Learn Better Ulrich Boser 2019-09-03 For centuries, experts have argued that learning was about memorizing information: You're supposed to study facts, dates, and details; burn them into your memory; and then apply that knowledge at opportune times. But this approach to learning isn't nearly enough for the world that we live in today, and in *Learn Better* journalist and education researcher Ulrich Boser demonstrates that how we learn can matter just as much as what we learn. In this brilliantly researched book, Boser maps out the new science of learning, showing how simple techniques like comprehension check-ins and making material personally relatable can help people gain expertise in dramatically better ways. He covers six key steps to help you "learn how to learn," all illuminated with fascinating stories like how Jackson Pollock developed his unique painting style and why an ancient Japanese counting device allows kids to do math at superhuman speeds. Boser's witty, engaging writing makes this book feel like a guilty pleasure, not homework. *Learn Better* will revolutionize the way students and society alike approach learning and makes the case that being smart is not an innate ability--learning is a skill everyone can master. With Boser as your guide, you will be able to fully capitalize on your brain's remarkable ability to gain new skills and open up a whole new world of possibilities.

[Fun-Schooling Curriculum - Homeschooling with Minecraft](#) Sarah Janisse Brown 2017-02-13 Fun-schooling Curriculum - Homeschooling with Minecraft: The Beginners Journal Animal and Farm Theme B1 & B2 ideal for ages 7-10 (1st-3rd grade) This Minecraft based curriculum is perfect for creative children, and for new homeschoolers. Cover all basic Elementary subjects while having fun with farming, building, design and animals in the Minecraft world. Our delight directed approach works great for all students, especially those resistant to anything "school"-related. Uses the Dyslexie Font to make reading easy for children with reading confusion. Perfect for students with Dyslexia, Asperger's Syndrome, ADHD and other learning challenges. Mrs Europaea's family loves this book: "Fun-schooling with Thinking Tree Books has saved my family endless bouts of tantrums from my child who was always too anxious to focus in a traditional school setting and would act out. With this newest book, Homeschooling with Minecraft, the Browns have once again created a multipurpose curriculum that could be used simultaneously with various ages. It is such a blessing and stress reliever to be able to teach both my 9 year old nephew and my own children ages 5 and 3 out of the same text, only having to supplement with reference resources

that are age appropriate. This book offers journal prompts, varying levels of math, drawing ideas, coloring pages, geography and much more. It doesn't matter which method you are using, Mason, Waldorf, Classical or even if you are Unschooling, Thinking Tree Books are appropriate to meet any educational goal." M. Ward loves how this journal compares Minecraft to real life: "This journal incorporates everything my son loves: animals, lego, nature, books, and of course Minecraft. And the best part about it all is that he loves working in these journals, and it's fun for him and not drudgery like so many school workbooks. It allows him to express his creativity even while working on subjects like math, so much so that it doesn't even feel like "school". I especially love the pages in this journal where he is to compare real life animals or farming to that which he sees on Minecraft. I see this meshing well with real hands on gardening (which we were already planning to do this spring). He's still working on his reading fluency, so I'm happy to have something with which he can further his education on other topics without being hampered by his stage of literacy."
