Politics of Transport in Twentieth-Century France Joseph Jones 1984-07-01 Joseph Jones's study focuses on the period since World War I. In these years the stability of the transport world was shaken by the effect of automobile competition upon the railways' near monopoly. A republican tradition based on fear of monopoly and protection of local facilities had emerged in the era when rail was king. In the 1930s and 1940s transport policy became a tug of war between supporters of this tradition and those who felt that a new approach was needed to cope with competition, economic depression, and war. Legislative proposals led to heated discussion as railway companies, car manufacturers, truckers, oil companies, small business, local authorities, and trade unions fought to defend their interests. Dr Jones's study of these conflicts, based upon extensive archival research, illustrates the tension between state planning economic liberalism which has been the central issue in economic policy in twentieth-century France.

A French Song Companion Graham Johnson 2002 A French Song Companion is an indispensable guide to the modern repertoire and the most comprehensive book of French mélodie in any language. Noted accompanist Graham Johnson provides repertoire guides to the work of over 150 composers--the majority of them from France but including British, American, German, Spanish, and Italian musicians who have written French vocal music. The book contains major articles on Fauré, Duparc, Debussy, Ravel, and Poulenc, as well as essays on Bizet, Chabrier, Gounod, Chausson, Hahn, and Satie, and important reassessments of such composers as Massenet, Koechlin, and Leguerney. The book combines these articles with the complete texts in English of over 700 songs, all translated by Richard Stokes, making it also a treasury of French poetry from the fifteenth through the twentieth centuries. The translations alone will prove invaluable to music lovers and performers; combined with the biographical articles, they become the ideal map for exploring this exciting and diverse repertoire.

Immersive Theater and Activism Nandita Dinesh 2018-11-30 Immersive theater calls upon audience members to become participants, actors and "others." It traditionally offers binary roles--that of oppressor or that of victim--and thereby stands the risk of simplifying complex social situations. Challenging such binaries, this book articulates theatrical "grey zones" when addressing juvenile detention, wartime interventions and immigration processes. It

presents scripts and strategies for directors and playwrights who want to create theatrical environments that are immersive and pedagogical; aesthetically evocative and politically provocative; simple and complex.

The Great Train Race Allan Mitchell 2000 From their origins, railways produced an intense competition between the two major continental systems in France and Germany. Fitting a new technology into existing political institutions and social habits, these two nations became inexorably involved in industrial and commercial rivalry that eventually escalated into the armed conflict of 1914. Based on many years of research in French and German archives, this study examines the adaptation of railroads and steam engines from Britain to the continent of Europe after the Napoleonic age. A fascinating example of how the same technology, borrowed at the same time from the same source, was assimilated differently by the two continental powers, this book offers a groundbreaking analysis of the crossroads of technology and politics during the first Industrial Revolution.

Handbook of Transportation Policy and Administration Jeremy Plant 2007-02-22 In the past few decades, the field of transportation has changed dramatically. Deregulation and greater reliance on markets and the private sector has helped to reconfigure the transport industries, while the rise of intermodal goods and global commerce has produced efficiencies of operation and a greater interdependence among transport modes. Freedom's Moment Paul M. Cohen 2007-12-01 What kind of freedom, and what kind of individual, has the French Revolutionary tradition sought to propagate? Paul Cohen finds a distinctly French articulation of freedom in the texts and lives of eight renowned cultural critics who lived between the eighteenth century and the present day. Arranged not according to the lives and times of its protagonists but to the narrative themes and structures they held in common, Cohen's study discerns a single master narrative of liberty in modern France. He captures these radicals, whose tradition bids them to resist the authority of power structures and public opinion. They denounce bourgeois and utilitarian values, the power of Church and State, and the corrupting influence of everyday politics, and they dream of a revolutionary rupture, a fleeting instant of sometimes violent but always meaningful transgression. An eloquent and insightful work on French political culture, *Freedom's Moment* also helps explain how France, even as it has oscillated between political stagnation and crisis, has held onto its faith that liberty, equality, and fraternity remain within its grasp. Examines the ideas of Rousseau, Robespierre, Stendahl,

Michelet, Bergson, Peguy, Sartre, and Foucault.
