**The Oxford Handbook of Management** Adrian Wilkinson 2017-03-01 Management, the pursuit of objectives through the organization and co-ordination of people, has been and is a core feature-and function-of modern society. Some 'classic' forms of corporate and bureaucratic management may be seen as the prevalent form of organization and organizing in the 20th century, but in the post-Fordist, global, knowledge-driven contemporary world we are seeing different patterns, principles, and styles of management as old models are questioned. The functions, ideologies, practices, and theories of management have changed over time, as recorded by many scholars, and may vary according to different models of organization, and between different cultures and societies. Whilst the administrative, corporate, or factory manager may be a figure on the wane, management as an ethos, organizing principle, culture, and field of academic teaching and research has increased dramatically in the last half century, and spread throughout the world. The purpose of this Handbook is to analyse and explore the evolution of management; the core functions and how they may have changed; its position in the culture/zeitgeist of modern society; the institutions and ideologies that support it; and likely challenges and changes in the future. This book looks at what management is, and how this may change over time. It provides an overview of management - its history, development, context, changing function in organization and society,

key elements and functions, and contemporary and future challenges.

**Contemporary Peacemaking** Roger Mac Ginty 2022-01-12 This fully updated third-edition of Contemporary Peacemaking is a state of the art overview of peacemaking in relation to contemporary civil wars. It examines best (and worst) practice in relation to peace processes and peace accords. The contributing authors are a mix of leading academics and practitioners with expert knowledge of a wide arrays of cases and techniques. The book provides a mix of theory and concept-building along with insights into ongoing cases of peace processes and post-accord peacebuilding. The chapters make clear that peacemaking is a dynamic field, with new practices in peacemaking techniques, changes to the international peace support architecture, and greater awareness of key issues such as gender and development after peace accords. The book is mindful of the intersection between top-down and bottom-up approaches to peace and how formal and institutionalized peace accords need to be lived and enacted by communities on the ground.

Mass Communications Research Resources Christopher H. Sterling 2016-05-06 This reference book is designed as a road map for researchers who need to find specific information about American mass communication as expeditiously as possible. Taking a topical approach, it integrates publications and organizations into subject-focused chapters for easy user reference. The editors define mass communication to include print journalism and electronic media and the processes by which they communicate messages to their audiences. Included are newspaper, magazine, radio, television, cable, and newer electronic media industries. Within that definition, this volume offers an indexed inventory of more than 1,400 resources on most aspects of American mass communication history, technology, economics, content, audience research, policy, and regulation. The material featured represents the carefully considered judgment of three experts -- two of them librarians -- plus four contributors from different industry venues. The primary focus is on the domestic American print and electronic media industries. Although there is no claim to a complete census of all materials on print journalism and electronic media -- what is available is now too vast for any single guide -- the most important and useful items are here. The emphasis is on material published since 1980, though useful older resources are included as well. Each chapter is designed to stand alone, providing the most important and useful resources of a primary nature -- organizations and documents as well as secondary books and reports. In addition, online resources and internet citations are included where possible.

Hommes, femmes, quelle égalité? Alain Bihr 2002 Sur la base de données disponibles, notamment statistiques, ce livre passe en revue l'ensemble des transformations survenues au sein des rapports entre hommes et femmes, à partir du constat de la situation de la femme en France, et de son évolution vers plus d'égalité, ou vers un simple déplacement des anciennes inégalités. Paradoxalement, son autonomie grandit, mais les discriminations perdurent.

*Communities in Action* National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
