The Contract of Employment Emeritus Professor of Employment Law Mark Freedland

2016-07-26 The contract of employment is the central legal institution of modern English employment law. It provides the foundation upon which most statutory employment rights are constructed; it provides a conduit for the implementation of norms negotiated in collective bargaining; and it continues to provide a contractual structure for the terms and conditions of employment

for a significant proportion of the working population. The Contract of Employment provides the most ambitious and comprehensive treatise on the theoretical and doctrinal aspects of the English contract of employment in the common law world. Under the general editorship of Professor Mark Freedland, the text has been produced by a team of world leading experts in employment law. Part I examines the theoretical context to the contract of employment, studying its structure and development from a wide variety of theoretical and comparative perspectives. Part II provides an exposition and analysis of the doctrinal aspects of the contract of employment. The coverage of The Contract of Employment is unrivalled in its depth, detail and sophistication. The legal analysis is always informed by a keen sense of the modern labour market context of the contract of employment, and it is sensitive to contemporary challenges such as precariousness, the interaction with migration law, the role of legislation in the contract of employment, and the decline of collective bargaining. It will be the principal reference point for the practitioners, judges, and academics concerned with the contract of employment as a legal category, both nationally and internationally.

Our Politics, Our Selves? Peter Digeser 1995-04-17 Is statecraft soulcraft? Should we look to our souls and selves in assessing the quality of our politics? Is it the business of politics to cultivate, shape, or structure our internal lives? Summarizing and answering the major theoretical positions on these issues, Peter Digeser formulates a qualified permission to protect or encourage particular forms of human identity. Public discourse on politics should not preclude talk about the role of reason in our souls or the importance of wholeness and community to our selves or the significance of autonomy for individuals. However, those who seek to place only their own conception of the self or soul within the reach of politics are as mistaken as those who would completely preclude such matters from the political realm. In proposing this view, Digeser responds to communitarians, classical political rationalists, and genealogists who argue that liberal culture fragments, debases, or normalizes our selves. He also critically analyzes perfectionist

liberals who justify liberalism by virtue of its ability to cultivate autonomy and authenticity, as well as liberal neutralists who wish to avoid altogether the problem of selfcraft. All these, he argues, fall short in some way in defining the extent to which politics should be concerned with the self.
