Prey Graham Masterton 2017-05-18 There's something in the attic of Fortyfoot House. Something that rustles. Something that scampers and scratches. Something with fur, far more terrifying than a rat. Recently divorced, David Williams takes a job restoring Fortyfoot House, a dilapidated 19th-century orphanage, hoping to find peace of mind and get to know his young son. But then he hears the scratching noises in the attic. And he sees long-dead people walking across the lawn. Does Fortyfoot House exist in today, yesterday, or tomorrow – or all three at once? Only one thing is certain – it is a house with a dark secret

that threatens to send David's world hurling into a living nightmare. A nightmare that only David himself can prevent – if he can escape the thing in the attic. 'One of the most original and frightening storytellers of our time' PETER JAMES. 'A true master of horror' JAMES HERBERT.

Choosing and Using Astronomical Eyepieces William Paolini 2013-08-23 A valuable reference that fills a number of niches including that of a buyer's guide, technical desk reference and observer's field guide. It documents the past market and its evolution, right up to the present day. In addition to appealing to practical astronomers - and potentially saving them money - it is useful both as a historical reference and as a detailed review of the current market place for this bustling astronomical consumer product. What distinguishes this book from other publications on astronomy is the involvement of observers from all aspects of the astronomical community, and also the major manufacturers of equipment. It not only catalogs the technical aspects of the many modern eyepieces but also documents amateur observer reactions and impressions over the years, using many different eyepieces. Eyepieces are the most talked-about

accessories and collectible items available to the amateur astronomer. No other item of equipment commands such vigorous debate, or has evolved into such a remarkable array of forms and functions. 'Choosing and Using Astronomical Eyepieces' provides a vast amount of reference material to point readers towards the best buys and the right eyepieces for different kinds of observing.

Long Fuse, Big Bang Eric Haseltine 2010-07-20 "If I had asked people what they wanted, they would have said faster horses." --Henry Ford As one part of your brain processes these words, another part of your brain is urging you to put the book down and focus on something more pressing. Get back to work on the budget due tomorrow. Answer e-mails growing stale in your inbox. Get off your rear and update that résumé. We're all guilty of it, especially in the business world. From Fortune 500 CEOs to assistants, we work to solve the most urgent problems first. That's because evolution has hardwired our brains to focus only on the immediate future, a survival technique that worked extremely well when predators were lurking at every turn. But that was then, this is now. In the modern world, where life expectancies are long and physical perils rare (at least for people who buy books), it's not only possible to build a strong tomorrow without sacrificing today, but to actually increase the number of

here-and-now victories by pursuing distant wins. That's where Long Fuse, Big Bang comes in--to help you work with that instinct to create and foster ideas that will lead to explosive professional results. Through proven case studies and personal experience, Dr. Eric Haseltine shows you how to neutralize the quick-fix way of thinking and actually use that desire to improve your chances of an enduring success. Rather than fight our most basic thought processes, this book will teach you how to work with your brain to light the long fuse, keep it smoldering, and ignite that "Big Bang" that will make history.
