Addressing Sickle Cell Disease National Academies of Sciences, Engineering, and Medicine 2020-12-22 Sickle cell disease (SCD) is a genetic condition that affects approximately 100,000 people in the United States and millions more globally. Individuals with SCD endure the psychological and physiological toll of repetitive pain as well as side effects from the pain treatments they undergo. Some adults with SCD report reluctance to use health care services, unless as a last resort, due to the racism and discrimination they face in the health care system. Additionally, many aspects of SCD are inadequately studied, understood, and addressed. *Addressing Sickle Cell Disease* examines the epidemiology, health outcomes, genetic implications, and societal factors associated with SCD and sickle cell trait (SCT). This report explores the current guidelines and best practices for the care of patients with SCD and recommends priorities for programs, policies, and research. It also discusses limitations and opportunities for developing national SCD patient registries and surveillance systems, barriers in the healthcare sector associated with SCD and SCT, and the role of patient advocacy and community engagement groups.

Health Policy and Advanced Practice Nursing Kelly A. Goudreau, PhD, RN, ACNS-BC, FAAN 2013-12-11 "There are many policy books, but none are written by APRNs or focus just on APRN practice. This topic is critical in today's healthcare reform movement. APRNs are at the core, or can be, if they use their practice knowledge and education to shape policy...[The] editors eloquently make the case that policy formation is a critical nursing skill."--Doody's Medical Reviews iGaining a better understanding of the political landscape and its impact on nursing and the APRN practice environment, by learning through textbooks such as this, and then through active involvement at any level in the political process itself, can only strengthen nursing and its influence on health policy .î -Loretta C. Ford, RN, EdD, PNP, FAAN, FAANP From the Foreword This view of health policy from the perspective of APRN practice is a call to action for advanced practice nurses to learn about the impact and implications of current initiatives in health policy. This knowledge will assist them in determining how they define and create positive change for their patients and

have an impact on community, national, and world health. This is the only text that satisfies the need for policy discussions for all APNs , it is designed to meet the requirements of both the IOM report on The Future of Nursing and the DNP criteria V for inclusion of health policy and advocacy in the curriculum. The text encompasses evolving health care policy and reform in the U.S., Canada, and internationally, addressing its impact on advanced practice nursing, APRN roles, care for special populations, health care quality, and patient safety . The book brings together a wealth of information written by luminaries in the field. Dr. Goudreau is a Past President, and Board Member of the National Association of Clinical Nurse Specialists (NACNS), and Dr. Smolenski was Director of Certification Services at the ANCC for 11 years, directing certification for 150,000 nurses in over 30 specialties. The text discusses issues surrounding the regulation of APRNs, how the local regulatory environment shapes their practice and how they can shape their local regulatory environment. Additionally, the text brings in international perspectives on how APRNs can and are impacting patient care globally. In order to provide content relevant to a universal APRN readership, each section of the text endeavors to present information from all four APRN perspectives: NPs, CNSs, CRNAs , and CNMs. For all of these roles, the book covers the implications of current and future health policy changes for APRN practice. Key Features: Addresses the role-specific policy informational needs of all APRN roles including NPs, CNSs, CRNAs , and CNMs Brings together in one volume all of the requisite information about health care policy and reform and its impact on advanced practice nursing Meets the requirements of the IOM report on The Future of Nursing and the DNP criteria V for inclusion of health policy and advocacy in the curriculum Offers guidance on how APRNs can influence policy development Covers impact and implications of health care policy and reform in the U.S., Canada, and internationally

Geriatric Medicine Balakrishnan Kichu R. Nair 2017-09-18 Written by international experts, this book presents chapters that cover common geriatric conditions including dementia, depression, delirium, falls, polypharmacy, incontinence, immobility, and medication-related issues, as well as neurological, cardiovascular, and endocrine diseases associated with old age. The book also discusses various aspects of ambulatory, residential, and palliative care for the elderly, in addition to ethical aspects of old age care, advance care planning and living wills. Geriatric medicine is a rapidly growing field in internal medicine. The majority of elderly people now live in developing countries, where there is an urgent need to up-skill healthcare professionals. By presenting problems as they arise and then discussing how to solve them, this book offers a valuable resource for all physicians interested in the care of older people.

Shariah and the Halal Industry Mohammad Hashim Kamali 2021-07-13 The rapid expansion of the halal industry and its markets has occurred not only in the heavily Islamic regions of Southeast Asia and the Middle East, but also in more unexpected countries such as Turkey, Japan, and South Korea, plus many others around the world. Yet despite both the increasing number of practicing Muslims and the demand for halal products worldwide, a base of scholarship on the subject has never emerged. The industry has been more market driven rather than knowledge driven. As such, industry operators have frequently drawn attention to the absence of such an authoritative text, one that would elucidate the shariah credibly of halal as well as its market presence. Mohammad Hashim Kamali's *Shariah and the Halal Industry* is designed to fill this gap. The first of its kind in the English language, the book is written in an accessible and reader-friendly style by a world-renowned authority on Islamic law and jurisprudence. The book serves as a reference on the shariah foundations of halal and meets the needs not only of industry operators and decision-makers, but also of students, scholars of Islam, and the many practicing Muslims who are customers of the halal industry across the globe. The book can also serve to educate the general public and non-specialist readers on Islam and shariah law at-large.

Textbook of Global Health Anne-Emanuelle Birn 2017-01-24 THE CRITICAL WORK IN GLOBAL HEALTH, NOW COMPLETELY REVISED AND UPDATED "This book compels us to better understand the contexts in which health problems emerge and the forces that underlie and propel them." -Archbishop Emeritus Desmond Mpilo Tutu H1N1. Diabetes. Ebola. Zika. Each of these health problems is rooted in a confluence of social, political, economic, and biomedical factors that together inform our understanding of global health. The imperative for those who study global health is to understand these factors individually and, especially, synergistically. Fully revised and updated, this fourth edition of Oxford's *Textbook of Global Health* offers a critical examination of the array of societal factors that shape health within and across countries, including how health inequities create consequences that must be addressed by public health, international aid, and social and economic policymaking. The text equips students, activists, and health professionals with the building blocks for a contextualized understanding of global health, including essential threads that are combined in no other work: · historical dynamics of the field · the political economy of health and development · analysis of the current global health structure, including its actors, agencies, and activities · societal determinants of health, from global trade and investment treaties to social policies to living and working conditions · the role of health data and measuring health inequities · major causes of global illness and death, including under crises, from a political economy of health vantage point that goes beyond communicable vs. non-communicable diseases to incorporate contexts of social and economic deprivation, work, and globalization · the role of trade/investment and financial liberalization, precarious work, and environmental degradation and contamination · principles of health systems and the politics of health financing · community, national, and transnational social justice approaches to building healthy societies and practicing global health ethically and equitably Through this approach the *Textbook of Global Health* encourages the reader -- be it student, professional, or advocate -- to embrace a wider view of the global health paradigm, one that draws from political economy considerations at community, national, and transnational levels. It is essential and current reading for anyone working in or around

global health.

Wireless Networks Information Processing and Systems Dil Muhammad Akbar Hussain 2008-11-14 The international multi-topic conference IMTIC 2008 was held in Pakistan during April 11-12, 2008. It was a joint venture between Mehran University, Jamshoro, Sindh and Aalborg University, Esbjerg, Denmark. Apart from the two-day main event, two workshops were also held: the Workshop on Creating Social Semantic Web 2.0 Information Spaces and the Workshop on Wireless Sensor Networks. Two hundred participants registered for the main conference from 24 countries and 43 papers were presented; the two workshops had overwhelming support and over 400 delegates registered. IMTIC 2008 served as a platform for international scientists and the engineering community in general, and in particular for local scientists and the engineering community to share and cooperate in various fields of interest. The topics presented had a reasonable balance between theory and practice in multidisciplinary topics. The conference also had excellent topics covered by the keynote speeches keeping in view the local requirements, which served as a stimulus for students as well as experienced participants. The Program Committee and various other committees were experts in their areas and each paper went through a double-blind peer review process. The conference received 135 submissions of which only 46 papers were selected for presentation: an acceptance rate of 34%.
