**Finding the Mother Tree** Suzanne Simard 2021-05-04 NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; her TED talks have been viewed by more than 10 million people worldwide. In this, her first book, now available in paperback, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths--that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes--in inspiring, illuminating, and accessible ways—how trees, living side by side for hundreds of years, have evolved, how they learn and adapt their behaviors, recognize neighbors, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies--and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. And Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them. And as she writes of her scientific quest, she writes of her own journey, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world.

**Open Systems Dependability** Mario Tokoro 2015-06-16 The book describes a fundamentally new approach to software dependability, considering a software system as an ever-changing system due to changes in service objectives, users' requirements, standards and regulations, and to advances in technology. Such a system is viewed as an Open System since its functions, structures, and boundaries are constantly changing. Thus, the approach to dependability is called Open Systems Dependability. The DEOS technology realizes Open Systems Dependability. It puts more emphasis on stakeholders' agreement and accountability achievement for business/service continuity than in elemental technologies.

**Cloud- und Open Source-basierte Integrationsplattformen** Theilig, Max-Marcel 2019-12-19 Die Digitalisierung des deutschen Mittelstands schreitet kontinuierlich voran, wenngleich bei noch vielen Unternehmen grundlegende Komponenten einer Digitalinfrastruktur fehlen oder nicht im vollen, gewünschten Umfang vorhanden sind: Wie eine eigene Website, CRM- oder ERP-Systeme. Im Zuge des Fortschritts sind in den Unternehmen in den letzten Jahren mehr und mehr unterschiedliche IT Systeme entstanden, die oft noch nicht miteinander kommunizieren können und Insellösungen darstellen. Gerade das Cloud Computing ermöglicht die einfache und schnelle Nutzung neuer Softwarelösungen, was wiederum die Vielfalt der genutzten IT-Systeme positiv beeinflusst. Die Anbindung von Cloud Diensten und die Verbindung bestehender On-Premise IT-Systeme stellt eine zentrale Herausforderung für kleine und mittelständische Unternehmen (KMU) dar. Das vom BMWI geförderte Projekt Open Integration (OIH) nimmt sich der Herausforderung an. Im Rahmen des vorliegenden Beitrags werden die Ergebnisse von zwei Abschlussarbeiten präsentiert, die sowohl die Governancestrukturen als auch die Geschäftsmodelle von existierenden Cloud- und Open Source-basierten Integrationsplattformen (IPaaS) anhand von abgeleiteten Kriterien untersucht haben. Die Ergebnisse der Analysen werden in

Form des Business Model Canvas, Steckbriefen, Vergleichstabellen und Business Blueprints dargestellt. Damit wird die Frage beantwortet, wie die Governancestruktur und das Geschäftsmodell eines IPaaS-Anbieters, z. B. des OIHs, aussehen kann. The digitalization of the German "Mittelstand" has been on the move regardless of whether companies lack the basic components of the modern infrastructure or are not able to utilize them to their necessary extent (e.g. an own web page, CRM- or ERP-systems). As a result of these evolving companies various IT-systems have been obtained, which are often not able to intercommunicate and are ultimately represent as isolated solutions. In parallel, the coming about of Cloud Computing facilitated the quick and simple usage of new solutions and in turn resulted in benefiting the entire IT landscape. However, the integration of Cloud Services in conjunction with existing on-premise solutions constitutes a central challenge for small and medium enterprises (SME). Consequently, the Open Integration Hub (OIH), a BMWi funded project, has actively tackled this challenge. Based on the scope of research article at hand, this paper will present the results of two theses that draw on the topic of governance as well as business models for existing Open Source Integration Platforms as a Service (IPaaS) and its representation in current literature. In order to answer the question of how best practices for governance and business model for an IPaaS vendors such as the OIH could look like, the results will be exhibited through means of business model canvases, briefings, comparison tables, and business blue prints. In the scope of the research article in hand the results of 2 theses will be summarized, that draws on the topic of governance as well as business models for existing Open Source Integration Platforms as a Service (IPaaS) and its representation in current literature. The results will be presented in the mean of business model canvases, briefings, comparison tables and business blue prints. That answers the question how the best practice governance and business model of an IPaaS vendors, like the OIH, could look like.

**Enhancing and analysing Project Communication** Kristina Pelikan 2019-04-18 Different cultures and languages make web-based communication among the members of international research projects often complex. Focussing on frequently neglected internal communication, this cumulative PhD thesis seeks to present methods from applied LSP research on a concrete case study - a research project from the area of Public Health. Aiming to establish a winwin situation between systematic approaches and communication optimisation, the case study is also used to verify known models. Systematic approaches can be beneficial for enhancing project communication, if they are part of a circle of theoria cum praxi. The thesis closes with appeals to linguists, project leaders and funding agencies for improving project communication as well as the involvement of applied linguistics in future.

*Entwicklung workflowbasierter eLearning-Dienste für den Einsatz an Realschulen* Jonathan Ufer 2011 Die Integration neuer Medien und Technologien in den Unterricht an allgemein bildenden Schulen in Deutschland ist noch nicht in dem gewünschten Masse erfolgt. Lehrpersonen mangelt es häufig an der nötigen Kompetenz beziehungsweise Zeit, ihren Unterricht durch den Einsatz neuer Medien anzureichern. Es fehlen Dienste, die Lehrpersonen bei der Durchführung von eLearning in ihrem Unterricht unterstützen. Die vorliegende Arbeit zeigt, wie workflowbasierte eLearning-Dienste für Realschulen entwickelt werden können. Hierfür wird zunächst das Potenzial aktueller Internettechnologien für den Einsatz im Unterricht analysiert und Anforderungen von Lehrpersonen an eLearning-Dienste werden erfasst. Es wird ein Baukasten mit fünf elementaren und sieben komplexen eLearning-Diensten spezifiziert. Zu jedem der eLearning-Dienste wird ein eLearning-Prozessmodell entwickelt. Es wird exemplarisch gezeigt, wie die eLearning-Dienste als eLearning-Workflows implementiert werden können. Schliesslich wird die Einsetzbarkeit der eLearning-Dienste im Realschulunterricht evaluiert.

Murder Alfresco Nadia Gordon 2010-07-01 A disturbing murder scene makes a Napa Valley chef hungry for justice in this cozy mystery by the author of *Death by the Glass*. Returning from a party late one night, chef Sunny McCoskey is the first to discover the body of a murdered woman left outside a local winery. Shortly before, she'd seen a truck leaving a local winery, driving without its headlights on. Was it the murderer? And did the murderer see her as well? Thrust into the center of a crime that has rattled the tranquil Napa Valley, Sunny pursues her own investigation, a journey that takes her from northern California's wine country to the insular houseboat community of Sausalito along the San Francisco Bay. Uncovering a tangle of secret liaisons, Sunny closes in on the murderer, who responds with one more desperate act. With *Murder Alfresco*, author Nadia Gordon again takes us into the heart of the food and wine culture of the Napa and Sonoma Valleys, and introduces us to an array of irreverent characters. As the *Los Angeles Times* said, "Sunny is a welcome, energetic heroine. . . . She and her pals are fun to be around." Praise for *Sharpshooter* "[Sunny] is bright, tenacious, and extremely likable, and Gordon paints a vivid portrait of the Napa Valley and its wine-and-food culture. I'm looking forward to many more novels in this intriguing new series." —Marcia Muller, *New York Times*-bestselling author of the Sharon McCone mysteries "Napa Valley, the good life, sunny skies, fine cuisine, and fleshy reds. But, isn't there something murky at the bottom of the bottle? Yes, and it is murder, no less. The mystery of wine . . . If a wine does not have some mystery to it, we call it plonk. *Sharpshooter* is not plonk. A crime novel with taste." —Kermit Lynch, author of *Adventures on the Wine Route* "Those of us who enjoy an

IT-unterstütztes Wissensmanagement: Theoretische Aufarbeitung und praktische Einführung einer Wissensmanagementlösung im Hochschulbereich Martin Zithier 2015-04 „Wissen ist Macht.“ Dieses Zitat aus dem 16. Jahrhundert beweist auch heute noch – vielleicht mehr denn je – seine Gültigkeit. An Universitäten und Fachhochschulen bildet Wissen die zentrale Ressource. Die Wissensentwicklung durch die Forschung und die Wissensweitergabe durch die Lehre stellen zentrale Aufgabenbereiche von Hochschulen dar. Durch das Management von Wissen bieten sich viele Möglichkeiten, die auch an Hochschulen Prozesse der Wissensentwicklung, -verteilung, -speicherung und -strukturierung unterstützen können. Ziel dieser Arbeit ist es, konkrete Einsatzzwecke von Wissensmanagement an Hochschulen zu analysieren sowie einen Überblick über aktuelle Wissensmanagementwerkzeuge und deren Einsatz zu schaffen. Dazu werden der Wissensbegriff als auch Wissensmanagement im Kontext der IT-Unterstützung betrachtet.

**Gestire il flusso di lavoro in Alfresco** Franchini Roberto Chi pensa che l'informatica sia solo programmazione si sbaglia di grosso. L'informatica è soprattutto progettazione e gestione

dell'informazione. Negli ultimi cinque anni ho avuto modo di mettere le mani "dentro" Alfresco. In internet si possono trovare diversi giudizi a riguardo, molto differenti. Personalmente, prima di esprimere un giudizio "ad alta voce", ho voluto toccare con mano lo strumento. Non nascondo che ne sono rimasto piacevolmente stupito. Alfresco è un grande progetto con un grande bacino di utenti, scritto in java che tiene conto di vari dettagli, specifiche di riferimento, problematiche di diverse tipologie di utilizzatori. Gestire un progetto del genere non è per niente facile. Nonostante questo, è impressionante come sia visibile l'impronta dei tecnici Java, degli architetti software che ne definiscono le linee guida di realizzazione. Io in fondo (molto in fondo) sono un tecnico e apprezzo l'evidente sforzo di volere restare coerenti con un mondo che evolve e che è importante seguire. Tutto questo ha però un evidente difetto: Alfresco è uno strumento complesso. E' un software che può fare e dare tanto di più rispetto agli altri, ma che deve essere "capito dentro". L'obiettivo di questa guida è offrire scelte open source ai prodotti Enterprise Content Management (ECM) commerciali. Alfresco Community con SinekartaPI e Sinekarta, offre un vero sistema ECM fornendo un'alternativa Open Source a sistemi commerciali di gestione documentale e protocollazione. Ogni giorno, oltre sette milioni di utenti aziendali e pubbliche amministrazioni in settantacinque paesi si affidano ad Alfresco gestendo quattro miliardi di documenti, file e processi, dietro il firewall, nel cloud e persino sui loro dispositivi mobili (secondo le informazioni elencate da Alfresco [www.alfresco.com](http://www.alfresco.com)). Alfresco è il CMS basato su Java più popolare con oltre 25.000 utenti attivi del forum e con oltre 300 estensioni dell'applicazione in forge, creato utilizzando standard completamente aperti. Questo libro si concentra su esigenze di business piuttosto che su sintassi tecniche, mostrando come fare qualcosa, con esempi passo-passo. Spiega come funzionano i workflow e come personalizzarli in base alle esigenze reali e quali scelte, sono disponibili e come si adattano nel quadro generale. Inoltre è spiegato in modo chiaro e dettagliato come con l'unione di tool come SinekartaPI e Sinekarta, Alfresco diventa un vero e proprio sistema adatto a qualsiasi pubblica amministrazione fornendo un valido e a norma di legge sistema Open Source di protocollazione, firma digitale e conservazione sostitutiva dei documenti

In it, you'll tackle hands-on examples for building applications on CMIS repositories from both the client and the server sides. You'll learn how to create new content-centric applications that install and run in any CMIS-compliant repository. About The Technology Content Management Interoperability Services (CMIS) is an OASIS standard for accessing content management systems. It specifies a vendor-and language-neutral way to interact with any compliant content repository. Apache Chemistry provides complete reference implementations of the CMIS standard with robust APIs for developers writing tools, applications, and servers. About This Book CMIS and Apache Chemistry in Action is a comprehensive guide to the CMIS standard and related ECM concepts. In it, you'll find clear teaching and instantly useful examples for building content-centric client and server-side applications that run against any CMIS-compliant repository. In fact, using the CMIS Workbench and the InMemory Repository from Apache Chemistry, you'll have running code talking to a real CMIS server by the end of chapter 1. This book requires some familiarity with content management systems and a standard programming language like Java or C#. No exposure to CMIS or Apache Chemistry is assumed. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. What's Inside The only CMIS book endorsed by OASIS Complete coverage of the CMIS 1.0 and 1.1 specifications Cookbook-style tutorials and real-world examples About the Authors Florian Müller, Jay Brown, and Jeff Potts are among the original authors, contributors, and leaders of Apache Chemistry and the OASIS CMIS specification. **Electronic Government and the Information Systems Perspective** Kim Normann Andersen  
2010-08-18 In front of you are the proceedings of the First International Conference on Electronic Government and Information Systems Perspective, EGOVIS. This conference builds on the tradition of its predecessors, the Electronic Government Conferences (EGOV) under the DEXA umbrella, which have been ongoing for nine years, but it also - cluded some innovations. In view of the large number of electronic government c- ferences, we found it important to focus the scope of the conference a little and to increase the quality requirements. Hence this year's conference featured a tougher review process and a smaller set of accepted papers. As a result, these proceedings contain the very best papers of 2010 covering various important aspects of electronic government and information systems used in the public sector. With an acceptance rate of less than 20% EGOVIS belongs to the top ten conferences in the world. The Program Committee accepted 13 full papers and 11 short papers, covering the most recent research trends in electronic government implementations, such as ICT for eGovernment services and monitoring, knowledge and content management systems for temporal and geo-spatial applications, interoperability for electronic government integrated architectures, decision and support tools for eDemocracy and direct parti- pation of citizens in the policy-making strategies, and Web 2. 0 and 3. 0 approaches for collaborative and transparent public sector services.

**Amity and Prosperity** Eliza Griswold 2018-06-12 In Amity and Prosperity, the prizewinning poet and journalist Eliza Griswold exposes the tattered edges of the social fabric in rural America. In a work rich with narrative suspense, she explores the volatile personalities and politics of a small Allegheny town that has an abundance of natural gas but no municipal water supply. The result is a definitive guide to the fracking debate, and to the larger social and environmental hazards that are upending rural America. Stacey Haney, a lifelong resident of Amity, Pennsylvania, is struggling to support her children when the fracking boom comes to town. Like most of her neighbors, she sees the energy companies' payments as a windfall. Soon trucks are rumbling down her unpaved road and a fenced-off fracking site rises on adjacent land. But her annoyance gives way to concern and then to fear as domestic animals and pets begin dying and mysterious illnesses strike her family--despite the companies' insistence that nothing is wrong. Griswold masterfully chronicles Haney's transformation into an unlikely whistleblower as she launches her own investigation into corporate wrongdoing. As she takes her case to court, Haney inadvertently reveals the complex rifts in her community and begins to reshape its attitudes toward outsiders, corporations, and the federal government. Amity and Prosperity uses her gripping and moving tale to show the true costs of our energy infrastructure and to illuminate the predicament of rural America in the twenty-first century.
