New Zealand English Grammar, Fact Or Fiction? Marianne Hundt 1998-01-01 New Zealand English (NZE) is one of the younger post-colonial varieties of English. It is therefore not surprising that previous research focused on lexical and phonological aspects of NZE and practically neglected grammatical peculiarities. **New Zealand English Grammar – Fact or Fiction?** presents a careful comparative analysis of parallel corpora of New Zealand, British, American and Australian English in order to single out morphological, syntactic and lexico-grammatical features typical of an emerging New Zealand standard. In addition to corpus data on regional variation, the author uses data on short-term diachronic change within British and American English to show how regional variation is closely related to both stylistic variation (a world-wide colloquialisation of the written norms of English) and ongoing linguistic change leading to temporal regional differences. NZE is different from other national varieties of English in terms of preferences for certain variants rather than categorically different grammatical rules. Nevertheless, it is a standard in its own right in so far as it is a typical mix of variants available in World English. The methodological approach combines both qualitative analyses and statistical evidence. The question in how far statistically significant differences in word frequencies can be shown to be linguistically significant is also relevant for other quantitative research into emerging national standards.

Teaching Secondary English Mark Pike 2003-10-30 'What the book does extremely well is to describe the way things are in terms of the requirements of the Framework for Teaching English, the curriculum and the new specifications - and for this reason it is likely to be most useful to those contemplating English teaching in the maintained sector from outside - returnees, aspiring NQTs or those in the independent sector' - Times Educational Supplement 'Instead of taking us yet again on a tour through the four modalities of English, this book's tri-partite structure takes a refreshingly different approach by offering thought-provoking argument grounded in classroom practicality' - Nick McGuinn, University of York Students' comments on Teaching Secondary English: 'The book is written in clear, digestible terms, offering many practical ideas for teaching the key skills and the wide range of material encountered in the English classroom. .. It is the kind of book which can be dipped into, which is particularly useful for people who spend most of their time planning lessons!' 'Teaching Secondary English is a must for student teachers and NQTs. It is a clear, comprehensive and practical guidebook dealing not solely with theory and pedagogy, but with the very real issues facing new teachers today' 'It is clear that Teaching Secondary English, unlike so many textbooks on the subject, is written by someone with recent classroom experience and this helps the reader to trust and respect the advice it purports. I certainly feel it is grounded in practicalities not "pie in the sky" theory that will not work in most 'real' classrooms!' This book enables English teachers to implement change and rise to new challenges, while remaining true to an ethically and socially just position which provides the rationale for their vocation. The author describes and evaluates recent changes to English teaching brought about by initiatives such as the Literacy Strategy, the new 'A' levels and the requirement to focus on spiritual, moral, social and cultural development. Examples of innovative teaching and learning strategies are provided

throughout. The author helps teachers to foster keen readers, writers and communicators. He shows how they can enable their students to acquire skills and knowledge, as well as to recognize the value of aesthetic experience, emotional literacy and spiritual and moral response to literature in their own lives and in their communities. This book is essential reading for PGCE students as well as practising teachers and all those involved in English in education.

Teaching English Language Learners Through Technology Tony Erben 2008-09 In *Teaching English Language Learners through Technology*, the authors explore the use of computers/technology as a pedagogical tool to aid in the appropriate instruction of ELLs across all content areas. The special focus of this book is on the informed use of various technologies and software programs that can specifically aid ELLs. Strategies are also provided for varying levels of access--whether teachers teach in a one computer classroom, have access to multiple computers, or have the ability to go into a computer lab at their school. A fully annotated list of web and print resources completes the volume, making this a valuable reference to help teachers harness the power of computer-assisted technologies in meeting the challenges of including all learners in effective instruction.

Learning to Teach English in the Secondary School Jon Davison 1997 This forward-looking book combines theory and practice to present a broad introduction to the opportunities and challenges of teaching English in secondary school classrooms. Each chapter explains the background to current debates about teaching the subject and provides tasks, teaching ideas, and further reading to explore issues and ideas in relation to school experience. With reference to new legislation, the chapters suggest a range of approaches to the teaching of reading, writing, speaking and listening, drama, media study, information technology, language study, grammar, poetry, Shakespeare, GNVQ and A Level English Language and Literature. *Learning to Teach English in the Secondary School* offers principles and practical examples of teaching and learning in the context of the end of the twentieth century when new notions of literacy compete with the demands of national assessment. Taking as its starting point the changing ideologies of English as a subject, the text addresses questions about the nature of teacher education. It raises issues concerning competence-based courses, working with a mentor in school and monitoring the development of a student teacher. *Learning to Teach Subjects in the Secondary School* series, edited by Sue Capel, Tony Turner and Marilyn Leask.

Dublin English Raymond Hickey 2005-07-28 The present book describes the English language in all its facets as spoken in present-day Dublin, the capital of the Republic of Ireland. It covers the entire range of its history since the first arrival of English there several hundred years ago. Apart from the evolution of

English in the capital, the book also concentrates on the significant changes which have been taking place in the speech of Dublin in the past 15 years or so. The rapid change of Dublin English is seen as a correlate to the many social and economic developments which have occurred in recent years. The type of linguistic change in Dublin is driven by dissociation (the mirror-image of accommodation) and will be of particular interest to scholars working within the 'language variation and change' framework as it will be to those more generally concerned with varieties of English and their specific profiles vis à vis more standard forms of English.

English Historical Linguistics 2010 Irén Heged?s 2012 The use of linguistic forms derived from the lexicon denoting sacred entities is often subject to tabooing behaviour. In the 15th and 16th century phrases like by gogges swete body or by cockes bones allowed speakers to address God without really saying the name; cf. Hock (1991: 295). The religious interjections based on the phonetically corrupt gog and cock are evidenced to have gained currency in the 16th century. In the 17th century all interjections based on religious appellations ceased to appear on stage in accordance with the regulations of the Act to Rest.

English Learning Made Easy- Strategies and Approaches Dr Reena Mittal

2015-04-03 Books are always our best companion. The idea of writing or editing a book remains always in our mind. Our students come from semi-urban background and not very fluent in English reading, writing and speaking. English is not just a Second language to them, but it is completely a foreign language to the rural background pupils. So, we research innovative techniques to make them familiar. This continuous research motivates us to edit a book on the topic. We can well see the potential of the book as it is not just about the 'Teaching' of English but basically about 'Learning' English as such. But of course it will be very helpful for ELT, per se. The book making is a long process and it needs a careful study of area, topics and research methodologies, along with very intensive and extensive genuine research work before we start. The very first thing which struck our mind was to choose the topic which could be beneficial for students and teachers both. Our undergraduate students, who actually lack Basic English speaking, reading and writing standard, gave us many new topics to write. They and their problems motivated us to collect opinions of our fellow colleagues on the wider perspectives of the chosen topic and edit a book on the subject. We have endeavored to cover many areas which need to be given emphasize when we teach or learn English. Our main focus is to give tricks and useful tips to enhance and learn English as a second language.
