The One King Lear Sir Brian Vickers 2016-04-04 In the 1980s influential scholars argued that Shakespeare revised King Lear in light of theatrical performance, resulting in two texts by the bard's own hand. The two-text theory hardened into orthodoxy. Here Sir Brian Vickers makes the case that Shakespeare did not cut his original text. At stake is the way his greatest play is read and performed.

On Compiling an Annotated Bibliography James L. Harner 2015-01-01 James Harner's popular pamphlet, first published in 1985, has been revised and updated in the light of advances in computer technology and the availability of humanities databases. Harner offers useful information on planning research, organizing an annotated bibliography, compiling entries, using a computer to prepare the manuscript, and editing. While the booklet focuses on the preparation of a comprehensive bibliography on a single literary author, the procedures and techniques are easily adapted to selective or subject bibliographies and to other periods and disciplines.

Blind Impressions Joseph A. Dane 2013-08-22 "As bibliographers or book historians, we perform our work by changing the function of the objects we study. We rarely pick up an Aldine edition to read one of the classical texts it contains. . . . Print culture, under this notion, is not a medium for writing or thought but a historical object of study; our bibliographical field, our own concoction, becomes the true referent of the objects we define as its foundation."—From the Introduction What is a book in the study of print culture? For the scholar of material texts, it is not only a singular copy carrying the unique traces of printing and preservation efforts, or an edition, repeated and repeatable, or a vehicle for ideas to be abstracted from the physical copy. But when the bibliographer situates a book copy within the methods of book history, Joseph A. Dane contends, it is the known set of assumptions which govern the discipline that bibliographic arguments privilege,

repeat, or challenge. "Book history," he writes, "is us." In *Blind Impressions*, Dane reexamines the field of material book history by questioning its most basic assumptions and definitions. How is print defined? What are the limits of printing history? What constitutes evidence? His concluding section takes form as a series of short studies in theme and variation, considering such matters as two-color printing, the composing stick used by hand-press printers, the bibliographical status of book fragments, and the function of scholarly illustration in the Digital Age. Meticulously detailed, deeply learned, and often contrarian, *Blind Impressions* is a bracing critique of the way scholars define and solve problems.

An Introduction to Bibliographical and Textual Studies Craig S. Abbott
2009-01-01 To a reader of Joyce's *Ulysses*, it makes a difference whether one of Stephen Dedalus's first thoughts is "No mother" (as in the printed version) or "No, mother!" (as in the manuscript). The scholarship surrounding such textual differences—and why this discipline should concern readers and literary scholars alike—is the focus of William Proctor Williams and Craig S. Abbott's acclaimed handbook. This updated, fourth edition outlines the study of texts' composition, revision, physical embodiments, process of transmission, and manner of reception; describes how new technologies such as digital imaging and electronic tagging have changed the way we produce, read, preserve, and research texts; discusses why these matters are central to a historical understanding of literature; and shows how the insights, methods, and products of bibliographical and textual studies can be applied to other branches of scholarship.

The Collected Poems of Amelia Alderson Opie Shelley King 2009-11-26 The Collected Poems of Amelia Alderson Opie offers the first collected, scholarly edition of poetical writings of one of the most celebrated women writers of the early nineteenth century. It brings together poems from a variety of sources, including three volumes of poetry assembled by the author, annual anthologies, periodicals, songs, manuscripts, fictional tales, broad sheets, separately published pamphlets, and unpublished private correspondence. The poems included cover the entire range of Opie's long career, starting with her earliest

surviving works from the 1790s and extending through her last poems in 1850. The arrangement proposed for this edition gives an overall sense of Opie's development from her early experiments with short lyrics appearing in *The Annual Anthology*, *The Cabinet*, and *The European Magazine* to her first large-scale success with *Poems* and the publication of a number of song lyrics, to the longer narrative poems in *The Warrior's Return* to the final phase of her publishing life after officially joining the Quakers in 1825 - the appearance of *Lays for the Dead*, a sequence of elegies for both private and public figures. Until now, Opie has been known primarily through a few frequently anthologized poems focusing on her response to the war with France and her support of the abolition movement. *The Collected Poems* offers the opportunity to explore more fully the contribution made to literary culture in the period by a woman who throughout her life used poetry as the basis of affective connection with her world.

Genetic Criticism Dirk Van Hulle 2022-02-24 In *Genetic Criticism*, Dirk Van Hulle introduces the study of creative processes to an Anglophone audience. As a method in the study of literary writing processes, genetic criticism is also a reading strategy. The idea behind this book is to introduce this strategy to a broader audience, from interested readers and graduate students to early career researchers and literary critics. In literary studies, it is often obvious that a particular work somehow seems to hit a nerve, but more challenging to pinpoint exactly why it 'works'. This book therefore starts from a clear, basic assumption: knowing how something was made can help us understand how and why it works. This strategy is at the basis of many disciplines, including art history. By means of X-ray technology or hyperspectral imaging, it is possible to look at a painting as a multilayered object with not only spatial dimensions, but also a temporal one. This temporal dimension is the core of the reading strategy introduced in this book. Note books, marginalia, manuscripts, and typescripts (even if one works with scans) give a concrete dimension to literature, which is a helpful reading strategy for many students. On the one hand, this involves concrete, transferrable skills such as aspects of transcription and digital scholarly editing. On the other hand, it also involves more abstract theoretical issues relating to matters of authorship, collaboration, authority, agency, intention and intertextuality.

The Life of Reason George Santayana 2011 *Santayana's Life of Reason*, published in five books from 1905 to 1906, ranks as one of the greatest works in modern philosophical naturalism. Acknowledging the natural material bases of human life, Santayana traces the development of the human capacity for appreciating and cultivating the ideal. It is a capacity he exhibits as he articulates a continuity running through animal impulse, practical intelligence, and ideal harmony in reason, society, art, religion, and science. The work is an exquisitely rendered vision of human life lived sanely. In this first book of the work, Santayana provides an account of how the human animal develops instinct, passion, and chaotic experience into rationality and ideal life. Inspired by Aristotle's *De Anima*, Darwin's evolutionary theory, and William

James's *The Principles of Psychology*, Santayana contends that the requirements of action in a hazardous and uncertain environment are the sources of the development of mind. More specifically, instinct and imagination are crucial to the emergence of reason from chaos. Separating himself from the typical thought of the time by his recognition of the imagination, Santayana in this volume offers extensive critiques of various philosophies of mind, including those of Kant and the British empiricists. This Critical Edition, volume VII of *The Works of George Santayana*, includes a chronology, notes, bibliography, textual commentary, lists of variants, and other tools useful to Santayana scholars. The other four books of the volume include *Reason in Society*, *Reason in Religion*, *Reason in Art*, and *Reason in Science*.

Introduction to Scholarship in Modern Languages and Literatures David G. Nicholls 2015-01-01 The third edition of the MLA's widely used *Introduction to Scholarship in Modern Languages and Literatures* features sixteen new essays by leading scholars. Designed to highlight relations among languages and forms of discourse, the volume is organized into three sections. "Understanding Language" provides an overview of the field of linguistics, with special attention to language acquisition and the social life of languages. "Forming Texts" offers tools for understanding how speakers and writers shape language; it examines scholarship in the distinct but interrelated fields of rhetoric, composition, and poetics. "Reading Literature and Culture" continues the work of the first two sections by introducing major areas of critical study. The nine essays in this section cover textual and historical scholarship; interpretation; comparative, cultural, and translation studies; and the interdisciplinary topics of gender, sexuality, race, and migrations (among others). As in previous volumes, an epilogue examines the role of the scholar

in contemporary society. Each essay discusses the significance, underlying assumptions, and limits of an important field of inquiry; traces the historical development of its subject; introduces key terms; outlines modes of research now being pursued; postulates future developments; and provides a list of suggestions for further reading. This book will interest any member of the academic community seeking a review of recent scholarship, while it provides an indispensable resource for undergraduate and graduate students of modern languages and literatures.

Traces of the Old, Uses of the New Amy Earhart 2015-11-12 Digital Humanities remains a contested, umbrella term covering many types of work in numerous disciplines, including literature, history, linguistics, classics, theater, performance studies, film, media studies, computer science, and information science. In *Traces of the Old, Uses of the New: The Emergence of Digital Literary Studies*, Amy Earhart stakes a claim for discipline-specific history of digital study as a necessary prelude to true progress in defining Digital Humanities as a shared set of interdisciplinary practices and interests. *Traces of the Old, Uses of the New* focuses on twenty-five years of developments, including digital editions, digital archives, e-texts, text mining, and visualization, to situate emergent products and processes in relation to historical trends of disciplinary interest in literary study. By reexamining the roil of theoretical debates and applied practices from the last generation of work in juxtaposition with applied digital work of the same period, Earhart also seeks to expose limitations in need of alternative methods—methods that might begin to deliver on the early (but thus far unfulfilled) promise that digitizing texts allows literature scholars to ask and answer questions in new and compelling ways. In mapping the history of digital literary scholarship, Earhart also seeks to chart viable paths to its future, and in doing this work in one discipline, this book aims to inspire similar work in others.

The Beauty of Inflections Jerome J. McGann 1985 First published in hardback in 1985, this collection of studies explores different types of ahistorical literary studies, and develops a socio-historical criticism for literary works. While focusing on 19th-century works - among them those of Christina Rossetti, Keats, and Byron - its arguments are applicable to literary studies in general, and its emphasis is theoretical and methodological.

Textual Studies and the Common Reader Alexander Pettit 2000 *Textual Studies and the Common Reader* collects eleven original essays by editors of literary texts and theorists concerned about the implications of what such editors do. The volume's organizing theme is textual studies, the domain of which, in one contributor's words, is the "genesis, transmission, and editing of texts." The

contributors seek to extend the discussion about textual studies beyond any narrow professional scope; thus, none of the essays assumes any training in textual studies. Also, the focus of the book is on the literary genre most familiar to most readers: the novel. Authors discussed include Willa Cather, Joseph Conrad, Theodore Dreiser, William Faulkner, D. H. Lawrence, William Makepeace Thackeray, and Mary Wollstonecraft Shelley. Many people read literary works, but few do so with a steady sense of their constructedness as texts--of the ways in which "genesis, transmission, and editing" have shaped them as conveyors of meaning. This book shows that the experience of reading is more rewarding for such awareness.

A History of the Book in America David Paul Nord 2015-12-01 The fifth volume of A History of the Book in America addresses the economic, social, and cultural shifts affecting print culture from World War II to the present. During this period factors such as the expansion of government, the growth of higher education, the climate of the Cold War, globalization, and the development of multimedia and digital technologies influenced the patterns of consolidation and diversification established earlier. The thirty-three contributors to the volume explore the evolution of the publishing industry and the business of bookselling. The histories of government publishing, law and policy, the periodical press, literary criticism, and reading--in settings such as schools, libraries, book clubs, self-help programs, and collectors' societies--receive imaginative scrutiny as well. The Enduring Book demonstrates that the corporate consolidations of the last half-century have left space for the independent publisher, that multiplicity continues to define American print culture, and that even in the digital age, the book endures. Representing Modernist Texts George Bornstein 1991 Literary scholars explore the significant yet largely ignored field of textual and editorial scholarship in the work of modern authors

Multiple Authorship and the Myth of Solitary Genius Jack Stillinger 1991 This is a study of the collaborative creation behind literary works that are usually considered to be written by a single author. Although most theories of interpretation and editing depend on a concept of single authorship, many works are actually developed by more than one author. Stillinger examines case histories from Keats, Wordsworth, Coleridge, Mill, and T.S. Eliot, as well as from American fiction, plays, and films, demonstrating that multiple authorship is a widespread phenomenon. He shows that the reality of how an author produces a work is often more complex than is expressed in the romantic notion of the author as solitary genius. The cumulative evidence revealed in this engaging study indicates that collaboration deserves to be included in any account of authorial achievement.

Bibliography in Literature, Folklore, Language and Linguistics David William Foster 2003-02-11 While the academic world devoted to literary study has been absorbed with new and distinct forms of literary criticism, bibliography has received scant attention--much less than in former times when it was understood as more than just an aid to research. Enormous changes have taken place in enumerative bibliography over the past thirty years, especially with the widespread use of computers, but these changes have gone unrecognized as bibliography has gone unappreciated. This work is a collection of essays concentrating exclusively on bibliography and its uses in the academic world, especially in literature, folklore, language, and linguistics. The book begins

with a discussion of what bibliography is, what it does, and how to create the optimum bibliography. Other subjects include bibliography and postcolonialism, critical theory and bibliography in cross-disciplinary environments, issues and problems with tools for feminist and women's studies scholars in literature, strategies for the incorporation of pluridisciplinary work, bibliographical databases and databased bibliographies, and ideas for the future of the MLA International Bibliography.

Writing for Print Suyoung Son 2020-10-26 "This book examines the widespread practice of self-publishing by writers in late imperial China, focusing on the relationships between manuscript tradition and print convention, peer patronage and popular fame, and gift exchange and commercial transactions in textual production and circulation. Combining approaches from various disciplines, such as history of the book, literary criticism, and bibliographical and textual studies, Suyoung Son reconstructs the publishing practices of two seventeenth-century literati-cum-publishers, Zhang Chao in Yangzhou and Wang Zhuo in Hangzhou, and explores the ramifications of these practices on eighteenth-century censorship campaigns in Qing China and Chosŏn Korea. By giving due weight to the writers as active agents in increasing the influence of print, this book underscores the contingent nature of print's effect and its role in establishing the textual authority that the literati community, commercial book market, and imperial authorities competed to claim in late imperial China."
