Paths to the Emerging State in Asia and Africa Keijiro Otsuka 2019-01-16 This book is open access under a CC BY-NC-ND license. This book addresses the issue of how a country, which was incorporated into the world economy as a periphery, could make a transition to the emerging state, capable of undertaking the task of economic development and industrialization. It offers historical and contemporary case studies of transition, as well as the international background under which such a transition was successfully made (or delayed), by combining the approaches of economic history and development economics. Its aim is to identify relevant historical contexts, that is, the 'initial conditions' and internal and external forces which governed the transition. It also aims to understand what current low-income developing countries require for their transition. Three economic driving forces for the transition are identified. They are: (1) labor-intensive industrialization, which offers ample employment opportunities for labor force; (2) international trade, which facilitates efficient international division of labor; and (3) agricultural development, which improves food security by increasing supply of staple foods. The book presents a bold account of each driver for the transition.

Historical Perspectives on the State of Health and Health Systems in Africa, Volume I Mario J. Azevedo 2017-01-30 This book examines the historical and current state of health and the health of the African people, including the Arab North, impacted by such factors as geography and natural elements, cultural and colonial traditions, and competing biomedical and traditional systems. It also looks at technological advances, poverty and health disparities, utilization of resources, and international presence, as reflected by the work of the World Health Organization, and structural adjustments imposed by the IMF and the World Bank.

An Economic History of Development in sub-Saharan Africa Ellen Hillbom 2019-06-19 "This is a desperately needed book. It not only surveys the field of African economic history at the level of undergraduate students, but provides several fresh perspectives, drawing on insights from the latest research on the evolution of African societies and their economic prosperity. This valuable source of teaching material will be the premier text on African economic history for at least the next decade." —Johan Fourie, Stellenbosch University, South Africa This upper level textbook offers a historical understanding of sub-Saharan Africa. By looking at the economic history of the African region from before the arrival of European territorial control

all the way through to Africa's integration in the current era of globalisation, readers can understand the development paths for African countries today. Organisation of production, social structures, trade, and governance are key factors in the discussion about African success stories and failures. Suitable reading for upper level undergraduates, MSc and postgraduate students, in addition to policy makers and development practitioners looking for a comprehensive overview of Africa from an economic and social perspective. Hillbom and Green also provide a starting point for the study of African economic history for those who would like to continue their own research in this area.

Know the Beginning Well K. Y. Amoako 2019-11 With this book, the author offers a personal look at some of the landmark policies, people, and institutions that have shaped Africa's post-independence history - and will continue to shape its future. It is a true inside account - told from a very personal perspective - of the evolution of African development over the last five decades.

Development In Modern Africa Martin S. Shanguhya 2019-10-08 Development in Modern Africa: Past and Present Perspectives contributes to our understanding of Africa's experiences with the development process. It does so by adopting a historical and contemporary analysis of this experience. The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis: skepticism and pessimism. While not overlooking the shortcomings of development, the themes in the book express an optimistic view of Africa's development experiences, highlighting elements that can be tapped into to enhance the condition of African populations and their states. By using case studies from precolonial, colonial, and postcolonial Africa, contributors to the volume demonstrate that human instincts to improve material, social and spiritual words are universal. They are not limited to the Western world, which the term and process of development are typically associated with. Before and after contact with the West, Africans have actively created institutions and values that they have actively employed to improve individual and community lives. This innovative spirit has motivated Africans to integrate or experiment with new values and structures, challenges, and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community. The book will be of interest to academics in the fields of history, African studies, and regional studies.

[Africans](#) John Iliffe 2017-07-13 An updated and comprehensive single-volume history covering all periods from human origins to contemporary African situations.

Economic Development E. Wayne Nafziger 2012-03-26 Nafziger explains the reasons for the recent fast growth of India, Poland, Brazil, China, and other Pacific Rim countries, and the slow, yet essential, growth for a turnaround of sub-Saharan Africa. The book is suitable for those with a background in economics principles. The fifth edition of the text, written by a scholar of developing countries, is replete with real-world examples and up-to-date information. Nafziger discusses poverty, income inequality, hunger, unemployment, the environment and carbon-dioxide emissions, and the widening gap between rich (including middle-income) and poor countries. Other new components include the rise and fall of models based on Russia, Japan, China/Taiwan/Korea and North America; randomized experiments to assess aid; an exploration of whether information technology and mobile phones can provide poor countries with a shortcut to prosperity; and a discussion of how worldwide financial crises, debt, and trade and capital markets affect developing countries.

Accelerating Poverty Reduction in Africa Kathleen Beegle 2019-10-09 Sub-Saharan Africa's turnaround over the past couple of decades has been dramatic. After many years in decline, the continent's economy picked up in the mid-1990s. Along with this macroeconomic growth, people became healthier, many more youngsters attended schools, and the rate of extreme poverty declined from 54 percent in 1990 to 41 percent in 2015. Political and social freedoms expanded, and gender equality advanced. Conflict in the region also subsided, although it still claims thousands of civilian lives in some countries and still drives pressing numbers of displaced persons. Despite Africa's widespread economic and social welfare accomplishments, the region's challenges remain daunting: Economic growth has slowed in recent years. Poverty rates in many countries are the highest in the world. And notably, the number of poor in Africa is rising because of population growth. From a global perspective, the biggest concentration of poverty has shifted from South Asia to Africa. *Accelerating Poverty Reduction in Africa* explores critical policy entry points to address the demographic, societal, and political drivers of poverty; improve income-earning opportunities both on and off the farm; and better mobilize resources for the poor. It looks beyond macroeconomic stability and growth—critical yet insufficient components of these objectives—to ask what more could be done and where policy makers should focus their attention to speed up poverty reduction. The pro-poor policy agenda advanced in this volume requires not only economic growth where the poor work and live, but also mitigation of the many risks to which African households are exposed. As such, this report takes a "jobs" lens to its task. It focuses squarely on the productivity and livelihoods of the poor and vulnerable—that is, what it will take to increase their earnings. Finally, it presents a road map for financing the poverty and development agenda.

Vision and Time C. Tsehloane Keto 2001 This revised edition of 1995's *Vision, Identity and Time* explores the relationship of a geo-culturally based Africa centered paradigm in the emerging global village of the 21st century. This text argues that perceptions of world history in a multicultural world require the acceptance of multiple perspectives. The book distinguishes between hegemonic and non-hegemonic perspectives, discusses the significance of early Nile Valley culture and outlines frameworks of analysis using examples of African American history and South African history.

African Urban Spaces in Historical Perspective Steven J. Salm 2005 This book presents new and interdisciplinary approaches to the study of African urban history and culture. Moving between precolonial, colonial, and contemporary urban spaces, it covers the major regions, religions, and urban societies of sub-Saharan Africa.

Africa's Development Dynamics 2021 Digital Transformation for Quality Jobs African Union Commission 2021-01-19 *Africa's Development Dynamics* uses lessons learned in the continent's five regions - Central, East, North, Southern and West Africa - to develop policy recommendations and share good practices. Drawing on the most recent statistics, this analysis of development dynamics attempts to help African leaders reach the targets of the African Union's Agenda 2063 at all levels: continental, regional, national and local.

The Idea of Development in Africa Corrie Decker 2020-10-29 *The Idea of Development in Africa* challenges prevailing international development discourses about the continent, by tracing the history of ideas, practices, and 'problems' of development used in Africa. In doing so, it offers an innovative approach to examining the history and culture of development

through the lens of the development episteme, which has been foundational to the 'idea of Africa' in western discourses since the early 1800s. The study weaves together an historical narrative of how the idea of development emerged with an account of the policies and practices of development in colonial and postcolonial Africa. The book highlights four enduring themes in African development, including their present-day ramifications: domesticity, education, health, and industrialization. Offering a balance between historical overview and analysis of past and present case studies, Elisabeth McMahon and Corrie Decker demonstrate that Africans have always co-opted, challenged, and reformed the idea of development, even as the western-centric development episteme presumes a one-way flow of ideas and funding from the West to Africa.

Africa's Development Dynamics 2018 2018 What are the major economic and social trends in Africa? What is Africa's role in globalisation? This new annual report presents an Africa open to the world and towards the future. Africa's Development Dynamics uses the lessons learned in the five African regions - Central, East, North, Southern and West Africa - to develop recommendations and share good practices. The report identifies innovative policies and offers practical policy recommendations, adapted to the specificities of African economies. Drawing on the most recent available statistics, this analysis of development dynamics aims to help African leaders reach the targets of the African Union's Agenda 2063 at all levels: continental, regional, and national. Every year this report will focus on one strategic theme. This first edition explores the dynamics of growth, jobs, and inequalities. It proposes ten decisive actions to promote sustainable economic and social development and to strengthen institutions in Africa. This volume also feeds into a policy debate between African Union's nations, citizens, entrepreneurs and researchers. It aims to be part of a new co-operation between countries and regions focused on mutual learning and the preservation of common goods. This report is the result of a partnership between the African Union Commission and the OECD Development Centre

Africa's Development in Historical Perspective Emmanuel Akyeampong 2014-08-11 This edited volume addresses the root causes of Africa's persistent poverty through an investigation of its longue durée history. It interrogates the African past through disease and demography, institutions and governance, African economies and the impact of the export slave trade, colonialism, Africa in the world economy, and culture's influence on accumulation and investment. Several of the chapters take a comparative perspective, placing Africa's developments aside other global patterns. The readership for this book spans from the informed lay reader with an interest in Africa, academics and undergraduate and graduate students, policy makers, and those in the development world.

China-Africa and an Economic Transformation Arkebe Oqubay 2019 This volume considers China-Africa relations in the context of a global division of labour and power, and through the history and experiences of both China and Africa. It examines the core ideas of structural transformation, productive investment and industrialization, international trade, infrastructure development, and financing.

Kicking Away the Ladder Ha-Joon Chang 2002 'The most important book about the world economy to be published in years.' Prospect 'This book is a joy: a fantastically useful teaching aid... a very necessary historical conscience in an age of amnesia.' The Business Economist 'A provocative critique of mainstream economists' sermons directed to developing

countrieshellip; It demands attention.' Charles Kindleberger, Emeritus Professor of Economics, MIT 'A scholarly tour-de-forcehellip; essential reading for industrial policy-makers in the twenty-first century.' Lance Taylor, Professor of Economics, New School University 'hellip;a lively, knowledgeable and original contribution to international political economy.' John Toye, Professor of Economics, University of Oxford 'hellip;an original and immensely valuable contribution to current debates on development.' Peter Evans, Professor of Sociology, University of California, Berkeley How did the rich countries really become rich? In this provocative study, Ha-Joon Chang examines the great pressure on developing countries from the developed world to adopt certain 'good policies' and 'good institutions', seen today as necessary for economic development. Adopting an historical approach, Dr Chang finds that the economic evolution of now-developed countries differed dramatically from the procedures that they now recommend to poorer nations. His conclusions are compelling and disturbing: that developed countries are attempting to 'kick away the ladder' by which they have climbed to the top, thereby preventing developing countries from adopting policies and institutions that they themselves used.

The African Diaspora Patrick Manning 2010-03-05 Patrick Manning follows the multiple routes that brought Africans and people of African descent into contact with one another and with Europe, Asia, and the Americas. In joining these stories, he shows how the waters of the Atlantic Ocean, the Mediterranean Sea, and the Indian Ocean fueled dynamic interactions among black communities and cultures and how these patterns resembled those of a number of connected diasporas concurrently taking shaping across the globe. Manning begins in 1400 and traces the connections that enabled Africans to mutually identify and hold together as a global community. He tracks discourses on race, changes in economic circumstance, the evolving character of family life, and the growth of popular culture. He underscores the profound influence that the African diaspora had on world history and demonstrates the inextricable link between black migration and the rise of modernity. Inclusive and far-reaching, *The African Diaspora* proves that the advent of modernity cannot be fully understood without taking the African peoples and the African continent into account.

Global Health in Africa Tamara Giles-Vernick 2013-11-15 *Global Health in Africa* is a first exploration of selected histories of global health initiatives in Africa. The collection addresses some of the most important interventions in disease control, including mass vaccination, large-scale treatment and/or prophylaxis campaigns, harm reduction efforts, and nutritional and virological research. The chapters in this collection are organized in three sections that evaluate linkages between past, present, and emergent. Part I, "Looking Back," contains four chapters that analyze colonial-era interventions and reflect upon their implications for contemporary interventions. Part II, "The Past in the Present," contains essays exploring the historical dimensions and unexamined assumptions of contemporary disease control programs. Part III, "The Past in the Future," examines two fields of public health intervention in which efforts to reduce disease transmission and future harm are premised on an understanding of the past. This much-needed volume brings together international experts from the disciplines of demography, anthropology, and historical epidemiology. Covering health initiatives from smallpox vaccinations to malaria control to HIV campaigns, *Global Health in Africa* offers a first comprehensive look at some of global health's most important challenges.

Poverty in a Rising Africa Kathleen Beegle 2016-03-10 Perceptions of Africa have changed

dramatically. Viewed as a continent of wars, famines and entrenched poverty in the late 1990s, there is now a focus on “Africa rising” and an “African 21st century.” Two decades of unprecedented economic growth in Africa should have brought substantial improvements in well-being. Whether or not they did, remains unclear given the poor quality of the data, the nature of the growth process (especially the role of natural resources), conflicts that affect part of the region, and high population growth. *Poverty in a Rising Africa* documents the data challenges and systematically reviews the evidence on poverty from monetary and nonmonetary perspectives, as well as a focus on dimensions of inequality. Chapter 1 maps out the availability and quality of the data needed to track monetary poverty, reflects on the governance and political processes that underpin the current situation with respect to data production, and describes some approaches to addressing the data gaps. Chapter 2 evaluates the robustness of the estimates of poverty in Africa. It concludes that poverty reduction in Africa may be slightly greater than traditional estimates suggest, although even the most optimistic estimates of poverty reduction imply that more people lived in poverty in 2012 than in 1990. A broad-stroke profile of poverty and trends in poverty in the region is presented. Chapter 3 broadens the view of poverty by considering nonmonetary dimensions of well-being, such as education, health, and freedom, using Sen's (1985) capabilities and functioning approach. While progress has been made in a number of these areas, levels remain stubbornly low. Chapter 4 reviews the evidence on inequality in Africa. It looks not only at patterns of monetary inequality in Africa but also other dimensions, including inequality of opportunity, intergenerational mobility in occupation and education, and extreme wealth in Africa.

Kicking Away the Ladder Ha-Joon Chang 2002-07-01 How did the rich countries really become rich? In this provocative study, Ha-Joon Chang examines the great pressure on developing countries from the developed world to adopt certain 'good policies' and 'good institutions', seen today as necessary for economic development. His conclusions are compelling and disturbing: that developed countries are attempting to 'kick away the ladder' with which they have climbed to the top, thereby preventing developing countries from adopting policies and institutions that they themselves have used.

Civilizing Nature Bernhard Gissibl 2012-11-30 National parks are one of the most important and successful institutions in global environmentalism. Since their first designation in the United States in the 1860s and 1870s they have become a global phenomenon. The development of these ecological and political systems cannot be understood as a simple reaction to mounting environmental problems, nor can it be explained by the spread of environmental sensibilities. Shifting the focus from the usual emphasis on national parks in the United States, this volume adopts an historical and transnational perspective on the global geography of protected areas and its changes over time. It focuses especially on the actors, networks, mechanisms, arenas, and institutions responsible for the global spread of the national park and the associated utilization and mobilization of asymmetrical relationships of power and knowledge, contributing to scholarly discussions of globalization and the emergence of global environmental institutions and governance.

Handbook of African Development Tony Binns 2018-04-27 This handbook presents an extensive new overview of African development - past, present and future. It addresses key core themes and topics that are pertinent to the continent's development - including sections on history, health and food, politics, economics, rural and urban development, and

development policy and practice. The volume draws on the expertise of over 60 of the world's leading scholars to provide a detailed and up-to-date analysis of the key opportunities and challenges that confront Africa, and how such issues are being addressed. Arranged by key themes, the handbook provides not only a historical understanding of the past, but also political perspectives on the future. The chapters provide critically informed analyses of their topics by drawing upon the latest conceptual viewpoints and applied experiences in Africa in the form of case studies to offer a comprehensive examination of the opportunities, challenges, key debates and future prospects. This handbook is an invaluable state-of-the-art overview and reference concerning many different aspects of Africa's development, which will be of interest to academics in all fields of African studies, and also academics and students working in cognate disciplines such as development studies, geography, history, politics and economics.

How Europe Underdeveloped Africa Walter Rodney 2018-11-27 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

Agricultural Development in China and Africa Xiaoyun Li 2012 First Published in 2011. Routledge is an imprint of Taylor & Francis, an informa company.

Africa Peter Lewis 2018-02-20 This book focuses on the historical construction of African states, the modes of political control in the region, and the character of political elites. It examines the nature of political legitimacy and the avenues of participation or withdrawal pursued by various popular sectors.

An Ecological and Historical Perspective on Agricultural Development in Southeast Asia Y?jir? Hayami 2000 How location, natural resources, and different policies toward the elite's preemption of unused land shaped the historical development of different agrarian structures across Southeast Asia, conditioning agricultural growth performance until today.

Rethinking and Unthinking Development Busani Mpofo 2019-03-01 Development has remained elusive in Africa. Through theoretical contributions and case studies focusing on Southern Africa's former white settler states, South Africa and Zimbabwe, this volume responds to the current need to rethink (and unthink) development in the region. The authors explore how Africa can adapt Western development models suited to its political, economic, social and cultural circumstances, while rejecting development practices and discourses

based on exploitative capitalist and colonial tendencies. Beyond the legacies of colonialism, the volume also explores other factors impacting development, including regional politics, corruption, poor policies on empowerment and indigenization, and socio-economic and cultural barriers.

African Seaports and Maritime Economics in Historical Perspective Ayodeji Olukoju 2020-07-14 This book updates African maritime economic history to analyse the influence of seaports and seaborne trade, processes of urbanization and development, and the impact of globalization on port evolution within the different regions of Africa. It succeeds the seminal collection edited by Hoyle & Hilling which was conceived during a phase of sustained economic growth on the African continent, and builds on a similar trend where African economies have experienced processes of economic growth and the relative improvement of welfare conditions. It provides valuable insights on port evolution and the way the maritime sector has impacted the hinterland and the regional economic structures of the affected countries, including the several and varied agents involved in these activities. *African Seaports and Maritime Economics in Historical Perspective* will be useful for economists, historians, and geographers interested in African and maritime issues, as well as policy makers interested in path-dependence and long-term analysis

Economic Growth and Development in Africa Horman Chitonge 2015-01-09 In recent years, Africa has undergone the longest period of sustained economic growth in the continent's history, drawing the attention of the international media and academics alike. This book analyses the Africa Rising narrative from multidisciplinary perspectives, offering a critical assessment of the explanations given for the poor economic growth and development performance in Africa prior to the millennium and the dramatic shift towards the new Africa. Bringing in perspectives from African intellectuals and scholars, many of whom have previously been overlooked in this debate, the book examines the construction of Africa's economic growth and development portraits over the years. It looks at two institutions that play a vital role in African development, providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences. The insightful analysis reveals that if Africa is rising, only 20-30 per cent of Africans are aboard the rising ship, and the main challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth. This book makes the complex, and sometimes confusing debates on Africa's economic growth experience more accessible to a wide range of readers interested in the Africa story. It is essential reading for students and researchers in African Studies, and will be of great interest to scholars in Development Studies, Political Economy, and Development Economics.

Africa's Development in Historical Perspective Emmanuel Akyeampong 2014-08-11 Why has Africa remained persistently poor over its recorded history? Has Africa always been poor? What has been the nature of Africa's poverty and how do we explain its origins? This volume takes a necessary interdisciplinary approach to these questions by bringing together perspectives from archaeology, linguistics, history, anthropology, political science, and economics. Several contributors note that Africa's development was at par with many areas of Europe in the first millennium of the Common Era. Why Africa fell behind is a key theme in this volume, with insights that should inform Africa's developmental strategies.

2014-08-14 Exiled populations, who increasingly refer to themselves as diaspora communities, hold a strong stake in the fate of their countries of origin. In a world becoming ever more interconnected, they engage in 'long-distance politics' towards, send financial remittances to and support social development in their homelands. Transnational diaspora networks have thus become global forces shaping the relationship between countries, regions and continents. This important intervention, written by scholars working at the cutting edge of diaspora and conflict, challenges the conventional wisdom that diaspora are all too often warmongers, their time abroad causing them to become more militant in their engagement with local affairs. Rather, they can and should be a force for good in bringing peace to their home countries. Featuring in-depth case studies from the Horn of Africa, including Somalia and Ethiopia, this volume presents an essential rethinking of a key issue in African politics and development.

Good Growth and Governance in Africa Kwesi Botchwey 2012 This volume reflects the highlights of their deliberations.

Africa's Transport Infrastructure Heinrich Bofinger 2011-01-01 This book will be of interest to governments in the region and to multilateral and bilateral aid and lending agencies, as well as to graduate students, faculty, and researchers in African studies and transport studies. --Book Jacket.

Africa's Cities Somik Vinay Lall 2017-02-09 Cities in Sub-Saharan Africa are experiencing rapid population growth. Yet their economic growth has not kept pace. Why? One factor might be low capital investment, due in part to Africa's relative poverty: Other regions have reached similar stages of urbanization at higher per capita GDP. This study, however, identifies a deeper reason: African cities are closed to the world. Compared with other developing cities, cities in Africa produce few goods and services for trade on regional and international markets To grow economically as they are growing in size, Africa's cities must open their doors to the world. They need to specialize in manufacturing, along with other regionally and globally tradable goods and services. And to attract global investment in tradables production, cities must develop scale economies, which are associated with successful urban economic development in other regions. Such scale economies can arise in Africa, and they will—if city and country leaders make concerted efforts to bring agglomeration effects to urban areas. Today, potential urban investors and entrepreneurs look at Africa and see crowded, disconnected, and costly cities. Such cities inspire low expectations for the scale of urban production and for returns on invested capital. How can these cities become economically dense—not merely crowded? How can they acquire efficient connections? And how can they draw firms and skilled workers with a more affordable, livable urban environment? From a policy standpoint, the answer must be to address the structural problems affecting African cities. Foremost among these problems are institutional and regulatory constraints that misallocate land and labor, fragment physical development, and limit productivity. As long as African cities lack functioning land markets and regulations and early, coordinated infrastructure investments, they will remain local cities: closed to regional and global markets, trapped into producing only locally traded goods and services, and limited in their economic growth.

African Population and Capitalism Dennis D. Cordell 1994 A collection of 17 essays on the colonial era in Africa designed to demonstrate to demographers the importance of historical

and social contexts in thinking about African populations, and to historians the importance and complex role played by population changes in social and economic changes. Two essays are in French. The 1987 edition sold out quickly and was rarely seen and little known; the wider distribution and lower price of the paper should prevent that fate overtaking the second. Paper edition (unseen), \$17.95. No index. Annotation copyright by Book News, Inc., Portland, OR

The History of Business in Africa Grietje Verhoef 2017-10-16 This book offers a comprehensive study of the history of African business. By analyzing the specificities of African business culture, as well as the dynamically changing African policy context, the author sheds new light on the development of African enterprises, markets and institutions. The book covers a wide range of historical studies, starting with the earliest exchange networks, the new market opportunities resulting from European penetration, the dualism of state-owned companies and private enterprises during the twentieth century, the role of foreign direct investments and multinational companies during the 1990s, and the globalization of African business.

Understanding Africa Richard A. Fredland 2001 Africa is a fascinating, complex, and infuriating place. This valuable work covers a broad range of topics aiming to make Africa comprehensible to the general reader. Richard A. Fredland based this book on his extensive travels and research in many African countries. The author offers a systematic and integrated portrait of the continent and its peoples through detailed analysis of African history, political systems, social, cultural and economic development, and present-day problems and prospects. The book is richly illustrated with photographs and supplemented with tables and appendices. A Burnham Publishers book

Diverse Development Paths and Structural Transformation in the Escape from Poverty Martin Andersson 2016-04-21 This volume analyzes the experiences of developing countries in Asia, Latin America, and Sub-Saharan Africa, and examines how they might catch up. Based on growth performance across the developing world over the last five decades, it offers a thorough account of the possibilities to engage in such processes in an increasingly globalized world. Together, the chapters highlight the diversity and variation of development pathways and provide valuable lessons and implications for how to approach this difficult question. The book shows the importance of acknowledging that the process of development is dynamic and that the possibilities for catch up are situation dependent. At the same time it makes clear that without structural change, and in particular agricultural transformation, sustained catch up is unlikely to happen. The volume demonstrates how analysis of current growth processes in developing countries can be enriched by paying closer attention to the multifaceted nature of both economic backwardness and successful pathways to escape it.

It interrogates the African past through disease and demography, institutions and governance, African economies and the impact of the export slave trade, colonialism, Africa in the world economy, and culture's influence on accumulation and investment. from the informed lay reader with an interest in Africa, academics and undergraduate and graduate students, policy makers, and those in the development world.

Themes in West Africa's History Emmanuel Kwaku Akyeampong 2006-01-15 There has long been a need for a new textbook on West Africa's history. In *Themes in West Africa's History*, editor Emmanuel Kwaku Akyeampong and his contributors meet this need, examining key themes in West Africa's prehistory to the present through the lenses of their different disciplines. The contents of the book comprise an introduction and thirteen chapters divided into three parts. Each chapter provides an overview of existing literature on major topics, as well as a short list of recommended reading, and breaks new ground through the incorporation of original research. The first part of the book examines paths to a West African past, including perspectives from archaeology, ecology and culture, linguistics, and oral traditions. Part two probes environment, society, and agency and historical change through essays on the slave trade, social inequality, religious interaction, poverty, disease, and urbanization. Part three sheds light on contemporary West Africa in exploring how economic and political developments have shaped religious expression and identity in significant ways. *Themes in West Africa's History* represents a range of intellectual views and interpretations from leading scholars on West Africa's history. It will appeal to college undergraduates, graduate students, and scholars in the way it draws on different disciplines and expertise to bring together key themes in West Africa's history, from prehistory to the present.
