Cases, 10/E is a 28 chapter book. Chapters 1-14 cover financial accounting, while Chapters 15-21 cover management accounting, and Chapters 22-28 focus on broader issues of control and corporate strategy. The approximately 120 cases that largely make up the end-of-chapter material are a combination of classic Harvard style cases, as well as extended problems. New to this edition is the inclusion of 2-3 problems per chapter. These problems, while not as involved as the case material, allow the students to exercise the concepts demonstrated in each chapter. The goal of the problem material is to provide a transition to the case material, which is a response to customer requests.

Data Structures and the Java Collections Framework William Joseph Collins 2002 This student-friendly book is designed for a course in data structures where the implementation language is Java. The focus is on teaching students how to apply the concepts presented, therefore many applications and examples are included, as well as programming projects, which get students thinking more deeply. The author shows students how to use the data structures provided in the Java Collections Framework, as well as teaching them how to build the code themselves. Using the Java Collections Framework gives the students the opportunity to work with fully tested code. Also, since this is a standard library of classes, students will be able to continue to use it for other courses and as they move into industry. Another feature of this text is that labs are provided with the book. They can be used as open-labs, closed labs, or homework assignments and are designed to give students hands-on experiences in programming. These optional labs provide excellent practice and additional material.

Pharmacology of Antibiotics J. D. Williams 2012-12-06 The International Society of Chemotherapy meets every two years to review progress in chemotherapy of infections and of malignant disease. Each meeting gets larger to encompass the extension of chemotherapy into new areas. In some instances, expansion has been rapid, for example in cephalosporins, pen icillins and combination chemotherapy of cancer - in others slow, as in the field of parasitology. New problems of resistance and untoward effects arise; reduction of host toxicity without loss of antitumour activity by new substances occupies wide attention. The improved results with cancer chemotherapy, es pecially in leukaemias, are leading to a greater prevalence of severe infection in patients so treated, pharmacokinetics of drugs in normal and diseased subjects is receiving increasing attention along with related problems of bioavailability and interactions between drugs. Meanwhile the attack on some of the major bacterial infections, such as gonorrhoea and tubercu losis, which were among the first infections to feel the

impact of chemotherapy, still continue to be major world problems and are now under attack with new agents and new methods. From this wide field and the 1,000 papers read at the Congress we have produced Proceedings which reflect the variety and vigour of research in this important field of medicine. It was not possible to include all of the papers presented at the Congress but we have attempted to include most aspects of current progress in chemotherapy.

Introduction to Leadership Peter G. Northouse 2017-02-06 The Fourth Edition of Peter G. Northouse's bestselling *Introduction to Leadership: Concepts and Practice* provides readers with a clear overview of the complexities of practicing leadership and concrete strategies for becoming better leaders.
