#Share Natalie T. Wood 2017-02-08 Each day, millions of consumers venture online to search and exchange product information and to seek out and share opinions. Electronic word-of-mouth (eWOM) communication has been shown to influence consumer actions across a variety of industries (King, Racherla, and Bush 2014). A significant portion of eWOM occurs on social media platforms. Whether it is a status update to Facebook of an upcoming vacation, a picture of a laundry room makeover on Pinterest, or a YouTube video discussing the features on the new iPhone, consumers are turning to a variety of social platforms to make everyday purchasing decisions easier for themselves and others. Indeed, social word of mouth (sWOM)—a subset of eWOM—has incredible reach with the potential to influence over two billion active social media consumers. The purpose of this book is to examine the influence of sWOM and provide guidance on how to operationalize its growing power. The goal of this book is to bring together industry best practices and academic research to help construct social media content that speaks with your brand voice, stimulates engagement, inspires consumers to share (#share), and complies with industry and federal guidelines. Each chapter highlights a key area of sWOM that will further your understanding and provide actionable information to assist you in mobilizing positive sWOM for your company.

The Humanitarian Machine Diego Fernandez Otegui 2021-06-30 As the world reels from the impact of a global pandemic and increasing intensity of climate-caused hazards, the humanitarian sector has never been more relevant. But providing aid to those affected by disasters and crises is more complex than ever. In *The Humanitarian Machine* aid workers reflect on their own experiences of working in crisis. As they write about their work and the ways in which they each approach the challenges of helping people, they comment on some of the most vexing issues facing the humanitarian sector. Each speaks from their own perspective, asking tough questions, sharing thoughtful reflections about their ongoing work, and unpacking what it really means to be a humanitarian worker. The stories they tell, whether recounting a specific experience or reflecting on years of practice, reveal the dilemmas they face and demystify the overly romanticized aura that sometimes surrounds humanitarian practice. Complementing the candid accounts that humanitarian leaders contribute in this book, the editors examine how their stories, perceptions, and understandings align with similar conversations that take place in other settings. Viewed together in this way, the insights and reflections provided in this book will be invaluable for humanitarian practitioners, students, and researchers alike.

Fire Department Strategic Planning, 3rd Edition Mark Wallace 2021-01-18 From the author: This 3rd edition is about organized common sense in the fire service. Section One provides support to fire departments that already have a strategic plan and just need to update and revise their existing plan. I have found over my 30 years of consulting with fire department's that they want to accomplish their next iteration of their strategic plan as rapidly as possible. Section Two provides a detailed "How-to" guide to help a fire department create its first strategic plan. Section Two is divided into four parts: (1) Understanding the Department, (2) Understanding the Situation, (3) Understanding the Strategic Issues Facing the Department, and (4) Creating Organizational Change. A new chapter (Chapter 20) provides assistance to those departments having challenges with their strategic plan and obtaining the desired outcomes/results. It adds a new troubleshooting process for those departments having challenges to create an effective and successful strategic plan. The book is designed to be effective as a manual to develop an individual fire department's strategic plan as well as a textbook for use in upper division college/university courses or as a text for post-graduate courses.

Fitter Faster Robert Davis 2017-05-11 A lifetime of fitness in just minutes a day. I don't have time . . . I'm too tired . . . I hate gyms . . . These are among the most common excuses for not exercising. But the truth is that getting in shape requires less time and effort than you might think. Examining everything from pre-workout stretches to post-workout protein shakes, this science-backed book slices through fitness fads and misconceptions to reveal how you can exercise quickly and effectively. For example, is it best to exercise in the morning? Does aerobic activity burn more fat than weight lifting? You'll also learn how to get and stay motivated, what equipment to buy (and what not to waste money on), which dietary supplements really help, and how to combat muscle soreness. *Fitter Faster* explains how to: Find the right balance between cardio, strength, and stretching * Slash workout times with high-intensity interval training * Prevent boredom * Enhance fat-burning The accompanying *Fitter Faster Plan*, developed with celebrity trainer Brad Kolowich, Jr., pulls everything together. Requiring as little as 15 minutes a day, these quick workouts maximize efficiency—allowing you to reap the greatest benefit in the shortest possible time...all without ever having to set foot in a gym. With photographs illustrating each exercise routine, this eye-opening book will forever change the way you work out- and help you get fitter faster.

Strategies to Improve Cardiac Arrest Survival Institute of Medicine 2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. *Strategies to Improve Cardiac Arrest Survival* examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of *Strategies to Improve Cardiac Arrest Survival* provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

CPR/AED for the Professional Rescuer American Red Cross 2006 This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
