The Circle Dave Eggers 2013-10-08 A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can’t believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman’s ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

HIV/AIDS Treatment and Care Irina Eramova 2007 The WHO Regional Office for Europe has combined its 13 protocols on treatment of and care for people with HIV and AIDS in one volume. The protocols are the cornerstone of the strategic actions that WHO has taken as part of its contribution to achieving the goal of universal access to HIV/AIDS prevention, treatment, care and support services. The protocols were specifically developed for the entire WHO European Region. Together, they represent a comprehensive and evidence-based tool that offers health professionals clear and specific advice on diagnosing and managing a wide range of health issues related to HIV/AIDS for adults, adolescents and children, including antiretroviral treatment, the management of opportunistic infections, tuberculosis, hepatitis, injecting drug use, sexual and reproductive health, the prevention of mother-to-child HIV transmission, immunization, palliative care and post-exposure prophylaxis. The Gastro-Archeologist Jeremy Woodward 2021-02-03 In order to understand common conditions such as coeliac disease and Crohn's disease, one must view the gut in its evolutionary context. This is the novel approach to the gut and its diseases that is adopted in this book. The first part tells the story of the evolution of the gut itself - why it came about and how it has influenced the evolution of animals ever since. The second part focuses on the evolution of immunity and how the layers of immune mechanisms are retained in the gut, resembling the strata revealed in an archeological dig. The final part, 'The Gastro-Archeologist', ties the first two together and highlights how understanding the gut and immune system in their evolutionary context can help us understand diseases affecting them. Ambitious in its scope but telling a unique story from a refreshingly novel perspective, the book offers an informative and enjoyable read. As the story of the gut, immunity and disease unfolds, the author aims to endow readers with the same sense of awe and excitement that the subject evokes in him. Difficult concepts are illustrated using simple and colourful analogies, and the main content is supplemented with anecdotes and unusual and amusing facts throughout the book. The book is intended for anyone with an interest in the gut, its immunity and diseases, ranging from school and college biology and biomedical students, to professionals working in the field, and to patients suffering from intestinal diseases who want to understand more about their conditions.

Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Overtourism Claudio Milano 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

Fostering Skills in Cameroon Shobhana Sosale 2016-05-11 Cameroon has strong goals for its growth and development. By 2035, it aims to be an emerging economy. The country's medium-term goals are focused on alleviating poverty, consolidating democracy, and achieving national unity—while respecting diversity. This report contributes substantively to the Government's vision on Strategy for Growth and Employment, putting human development and employment at center stage. Cameroon faces three main challenges: • Developing more robust formal and informal employment opportunities by strengthening human development. • Increasing productivity in agriculture, mining, and key value chains (timber, tourism, and information and communication technology). • Advancing growth by investing in infrastructure and improving the business climate and regional integration. The Strategy sets a target for reducing underemployment from 76 percent of the workforce to 50 by 2020 by creating tens of

thousands of formal jobs. But based on results from the first two years of its implementation, the strategy is far from achieving that target. This report is meant to support Cameroon's efforts to build the skills of its workers. This report reaches conclusions and offers policy recommendations to answer six questions: • What has been the trajectory of Cameroon's economic growth? Which sectors have contributed to growth? • What jobs are being created? • What types of skills are being used in the sectors where the highest percentages of the population are employed? • What are the demand and supply barriers to skills? • Which policies and institutions are in play? Are they sufficient? • What needs to or could be reformed? Cameroon has good prospects for moving to middle-income status. It can create a more dynamic, responsive workforce. But a new strategy is required. It can be done. This report proposes new directions and provides recommendations. Outcomes are expected. Work has never been easy. But many have been working—and Cameroon can work.

Nineteen Eighty-Four George Orwell 2021-01-01 George Orwell's *Nineteen Eighty-Four* is unquestionably the most famous dystopian novel of all times. Written in the year of 1948, the author swapped the last two digits while describing a future totalitarian society where the minds, attitudes and actions of the subjects are thoroughly scrutinized by the "Thought Police", suspected dissidents tracked down and where the worship of the mythical party leader Big Brother is forced upon the masses. The low-ranking party member Winston Smith begins secretly to question the whole system and initiates a forbidden love affair with another party member.

Expanding the Lexicon Sabine Arndt-Lappe 2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon - understood in a wide sense as not being necessarily limited to the word level - by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

Global Tuberculosis Report 2019 World Health Organization 2019-08-12 WHO has published a global TB report every year since 1997. The main aim of the report is to provide a comprehensive and up-to-date assessment of the TB epidemic, and of progress in prevention, diagnosis and treatment of the disease, at global, regional and country levels. This is done in the context of recommended global TB strategies and targets endorsed by WHO's Member States, broader development goals set by the United Nations (UN) and targets set in the political declaration at the first UN high-level meeting on TB (held in September 2018). The 2019 edition of the global TB report was released on 17 October 2019. The data in this report are updated annually. Please note that direct comparisons between estimates of TB disease burden in the latest report and previous reports are not appropriate. The most recent time-series of estimates are published in the 2019 global TB report.

Ghana Must Go Taiye Selasi 2013-04-04 A stunning novel, spanning generations and continents, *Ghana Must Go* by rising star Taiye Selasi is a tale of family drama and forgiveness, for fans of Zadie Smith and Chimamanda Ngozi Adichie. This is the story of a family -- of the simple, devastating ways in which families tear themselves apart, and of the incredible lengths to which a family will go to put itself back together. It is the story of one family, the Sais, whose good life crumbles in an evening; a Ghanaian father, Kweku Sai, who becomes a highly respected surgeon in the US only to be disillusioned by a grotesque injustice; his Nigerian wife, Fola, the beautiful homemaker abandoned in his wake; their eldest son, Olu, determined to reconstruct the life his father should have had; their twins, seductive Taiwo and acclaimed artist Kehinde, both brilliant but scarred and flailing; their youngest, Sadie, jealously in love with her celebrity best friend. All of them sent reeling on their disparate paths into the world. Until, one day, tragedy spins the Sais in a new direction. This is the story of a family: torn apart by lies, reunited by grief. A family absolved, ultimately, by that bitter but most tenuous bond: familial love. *Ghana Must Go* interweaves the stories of the Sais in a rich and moving drama of separation and

reunion, spanning generations and cultures from West Africa to New England, London, New York and back again. It is a debut novel of blazing originality and startling power by a writer of extraordinary gifts. 'Ghana Must Go is both a fast moving story of one family's fortunes and an ecstatic exploration of the inner lives of its members. With her perfectly-pitched prose and flawless technique, Selasi does more than merely renew our sense of the African novel: she renews our sense of the novel, period. An astonishing debut' Teju Cole, author of Open City Taiye Selasi was born in London and raised in Massachusetts. She holds a B.A. in American Studies from Yale and an M.Phil. in International Relations from Oxford. "The Sex Lives of African Girls" (Granta, 2011), Selasi's fiction debut, appears in Best American Short Stories 2012. She lives in Rome.

Djibouti International Monetary Fund 2012-06-08 The modern economy of the Republic of Djibouti is based on rents directly or indirectly originating from the international port of Djibouti and from the country's strategic position. The Poverty Reduction Strategy Paper discusses that the growth recorded over the last five years is essentially driven by the increase in foreign direct investment—but especially by the activities of the Port of Djibouti. The informal economy constitutes a major proportion of the economic activities of Djibouti and provides a livelihood for much of the Djibouti population.
