Rural Politics in Contemporary China Emily T. Yeh 2016-01-22 This collection provides an overview of China's rural politics, bringing scholarship on agrarian politics from various social science disciplines together in one place. The twelve contributions, spanning history, anthropology, sociology, environmental studies, political science, and geography, address enduring questions in peasant studies, including the relationship between states and peasants, taxation, social movements, rural-urban linkages, land rights and struggles, gender relations, and environmental politics. Taking rural politics as the power-inflected processes and struggles that shape access and control over resources in the countryside, as well as the values, ideologies and discourses that shape those processes, the volume brings research on China into conversation with the traditions and concerns of peasant studies scholarship. It provides both an introduction to those unfamiliar with Chinese politics, as well as in-depth, new research for experts in the field. This book was published as a special issue of the Journal of Peasant Studies.

New Markets, New Opportunities? Nancy Birdsall 2001-09-19 A Brookings Institution Press and Carnegie

Endowment for International Peace publication Many of the countries that have recently converted to a market-based economic system have also experienced an alarming increase in income inequality – a widening gap between the haves and have nots. But to what extent is the increase in inequality also increasing the opportunities for economic advancement – particularly for those at the bottom of the economic ladder? Does the creation of greater opportunities make a region's move to the market politically acceptable? And, if opportunities don't increase along with inequality, will it eventually cause a political backlash against a country's market policies? This book highlights the importance of finding the answers to those questions by examining the issues of social mobility and opportunity as an essential part of the income inequality puzzle. It provides a summary of the latest research on the economics and politics of social mobility in both developed and emerging market economies, including the conceptual issues involved and the challenges of accurately documenting trends. The book concludes with a discussion of the economics of opportunity and mobility in Latin America and Eastern Europe, and the politics and perceptions of mobility in the two regions.

From Revolutionary Cadres to Party Technocrats in Socialist China Hong Yung Lee 2018-08-14 Using a wide variety of previously unavailable sources, Hong Yung Lee offers a theoretical and historical perspective on China's ruling elite, examining their politics and the bureaucratic system in which they participate. He traces the evolution of these cadres from the guerrilla fighters who first joined the communist movement and founded the new regime in 1949 to the technocratic specialists who wield power today. In the revolution, communist leaders built a peasant-based party organization whose members were largely recruited from uneducated poor peasants and hired laborers. Even after they became the founders of a new regime, their rural orientation and revolutionary experiences continued to affect the political process. Lee shows how the requirements of modernization compelled the state to replace the revolutionary cadres with bureaucratic technocrats. Selected from the postliberation generation, the new leaders are more committed to problem-solving than to socialism. Despite uncertainties in the immediate future, this elite transformation signifies an end to modern China's revolutionary era. Lee argues that it seems only a matter of time before China will have a bureaucratic-authoritarian regime led by technocrats possessing a managerial perspective and a pragmatic economic orientation. Cadres and Corruption Xiaobo Lü 2000 The most up-to-date and comprehensive analysis of corruption

and change in the Chinese Communist Party, "Cadres and Corruption" reveals the long history of the party's inability to maintain a corps of committed and disciplined cadres. Contrary to popular understanding of China's pervasive corruption as an administrative or ethical problem, the author argues that corruption is a reflection of political developments and the manner in which the regime has evolved. Based on a wide range of previously unpublished documentary material and extensive interviews conducted by the author, the book adopts a new approach to studying political corruption by focusing on organizational change within the ruling party. In so doing, it offers a fresh perspective on the causes and changing patterns of official corruption in China and on the nature of the Chinese Communist regime. By inquiring into the developmental trajectory of the party's organization and its cadres since it came to power in 1949, the author argues that corruption among Communist cadres is not a phenomenon of the post-Mao reform period, nor is it caused by purely economic incentives in the emerging marketplace. Rather, it is the result of a long process of what he calls organizational involution that began as the Communist party-state embarked on the path of Maoist "continuous revolution." In this process, the Chinese Communist Party gradually lost its ability to sustain officialdom with either the Leninist-cadre or the Weberian-bureaucratic mode of integration. Instead, the party unintentionally created a neotraditional ethos, mode of operation, and set of authority relations among its cadres that have fostered official corruption.

The Treasure of the Hairy Cadre Susan C. Daffron 2016-01-04 For elementary school teacher Sara Winston, being a camp counselor is the ideal summer job, if only she can pass the canoe test. As a former all-star athlete Sara knows she needs to practice, so she heads out on a solo excursion to hone her paddling skills. A sudden lightning storm drives her to shore, and while waiting out the deluge, she encounters a bedraggled man who is definitely not rainwater fresh. Zack Flanagan looks like a soggy, sweaty pirate, so when he reveals stories of hidden treasure, Sara is convinced he's a harmless nut case. But when someone steals Sara's canoe leaving them stranded in a remote uninhabited area miles from anywhere, she considers the possibility that Zack might not be so crazy after all. Someone else might be after the treasure--and them.

Creating Market Socialism Carolyn L. Hsu 2007-08-13 In the midst of China's post-Mao market reforms, the old status hierarchy is collapsing. Who will determine what will take its place? In *Creating Market Socialism*, the sociologist Carolyn L. Hsu demonstrates the central role of ordinary people—rather than state or market elites—in creating new institutions for determining status in China. Hsu explores the emerging hierarchy, which is based on the concept of *suzhi*, or quality. In *suzhi* ideology, human capital and educational credentials are the most important measures of status and class position. Hsu reveals how, through their words and actions, ordinary citizens decide what jobs or roles within society mark individuals with *suzhi*, designating them “quality people.” Hsu's ethnographic research, conducted in the city of Harbin in northwestern China, included participant observation at twenty workplaces and interviews with working adults from a range of professions. By analyzing the shared stories about status and class, jobs and careers, and aspirations and hopes that circulate among Harbiners from all walks of life, Hsu reveals the logic underlying the emerging stratification system. In the post-socialist era, Harbiners must confront a fast-changing and bewildering institutional landscape. Their collective narratives serve to create meaning and order in the midst of this confusion. Harbiners collectively agree that “intellectuals” (scientists, educators, and professionals) are the most respected within the new social order, because

they contribute the most to Chinese society, whether that contribution is understood in terms of traditional morality, socialist service, or technological and economic progress. Harbiners understand human capital as an accurate measure of a person's status. Their collective narratives about suzhi shape their career choices, judgments, and child-rearing practices, and therefore the new practices and institutions developing in post-socialist China.
