The Fall of the University of Cape Town David Benatar 2021-11-09 Destructive forces have been eroding the University of Cape Town, Africa's leading university. This book tells the sad, true tale of what has been transpiring. It is a saga of lunacy, criminality, pandering, and identity politics. The mad and the bad - the deranged, deluded, the depraved - have been granted endless latitude in bullying and abusing others. The decline began in 2015 with the Rhodes Must Fall protest that resulted in the offending statue's removal within a month, and which spawned similar protests abroad. Emboldened by their local

success, the protestors issued new and ever-increasing demands later that year and then again in 2016 and 2017. Their methods also became criminal - including intimidation, assault, and arson. The university leadership capitulated to this behaviour, and this fostered a broader and now pervasive toxic environment within the institution. These developments offer important lessons for universities around the world that are yielding to the forces of a faux "progressivism".

Discovering Southern African Rock Art J. David Lewis-Williams 1990 A book on the ancient rock art of the San -- the story behind the research. Ways of discovering rock art. The aesthetic approach. The narrative approach. Rediscovering the San. The interpretative approach: San beliefs. The interpretative approach: pictures in the brain. Ducks and rabbits. Battling it out. Many meanings. The broken string. Fragile heritage.

Farthest North Fridtjof Nansen 1898 In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner Fram, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go "farthest north." They survived a winter in a moss hut eating walrus and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.

Leonardo Pisano (Fibonacci) L. E. Sigler 2014-06-28 The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

The Dream House Craig Higginson 2016-04 A farmhouse is being reproduced a dozen times, with slight variations, throughout a valley. Three small graves have been dug in the front garden, the middle one

lying empty. A woman in a wheelchair sorts through boxes while her husband clammers around the old demolished buildings, wondering where the animals have gone. A young woman - called 'the barren one' behind her back - dreams of love, while an ageing headmaster contemplates the end of his life. At the entrance to the long dirt driveway, a car appears and pauses - pointed towards the house like a silver bullet, ticking with heat. So begins *The Dream House*, Craig Higginson's riveting and unforgettable novel set in the Midlands of KwaZulu-Natal. Written with dark wit, a stark poetic style and extraordinary tenderness, this is a story about the state of a nation and a deep meditation on memory, ageing, meaning, family, love and loss. This updated 2016 edition contains new content, with Craig Higginson exploring the background to *The Dream House*, his varied experiences in a farmhouse in KwaZulu-Natal and the subsequent and poignant motivations for this moving novel.

Examining the Phenomenon of "Teaching Out-of-field" Linda Hobbs 2019-01-01 This book identifies and surveys the major themes around 'out-of-field teaching', that is, teaching subjects or year levels without a specialization. This has been an issue in many countries for some time, yet until recently there has been little formal research and poor policy responses to related problems. This book arises out of collaborations between members of an international group of researchers and practitioners from Australia, Germany, Ireland, England, South Africa, Indonesia and the United States. Cross-national comparisons of ideas through case studies, descriptions of practice and research data interrogates the experiences, practices, and contexts relating to out-of-field teaching. In particular, the book considers the phenomenon of out-of-field teaching in relation to national policy contexts, local school leadership practices, professional development. The book represents an essential contribution on a highly topical issue that has implications for quality and equitable education around the globe.

Academic Literacy Development Laura-Mihaela Muresan 2021-03-11 This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish

People of the Eland Patricia Vinnicombe 2009 First published in 1976, *People of the Eland* was the first major step away from the outsiders view upon San rock art that had dominated studies of rock art for nearly a century. The book provides an account of the rock art of the Drakensberg Range and historical information on the mountain San themselves. The book aims to gain an insiders view of the rock art using San understandings of the world. While following this approach, it quickly became clear to Patricia Vinnicombe that the art was very far from simple depictions of daily life as had once seemed likely, but instead reflected the most deeply held San beliefs and symbols. This approach and this understanding has now become the standard for all those working with San rock art. Whilst this early knowledge of San art has been built upon considerably since 1976, *People of the Eland* remains a cornerstone of our current understanding. Reprinted here in full color, with the original artwork and photographs, *People of the Eland* remains a seminal work, the impact of which cannot be underestimated.
