Interactive Collaborative Learning Michael E. Auer 2016-12-31 This book presents the proceedings of the 19th International Conference on Interactive Collaborative Learning, held 21-23 September 2016 at Clayton Hotel in Belfast, UK. We are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of developments in both technology and the global markets, and the growing need for flexibility and agility are essential and challenging elements of this process that have to be addressed in general, but especially in the context of engineering education. To face these topical and very real challenges, higher education is called upon to find innovative responses. Since being founded in 1998, this conference has consistently been devoted to finding new approaches to learning, with a focus on collaborative learning. Today the ICL conferences have established themselves as a vital forum for the exchange of information on key trends and findings, and of practical lessons learned while developing and testing elements of new technologies and pedagogies in learning.

And we guess that you don't want to be left behind in not understanding and speaking Korean, right? Because of this, we have created the next level of Korean stories for the students who have already surpassed the beginner level: Intermediate Korean Short Stories! In this book we have compiled 12 challenging, compelling and fun stories that will allow you to expand your vocabulary, educate you on the culture and give you the tools to boost your grasp of the wonderful Korean tongue. How Intermediate Korean Short Stories works: - Each chapter possesses a funny, interesting and/or thought-provoking story based on real-life situations, allowing you to discover more about the Korean way of life. The last two are even more challenging in length and level for those of you getting ready for Advanced Korean! - The summaries follow the story: a synopsis in Korean and in English of what you just read, both to review the lesson and for you to see if you understood what the tale was about. Use them if you're having trouble. - At the end of those summaries, you'll be provided with a list of the most relevant vocabulary involved in the lesson, as well as slang and sayings that you may not have understood at first glance! - Finally, you'll be provided with a set of tricky questions in Korean, allowing you the chance to prove that you learned something in the story. Don't worry if you don't know the answer to any - we will provide them immediately after (and in English), but no cheating! We want you to feel comfortable while mastering the Korean tongue; after all, no language should be a barrier for you to travel around the world and expand your social circles! So look no further! their ordeal during the Cultural Revolution. Chang was a Red Guard briefly at the age of fourteen, then worked as a peasant, a “barefoot doctor,” a steelworker, and an electrician. As the story of each generation unfolds, Chang captures in gripping, moving—and ultimately uplifting—detail the cycles of violent drama visited on her own family and millions of others caught in the whirlwind of history.

Multilingual Lexical Recognition in the Mental Lexicon of Third Language Users Weronika Szubko-Sitarek

2014-10-07 The monograph constitutes an attempt to demonstrate that trilinguals should be considered as learners and speakers in their own right as opposed to L2 learners with a view to enumerating consequences this would bring to third or additional language teaching. Its theoretical part offers an insight into the structure of the multilingual mental lexicon which is a product of the interplay of a whole array of cross-linguistic factors in the minds of multilingual speakers. The empirical part reports the findings of an empirical study which aimed to investigate connections which are formed between multiple languages in a multilingual mind. All the aspects, analyzed in the experiments are part of a broader question of how multilinguals make their lexical decisions and, more specifically, how they recognize words from different languages. The book closes with the discussion of the role of the obtained results for multilingual didactics as well as some possible areas for future research.

Action Research in the World Language Classroom Mary Lynn Redmond 2013-06-01 The current thrust in the field of education is to improve teachers' understanding of how research on best practices can improve student learning. The field of world language education introduces a double, perhaps a triple, bind: teachers must be able to design and deliver instruction that aligns with national expectations for developing students' language and intercultural abilities for success in the global workplace, yet in schools across America, all K-12 students do not have the opportunity to study languages, even though research supports their astonishing facility for acquisition. Schools and teachers without resources, including time to investigate and implement evidence-based best practices, are ultimately held accountable for student performance. If world language teachers are to advocate for languages, they must use their expertise and share evidence of their students' progress. The American Council on the Teaching of Foreign Languages (ACTFL) recently began development of a national research priorities agenda for grades preK-16. Action research, which is classroom-centered and inquiry-based, can contribute to our profession's efforts, as it helps us to increase awareness of the critical need for language study in grades preK-16. World language teachers can become teacher-researchers in their own classrooms, gathering deeply meaningful insights into their students' progress that they can share with others. Teacher-researchers investigate innovative approaches in response to their questions about teaching and learning, which are rooted in daily experience. They engage their students in fresh learning activities, and student feedback helps them to make better decisions about instructional and assessment strategies. Results can be shared with stakeholders, including parents, administrators, school board members, and guidance counselors, as evidence of what all kinds of students can do in languages. At a time in our history when we are striving to prepare teachers for 21st-century schools that prioritize global competence, Action Research in the World Language Classroom is a timely resource for the profession. It describes a natural, engaging, motivating way to contribute, particularly for preservice teachers who are shaping their views and understanding about world language instruction and the connections between research and best practices. The book includes four studies conducted by preservice teachers during their student teaching internships in North Carolina public schools. The editor hopes that their work and observations will inspire and assist world language educators at all stages of their careers.
