**Magic and Superstition in Europe** Michael David Bailey 2007 The only comprehensive, single-volume survey of magic available, this compelling book traces the history of magic, witchcraft, and superstitious practices such as popular spells or charms from antiquity to the present day. Focusing especially on Europe in the medieval and early modern eras, Michael Bailey also explores the ancient Near East, classical Greece and Rome, and the spread of magical systems particularly modern witchcraft or Wicca from Europe to the United States. He examines how magic and superstition have been defined in various historical eras and how these constructions have changed over time. He considers the ways in which specific categories of magic have been condemned, and how those identified as magicians or witches have been persecuted and prosecuted in various societies. Although conceptions of magic have changed over time, the author shows how magic has almost always served as a boundary marker separating socially acceptable actions from illicit ones, and more generally the known and understood from the unknown and occult.

**Color Mania** Barbara Flückiger 2019-12-10 Since the earliest days of cinema, film has been a colorful medium and art form. More than 230 film color processes have been devised in the course of film history, often in close connection with photography. In this regard, both media institutionalized numerous techniques such as hand and stencil coloring as well as printing and halftone processes.

Apart from these fundamental connections in terms of the technology of color processes, film and photography also share and exchange color attributions and aesthetics. This publication highlights material aspects of color in photography and film, while also investigating the relationship of historical film colors and present-day photography. Works of contemporary photographers and artists who reflect on technological and culture-theoretical aspects of the material of color underline these relations. Thematic clusters focus on aesthetic and technological parallels, including fashion and identity, abstraction and experiment, politics, exoticism, and travel. Color Mania contains a general introduction to color in film and photography (technique, materiality, aesthetics) as well as a series of short essays that take a closer look at specific aspects. An extensive image section illustrates the texts and color systems and continues the aesthetic experience of the various processes and objects in book form. Exhibition: Fotomuseum Winterthur, Switzerland (07.09. - 24.11.2019).

*Magic and Magicians in the Middle Ages and the Early Modern Time* Albrecht Classen 2017-10-23 There are no clear demarcation lines between magic, astrology, necromancy, medicine, and even sciences in the pre-modern world. Under the umbrella term 'magic,' the contributors to this volume examine a wide range of texts, both literary and religious, both medical and philosophical, in which the topic is discussed from many different perspectives. The fundamental concerns address issues such as how people perceived magic, whether they accepted it and utilized it for their own purposes, and what impact magic might have had on the mental structures of that time. While some papers examine the specific appearance of magicians in literary texts, others analyze the practical application of magic in medical contexts. In addition, this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained. Magic is, oddly but significantly, still around us and exerts its influence. Focusing on magic in the medieval world thus helps us to shed light on human culture at large.

**Example Or Alter Ego? Aspects of the Portrait Historie in Western Art from Antiquity to the Present** Jos Koldewij 2016-12-14 The present collection of essays on the subject of the portrait historie treats examples of this subgenre of portraiture stemming from Classical Antiquity, medieval times, the Renaissance and Baroque period, but also from Romantic era and the modern movements of the nineteenth and twentieth centuries. A portrait historie can be described as an artistic rendering of an individual in the guise of a historical figure. In a broader and more modern sense it can be understood as a representation or figuration of the self which appropriates and incorporates visual metaphors by means of allegorisation and identification. This book is the result of a research project of the Art History Department in collaboration with the Archaeology Department of the Faculty of Arts of the Radboud University Nijmegen.

*Schwetzingen Palace Gardens* Hartmut Troll 2009-08-20 *The Silbergraue Führer (Silver Grey Guide)* presents an outline of the garden's history, describes its structures and the architects behind them and analyses the garden's significance as a cultural monument. The Schwetzingen Palace Gardens constitute a veritable showpiece of the European art of laying out gardens. A magnificent park forming the centrepiece of the elector's summer residence was created within a period of thirty years under

Electors Carl Theodor, his director of buildings and gardens, Nicolas de Pigage and the garden landscaper, Friedrich Ludwig von Sckell. Two different philosophies of laying out gardens, the French and the English ones, were juxtaposed in Schwetzingen, resulting in a unique artistic achievement. The multifarious interplay of garden art, architecture, sculpture and craftwork makes the Schwetzingen Palace Gardens into one of the best-preserved garden creations of the 18th century. The manifestations of freemasonry, an important social movement of the time, are by no means the least of its claims to fame. Such a concentration of objects bearing witness to the history of civilization makes the Schwetzingen Palace Gardens into a promising candidate for inclusion in UNESCO's list of World Heritage Sites.

**Remembering Constantine at the Milvian Bridge** Raymond Van Dam 2011-04-29 Constantine's victory in 312 at the battle of the Milvian Bridge established his rule as the first Christian emperor. This book examines the creation and dissemination of the legends about that battle and its significance. Christian histories, panegyrics and an honorific arch at Rome soon commemorated his victory, and the emperor himself contributed to the myth by describing his vision of a cross in the sky before the battle. Through meticulous research into the late Roman narratives and the medieval and Byzantine legends, this book moves beyond a strictly religious perspective by emphasizing the conflicts about the periphery of the Roman empire, the nature of emperorship and the role of Rome as a capital city. Throughout late antiquity and the medieval period, memories of Constantine's victory served as a powerful paradigm for understanding rulership in a Christian society.

The Hidden Keys André Alexis 2016-09-19 Giller Prize winner André Alexis's contemporary take on the quest narrative is an instant classic. Although the Green Dolphin is a bar of ill repute, it is there that Tancred Palmieri, a thief with elegant and erudite tastes, meets Willow Azarian, an aging heroin addict. She reveals to Tancred that her very wealthy father has recently passed away, leaving each of his five children a mysterious object that provides one clue to the whereabouts of a large inheritance. Willow enlists Tancred to steal these objects from her siblings and solve the puzzle. A Japanese screen, a painting that plays music, an aquavit bottle, a framed poem, and a model of Frank Lloyd Wright's Fallingwater: Tancred is lured in to this beguiling quest, and even though Willow dies before he can begin, he presses on. As he tracks down the treasure, however, he must enlist the help of Alexander von Wurfel, esteemed copyist, and fend off Willow's heroin dealers, a young albino named "Nigger" Colby and his sidekick, Sigismund "Freud" Luxemburg, a club-footed psychopath, both of whom are eager to get their paws on this supposed pot of gold. And he must mislead Detective Daniel Mandelshtam, his most adored friend. Based on a reading of Robert Louis Stevenson's Treasure Island, The Hidden Keys questions what it means to be honorable and what it means to be faithful.

**Magic in Western Culture** Brian P. Copenhaver 2015-09-09 The story of the beliefs and practices called 'magic' starts in ancient Iran, Greece, and Rome, before entering its crucial Christian phase in the Middle Ages. Centering on the Renaissance and Marsilio Ficino - whose work on magic was the most influential account written in premodern times - this groundbreaking book treats magic as a classical tradition with foundations that were distinctly philosophical. Besides Ficino, the premodern story of magic also features Plotinus, Iamblichus, Proclus, Aquinas, Agrippa, Pomponazzi, Porta, Bruno, Campanella, Descartes, Boyle, Leibniz, and Newton, to name only a few of the prominent thinkers

discussed in this book. Because pictures play a key role in the story of magic, this book is richly illustrated.

*Patterns and Persons* M. Barnard 2010 Scholarly research does not develop in an historical vacuum. The questions addressed and the vantage points from where they are studied, are closely related to the social and cultural contexts in which the researchers are working and living. This holds in a particular way true for liturgical research done in the twentieth century. The research carried out in this period was clearly influenced by the changes that various forms of Christianity, and more in general religion as such, went through during this century. The clearest evidence of the strong impact these changes had on liturgical practice is provided by a series of sweeping liturgical reforms taking place in the second half of the century. The research of liturgical scholars was indirectly or directly influenced by the social and cultural processes that were taking place. These processes unavoidably had their effect on the questions that were raised and on the foci that were chosen and it also coloured, at least to some extent, the interpretations given to the data studied. During the last few decades, these issues have frequently and thoroughly been discussed by the Dutch liturgical scholars who are cooperating within the open, inter-confessional and interdisciplinary setting of the Institute for Liturgical and Ritual Studies located at the Tilburg University. Apart from furthering reflection about the various scholarly paradigms that were followed among these scholars, these discussions and conversations also aroused a historiographic curiosity, especially with regard to the development of liturgical scholarship in the Netherlands. How did liturgical studies develop in the course of this century in the Netherlands? What

scholarly approaches were predominant? What paradigms and shifts of paradigm can one discern? And how did these relate to the development of liturgical practice and the underlying religious, cultural and historical processes? In several respects the Dutch case was unique, due to specific historical circumstances. These considerations led to the decision to devote a common research project to the history of liturgical studies in the Netherlands and this volume is the final outcome of this project.

*Mental Health, Spirituality, and Religion in the Middle Ages and Early Modern Age* Albrecht Classen 2014-07-28 This volume continues the critical exploration of fundamental issues in the medieval and early modern world, here concerning mental health, spirituality, melancholy, mystical visions, medicine, and well-being. The contributors, who originally had presented their research at a symposium at The University of Arizona in May 2013, explore a wide range of approaches and materials pertinent to these issues, taking us from the early Middle Ages to the eighteenth century, capping the volume with some reflections on the relevance of religion today. Lapidary sciences matter here as much as medical-psychological research, combined with literary and art-historical approaches. The premodern understanding of mental health is not taken as a miraculous panacea for modern problems, but the contributors suggest that medieval and early modern writers, scientists, and artists commanded a considerable amount of arcane, sometimes curious and speculative, knowledge that promises to be of value and relevance even for us today, once again. Modern palliative medicine finds, for instance, intriguing parallels in medieval word magic, and the mystical perspectives encapsulated highly productive alternative perceptions of the macrocosm and microcosm that promise to be insightful and important also for the post-modern world.
