Critical Approaches to Fieldwork Gavin Lucas 2002-01-04 This work takes as its starting point the role of fieldwork and how this has changed over the past 150 years. The author argues against progressive accounts of fieldwork and instead places it in its broader intellectual context to critically examine the relationship between theoretical paradigms and everyday archaeological practice. In providing a much-needed historical and critical evaluation of current practice in archaeology, this book opens up a topic of debate which affects all archaeologists, whatever their particular interests.

Foundations of Paleoparasitology Adauto Araújo 2014-01-01 Unprecedented initiative in the world, the book compiles the available knowledge on the subject and presents the state-of-the-art in paleoparasitology - term coined about 30 years ago by Brazilian Fiocruz researcher Luiz Fernando Ferreira, pioneer in this science which is concerned with the study of parasites in the past. Multidisciplinary by essence, paleoparasitology gathers contributions from social scientists, biologists, historians, archaeologists, pharmacists, doctors and many other professionals, either in biomedical or humanities fields. With varied applications such as in evolutionary or migration studies, their results often depend on the association between laboratory findings and cultural remains. The book is divided into four parts - Parasites, Hosts, and Human Environment; Parasites Remains Preserved in Various Materials and Techniques in Microscopy and Molecular Diagnostics; Parasite Findings in Archeological Remains: a paleographic view; and Special Studies and Perspectives. Signed by authors from various countries such as Argentina, USA, Germany and France, the book has chapters devoted to the discoveries of paleoparasitology on all continents.

Hell in the Byzantine World Angeliki Lymberopoulou 2020-06-30 The imagery of Hell, the Christian account of the permanent destinations of the human soul after death, has fascinated people over the centuries since the emergence of the Christian faith. These landmark volumes provide the first large-scale investigation of this imagery found across the Byzantine and post-Byzantine world. Particular emphasis is placed on images from churches across Venetian Crete, which are comprehensively collected and published for the first time. Crete was at the centre of artistic production in the late Byzantine world and beyond and its imagery was highly influential on traditions in other regions. The Cretan examples accompany rich comparative material from the wider Mediterranean – Cappadocia, Macedonia, the Peloponnese and Cyprus. The large amount of data presented in this publication highlight Hell's emergence in monumental painting not as a concrete array of images, but as a diversified mirroring of social perceptions of sin.

Standard-Setting at UNESCO Abdulqawi A. Yusuf 2007-10-15 Standard-setting represents one of the main constitutional functions of UNESCO and an important tool for realizing the goals for which the Organization was created. In addition to conventions and recommendations, the declarations adopted by the General Conference promulgate principles and norms intended to inspire the action of Member States in specific fields of activity. This first of a two-volume work on Standard-setting in UNESCO contains the essays presented at a symposium held on the occasion of its sixtieth anniversary. Topics addressed in Normative Action in Education, Science and Culture include methods of elaboration and implementation; constitutional objectives and legal commitments; international collaboration; and impact. Co-publication with the UNESCO.

Alternative Pathways to Complexity Lane F. Fargher 2016-12-15 *Alternative Pathways to Complexity* focuses on the themes of architecture, economics, and power in the evolution of complex societies. Case studies from Mesoamerica, Asia, Africa, and Europe examine the relationship between political structures and economic configurations of ancient chiefdoms and states through a framework of comparative archaeology. A group of highly distinguished scholars takes up important issues, theories, and methods stemming from the nascent body of research on comparative archaeology to showcase and apply important theories of households, power, and how the development of complex societies can be extended and refined. Drawing on the archaeological, ethnohistorical, and ethnographic records, the chapters in this volume contain critical investigations on the role of collective action, economics, and corporate cognitive codes in structuring complex societies. *Alternative Pathways to Complexity* is an important addition to theoretical development and empirical research on Mesoamerica, the Old World, and cross-cultural studies. The theoretical implications addressed in the chapters will have broad appeal for scholars grappling with alternative pathways to complexity in other regions as well as those addressing diverse cross-cultural research. Contributors: Sarah B. Barber, Cynthia L. Bedell, Christopher S. Beekman, Frances F. Berdan, Tim Earle, Carol R. Ember, Gary M. Feinman, Arthur A. Joyce, Stephen A. Kowalewski, Lisa J. LeCount, Linda M. Nicholas, Peter N. Peregrine, Peter Robertshaw, Barbara L. Stark, T. L. Thurston, Deborah Winslow, Rita Wright

Perishable Material Culture in Prehistory Linda M. Hurcombe 2014-04-24 *Perishable Material Culture in Prehistory* provides new approaches and integrates a broad range of data to address a neglected topic, organic material in the prehistoric record. Providing news ideas and connections and suggesting revisionist ways of thinking about broad themes in the past, this book demonstrates the efficacy of an holistic approach by using examples and cases studies. No other book covers such a broad range of organic materials from a social and object biography perspective, or concentrates so fully on approaches to the missing components of prehistoric material culture. This book will be an essential addition for those people wishing to understand better the nature and importance of organic materials as the 'missing majority' of prehistoric material culture.

Nothing Happened Susan A. Crane 2021-01-19 The past is what happened. History is what we remember and write about that past, the narratives we craft to make sense out of our memories and their sources. But what does it mean to look at the past and to remember that "nothing happened"? Why might we feel as if "nothing is the way it was"? This book transforms these utterly ordinary observations and redefines "Nothing" as something we have known and can remember. "Nothing" has been a catch-all term for everything that is supposedly uninteresting or is just not there. It will take some—possibly considerable—mental adjustment before we can see Nothing as Susan A. Crane does here, with a capital "n." But Nothing has actually been happening all along. As Crane shows in her witty and provocative discussion, Nothing is nothing less than fascinating. When Nothing has changed but we think that it should have, we might call that injustice; when Nothing has happened over a long, slow period of time, we might call that boring. Justice and boredom have histories. So too does being relieved or disappointed when Nothing happens—for instance, when a forecasted end of the world does not occur, and millennial

movements have to regroup. By paying attention to how we understand Nothing to be happening in the present, what it means to "know Nothing" or to "do Nothing," we can begin to ask how those experiences will be remembered. Susan A. Crane moves effortlessly between different modes of seeing Nothing, drawing on visual analysis and cultural studies to suggest a new way of thinking about history. By remembering how Nothing happened, or how Nothing is the way it was, or how Nothing has changed, we can recover histories that were there all along.

Culture Jam Kalle Lasn 2000-11-07 America is no longer a country but a multimillion-dollar brand, says Kalle Lasn and his fellow "culture jammers". The founder of Adbusters magazine, Lasn aims to stop the branding of America by changing the way information flows; the way institutions wield power; the way television stations are run; and the way the food, fashion, automobile, sports, music, and culture industries set agendas. With a courageous and compelling voice, Lasn deconstructs the advertising culture and our fixation on icons and brand names. And he shows how to organize resistance against the power trust that manages the brands by "uncooling" consumer items, by "dermarketing" fashions and celebrities, and by breaking the "media trance" of our TV-addicted age. A powerful manifesto by a leading media activist, Culture Jam lays the foundations for the most significant social movement of the early twenty-first century -- a movement that can change the world and the way we think and live.

The Archaeology of Science Michael Brian Schiffer 2013-04-19 This manual pulls together—and illustrates with interesting case studies—the variety of specialized and generalized archaeological research strategies that yield new insights into science. Throughout the book there are templates, consisting of questions, to help readers visualize and design their own projects. The manual seeks to be as general as possible, applicable to any society, and so science is defined as the creation of useful knowledge—the kinds of knowledge that enable people to make predictions. The chapters in Part I discuss the scope of the archaeology of science and furnish a conceptual foundation for the remainder of the book. Next, Part II presents several specialized, but widely practiced, research strategies that contribute to the archaeology of science. In order to thoroughly ground the manual in real-life applications, Part III presents lengthy case studies that feature the use of historical and archaeological evidence in the study of scientific activities.

Metallography and Microstructure in Ancient and Historic Metals David A. Scott 1992-01-02 David A. Scott provides a detailed introduction to the structure and morphology of ancient and historic metallic materials. Much of the scientific research on this important topic has been inaccessible, scattered throughout the international literature, or unpublished; this volume, although not exhaustive in its coverage, fills an important need by assembling much of this information in a single source. Jointly published by the GCI and the J. Paul Getty Museum, the book deals with many practical matters relating to the mounting, preparation, etching, polishing, and microscopy of metallic samples and includes an account of the way in which phase diagrams can be used to assist in structural interpretation. The text is supplemented by an extensive number of microstructural studies carried out in the laboratory on ancient and historic metals. The student beginning the study of metallic materials and the conservation scientist who wishes to carry out structural studies of metallic objects of art will find this publication quite useful.

Carving Egg Heads Mary Finn 1997 This book is the perfect start for anyone interested in learning how to carve detailed faces. Mary Finn uses her "practice stick" method to show you how to carve each feature - eyes, nose, closed mouth, open mouth - with step by step directions that even beginners will find easy to follow. Then she shows you how to arrange all of these pieces into one wooden egg to make a convincing head! This method has helped hundreds of Mary's students, and is a sure-fire way to get started! "Egg head" projects included in this book are an old man, a pirate, and the Mad Hatter. Mary shows you how to adapt her carving techniques to flatter surfaces to make jewelry (like a bolo tie project) and how to paint your pieces for maximum impact. This book is terrific for beginners, and a great way for more advanced carvers to enlarge their skills.

Green Roof Ecosystems Richard K. Sutton 2015-06-04 This book provides an up-to-date coverage of green (vegetated) roof research, design, and management from an ecosystem perspective. It reviews, explains, and poses questions about monitoring, substrate, living components and the abiotic, biotic and cultural aspects connecting green roofs to the fields of community, landscape and urban ecology. The work contains examples of green roof venues that demonstrate the focus, level of detail, and techniques needed to understand the structure, function, and impact of these novel ecosystems. Representing a seminal compilation of research and technical knowledge about green roof ecology and how functional attributes can be enhanced, it delves to explore the next wave of evolution in green technology and defines potential paths for technological advancement and research.
