climate change (Hegel). Philosophy and the Climate Crisis will be of great interest to students and scholars of climate change,

environmental philosophy and ethics and the environmental humanities.

Solve for Happy Mo Gawdat 2017-03-21 In this “powerful personal story woven with a rich analysis of what we all seek” (Sergey Brin, cofounder of Google), Mo Gawdat, Chief Business Officer at Google’s [X], applies his superior logic and problem solving skills to understand how the brain processes joy and sadness—and then he solves for happy. In 2001 Mo Gawdat realized that despite his incredible success, he was desperately unhappy. A lifelong learner, he attacked the problem as an engineer would: examining all the provable facts and scrupulously applying logic. Eventually, his countless hours of research and science proved successful, and he discovered the equation for permanent happiness. Thirteen years later, Mo’s algorithm would be put to the ultimate test. After the sudden death of his son, Ali, Mo and his family turned to his equation—and it saved them from despair. In dealing with the horrible loss, Mo found his mission: he would pull off the type of “moonshot” goal that he and his colleagues were always aiming for—he would share his equation with the world and help as many people as possible become happier. In *Solve for Happy* Mo questions some of the most fundamental aspects of our existence, shares the underlying reasons for suffering, and plots out a step-by-step process for achieving lifelong happiness and enduring contentment. He shows us how to view life through a clear lens, teaching us how to dispel the illusions that cloud our thinking; overcome the brain’s blind spots; and embrace five ultimate truths. No matter what obstacles we face, what burdens we bear, what trials we’ve experienced, we can all be content with our present situation and optimistic about the future.

Ecstasy Ulrike Groos 2018-09-26 This book traces the phenomenon of ecstasy in art and cultural history. Accompanying an exhibition at the Kunstmuseum Stuttgart and Zentrum Paul Klee, this book illuminates the various spiritual, political, psychological, social, sexual, and aesthetic implications of euphoric and intoxicated states between asceticism and excess. Artworks from antiquity to the present time show the various facets of mind-altering states while taking different cultural regions into consideration. Each of the ten chapters focuses on a different aspect of the ecstatic state and the shifting social significance of ecstasy over the centuries, exploring how different cultures address and express ecstasy. Encompassing everything from classical sculpture and religious painting to 21st-century photography and collage, this

book features splendid reproductions of works by artists such as Marina Abramović, Gian Lorenzo Bernini, Louise Bourgeois, Günter Brus, Lovis Corinth, Rineke Dijkstra, Marlene Dumas, Ayrson Heráclito, Carsten Höller, Ernst Ludwig Kirchner, Pablo Picasso, Aura Rosenberg, Andy Warhol, and Francisco de Zurbarán.

Sit Down and Shut Up Brad Warner 2010-10-05 In 2003, Brad Warner blew the top off the Buddhist book world with his irreverent autobiography/manifesto, *Hardcore Zen: Punk Rock, Monster Movies, and the Truth about Reality*. Now in his second book, *Sit Down and Shut Up*, Brad tackles one of the great works of Zen literature, the *Shobogenzo*, by thirteenth-century Zen master Dogen. Illuminating Dogen's enigmatic teachings in plain language, Brad intertwines musings on sex, meditation, death, God, sin, and happiness with an exploration of the punk rock ethos. In chapters such as "Evil Is Stupid," "Kill Your Anger," and "Enlightenment Is for Sissies," Brad melds the antiauthoritarianism of punk with that of Zen, mixing in a travelogue of his triumphant return to Ohio to play in a reunion concert of Akron punk bands. For those drawn to Buddhist teachings but scared off by their stiff austerity, Brad writes with a sharp smack of truth, in teachings and stories that cut to the heart of reality.

Animal Beauty Christiane Nüsslein-Volhard 2019-05-14 An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a "sexual selection" distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.
