Children's Health Issues in Historical Perspective Cheryl Krasnick Warsh 2006-01-01 From sentimental stories about polio to the latest cherub in hospital commercials, sick children tug at the public's heartstrings. However sick children have not always had adequate medical care or protection. The essays in Children's Issues in Historical Perspective investigate the identification, prevention, and treatment of childhood diseases from the 1800s onwards, in areas ranging from French-colonial Vietnam to nineteenth-century northern British Columbia, from New Zealand fresh air camps to American health fairs. Themes include: the role of government and/or the private sector in initiating and underwriting child public health programs; the growth of the profession of pediatrics and its views on "proper" mothering techniques; the role of nationalism, as well as ethnic and racial dimensions in child-saving movements; normative behaviour, social control, and the treatment of "deviant" children and adolescents; poverty, wealth, and child health measures; and the development of the modern children's hospital. This liberally illustrated collection reflects the growing academic interest in all aspects of childhood, especially child health, and originates from health care professionals and scholars across the disciplines. An introduction by the editors places the historical themes in context and offers an overview of the contemporary study of children's health.

Teaching Stravinsky Kimberly A. Francis 2015-08-03 In 1929 Nadia Boulanger accepted Igor Stravinsky's younger son, Soulima, as her student. Within two years, Stravinsky and Boulanger merged their artistic spheres, each influencing and enhancing the cultural work of the other until the composer's death in 1971. Teaching Stravinsky tells Boulanger's story of the ever-changing nature of her fractious relationship with Stravinsky. Author Kimberly A. Francis explores how Boulanger's own professional activity during the turbulent twentieth-century intersected with her efforts on behalf of Stravinsky, and how this facilitated her own influential conversations with the composer about his works while also drawing her into close contact with his family. Through the theoretical lens of Bourdieu, and drawing upon over one thousand pages of letters and scores, many published here for the first time, Francis examines the extent to which Boulanger played a foundational role in defining, defending, and ultimately consecrating Stravinsky's canonical identity. She considers how the quotidian events in the lives of these two icons of modernism informed both their art and their professional decisions, and convincingly argues for a reevaluation of the influence of women on cultural production during the twentieth century. At once a story of one woman's vibrant friendship with an iconic modernist composer, and a case study in how gendered polemics informed professional negotiations of the artistic-political fields of the twentieth-century, Teaching Stravinsky sheds new light not only on how Boulanger taught Stravinsky, but also how, in doing so, she managed to influence the course of modernism itself.

**Architecture and the Historical Imagination** Martin Bressani 2016-04-15 Hailed as one of the key theoreticians of modernism, Eugène-Emmanuel Viollet-le-Duc was also the most renowned restoration architect of his age, a celebrated medieval archaeologist and a fervent champion of Gothic revivalism. He published some of the most influential texts in the history of modern architecture such as the *Dictionnaire raisonné de l'architecture française du XIe au XVIe siècle* and *Entretiens sur l'architecture*, but also studies on warfare, geology and racial history. Martin Bressani expertly traces Viollet-le-Duc's complex intellectual development, mapping the attitudes he adopted toward the past, showing how restoration, in all its layered meaning, shaped his outlook. Through his life journey, we follow the route by which the technological subject was born out of nineteenth-century historicism.
