The impact of disasters and crises on agriculture and food security: 2021 Food and Agriculture Organization of the United Nations 2021-03-17 On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic. Agriculture underpins the livelihoods of over 2.5 billion people – most of them in low-income developing countries – and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their growing frequency and intensity, along with the systemic nature of risk, are upending people's lives, devastating livelihoods, and jeopardizing our entire food system. This report makes a powerful case for investing in resilience and disaster risk reduction – especially data gathering and analysis for evidence informed action – to ensure agriculture's crucial role in achieving the future we want.

The Plague Year Lawrence Wright 2021-06-08 From the Pulitzer Prize-winning author of *The Looming Tower*, and the pandemic novel *The End of October*: an unprecedented, momentous account of Covid-19—its origins, its wide-ranging repercussions, and the ongoing global fight to contain it "A book of panoramic breadth ... managing to surprise us about even those episodes we ... thought we knew well ... [With] lively exchanges about spike proteins and nonpharmaceutical interventions and disease waves, Wright's storytelling dexterity makes all this come alive." —The New York Times Book Review From the fateful first moments of the outbreak in China to the storming of the U.S. Capitol to the extraordinary vaccine rollout, Lawrence Wright's *The Plague Year* tells the story of Covid-19 in authoritative, galvanizing detail and with the full drama of events on both a global and intimate scale, illuminating the medical, economic, political, and social ramifications of the pandemic. Wright takes us inside the CDC, where a first round of faulty test kits lost America precious time . . . inside the halls of the White House, where Deputy National Security Adviser Matthew Pottinger's early alarm about the virus was met with confounding and drastically costly skepticism . . . into a Covid ward in a Charlottesville hospital, with an idealistic young woman doctor from the town of Little Africa, South Carolina . . . into the precincts of prediction specialists at Goldman Sachs . . . into Broadway's darkened theaters and Austin's struggling music venues . . . inside the human body, diving deep into the science of how the virus and vaccines function—with an eye-opening detour into the history of vaccination and of the modern anti-vaccination movement. And in this full accounting, Wright makes clear that the medical professionals around the country who've risked their lives to fight the virus reveal and embody an America in all its vulnerability, courage, and potential. In turns steely-eyed, sympathetic, infuriated, unexpectedly comical, and always precise, Lawrence Wright is a formidable guide, slicing through the dense fog of misinformation to give us a 360-degree portrait of the catastrophe we thought we knew.

Tools of Engagement Tessa Bailey 2020-09-22 In Tessa Bailey's latest rom-com, two enemies team up to flip a house... and the sparks between them might burn the place down or ignite a passion that neither can ignore! Hair, makeup, clothing, decor... everything in Bethany Castle's world is organized, planned, and styled to perfection. Which is why the homes she designs for her family's real estate business are the most coveted in town. The only thing not perfect? Her track record with men. She's on a dating hiatus and after helping her friends achieve their dreams, Bethany finally has time to focus on her own: flip a house, from framework to furnishings, all by herself. Except her older brother runs the company and refuses to take her seriously. When a television producer gets wind of the Castle sibling rivalry, they're invited on Flip Off, a competition to see who can do the best renovation. Bethany wants bragging rights, but she needs a crew and the only member of her brother's construction team willing to jump ship is Wes Daniels, the new guy in town. His Texas drawl and handsome face got under Bethany's skin on day one, and the last thing she needs is some cocky young cowboy in her way. As the race to renovate heats up, Wes and Bethany are forced into close quarters, trading barbs and biting banter as they remodel the ugliest house on the block. It's a labor of love, hate, and everything in between, and soon sparks are flying. But Bethany's perfectly structured life is one kiss away from going up in smoke and she knows falling for a guy like Wes would be a flipping disaster. Darcy begs Elle to play along and she agrees to pretend they're dating. Shaping Neighbourhoods Hugh Barton 2021-06-29 Shaping Neighbourhoods is unique in combining all aspects of the spatial planning of neighbourhoods and towns whilst emphasising positive outcomes for people's health and global sustainability. This new edition retains the combination of radicalism, evidence-based advice and pragmatism that made earlier editions so popular. This updated edition strengthens guidance in relation to climate change and biodiversity, tackling crises of population health that are pushing up health-care budgets, but have elements of their origins in poor place spatial planning – such as isolation, lack of everyday physical activity, and respiratory problems. - Understanding the principles for planning healthy and sustainable neighbourhoods and towns
- Planning collaborative and inclusive processes for multi-sectoral working
- Developing know-how and skills in matching local need with urban form
- Discovering new ways to integrate development with natural systems
- Designing places with character and recognising good urban form

Whether you are a student faced with a local planning project; a public health professional, planner, urban designer or developer involved in new development or regeneration; a council concerned with promoting healthy and sustainable environments; or a community group wanting to improve your neighbourhood – you will find help here.

Doughnut Economics Kate Raworth 2017-02-23 A Financial Times "Best Book of 2017: Economics" 800-CEO-Read "Best Business Book of 2017: Current Events & Public Affairs" Economics is the mother tongue of public policy. It dominates our decision-making for the future, guides multi-billion-dollar investments, and shapes our responses to climate change, inequality, and other environmental and social challenges that define our times. Pity then, or more like disaster, that its fundamental ideas are centuries out of date yet are still taught in college courses worldwide and still used to address critical issues in government and business alike. That's why it is time, says renegade economist Kate Raworth, to revise our economic thinking for the 21st century. In Doughnut Economics, she sets out seven key ways to fundamentally reframe our understanding of what economics is and does. Along the way, she points out how

we can break our addiction to growth; redesign money, finance, and business to be in service to people; and create economies that are regenerative and distributive by design. Named after the now-iconic “doughnut” image that Raworth first drew to depict a sweet spot of human prosperity (an image that appealed to the Occupy Movement, the United Nations, eco-activists, and business leaders alike), Doughnut Economics offers a radically new compass for guiding global development, government policy, and corporate strategy, and sets new standards for what economic success looks like. Raworth handpicks the best emergent ideas—from ecological, behavioral, feminist, and institutional economics to complexity thinking and Earth-systems science—to address this question: How can we turn economies that need to grow, whether or not they make us thrive, into economies that make us thrive, whether or not they grow? Simple, playful, and eloquent, Doughnut Economics offers game-changing analysis and inspiration for a new generation of economic thinkers.

Tourism Planning and Development in Eastern Europe Hania Janta 2022-08-25 Three decades ago, the hypermobility of tourists from the days before the global pandemic was truly unthinkable in Eastern Europe. The borders were closed and the region isolated from the rest of the world. Despite an extraordinary transformation of tourism in the area since, Eastern Europe remains under-explored in tourism studies. This book fills the gap by outlining contemporary strategies for tourism development in post-socialist countries, considering the opportunities and challenges as well as the initiatives and approaches to sustainability. Illuminating the various economic, socio-cultural and environmental impacts that tourism has created, this book is a valuable reference for researchers and students of tourism and related disciplines, as well as anyone interested in the development of Eastern Europe.

Biophilic Cities Timothy Beatley 2011 Tim Beatley has long been a leader in

advocating for the "greening" of cities. But too often, he notes, urban greening efforts focus on everything except nature, emphasizing such elements as public transit, renewable energy production, and energy efficient building systems. While these are important aspects of reimagining urban living, they are not enough, says Beatley. We must remember that human beings have an innate need to connect with the natural world (the biophilia hypothesis). And any vision of a sustainable urban future must place its focus squarely on nature, on the presence, conservation, and celebration of the actual green features and natural life forms. A biophilic city is more than simply a biodiverse city, says Beatley. It is a place that learns from nature and emulates natural systems, incorporates natural forms and images into its buildings and cityscapes, and designs and plans in conjunction with nature. A biophilic city cherishes the natural features that already exist but also works to restore and repair what has been lost or degraded. In *Biophilic Cities* Beatley not only outlines the essential elements of a biophilic city, but provides examples and stories about cities that have successfully integrated biophilic elements--from the building to the regional level--around the world. From urban ecological networks and connected systems of urban greenspace, to green rooftops and green walls and sidewalk gardens, Beatley reviews the emerging practice of biophilic urban design and planning, and tells many compelling stories of individuals and groups working hard to transform cities from grey and lifeless to green and biodiverse.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Braiding Sweetgrass Robin Wall Kimmerer 2020-04-23 'A hymn of love to the world ... A journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise' Elizabeth Gilbert, author of *Eat, Pray, Love* As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two ways of knowledge together. Drawing on her life as an indigenous scientist, a mother, and a woman, Kimmerer shows how other living beings - asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass - offer us gifts and lessons, even if we've forgotten how to hear their voices. In a rich braid of reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of a wider ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

Planning and Managing the Experience Economy in Tourism Augusto Costa, Rui 2021-12-03 Tourism is facing a new paradigm that has been brought on by the introduction of experiences in the development, management, and promotion of tourism. Associating experiences to tourism destination and products allows tourists to relate to their vacations differently and helps to fuel a destination's competitiveness and compliance with new needs and motivations that are being driven by the tourists. When properly design, managed, and developed, tourism experiences can contribute to the destination's overall sustainability by maximizing tourism's positive impacts and fostering their spillover to local communities. *Planning and Managing the Experience Economy in Tourism* is an essential reference book that seeks to advance research on tourism experience as well as investigate how tourism experiences can create and increase tourism competitiveness. The book explores how the experience concept has evolved in the last decade, alongside the needs and motivations of consumers, and how it can be conceptualized, designed, managed, and implemented both at the tourism firm and destination levels. Delving further into concepts like creative tourism, destination attributes, and smart experiences, this book serves as a dynamic resource for travel agencies, tourism managers, tourism professionals, marketers, destination managers, government officials, policymakers, academicians, students, tourism officials, planners, and researchers.

W Magazine calls her "The Most Interesting Girl on YouTube." But what does she call herself? A girl in desperate need of The Ideal Planner! Until now, it seemed like every planner was for "that perfect girl." But what if you're just muddling through? What if you're kind of weird, a little obsessed, definitely silly, love art and fashion, and sometimes accidentally skip days or weeks or months in your planner but don't want those pages to go to waste? Emma looked everywhere but could not find such a planner. So she decided to make one herself and share it with the world. With guided journal pages, custom mood boards, puzzles, games, lists, corny quotes, cool designs, and silly messages from Emma, it's a diary, scrapbook, guided journal, coloring book, and planner all in one. And because you fill in the dates you want, it never becomes outdated.

Invisible Child Andrea Elliott 2021-10-05 PULITZER PRIZE WINNER • A “vivid and devastating” (The New York Times) portrait of an indomitable girl—from acclaimed journalist Andrea Elliott “From its first indelible pages to its rich and startling conclusion, *Invisible Child* had me, by turns, stricken, inspired, outraged, illuminated, in tears, and hungering for reimmersion in its Dickensian depths.”—Ayad Akhtar, author of *Homeland Elegies* ONE OF THE TEN BEST BOOKS OF THE YEAR: The New York Times • ONE OF THE BEST BOOKS OF THE YEAR: The Atlantic, The New York Times Book Review, Time, NPR, Library Journal In *Invisible Child*, Pulitzer Prize winner Andrea Elliott follows eight dramatic years in the life of Dasani, a girl whose imagination is as soaring as the skyscrapers near her Brooklyn shelter. In this sweeping narrative, Elliott weaves the story of Dasani’s childhood with the history of her ancestors, tracing their passage from slavery to the Great Migration north. As Dasani comes of age, New York City’s homeless crisis has exploded, deepening the chasm between rich and poor. She must guide her siblings through a world riddled by hunger, violence, racism, drug addiction, and the threat of foster care. Out on the street, Dasani becomes a fierce fighter “to protect those who I love.” When she finally escapes city life to enroll in a boarding school, she faces an impossible question: What if leaving poverty means abandoning your family, and yourself? A work of luminous and riveting prose, Elliott’s *Invisible Child* reads like a page-turning novel. It is an astonishing story about the power of resilience, the importance of family and the cost of inequality—told through the crucible of one remarkable girl. Winner of the J. Anthony Lukas Book Prize • Finalist for the Bernstein Award and the PEN/John Kenneth Galbraith Award
