Local Electricity Markets Tiago Pinto 2021-07-03 Local Electricity Markets introduces the fundamental characteristics, needs, and constraints shaping the design and implementation of local electricity markets. It addresses current proposed local market models and lessons from their limited practical implementation. The work discusses relevant decision and informatics tools considered important in the implementation of local electricity markets. It also includes a review on management and trading platforms, including commercially available tools. Aspects of local electricity market infrastructure are identified and discussed, including physical and software infrastructure. It discusses the current regulatory frameworks available for local electricity market development internationally. The work concludes with a discussion of barriers and opportunities for local electricity markets in the future. Delineates key components shaping the design and implementation of local electricity market structure Provides a coherent view on the enabling infrastructures and technologies that underpin local market expansion Explores the current regulatory environment for local electricity markets drawn from a global panel of contributors Exposes future paths toward widespread implementation of local electricity markets using an empirical review of barriers and opportunities Reviews relevant local electricity market case studies, pilots and demonstrators already deployed and under implementation

Grammar as Processor Roland Pfau 2009-01-14 Spontaneous speech errors provide valuable evidence not only for the processes that mediate between a communicative intention and the articulation of an utterance but also for the types of grammatical entities that are manipulated during production. This study proposes an analysis of speech errors that is informed by grammar theory. In particular, it is shown how characteristic properties of erroneous German utterances can be accounted for within Distributed Morphology (DM). The investigation focuses on two groups of errors: Errors that result from the manipulation of semantic and morphosyntactic features, and errors which appear to involve the application of a post-error repair strategy. It is argued that a production model which incorporates DM allows for a straightforward account of the attested, sometimes complex, error patterns. DM mechanisms, for instance, render unnecessary the assumption of repair processes. Besides providing an account for the attested error patterns, the theory also helps us in explaining why certain errors do not occur. In this sense, DM makes for a psychologically real model of grammar.

Remote Sensing for Archaeological Heritage Management David Cowley 2011 Remote sensing is one of the main foundations of archaeological data, underpinning knowledge and understanding of the historic environment. The volume, arising from a symposium organised by the Europae Archaeologiae Consilium (EAC) and the Aerial Archaeology Research Group (AARG), provides up to date expert statements on the methodologies, achievements and potential of remote sensing with a particular focus on archaeological heritage management. Well-established approaches and techniques are set alongside new technologies and data-sources, with discussion covering relative merits and applicability, and the need for integrated approaches to understanding and managing the landscape. Discussions cover aerial photography, both modern and historic, LiDAR, satellite imagery, multi- and hyper-spectral data, sonar and geophysical survey, addressing both terrestrial and maritime contexts. Case studies drawn from the contrasting landscapes of Europe illustrate best practice and innovative projects.

The Official SAT Subject Test in World History Study Guide The College Board 2017-09-05 SAT Subject Tests are a valuable way to help students show colleges a more complete picture of their academic background and interests. Each year, nearly 100K high school students take a history SAT Subject Test to demonstrate their knowledge. Several colleges and universities also require or recommend students to take SAT Subject Tests for admission and/or placement. Taking a SAT Subject Test in history can be a great way for students to demonstrate interest in the humanities. The Official SAT Subject Test in World History Study Guide from the College Board is the only source of official questions and answer explanations. Created from the makers of the Subject Tests, this guide offers a total of four (two never-been released) forms of actual past World History exams for students to gain real practice. Students will gain valuable experience and raise their confidence by taking practice tests, learning about test structure, and gaining a deeper understanding of what is tested on the test. The Official SAT Subject Test in World History Study Guide will help students get ready for the test with:

- 4 full-length, previously administered tests in World History
- Detailed answer explanations for every question in all tests

Pulp Bleaching Today Hans Ulrich Suess 2010 This book describes the most effective application of chemicals in bleaching. It starts with a brief overview of the history of bleaching and then focuses on recent developments. The ban of chlorine from bleaching pulp has shifted bleaching to environmentally sound procedures. Elementary Chlorine Free bleaching (ECF bleaching) and Totally Chlorine Free bleaching (TCF bleaching) are explained. The potential of different bleaching chemicals is exemplified in detail with a special focus on what to do and what to avoid. Very recent knowledge about the sources of yellowing is utilized to explain the ideal strategy for the removal of chromophores and their precursors. Emphasis is placed on applicable bleaching, in clear contrast to sophisticated, complicated or simply expensive pseudo modern bleaching. The target of this book is to explain the potential and the limitations of different chemicals and to demonstrate the necessity of comprehensive solutions for an environmentally sound use of the raw material wood, of chemicals, and of water in the production of pulp with top quality and yield. This book should educate students in the art of bleaching, assist mill personal in their continuous effort for process optimization, help research and technology managers to

successfully select their targets, and be on hand as reference of the most recent bleaching technology.

Finding a Solution to Leadership Niels Brabandt 2019-10-21 Business and employee management are key subjects in business administration. For decades, actually for centuries, there has been a discussion about how effective leadership of people or employees can be realized. It has always been a major concern within market-based economic systems to learn how its products and services should be designed in order to generate consumer demand. That the discussion about business and employee management is more relevant than ever is linked to the fact that leadership situations are influenced by a variety of external factors. They include, in particular, political, cultural, social, demographic, economic, and technological developments. It is therefore required for business and employee management to be adapted to those external framework conditions on a permanent basis. In former times, the assumption in mainstream leadership research was that leadership success relied on specific personal characteristics. Later on, the prevailing view was that the decisive factors in employee management lied in specific leadership behavior or leadership styles. Today's research on leadership is dominated by situation-oriented approaches, providing for specific leadership concepts for specific organizational and employee-related structures. The present thesis is an attempt to bundle a variety of approaches to leadership with the aim of providing an overarching framework for concepts of a similar nature. Therefore, the leadership concept to be developed in what follows is to be characterized by the principles of holism and sustainability. The first step is to present the fundamentals of leadership and management in order to introduce key terms and concepts and provide an overview of the research on leadership. Chapter 3 deals with separately displaying the business and employee management approaches of various management pioneers, distinguishing between early and con-temporary pioneers. Each approach is presented in consideration of its key elements, its strengths and opportunities, as well as its weaknesses and limitations. The fourth chapter, finally, is devoted to developing a holistic and sustainable leader-ship concept.

Land Ownership and Land Use Development Erwin Hepperle 2017-01-10 Across Europe, land is constantly the subject of enormous and widely varied pressures. The land we have is shrinking in area due to numerous reasons, including those that are directly related to climate change and migration. In fact all disciplines that have responsibilities for the husbandry use, management, and administration of the land are forced to address the problems of how to plan and how to utilise this increasingly valuable resource. The papers contained within this book emerge from two symposia held in 2014 and 2015, which now have been arranged along four general themes reflecting the multi-disciplinary nature of the disciplines concerned with land. The first part is dedicated to the interpretation of key terms in their context and the dissimilar conceptual approaches in the governance of different states. It is followed by papers that identify the process of decision-taking: how to organize and co-operate. One large section addresses the identification of land pattern changes and the reason for it. The papers in the final cluster deal with the general theme of strategies and measures used to steer future evolution in land policies.

The publication addresses various needs that have to be balanced: the tasks of living space in the face of societal and demographic changes, infrastructure supply, challenges of an increasingly urbanised region, food production, 'green energy', natural hazards, habitats and cultural landscapes protection.

Proteomics in Practice Reiner Westermeier 2008-09-08 Still the only concise practical guide to laboratory experiments in proteomics, this new edition now also covers DIGE technology and liquid-chromatography, while the troubleshooting section has been considerably extended. Adopting a practical approach, the authors present the relevant techniques and explain the route to successful experimental design and optimal method selection. They cover such electrophoretic techniques as isoelectric focusing, SDS page, 2-D page, and DIGE, as well as liquid-chromatography techniques, such as ion exchange, affinity chromatography and reversed-phase HPLC. Mass-spectrometric techniques include MALDI, ESI, and FT ICR. Generously illustrated, partly in color, the book also features updates of protocols as well as animations illustrating crucial methodological steps on a companion website.

Language and Business Sylvia-Michèle Sternkopf 2004-07-28 Inhaltsangabe: Abstract: Small and medium-sized enterprises (SMEs) are the backbone of the German economy. Against the background of continuing globalisation, they are increasingly faced with the challenge of internationalisation. This study was designed as an empirical investigation of how well SMEs in the federal state of Saxony are prepared for this task of the future, which measures they take in order to market their products and services in the global marketplace, and it tries to identify their strengths and weaknesses in this respect. The very nature of this thesis is thus a truly interdisciplinary approach, investigating marketing aspects as well as linguistic factors. The main focus was on the language small and medium-sized companies use for their international communications. English has long become the lingua franca of the globalising economy, and this study set out to investigate how well SMEs are prepared to meet the linguistic requirements imposed on them by global business. Enterprises in the new German states are widely believed to be disadvantaged with regard to their communicative competence in English, since English played only a minor role for decades, but has risen to decisive significance within the past couple of years, taking many companies and their employees by surprise, finding them not as well prepared as their colleagues in the old German states. Still, finding their way to the new export markets in Western Europe, the Americas and Asia are vital for the survival of Saxon economy, and communicative competence in English as the lingua franca of international business is the major prerequisite for achieving this objective. Corporate communicative competence involves various aspects, including the foreign language skills of the employees covering the entire range of linguistic skills from oral communication including listening and speaking, giving presentations or participating in negotiations to writing skills ranging from reading and writing of various text types, including media literacy. Apart from the personal linguistic competence of the employees, the corporate linguistic competence of the company also plays a major role for the perception of the company on its international markets. Therefore this study focused on investigating how well SMEs present themselves in their corporate literature and on the internet, which instruments from the wide-ranging selection of marketing tools they apply for communicating [...]

Proteomics Sample Preparation Jörg von Hagen 2011-08-24 This long-awaited first guide to sample preparation for proteomics studies overcomes a major bottleneck in this fast growing technique within the molecular life sciences. By addressing the topic from three different angles -- sample, method and aim of the study -- this practical reference has something for every proteomics researcher. Following an introduction to the field, the book looks at sample preparation for specific techniques and applications and finishes with a section on the preparation of sample types. For each method described, a summary of the pros and cons is given, as well as step-by-step protocols adaptable to any specific proteome analysis task.

Easy Language - Plain Language - Easy Language Plus Christiane Maaß 2020-09-11 This book shows how accessible communication, and especially easy-to-understand languages, should be designed in order to become instruments of inclusion. It examines two well-established easy-to-understand varieties: Easy Language and Plain Language, and shows that they have complementary profiles with respect to four central qualities: comprehensibility, perceptibility, acceptability and stigmatisation potential. The book introduces Easy and Plain Language and provides an outline of their linguistic, sociological and legal profiles: What is the current legal framework of Easy and Plain Language? What do the texts look like? Who are the users? Which other groups are involved in the production and use of Easy and Plain Language offers? Which qualities are a hazard to acceptability and, thus, enhance their stigmatisation potential? The book also proposes another easy-to-understand variety: Easy Language Plus. This variety balances the four qualities and is modelled in the present book.

Discipline Equals Freedom Jocko Willink 2020-10-13 In this expanded edition of the 2017 mega-bestseller, updated with brand new sections like DO WHAT MAKES YOU HAPPY, SUGAR COATED LIES and DON'T NEGOTIATE WITH WEAKNESS, readers will discover new ways to become stronger, smarter, and healthier. Jocko Willink's methods for success were born in the SEAL Teams, where he spent most of his adult life, enlisting after high school and rising through the ranks to become the commander of the most highly decorated special operations unit of the war in Iraq. In Discipline Equals Freedom, the #1 New York Times bestselling coauthor of Extreme Ownership describes how he lives that mantra: the mental and physical disciplines he imposes on himself in order to achieve freedom in all aspects of life. Many books offer advice on how to overcome obstacles and reach your goals--but that advice often misses the most critical ingredient: discipline. Without discipline, there will be no real

progress. Discipline Equals Freedom covers it all, including strategies and tactics for conquering weakness, procrastination, and fear, and specific physical training presented in workouts for beginner, intermediate, and advanced athletes, and even the best sleep habits and food intake recommended to optimize performance. FIND YOUR WILL, FIND YOUR DISCIPLINE--AND YOU WILL FIND YOUR FREEDOM

International Perspectives on School Settings, Education Policy and Digital Strategies Annika Wilmers 2021-02-15 An exchange on education ideas has shaped the transatlantic discourse in education for a long time. Over the past two decades education science has increasingly become networked internationally. Since 2015, the Office for International Cooperation in Education at DIPF | Leibniz Institute for Research and Information in Education has organized international sessions on education research at the Annual Meetings of the American Educational Research Association, thus providing a floor for transatlantic exchange on current research topics. The volume gives an overview of the transatlantic activities in education research with regard to these sessions representing a collection of topics ranging from school development over the use of large scale assessment and digital data in education to questions related to migration and public education or the economization of education. At the same time the volume offers a reflection on the assets and obstacles of international exchange.

Expanding the Lexicon Sabine Arndt-Lappe 2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon - understood in a wide sense as not being necessarily limited to the word level - by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

Paul Lorenzen -- Mathematician and Logician Gerhard Heinzmann 2021-08-17 This open access book examines the many contributions of Paul Lorenzen, an outstanding philosopher from the latter half of the 20th century. It features papers focused on integrating Lorenzen's original approach into the history of logic and mathematics. The papers also explore how practitioners can implement Lorenzen's systematical ideas in today's debates on proof-theoretic semantics, databank management, and stochastics. Coverage details key contributions of Lorenzen to constructive mathematics, Lorenzen's work on lattice-groups and divisibility theory, and modern set theory and Lorenzen's critique of actual infinity. The contributors also look at the main problem of Grundlagenforschung and Lorenzen's consistency proof and Hilbert's larger program. In addition, the papers offer a constructive examination of a Russell-style Ramified Type Theory and a way out of the circularity puzzle within the operative justification of logic and mathematics. Paul Lorenzen's name is associated with the Erlangen School of Methodical Constructivism, of which the approach in linguistic philosophy and philosophy of science determined philosophical discussions especially in Germany in the 1960s and 1970s. This volume features 10 papers from a meeting that took place at the University of Konstanz.

Towards An Unknown Marx Enrique Dussel 2002-09-11 This book is the first complete commentary on Marx's manuscripts of 1861-63, works that guide our understanding of fundamental concepts such as 'surplus-value' and 'production price'. The recent publication of Marx's writings in their entirety has

been a seminal event in Marxian scholarship. The hitherto unknown second draft of Volume 1 and first draft of Volume 3 of Capital, both published in the Manuscripts of 1861-63, now provide an important intermediate link between the Grundrisse and the final published editions of Capital. In this book, Enrique Dussel, one of the most original Marxist philosophers in the world today, provides an authoritative and detailed commentary on the manuscripts of 1861-63. The main points which Dussel emphasises in this path-breaking work are: The fundamental category in Marx's theory is 'living labour' which exists outside of capital and which capital must subsume in order to produce surplus-value. Theories of Surplus Value is not a historical survey of previous theories, but rather a 'critical confrontation' through which Marx developed new categories for his own theory. The most important new categories developed in this manuscript are related to the 'forms of appearance' of surplus value. The final part of the book discusses the relevance of the Manuscripts of 1861-63 to contemporary global capitalism, especially to the continuing underdevelopment and extreme poverty of Latin America.

Probabilistic Thinking, Thermodynamics and the Interaction of the History and Philosophy of Science Jaakko Hintikka 2013-04-17 The two volumes to which this is a preface consist of the Proceedings of the Second International Conference on History and Philosophy of Science. The Conference was organized by the Joint Commission of the International Union of History and Philosophy of Science (IUHPS) under the auspices of the IUHPS, the Italian Society for Logic and Philosophy of Science, and the Domus Galilaeana of Pisa, headed by Professor Vincenzo Cappelletti. Domus Galilaeana also served as the host institution, with some help from the University of Pisa. The Conference took place in Pisa, Italy, on September 4-8, 1978. The editors of these two volumes of the Proceedings of the Pisa Conference acknowledge with gratitude the help by the different sponsoring organizations, and in the first place that by both Divisions of the IUHPS, which made the Conference possible. A special recognition is due to Professor Evandro Agazzi, President of the Italian Society for Logic and Philosophy of Science, who was co-opted as an additional member of the Organizing Committee. This committee was otherwise identical with the Joint Commission, whose members were initially John Murdoch, John North, Arpad Szabó, Robert Butts, Jaakko Hintikka, and Vadim Sadovsky. Later, Erwin Hiebert and Lubos Novy were appointed as additional members.
