Medical Surgical Nursing Linda Workman 2021-09-02 Master the essential medical-surgical nursing content you'll need for success on the Next Generation NCLEX(R) Exam (NGN) and safe clinical practice! Medical-Surgical Nursing: Concepts for Interprofessional Collaborative Care, 10th Edition uses a conceptual approach to provide adult health knowledge and help you develop the clinical nursing judgment skills that today's medical-surgical nurses need to deliver safe, effective care. "Iggy" emphasizes three emerging trends in nursing □ interprofessional collaborative care, concept-based learning, and clinical judgment and systems thinking □ trends that will ground you in how to think like a nurse and how to apply your knowledge in the classroom, simulation laboratory, and clinical settings. A perennial bestseller, "Iggy" also features NCLEX Exam-style Challenge and Mastery questions to prepare you for success on the NGN! Consistent use of interprofessional terminology promotes interprofessional collaboration through the use of a common healthcare language, instead of using isolated nursing-specific diagnostic language. UNIQUE! Enhanced conceptual approach to learning integrates nursing concepts and exemplars, providing a foundation in professional nursing concepts and health and illness concepts, and showing their application in each chapter. Unparalleled emphasis on clinical reasoning and clinical judgment helps you develop these vital skills when applying concepts to clinical situations. Emphasis on QSEN and patient safety focuses on safety and evidence-based practice with Nursing Safety Priority boxes, including Drug Alert, Critical Rescue, and Action Alert boxes. Direct, easy-to-read writing style

features concise sentences and straightforward vocabulary. Emphasis on health promotion and community-based care reflects the reality that most adult health care takes place in environments outside of high-acuity (hospital) settings.

Virtual Clinical Excursions 3. 0 for Fundamental Concepts and Skills for Nursing Susan C. DeWit 2005-10

This dynamic and engaging workbook/CD-ROM package guides users through Pacific View Regional Hospital - a multi-level, virtual hospital setting in which students meet and care for a set of highly complex and diverse patients. The VCE workbook acts as a map, guiding users through the interactive setting as they care for patients in the virtual hospital and draw connections between these nursing experiences and their textbook discussions. Each workbook lesson includes a reading assignment from Fundamental Concepts and Skills for Nursing, 2nd Edition and activities that tie in with the accompanying software. Virtual Clinical Excursions equips users with the practical knowledge and skills needed for clinical rotations, while sharpening the decision-making skills that will help them set priorities for care, collect and interpret data, prepare and administer medications, and reach conclusions about patient problems. Meaningful, real-world problems place users in nursing scenarios where they can set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. The highly-engaging format encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. Lessons in the workbook complement the content in the textbook and guide the student through the virtual hospital. Includes NCLEX examination-style questions that offer built-in testing of clinical knowledge. The CD-ROM offers users the opportunity to visit each patient and access realistic information essential for patient care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. A clock icon appears under each lesson, estimating how much time it will take to complete. A linkage icon alerts the user whenever they are about to begin an exercise that connects with previous lessons. The elimination of third-party plug-ins facilitates fast and

easy software installation. Flash-based technology allows for more ease of use and seamless navigation. Greater faculty support with the addition of the FAC PAC, a new instructors' website, and a radically expanded testing component. A medication administration feature enables users to select, prepare, and administer medications. Over 50 common medication errors imbedded within the software to boost clinical realism and prepare students for current practice. A Medication Room that contains a wide variety of drug storage areas, such as a Unit Dosage Cabinet, Automated Dispensing System, IV Storage, and a Refrigerator. 6 unique patients/cases, each with complex medical-surgical conditions for students to care for and monitor within the virtual hospital.

Virtual Clinical Excursions Online and Print Workbook for Introduction to Maternity and Pediatric Nursing

Gloria Leifer 2018-12-18 One of the most complete nursing education learning systems available, Virtual Clinical Excursions 4.0 (VCE) is an interactive print and online workbook that guides you through a virtual hospital where the patients are real and their conditions are constantly changing. Each lesson features a core reading assignment from Introduction to Maternity and Pediatric Nursing, 8th Edition along with activities based on "visiting" the patients in the hospital. By immersing you in a realistic, yet safe, nursing environment, VCE simulates the average clinical rotation by allowing you to conduct a complete assessment of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. This unique virtual setting is the best way to learn about the complexities of patient care by giving you the perfect environment to practice what you've learned. Duration for access to this product, which may be at the discretion of your institution, is up to 36 months. Elsevier reserves the right to restrict or remove access due to changes in product portfolio or other market conditions. Updated drug reference includes a comprehensive set of the

latest drug monographs to help you make the best clinical judgments to complete each case. Online workbook lessons guide you throughout the patient scenarios to collect information, make decisions, and set priorities. Vital signs tool within each patient's room allows you to check the patient's status at critical moments, and promotes safe practice. Nurse-client interaction videos depict conversations and situations involving nurses, patients, family members, and hospital staff to help you discern between communications that are ideal and those that need improvement. Unique records that house data from the virtual patient's hospital stay allows you to record new findings to see how the data for different attributes has changed over time. Laboratory guide provides standard value ranges for all laboratory values offered within the virtual patient hospital, so you can confirm and compare standard lab values against your patients' test results. Physical examination experience with unique images and assessment findings advance your understanding of each patient's system assessments. Patient medication administration enhances your ability to think critically about safe medication practices and follow safe medication standards. Allows for easy and quick access to various patient charts, including Physician's Orders, Laboratory Reports, Patient Education, Nursing Admission, and many more. Kardex nursing information regarding patients' acute care provides quick access to vital information such as physician's orders, laboratory reports, patient education, nursing admission, and more, offering a richly detailed portrait of the patient. NEW! Updated content from Introduction to Maternity and Pediatric Nursing, 8th Edition addressed through patient care activities in the VCE workbook, providing you with active learning of the latest evidence-based care.

Principles and Practice of Psychiatric Nursing Gail Wiscarz Stuart 2005 Principles and Practice of Psychiatric Nursing, 8th Edition provides comprehensive coverage of psychiatric nursing. Beginning with fundamental coverage of all key psychiatric nursing principles, it goes on to address the complete continuum of care - including mental health promotion and illness prevention, crisis intervention, and psychiatric rehabilitation and recovery. The book then applies psychiatric nursing principles to specific clinical disorders based on adaptive-maladaptive coping responses, the six-step nursing process, and DSM-IV-TR and NANDA diagnoses. Subsequent chapters describe various modalities of treatment (psychopharmacology, somatic therapies, cognitive and behavioral therapies, managing aggressive behavior, and more), hospital-based and community-based care, and treatment of special populations. The Stuart Stress Adaptation Model provides a consistent nursing-oriented framework for understanding health and wellness. Evidence-based algorithms are presented in lieu of the less relevant critical pathways found in other texts. The latest American Nurses Association's Standards of Care prepare students for the realities of evidenced-based care in nursing practice. A vibrant, full-color design enhances and enriches students' understanding of essential concepts. Short vignettes in a patient's and family's own words give readers a different perspective of the caregiving process. Case studies present in-depth clinical scenarios that show each step of the nursing process, demonstrating realistic applications of the nursing process. Critical thinking questions interspersed throughout the text encourage independent clinical reasoning. Numerous boxes and tables throughout the book highlight important issues and current topics related to chapter content in visual, easy-to-digest segments. Citing the Evidence boxes provide summaries of recent clinical research, with new boxes added to the Evolve website each month. Nursing Treatment

Plan Summaries present care plans, including patient goals with nursing interventions and rationales, to guide nursing care related to the treatment of major disorders. Patient Education Plans and Family Education Plans include key information nurses need to communicate to the patient and family members. Sample Therapeutic Dialogues for nurse-patient interactions demonstrate the difference between therapeutic and nontherapeutic communication. Clinical chapters have been carefully revised and updated to include the latest research and appropriate nursing and medical diagnoses relevant to each disorder. A strengthened family focus and more in-depth discussion of outpatient care reflect current trends in psychiatric nursing. NIC and NOC are introduced in the nursing process chapter (chapter 12) and incorporated as appropriate into disorders chapters. Chapter Focus Points at the end of each chapter provide a comprehensive review of important information. Key terms are defined in the glossary and listed with page references at the end of the chapter in which they appear. A comprehensive list of behavioral rating scales is offered as an appendix for easy reference. A companion CD-ROM offers animations, interactive exercises, review questions for the NCLEX examination, and an audio glossary for additional study and review. A companion CD-ROM offers animations, interactive exercises, review questions for the NCLEX examination, and an audio glossary for additional study and review. New chapters explore the latest trends and relevant topics, including: Families as Resources, Caregivers, and Collaborators (Chapter 11); Family Interventions (Chapter 33) Community-Based Psychiatric Nursing Care (Chapter 35); and Psychological Care of Patients with Life Threatening Illness (Chapter 40).

Focused Patient Assessment tables include actual questions to help you learn how to effectively phrase questions to patients as well as target physical assessment techniques. Nursing skills at the end of each chapter feature full-bleed coloring on the edge of the page to make them easy to locate. Safety guidelines for nursing skills sections precede each skills section to help you focus on safe and effective skills performance. Detailed care plans in the text and on Evolve demonstrate the application of the 5-step nursing process to individual patient problems to help you understand how a plan is developed and how to evaluate care. Unexpected outcomes and related interventions for skills alert you to possible problems and appropriate nursing action. Patient Teaching boxes help you plan effective teaching by first identifying an outcome, then developing strategies on how to teach, and finally, implementing measures to evaluate learning. Care of the Older Adult boxes highlight key aspects of nursing assessment and care for this growing population. Key points neatly summarize the

most important content for each chapter to help you review and evaluate learning. Evidence-Based Practice boxes include a PICO question, summary of the results of a research study, and a F description of how the study has affected nursing practice – in every chapter. Patient-Centered Care boxes address racial and ethnic diversity along with the cultural differences that impact socioeconomic status, values, geography, and religion. 65 Skills and procedural guidelines provide clear, step-by-step instructions for providing safe nursing care. 5-step nursing process provides a consistent framework for clinical chapters. Concept maps visually demonstrate planning care for patients with multiple diagnoses. NOC outcomes, NIC interventions, and NANDA diagnoses are incorporated in care plans to reflect the standard used by institutions nationwide.

Virtual Clinical Excursions 2.0 to Accompany Fundamentals of Nursing Patricia A. Potter 2004-06 A multi-floor, virtual hospital, VCE 2.0: Canyon View Regional Medical Center contains 14 patient rooms with five floors - a Well Child Clinic, a Pediatrics Floor, a Surgery Department, an Intensive Care Unit, and a Medical-Surgical Telemetry Floor. These patients are included in VCE 2.0: Canyon View Regional Medical Center: · Darlene Martin Ms. Martin, age 49, was admitted with uterine leiomyomata, irregular periods,

and endometrial hyperplasia. She opts for a total abdominal hysterectomy. · James Franklin Mr. Franklin, age 67, admitted after experiencing episodic light-headedness, left arm and left leg numbness, and one episode of expressive aphasia. He undergoes a carotid endarterectomy. · James Story Mr. Story, age 42, has renal failure and Type 1 Diabetes Mellitus. He arrives complaining of significant weakness, nausea, and an increasingly edematous right arm. · Paul Jungerson Mr. Jungerson, age 61, complains of persistent left lower quadrant abdominal pain that has lasted for 3 days. Diagnosed with a coloanal anastomosis disruption, he undergoes a colostomy. · Elizabeth Washington Ms. Washington, age 63, is admitted following an automobile accident which fractures her hip. · Tom Handy Mr. Handy, age 62, is admitted for a right upper lobectomy with bronchoscopy for moderately differentiated squamous cell carcinoma of the right lung. · Julia Parker Ms. Parker, age 55, is admitted with indigestion and mid back pain. She suffers a myocardial infarction. Includes a guided tutorial which shows students how to work with a patient in the virtual hospital · collect patient data from various sources (reports, charts, medication administration record, short video clips and audio clips of nurse-patient interactions) · record patient data · listen to a report and itemize a patient's problems and high-priority concerns · and sometimes administer medications. Requires students to use their critical thinking skills to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. Encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. A new clock icon appears under each lesson, offering an estimate on how much time it will take to complete. A new linkage icon alerts users whenever they are about to begin an exercise that connects with previous lessons. A new Table of Contents-Index matches the chapters from the textbook with patients and lessons in the workbook. A series of groundbreaking, new workbooks and CD-ROMs, Virtual Clinical Excursions bring learning to life in two different "virtual" hospital settings! Each lesson in Virtual Clinical Excursions has a core textbook reading assignment with corresponding CD-ROM and workbook activities. The exercises in the workbook complement the content in the the parent text and provide a perfect environment in which students may "practice" what they are learning in the text. The workbooks act as maps - guiding students through the CD-ROM as they care for patients in the virtual hospital. Virtual hospital visits on the CD-ROM allow

students to access realistic information resources that are essential to patient care.
