Juergen Teller 2013 The idea for this publication came about as an extension of the exhibition *Juergen Teller: Woo!* held at the Institute of Contemporary Arts in London in 2013. In the run-up to his show, Teller was invited to curate a selection of photographs in the ICA Fox Reading Room, a confined space located away from the main galleries. His initial plan was to cover an area of wall with "tear sheets" - proof pages relating to his commercial photography. As the project developed, Teller would eventually plaster the entire space with images spanning a twenty-year period, including family portraits, magazine assignments, recent ad campaigns, landscapes and various personal projects. The combined effect of seeing his images juxtaposed like this, so they formed hitherto unforeseen relationships across time, would so inspire Teller that, during the course of his show, he would passionately launch himself into the production of this book. Setting itself apart from more conventional exhibition catalogues, this publication brilliantly relays the raw impact of the original installation, unlocking a new and exciting dialogue across an impressive body of work.

The Unseen Giacometti Alberto Giacometti 2011 In 2009 the Bündner Kunstmuseum Chur (Museum of Art of the Grisons) in Switzerland purchased a collection of photographs of and drawings by Alberto Giacometti (1901-66). The collection includes around one hundred photographs and a number of drawings, the majority of which have never before been published and are previously unseen. Taken by such celebrated photographers as May Ray, Henri Cartier Bresson, and Cecil Beaton, the photographs show Giacometti as a young artist bursting with energy during his first stay in Paris; at work at his legendary studios in Paris and his native Val Bregaglia in Switzerland; lighthearted in the company of his wife, Annette, or in discussion with friends; posing with his sculptures; and in silent dialogue with his models. The drawings are mainly sketches on pages from newspapers and magazines. The entire collection, along with the analyses and commentary presented here, greatly enriches our understanding of Alberto Giacometti as both an artist and a person.

The Rolling Stones Luc Sante 2014 Ladies and gentlemen...the Rolling Stones! The definitive, authorized illustrated history of the world's greatest rock 'n' roll band The kind of fame and success the Rolling Stones have achieved in their 50-year career is completely without parallel; their most famous riffs

and catchiest lyrics are indelibly engraved in our collective memory. With their bluesy rock 'n' roll and mesmerizing stage presence, the Stones redefined the music of the 1960s and paved the way for rock as we know it today. Produced in collaboration with the band, this book charts the Stones' remarkable history and outrageously cool lifestyle in around 600 pages of photographs and illustrations, many previously unseen, gathered from archives all over the world. Unprecedented access to the Rolling Stones' own archives in New York and London adds an equally extraordinary, more private side to the Stones' story. Standard TASCHEN edition

Modern Control Engineering Yaduvir Singh 2010-12 Modern Control Engineering is primarily designed to serve as a textbook for undergraduate students of engineering for a course on Control Systems. The book has been carefully developed to cover all topics that are essential to develop an understanding of control systems. Beginning with the study of basics of control systems, the book proceeds to provide a comprehensive coverage of important concepts such as Lorentz transforms and z-transforms; transfer function and gain; block diagrams and signal flow graphs; time-domain modeling; analogous systems and physical system modeling; control system components; time response analysis of control systems and error criterion; stability analysis; controllers; compensation in control systems; eigenvalues and eigenvectors; and industrial control systems. Written in a student-friendly manner, the book contains a large number of solved examples to provide a good and clear understanding of the concepts discussed. Figures and tables interspersed throughout the book successfully supplement the text. Solved problems and unsolved exercises have been included at the end of each chapter to test students' knowledge regarding the topics covered therein.

Chicagoisms Alexander Eisenschmidt 2013 Chicago has long captured the global imagination as a place of tall, shining buildings rising from the fog, the playground for many of architecture's greats—from Mies van der Rohe to Frank Lloyd Wright—and a surprising epicenter for modern construction and building techniques. In this beautifully illustrated volume, Alexander Eisenschmidt and Jonathan Mekinda have brought together a diverse pool of curators, artists, architects, historians, critics, and theorists to produce a multifarious portrait of the Second City. Looking at events as far back as the 1933 exhibition “Early Modern Architecture in Chicago,” *Chicagoisms* is remarkable for the breadth of its topics and the depth of its essays. From more abstract ventures like tracking the boom-and-bust cycle of Chicago's commitment to architecture and the influence of the Chicago grid system of Mies van der Rohe, to more straightforward studies of the “Americanization” of Berlin, the editors have chosen essays that convey the complex and varied history and culture of Chicago's architecture. More than simply an architectural biography of the city, *Chicagoisms* shows Chicago to have an important role as a catalyst for international development and pinpoints its remarkable influence around the world. The contributors explore topics as diverse as Daniel Burnham's vision and OMA's student center for the Illinois Institute of Technology, and show them to all be indelibly products of Chicago. This volume is published to coincide with the exhibition *Chicagoisms: The City as Catalyst for Architectural Speculation* opening at the Art Institute of Chicago, opening in June 2013.

Acquisition of Second Language Intonation Marianne Radel 2008 Frequently,

advanced speakers of a second language use the foreign grammar perfectly - often knowing the rules better than native speakers. And yet, by listening to their talking, native speakers know immediately that they are communicating with foreigners. The problem lies in the area of prosody. In classroom situations students might learn how to role an 'r' or form a proper 'th', but not how to produce entire intonation phrases. However, only with intonation is the full meaning, that a speaker wants to communicate, understood. But why is intonation assumed to be of special difficulty to L2 learners? Why are certain features more difficult to learn than others? This investigation sheds some light on the direction of acquisition of intonation by L2 learners (here: L2 Spanish by L1 speakers of German) and simultaneously makes predictions about the markedness of certain phenomena in the languages under consideration. These findings may help language teachers and learners as well-directed teaching materials can be derived and major problems in the acquisition process can be resolved more easily.

Notes on the Type, Time, Letters & Spirits Dexter Sinister 2017 This book contains three interconnected palimpsest essays on the backstory of a meta font updated by Dexter Sinister and used in this book series, a broad history of the rationalization of letterforms that considers the same typeface from a higher point of disinterest, and a proposal for a sundial designed to operate in parallel physical and digital realms. All of the essays contemplate the ambiguous nature of our shared idea of time itself.

Creative Infidelities Barbara Steiner 2016-09 Berlin-based landscape architecture firm Topotek 1 (founded in 1996) traverses disciplines, landscape typologies and scales. This publication showcases ten significant projects including The Big Dig in Xi'an, China, Superkilen in Copenhagen, Denmark, the Heerenschlerli sports facilities in Zurich and the Castle Park in Wolfsburg, Germany.

Egon Eiermann Immo Boyken 2004 When the German Embassy in Washington was completed in 1964, the architectural critic of the Washington Post wrote that the express aim of those commissioning the building had been to make an architectural statement that would embody the spirit of the young German democracy and avoid any form that could revive grim memories of the past. The paper felt that it had been right to engage Egon Eiermann for this project, as he had already solved the same problem of "architectural diplomacy" with his German Pavilion for the Brussels World Fair in 1958. Eiermann (1904-1970) studied at the Technische Hochschule in Berlin, finally in Hans Poelzig's master-class, but he was also influenced by Heinrich Tessenow. As early as 1931 his first building, which he had planned as an architect employed in a practice, was published in Wasmuths Monatshefte für Baukunst und Stadtebau; his major buildings and projects continued to be featured in magazines in Germany

joining the organophosphorus compounds, methylcarbamates, and pyrethroids as the major insecticides. Recently, imidacloprid and related nicotinoids have begun replacing organophosphorus and methylcarbamate compounds as insecticides to control insect pests on major crops. Nicotinoids act on the nicotinic acetylcholine receptor, as does naturally occurring nicotine, but with remarkable effectiveness against insects while being safe for mammals; they are quickly degraded and do not persist in the environment. This volume describes the relationship of nicotinoids to botanical insecticidal alkaloids, their discovery and development as insecticides, and the prospects for their expanded use and for the development of resistance. This book is the first to provide concise, comprehensive information on nicotinoids, their chemistry, mode of action, metabolism, and application in agriculture.

Slavutych Ievgeniia Gubkina 2015-07-01 Slavutych, a Ukrainian provincial city north of Kiev, seems in many respects to belong to a different era. Built after the Chernobyl nuclear disaster in 1986 to replace the contaminated dwellings of workers from the plant, Slavutych is the last "ideal" planned city of the Soviet Union. The city is highly topical, particularly in times of political crisis in Eastern Europe. However, Slavutych is also an architectural manifestation of the Soviet people's friendship, with architects throughout the Soviet Union involved in its planning and construction. Postmodern buildings in Slavutych are both characterised by socialist, Soviet influences and regional styles from the Caucasus region, Baltic States and Russia. Furthermore, the search for an environmentally sustainable, habitable architecture is of course still relevant today. The Architectural Guide Slavutych documents numerous buildings as well as all city districts, providing a critical analysis of unique late-Soviet architecture and urban planning in the context of Perestroika.

Surprise Mies van Hout 2018-03 The most wonderful book for anyone who is expecting a child, or already has one . . . Just as she captured a rainbow of emotions in *Happy* and the stages of friendship in *Friends* , Mies van Hout has now turned her talents to the special bond between parent and child. From hoping and expecting to caring, from playing to finally letting go, Mies van Hout has created a picture book that will elicit smiles from every parent or parent - to - be. The book has everything: enchantment, beautiful wonder and a gentle subtext of melancholy. It is the beauty of living created in the inimitable style of Mies van Hout: vulnerable and yet strong as life itself.

Upgrade Gestalten 2017-03 'Upgrade' breathes new life into forgotten architecture. Past structures are consciously preserved and revamped, expanded and altered, to create something exciting and enticing. 'Upgrade' explores architectural and design concepts that seek to enhance and repurpose our surroundings from slight changes to complete renovations. Extensions upon a rooftop. Factories turned into relaxing retreats. Wood additions contrasting with antique brick exteriors. Through engaging anecdotes and inspiring images, 'Upgrade' provides vibrant exemplars and enthusiasm for revamping existing spaces. Repurposing the unused: be it an empty chapel that becomes an inviting writer's nook or a rotten barn converted into a cozy living space for a small family. The projects illustrate the possibility of adding a touch of the new to the old: farmhouses adorned with modern glass additions or churches whose traditional lines now frame an office. What are ruins to some become another's architectural playground.

Evan Penny Evan Penny 2011 Evan Penny makes the kind of sculpture that is so realistic, so detailed and so obviously a display of skill that it literally stops people in their tracks. But this alone isn't why the artist's work grabs a viewer, holds onto their gaze and then begins to choreograph their movements around the solid objects he has planted in their space. Penny's standing nude figures and portrait heads invite you to stare, to examine every wrinkle, bump, fleshy imperfection and intimate crevasse. Penny's lifelike figures, modelled with great craftsmanship out of aluminium, silicone, epoxy resin and pigments, have a physical, highly sensuous presence. Nevertheless, they seem artificial. The work reflects on how the human image is presented by modern technologies such as photography, electronic image editing, offset printing and 3D scanning. English, German and Italian text.

Jeff Koons Jeff Koons 2009 L'art de Jeff Koons est séduisant et sexy, conceptuel et ludique. Il s'adresse au spectateur de manière très directe, comme on a pu le voir depuis que l'artiste a conquis la scène artistique dans les années 1980 avec ses sculptures de ballons de basket et son lapin gonflable en inox. Depuis le début des années 1990, après être apparu dans la série Made in Heaven, qui le montrait dans ses ébats amoureux avec sa femme, ou avoir dressé la sculpture florale d'un chiot de 12 mètres devant le château d'Arolsen, Koons est devenu une figure incontournable de la vie publique. Aujourd'hui, il célèbre les mythes du quotidien dans des peintures-collages de grand format dominées par des personnages de bandes dessinées et dans des sculptures hautement réfléchissantes dont la facture artisanale

ultraperfectionniste transforme des objets insignifiants en œuvres d'art. Au fil des années, Koons n'a cessé de susciter des défenseurs enthousiastes aussi bien que des adversaires farouches, ce qui en fait un des artistes les plus populaires de notre époque.

Explanations are accompanied by hundreds of written and recorded examples, and the discussion of each style concludes with a complete composition. An extensive discography, glossary, biographies, and photos of Brazilian artists are included.

The Tale of Khun Chang Khun Phaen 2015-04-28 Khun Chang Khun Phaen is an outstanding classic in the Thai language, an entertaining folk epic set amidst the social panorama of traditional Siam. Masterfully told in the style of an ancient saga, it is a spectacular love story rich in romance, adventure, violence, farce, and magic, and ending in the tragic and enigmatic death of its heroine. The great Thai linguist William Gedney once remarked, "if all other information on traditional Thai culture were to be lost, the whole complex could be reconstructed from this marvelous text." Written in lively prose, this new, abridged edition retains every scene, incident, and significant speech from the full English translation, except for one short section. The authors won the A. L. Becker Southeast Asian Literature in Translation Prize (2010) for the full translation.

Billionaire Boy: Mark Zuckerberg: In His Own Words George Beahm 2013-02-01
Billionaire Boy: Mark Zuckerberg in his own words is a revealing insight into the mind and vision of the world's youngest billionaire and founder and CEO of Facebook. The Mark Zuckerberg most people know is the one depicted in Academy Award-winning film *The Social Network*: a nerdy, insecure and socially awkward young man - hardly the image of a topflight CEO in command of one of the world's largest and most successful companies. Achieving the growth of Facebook as fast as Zuckerberg has is no mean feat, especially when you consider he had never raised a dollar from investors nor managed a single employee before. At the helm of Facebook, Zuckerberg not only has to run fast to maintain the company's high profile success, but also needs to fight to stay ahead of some of the richest, most talented and most aggressive companies in the world. In this collection of quotations taken from interviews, presentations, media announcements and more, we see a new breed of business leader with a new way of thinking about business and success in a constantly changing world.
