Rainforest Habitat John Messer 1981-01-01

**Habitat, Economy and Society in the Central Africa Rain Forest** Jan Vansina 1992-11 Over 50 years ago, the renowned anthropologist Daryll Forde strongly advocated comparative anthropological studies. Professor Vansina argues that 50 years later, Forde's criticisms still apply despite both Forde's considerable intellectual legacy and an exponential increase in available information. Using the example of Central African peoples, Professor Vansina challenges the current scholarship of sociologists and anthropologists, and makes a compelling case for broad, historical, comparative studies.

**Your Bedroom is a Rainforest!** Hannah Sheldon-Dean 2021-12-14 Go on a journey through the jungle without ever leaving your bed! With *Your Bedroom is a Rainforest!*, kids can transform an ordinary room into a habitat for some of Earth's most amazing creatures with reusable, wall-safe (and BPA-free!), glow-in-the-dark stickers—everything from blue morpho butterflies to Bengal tigers to poison dart frogs! “What’s your favorite animal?” The answer to this question, much like one’s favorite color, can say a lot about a kid. Maybe they’re into gorillas because they admire their nobility; maybe the colors of a toucan capture their imagination; maybe they like crocodiles because they take to water. While there are countless possible answers to this question, one thing is almost certain: they probably aren’t going to say, “squirrel.” No, the favorite animal of a child tends to be exotic, dangerous, fast, and maybe even endangered. In the past, a long and expensive trip to the zoo was required for kids to pay a visit to their beast of choice. Well, not anymore! *Your Bedroom is a Rainforest!* brings the incredible ecosystems of Central America, northern South America, western Africa, Southeast Asia, and beyond, right to the walls of your child’s bedroom! Within this keepsake-worthy hardcover book you will find more than 60 reusable stickers of jaguars, capybara, scarlet macaws, monkeys, forest elephants, anacondas, and many more adorable—and sometimes ferocious—animals glow in the dark and bring your environment to life. Along with the stickers, kids can look forward to pages packed with illustrations of their favorite animals accompanied by fascinating, and often hard-to-believe facts, such as: - Most pandas spend half the day eating. - Toxic poison dart frogs have neon colors to warn predators. - Tiger urine smells like buttered popcorn. - Without sloths, there would be no avocados! - Lions may be called the kings of the jungle, but they don’t live anywhere near them. - Much of the life in the rainforest is found in the trees. - Unlike many other cats, jaguars do not avoid water; in fact, they are excellent swimmers. The high-quality, glow-in-the-dark stickers might be what gets kids interested, but the amazing facts are sure to be what keeps them around. And the best part? You’re never too old to appreciate amazing jungle animals! About the Author: Hannah Sheldon-Dean is a writer, editor, and educator specializing in publications for children and young adults. She has written several licensed activity books and gift books with Penguin Young Readers, and she writes and edits fiction, nonfiction, and educational materials for a variety of outlets.

She is currently a writing consultant at the Columbia University School of Social Work and a volunteer mentor with Girls Write Now. Hannah received a Master's of Social Work from New York University and a BA in Literary Arts and Education Policy from Brown University, and she loves to work on projects that fall at the intersection of those fields. She lives in Brooklyn but grew up in Vermont, so you might see her wandering the city in search of pine trees, mourning doves, caterpillars, or whatever other bits of nature she can find. She also loves singing with Khorikos choir, baking bread, and dreaming about the animal sanctuary she'll open someday.
