Castles of the Morea Kevin Andrews 2006-06-01 First published in 1953, this book presents a description of sixteen of the larger medieval fortresses in the Peloponnese, occupied by the Venetians during the period 1685-1715. It is also a beautifully-written celebration of some of Greece's most striking, but also least studied, architectural monuments, inspired by a unique collection of seventeenth century fortification plans (the so-called "Grimani codex") preserved in the Gennadius Library of the American School of Classical Studies at Athens. The author first saw the plans in 1948 and devoted the next four years of his life to a historical and archaeological investigation of the castles they depicted. At a time when most of the students at the American School were studying the classics, his interest in later Greek history was pioneering. He not only searched out hundreds of obscure documentary sources but also made a point of visiting, and personally describing and photographing, every castle - not an easy thing to do at the tail end of the Greek Civil War. The final publication was an instant classic, marked out by its evocative prose and Andrews' obvious fascination with the subject. As he wrote, "instead of the shining temple stones chiseled with the resources of perfection, these fortresses of medieval Greece crouch to the contours of the land with crumbling, roofless walls of rubble, built with the mark of haste, as if there were not time between one invasion and the next to build them." The book has been long out of print. This new edition presents Andrews' original text with a new introduction which sets the work in context and discusses some of the developments in Greek castle studies since the 1950s. The Grimani maps, originally printed only in black and white, are now presented in their original

colors.

La famille dans l'ordre juridique de l'Union européenne / Family within the Legal Order of the European Union Elsa Bernard 2020-12-31 Le droit de la famille, dans sa dimension civiliste, fortement ancré dans les cultures nationales des États membres, est une matière qui ne relève pas, en principe, du droit de l'Union européenne. Pourtant, il n'est plus possible d'affirmer que la matière échappe dans son entier au droit de l'Union. De nombreux aspects de la famille sont sous influence européenne, au point que l'on voit se dessiner les contours d'une « famille européenne ». L'ouvrage propose de mettre en lumière l'acquis européen en matière de droit de la famille, au prisme du droit matériel (citoyenneté européenne, politique sociale de l'Union, fonction publique européenne...), comme du droit international privé. Le droit de la famille de l'Union s'identifie alors comme un « droit spécial » complétant la diversité des droits nationaux de la famille. Sa signification théorique et politique dans l'Union est débattue par les auteurs, autant que son devenir. Loin de demeurer fragmentaire à côté des droits nationaux des États membres, il a probablement vocation à se densifier pour offrir aux citoyens et résidents européens un droit commun de la famille au sein de l'Union. Family law, with its civil law tradition, and strong roots in the national cultures of the Member States, does not normally fall within the scope of European law. However, it is no longer possible to argue that family law is outside European law entirely. There are many aspects of the family which are subject to European influence, to the point that the outlines of a « European family » are starting to emerge. This book is intended to highlight the European experience of family law and its substantive (i.e. European citizenship, EU social policy, EU civil service...) and private international law aspects. Union law therefore contains a form of « special » family law which is shared between the Member States and supplements their national family laws. Its theoretical and political importance in the Union, as well as its future, are discussed by the authors. Far from remaining fragmented alongside the national laws of Member States, it will likely develop to offer European citizens and residents a common family law within the EU.

Alf lahga wa lahga Olivier Durand 2014 This volume is a collection of articles written by more than 40 scholars who work in the field of Arabic dialectology. All articles are revised versions of papers presented at the 9th Conference of the Association Internationale de Dialectologie Arabe (AIDA) held in Pescara in March 2011. The variety of dialects represented in the book engage various issues in Arabic dialectology - such as sedentary and Bedouin dialects, sociolinguistic phenomena, and the written dimension - investigated from both synchronic and diachronic perspectives. The broad range of meaningful subjects that are tackled in the book offer an important contribution to the current debates on general linguistics and sociolinguistics, Arabic linguistics, Arabic literature, as well as Semitic and Islamic studies. Advancing Cultural Astronomy Efrosyni Boutsikas 2021-04-08 This collection of essays on cultural astronomy celebrates the life and work of Clive Ruggles, Emeritus Professor of Archaeoastronomy at Leicester University. Taking their lead from Ruggles' work, the papers present new research focused on three core themes in cultural astronomy: methodology, case studies, and heritage. Through this framework, they show how the study of cultural astronomy has evolved over time and share new ideas to continue advancing the field. Ruggles' work in these areas has had a profound impact on the way that scholars approach evidence of the role of sky in both ancient and modern cultures. While the papers span many time periods and regions, they are closely connected by these three major themes, presenting methodological investigations of how we can approach archaeological, textual, and ethnographic evidence; describing detailed archaeoastronomical case studies; or stressing the importance of global heritage management. This work will appeal to researchers and scholars interested in the history and development of cultural astronomy.
