The Moral Work of Teaching and Teacher Education Matthew N. Sanger 2015-04-25 What makes teaching a moral endeavor? How can we prepare classroom practitioners for engaging in that moral endeavor in meaningful and effective ways? This volume brings together leading scholars who draw upon both their academic expertise and substantial wisdom of practice to offer a variety of perspectives on the challenge of preparing today's teachers for the moral work of teaching. Book Features: Examines the role that teacher preparation and development can play in addressing the moral work of teaching. Highlights the work of leading scholars from educational psychology, educational philosophy, and teacher education. Provides compelling insights for identifying the next generation of our nation's best teachers. Contributors: Wolfgang Althof, Karen D. Benson, Marvin W. Berkowitz, Donald Blumenfeld-Jones, Elizabeth Campbell, Julie Canniff, Mary Crawford, Lana Daly, Rebecca Evers, Cathie Fallona, Gary Fenstermacher, Anthony Holter, Lisa E. Johnson, Daniel Lapsley, Darcia Narvaez, Virginia Navarro, Larry Nucci, Joy Pelton, Virginia Richardson, Don Senneville, David Shields, Barbara Stengel, Jonatha W. Vare, Marilyn Watson Matthew Sanger is associate professor of Educational Foundations in the College of Education at Idaho State University. Richard Osguthorpe is associate professor and chair of the Department of Curriculum, Instruction, and Foundational Studies at Boise State University. "The editors and contributors help us appreciate that many teachers come to the work precisely because of abiding moral commitments—to help others, to make a difference in the lives of the young, to give something back to society. But they also help us see how crucial it is to give candidates systematic support in coming to grips with the meaning of these commitments, and how to translate them into pedagogical action for the well-being of students and society alike." —From the Foreword by David T. Hansen "This book sheds light into the core of professional morality. It should be a 'must' for each student teacher and for each practitioner around school life." —Fritz Oser, professor of education and educational psychology, University of Fribourg, Switzerland "Lest we forget that teaching is inherently moral work, Sanger and Osguthorpe explain what this means for teachers and teacher educators. The combination of conceptual analysis and cases of teacher education practice make this book a valuable resource and welcome antidote to the current

preoccupation with test scores.” —Sharon Feiman-Nemser, Brandeis University

Language Minority Students in American Schools H. D. Adamson 2005-03-23 This book addresses questions of language education in the United States, focusing on how to teach the 3.5 million students in American public schools who do not speak English as a native language. These students are at the center of a national debate about the right relationship among ESL, bilingual, and mainstream classes. Bilingual education has been banned by constitutional amendment in California and Arizona, and similar amendments are being considered in other states. *Language Minority Students in American Schools: An Education in English* places this debate and related issues of teaching standard English to speakers of nonstandard dialects, such as black English, within the larger context of language acquisition theory and current methods of language teaching. Adamson draws from the large body of sociolinguistic, psycholinguistic, and educational research, and on his own experience as an English teacher in the U.S.

and overseas, to shed light on some of these controversies and on the cognitive, cultural, public policy, and practical issues involved in educating English language learners. Presenting all sides of the issues fairly, he offers a strong endorsement for bilingual and bidialectical education based on programs designed and administered according to the principles discussed in the book and supported by language acquisition theory and classroom research. A strength of the book is the inclusion of original research conducted in a middle school enrolling a majority of Latino students. This research contributes to the field of language education by providing a detailed description of how English language learners study content subjects. Examples from the study are used to illustrate a discussion of Vygotskian learning principles and the relationship between the students' home and school cultures. *Language Minority Students in American Schools: An Education in English* is intended for students who are preparing to become teachers of English as a second language, and for teachers of other subjects who work with English language learners.

High Stakes National Research Council 1999-01-16 Everyone is in favor of "high education standards" and "fair testing" of student achievement, but there is little agreement as to what these terms actually mean. *High Stakes* looks at how testing affects critical decisions for American students. As more and more tests are introduced into the country's schools, it becomes increasingly important to know how those tests are used—and misused—in assessing children's performance and achievements. *High Stakes* focuses on how testing is used in schools to make decisions about tracking and placement, promotion and retention, and awarding or withholding high school diplomas. This book sorts out the controversies that emerge when a test score can open or close gates on a student's educational pathway. The expert panel: Proposes how to judge the appropriateness of a test. Explores how to make tests reliable, valid, and fair. Puts forward strategies and practices to promote proper test use. Recommends how decisionmakers in education should—and should not—use test results. The book discusses common misuses of testing, their political and social context, what happens when test issues are taken to court, special student populations, social promotion, and more. *High Stakes* will be of interest to anyone concerned about the long-term implications for individual students of picking up that Number 2 pencil: policymakers, education administrators, test designers, teachers, and parents.
