We Are Best Friends: Animals in Society Leslie Irvine 2019-10-01 Friendships between humans and non-human animals were once dismissed as sentimental anthropomorphism. After decades of research on the emotional and cognitive capacities of animals, we now recognize human-animal friendships as true reciprocal relationships. Friendships with animals have many of the same characteristics as friendships between humans. Both parties enjoy the shared presence that friendship entails along with the pleasures that come with knowing another being. Both friends develop ways of communicating apart from, or in addition to, spoken language.

Transnational Tourism Experiences at Gallipoli Jim McKay 2018-05-24 This book offers a fresh account of the Anzac myth and the bittersweet emotional experience of Gallipoli tourists. Challenging the straightforward view of the Anzac obsession as a kind of nationalistic military Halloween, it shows how transnational developments in tourism and commemoration have created the conditions for a complex, dissonant emotional experience of sadness, humility, anger, pride and empathy among Anzac tourists. Drawing on the in-depth testimonies of travellers from Australia and New Zealand, McKay shines a new and more complex light on the history and cultural politics of the Anzac myth. As well as making a ground breaking, empirically-based intervention into the culture wars, this book offers new insights into the global memory boom and transnational developments in backpacker tourism, sports tourism and “dark” or “dissonant” tourism.

Researching Emotions in International Relations Maéva Clément 2017-12-05 This edited volume is the first to discuss the methodological implications of the 'emotional turn' in International Relations. While emotions have become of increasing interest to IR theory, methodological challenges have yet to receive proper attention. Acknowledging the plurality of ontological positions, concepts and theories about the role of emotions in world politics, this volume presents and discusses various ways to research emotions empirically. Based on concrete research projects, the chapters demonstrate how social-scientific and humanities-oriented methodological approaches can be successfully adapted to the study of emotions in IR. The volume covers a diverse set of both well-established and innovative methods, including discourse analysis, ethnography, narrative, and visual analysis. Through a hands-on approach, each chapter sheds light on practical challenges and opportunities, as well as lessons learnt for future research. The volume is an invaluable resource for advanced graduate and postgraduate students as well as scholars interested in developing their own empirical research on the role of emotions.

Tourist Destination Governance Eric Laws 2011 This book examines the political order and the issues, processes and approaches in applying governance insights to tourist destinations. The book consists of 16 chapters presented in three parts. Part I introduces the reader to the issues and considerations of tourist destination governance. The four chapters in this part address the diversity of questions of relevance around regional destination development, community involvement, responsiveness and future outcomes of governance in the context of tourism. This includes an exploration of a variety of challenges regarding governance in emerging tourist destinations within the Greater Mekong in Asia, the conflicts in governance within a regional community in Scotland which has had a long history of golf tourism, the development of a typology of issues and pressures that affect tourist destination governance and the role of knowledge in good governance for tourist destinations. Part II explores the complexities and considerations of decision making and the significant role it plays in its specific relevance to tourist destination governance and tourism development within regional communities. In acknowledging that tourist destination development may involve contentious, complicated and arduous processes, this part recognizes that decision making has a prominent role to play in achieving effectiveness in governance. The three chapters in this part examine tourist destination decision making during times of crisis in Thailand, stakeholder roles in governance and decision making for a wildlife tour in Tonga, and the utilization of community involvement and empowerment as keys to success in regional tourist destinations. Part III provides further understanding regarding the approaches and solutions of tourist

destination governance. This includes aspects of structural change, community engagement, networks and collaborations in the context of destinations. The five chapters in this part include the exploration of a process of governance change within a broader mountain tourist destination in Switzerland, utilizing effective networks as assistance to governance in destinations, community-based tourism governance solutions in a case study in Thailand and insights from complexity, network and stakeholder theories as approaches, including an understanding of a micro-macro context of tourist destination governance at its local/regional and national level. The concluding chapter examines the theory and methodology of governance studies, provide insights for tourist destination managers and researchers, and identify opportunities for further research into destination governance issues. This chapter discusses the application of governance concepts to other countries' governance and issues of conceptual importance, such as the need for ideology in the discussion of governance. This raises the question: does good governance of a tourist destination have to be based on democratic principles? Finally, the chapter looks at the concept of governance effectiveness.

Anti-Gender Politics in the Populist Moment Agnieszka Graff 2021-09-16 This book charts the new phase of global struggles around gender equality and sexual democracy: the ultraconservative mobilization against "gender ideology" and feminist efforts to counteract it. It argues that anti-gender campaigns, which emerged around 2010 in Europe, are not a simple continuation of the anti-feminist backlash dating back to the 1970s, but part of a new political configuration. Opposition to "gender" has become a key element of the rise of right-wing populism, which successfully harnesses the anxiety, shame and anger caused by neoliberalism and threatens to destroy liberal democracy. *Anti-Gender Politics in the Populist Moment* offers a novel conceptualization of the relationship between the ultraconservative anti-gender movement and right-wing populist parties, examining the opportunistic synergy between these actors. The authors map the anti-gender campaigns as a global movement,

putting the Polish case in a comparative perspective. They show that the anti-gender rhetoric is best understood as a reactionary critique of neoliberalism as a socio-cultural formation. The book also studies the recent wave of feminist mass mobilizations, viewing the transnational revolt of women as a left populist movement. This is an important study for those doing research in politics, cultural studies, gender and sexuality studies and sociology. It will also be useful for activists and policy makers.

Ethics in Real Estate Stephen E. Roulac 2013-04-17 ethics." Certainly our industry is bound by the formal constraints of law in national, state, and local jurisdictions. What this volume reminds us, however, is that those laws are only as good as the personal "sea of ethics" in which each of us operates. THE ETHICS OF PROPERTY INVOLVEMENTS Stephen E. Roulac The Roulac Group San Rafael, California and Visiting Professor University of Ulster Ethical considerations are a dominant theme in the management literature. As "Ethics and ethical issues surround our liver, ... ethics has become one of the most rapidly growing areas of management research, with over 800 articles and 1,400 books appearing since 1990" (Schminke, Ambrose, and Miles, 1998). Compared to business and business management, however, the research and writing on real estate in an ethics context is in the very early stages of development. The lack of a developed literature on ethics in real estate is reflected in the response by one highly placed executive to my solicitation for funding to support the publication of this volume: "I didn't know there

were any ethics in real estate!" Fortunately, the Summa Corporation and the American Real Estate Society believe in the importance of ethics in real estate, for their cosponsorship has made possible this special monograph on the subject of Ethics in Real Estate. The support of the Summa Corporation and the American Real Estate Society of this pioneering volume is warmly and appreciatively acknowledged.

Stakeholder Dialogues in Natural Resources Management Susanne Stoll-Kleemann 2007-01-10 Participatory Processes for Natural Resource Management Ortwin Renn University of Stuttgart, Stuttgart, Germany Need for analytic-deliberative processes Inviting the public to be part of the decision making process in natural resource management has been a major objective in European and American environmental policy arenas. The US-National Academy of Sciences has encouraged environmental

protection agencies to foster citizen participation and public involvement for making environmental policy making and natural resource management more effective and democratic (Stern and Fineberg 1996). The report emphasizes the need for a combination of assessment and dialogue which the authors have framed the "analytic-deliberative" approach. Unfortunately, early public involvement of the public in deliberative processes may compromise, however, the objective of efficient and effective policy implementation or violate the principle of fairness (Cross 1998, Okrent 1998). Another problem is that the public consists of many groups with different value structures and preferences. Without a systematic procedure to reach consensus on values and preferences, the public's position often appears as unclear (Coglianese 1997, Rossi 1997). Participatory processes are thus needed that combine technical expertise, rational decision making, and public values and preferences. How can and should natural resource managers collect public preferences, integrate public input into the management process, and assign the appropriate roles to technical experts, stakeholders (i. e.

Probability & Statistics with R for Engineers and Scientists Michael Akritas 2018-03-21 This title is part of the Pearson Modern Classics series. Pearson Modern Classics are acclaimed titles at a value price. Please visit www.pearsonhighered.com/math-classics-series for a complete list of titles. This text grew out of the author's notes for a course that he has taught for many years to a diverse group of undergraduates. The early introduction to the major concepts engages students immediately, which helps them see the big picture, and sets an appropriate tone for the course. In subsequent chapters, these topics are revisited, developed, and formalized, but the early introduction helps students build a true understanding of the concepts. The text utilizes the statistical software R, which is both widely used and freely available (thanks to the Free Software Foundation). However, in contrast with other books for the intended audience, this book by Akritas emphasizes not only the interpretation of software output, but also the generation of this output. Applications are diverse and relevant, and come from a variety of fields.

Managing Human Resources Stephen Bach 2013-01-22 This revised edition is a comprehensive, authoritative set of essays. It is more detailed and analytical than the mainstream treatments of HRM. As in previous editions, *Managing Human Resources* analyses HRM, the study of work and employment, using an integrated multi-disciplinary approach. The starting point is a recognition that HRM practice and firm performance are influenced by a variety of institutional arrangements that extend beyond the firm. The consequences of HRM need to incorporate analysis of employees and other stakeholders as well as the implications for organizational performance.

Accountability Arrangements to Combat Corruption Sue Cavill 2007 This review describes accountability arrangements to combat corruption in the infrastructure sector. The sustainability of the livelihoods of the poor in low- and middle-income countries is compromised by corruption in the delivery of infrastructure services. Such services include water supply, sanitation, drainage, the provision of access roads and paving, transport, solid waste management, street lighting and community buildings. For this reason, The Water, Engineering Development Centre, (WEDC) at Loughborough University in the UK is conducting research into anti-corruption initiatives in this area of infrastructure services delivery. This series of reports has been produced as part of a project entitled Accountability Arrangements to Combat Corruption, which was initially funded by the Department for International Development (DFID) of the British Government. The purpose of the work is to improve governance through the use of accountability arrangements to combat corruption in the delivery of infrastructure services. These findings, reviews, country case studies, case surveys and practical tools provide evidence of how anti-corruption initiatives in infrastructure delivery can contribute to the improvement of the lives of the urban poor. The main objective of the research is the analysis of corruption in infrastructure delivery. This includes a review of accountability initiatives in infrastructure delivery and the nature of the impact of greater accountability.

Heritage Regimes and the State Bendix, Regina 2013-07-02 What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO's aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

Globalisation, Global Justice and Social Work Iain Ferguson 2005-08-15 Globalization has become a seemingly unstoppable force over recent decades and, in its wake, global notions of social justice have developed in response to its negative aspects. Neo-liberal economic policies have been a key element in the wider process of globalization, and these policies have had a profound impact on welfare provision and the shape of social work practice. Arising dissatisfaction among users of welfare and social work services is fuelling the search for a new, more radical social work that is firmly rooted in principles of social justice. Globalisation, Global Justice and Social Work explores the global effects of neo-liberal policies on welfare services in different countries, with contributions from social work academics, practitioners and welfare activists around the world. The first section of the book presents case studies of impact of neo-liberalism on welfare systems, social service provision and the practice of social work. In the second section the chapters explore the relationship between social work practice and the struggle for social justice. Authors discuss the personal and political dilemmas they have had to address in seeking to link a personal commitment to social justice with their daily practice as workers and educators in social work. The final section assesses the prospects for social work practice based on notions of social justice, by looking at what can be learned from the experience of previous radical movements as well as from emergent global and local movements.

Policing and Public Management Kevin Morrell 2018-07-17 Policing and Public Management takes a new perspective on the challenges and problems facing the governance of police forces across the UK and the developed world. Complementing existing texts in criminology and police studies, Morrell and Bradford draw on ideas from the neighbouring fields of public management and virtue ethics to open the field up to a broader audience. This forms the basis for an imaginative reframing of policing as something that either enhances or diminishes "the public good" in society. The text focuses on two cross-cutting aspects of the relationship between the police and the public: public confidence and public order. Extending award-winning work in public management, and drawing on extensive and varied data sources, Policing and Public Management offers new ways of seeing the police and of understanding police governance. This text will be valuable supplementary reading for students of public management, policing and criminology, as well as others who want to be better informed about contemporary policing.
