World Development Report 2018 World Bank Group 2017-10-16 Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.

Life M. Kronegger 2012-12-06 In her Introduction, Tymieniecka states the core theme of the present book sharply: Is culture an excess of nature's prodigious expansiveness - an excess which might turn out to be dangerous for nature itself if it goes too far - or is culture a 'natural', congenial prolongation of nature-life? If the latter, then culture is assimilated into nature and thus would lose its claim to autonomy: its criteria would be superseded by those of nature alone. Of course, nature and culture may both still be seen as being absorbed by the inner powers of specifically human inwardness, on which view, human being, caught in its own transcendence, becomes separated radically in kind from the rest of existence and may not touch even the shadow of reality except through its own prism. Excess, therefore, or prolongation? And on what terms? The relationship between culture and nature in its technical phase demands a new elucidation. Here this is pursued by excavating the root significance of the 'multiple rationalities' of life. In contrast to Husserl, who differentiated living types according to their degree of participation in the world, the phenomenology of life disentangles living types from within the onto-poietic web of life itself. The human creative act reveals itself

as the Great Divide of the Logos of Life - a divide that does not separate but harmonizes, thus dispelling both naturalistic and spiritualistic reductionism.

Principles of Akkadian Textual Criticism Martin Worthington 2012-07-30 Errors of many kinds abound in Akkadian writings, but this fact's far-reaching implications have never been unraveled and systematized. To attempt this is the aim of this book. Drawing on scholarship from other fields, it outlines a framework for the critical evaluation of extant text and the formulation of conjectural emendations. Along the way, it explores issues at the interface of orthography, textual transmission, scribal education, grammar, literacy, and literary interpretation.

A Theory of Craft Howard Risatti 2009-12 What is craft? How is it different from fine art or design? In *A Theory of Craft*, Howard Risatti examines these issues by comparing handmade ceramics, glass, metalwork, weaving, and furniture to painting, sculpture, photography, and machine-made design from Bauhaus to the Memphis Group. He describes craft's unique qualities as functionality combined with an ability to express human values that transcend temporal, spatial, and social boundaries. Modern design today has taken over from craft the making of functional objects of daily use by employing machines to do work once done by hand. Understanding the aesthetic and social implications of this transformation forces us to see craft as well as design and fine art in a new perspective, Risatti argues. Without a way of understanding and valuing craft on its own terms, the field languishes aesthetically, being

judged by fine art criteria that automatically deny art status to craft objects. Craft must articulate a role for itself in contemporary society, says Risatti; otherwise it will be absorbed by fine art or design and its singular approach to understanding the world will be lost. *A Theory of Craft* is a signal contribution to establishing a craft theory that recognizes, defines, and celebrates the unique blend of function and human aesthetic values embodied in the craft object.

The Dogs of Winter Ann Lambert 2020-10-20 The sequel to *The Birds That Stay* - hailed by the *New York Journal of Books* as "a fascinating and gripping tale of suspense" and the *Globe and Mail* as one of "Ten thrillers that will keep you on the edge of your seat". Says Ann Cleeves of the new book: "it's about power and powerlessness in the dead of winter. And more than that, it's a rollicking good read." *The Dogs of Winter* begins after a howling snowstorm envelops Montreal, and the body of a young woman is discovered in its wake. The only clue to her identity is the photograph in her pocket, and on it, the phone number of Detective Inspector Romeo Leduc. Meanwhile, Marie and Romeo are busy navigating their deepening relationship, and a student at Marie's college is the victim of a terrible assault. While Romeo begins to think that the dead woman may be linked to violence against several homeless people in the city, the search for justice in both cases is thwarted by societal apathy and ignorance, even as the killer is stalking the frigid streets of Montreal, preying on and terrorizing its most vulnerable citizens.

Sustainable Agricultural Mechanization: A Framework for Africa Food and Agriculture Organization of the United Nations 2019-03-13 This framework presents ten interrelated principles/elements to guide Sustainable Agricultural Mechanization in Africa (SAMA). Further, it presents the technical issues to be considered under SAMA and the options to be analysed at the country and sub regional levels. The ten key elements required in a framework for SAMA are as follows: The analysis in the framework calls for a specific approach, involving learning from other parts of the world where significant transformation of the agricultural mechanization sector has already occurred within a three-to-four decade time frame, and developing policies and programmes to realize Africa's aspirations of Zero Hunger by 2025.

This approach entails the identification and prioritization of relevant and interrelated elements to help countries develop strategies and practical development plans that create synergies in line with their agricultural transformation plans. Given the unique characteristics of each country and the diverse needs of Africa due to the ecological heterogeneity and the wide range of farm sizes, the framework avoids being prescriptive.

Managing The Professional Service Firm David H. Maister 2012-12-11 Professional service firms differ from other business enterprises in two distinct ways: first they provide highly customised services thus cannot apply many of the management principles developed for product-based industries. Second, professional services are highly personalised, involving the skills of individuals. Such firms must therefore compete not only for clients but also for talented professionals. Drawing on more than ten years of research and consulting to these unique and creative companies, David Maister explores issues ranging from marketing and business development to multinational strategies, human resources policies to profit improvement, strategic planning to effective leadership. While these issues can be complex, Maister simplifies them by recognising that 'every professional service firm in the world, regardless of size, specific profession, or country of operation, has the same mission statement: outstanding service to clients, satisfying careers for its people and financial success for its owners.'

The Art of Partimento Giorgio Sanguinetti 2012-04-03 At the height of the Enlightenment, four conservatories in Naples stood at the center of European composition. Maestros taught their students to compose with unprecedented swiftness and elegance using the partimento, an instructional tool derived from the basso continuo that encouraged improvisation as the path to musical fluency. Although the practice vanished in the early nineteenth century, its legacy lived on in the music of the next generation. In *The Art of Partimento*, performer and music-historian Giorgio Sanguinetti chronicles the history of this long-forgotten Neapolitan art. Sanguinetti has painstakingly reconstructed the oral tradition that accompanied these partimento manuscripts, now scattered throughout Europe. Beginning with the origins of the partimento in the circles of Corelli, Pasquini, and Alessandro Scarlatti in Rome and tracing it through the peak of the tradition in Naples, *The Art of Partimento* gives a glimpse into the daily life and work of an eighteenth century composer. *The Art of the Partimento* is also a complete practical handbook to reviving the tradition today. Step by step, Sanguinetti guides the aspiring composer through elementary realization to more advanced exercises in diminution, imitation, and motivic coherence. Based on the teachings of the original masters, Sanguinetti challenges the reader to become a part of history, providing a variety of original partimenti in a range of genres, forms, styles, and difficulty levels along the way and allowing the student to learn the art of the partimento for themselves at their own pace. As both history and practical guide, *The Art of Partimento* presents a new and innovative way of thinking about music theory. Sanguinetti's unique approach unites musicology and music theory with performance, which allows for a richer and deeper understanding than any one method alone, and offers students and scholars of composition and music theory the opportunity not only to understand the life of this fascinating tradition, but to participate in it as well.

The False Promises of the Digital Revolution C. A. Bowers 2014 *The False Promises of the Digital Revolution* examines what currently goes largely unnoticed because of the many important uses of digital technologies. While many people interpret digital technologies as accelerating the global rate of progress, C. A. Bowers focuses attention on how they reinforce the deep and ecologically problematic cultural assumptions of the West: the myth of progress, the substitution of data for different cultural traditions of wisdom, the connections between print and abstract thinking, the myth of individual autonomy, the conduit view of language that hides how words (metaphors) reproduce earlier misconceptions, and a Social Darwinian justification for colonizing other cultures that is now leading to armed resistance - which, in turn, strengthens the ties between corporations, the military, and the computer science

industry. The book also investigates how to understand the cultural non-neutrality of digital technologies; how print and the emphasis on data undermine awareness of the tacit information pathways between cultural and natural ecologies; and how to identify educational reforms that will contribute to a more informed public about the uses of digital technologies.

On the Death and Life of Languages Claude Hagège 2009-01-01 Twenty-five languages die each year; at this pace, half the world's five thousand languages will disappear within the next century. In this timely book, Claude Hagège seeks to make clear the magnitude of the cultural loss represented by the crisis of language death. By focusing on the relationship of language to culture and the world of ideas, Hagège shows how languages are themselves crucial repositories of culture; the traditions, proverbs, and knowledge of our ancestors reside in the language we use. His wide-ranging examination covers all continents and language families to uncover not only how languages die, but also how they can be revitalized—for example in the remarkable case of Hebrew. In a striking metaphor, Hagège likens languages to bonfires of social behavior that leave behind sparks even after they die; from these sparks languages can be rekindled and made to live again.

Managing Complexity G. Rzevski 2014-03-25 *Managing Complexity* is the first book that clearly defines the concept of Complexity, explains how Complexity can be measured and tuned, and describes the seven key features of Complex Systems:

ConnectivityAutonomyEmergencyNonequilibriumNon-linearitySelf-organisationCo-evolution
The thesis of the book is that complexity of the environment in which we work and live offers new opportunities and that the best strategy for surviving and prospering under conditions of complexity is to develop adaptability to perpetually changing conditions. An effective method for designing adaptability into business processes using multi-agent technology is presented and illustrated by several extensive examples, including adaptive, real-time scheduling of taxis, sea-going tankers, road transport, supply chains, railway trains, production processes and swarms of small space satellites. Additional case studies include adaptive servicing of the International Space Station; adaptive processing of design changes of large structures such as wings of the largest airliner in the world; dynamic data mining, knowledge discovery and distributed semantic processing. Finally, the book provides a foretaste of the next generation of complex issues, notably, The Internet of Things, Smart Cities, Digital Enterprises and Smart Logistics.
