The Biomass Assessment Handbook Frank Rosillo-Calle 2012-04-27 The increasing importance of biomass as a renewable energy source has lead to an acute need for reliable and detailed information on its assessment, consumption and supply. Responding to this need, and overcoming the lack of standardized measurement and accounting procedures, this handbook provides the reader with the skills to understand the biomass resource base, the tools to assess the resource, and explores the pros and cons of exploitation. Topics covered include assessment methods for woody and herbaceous biomass, biomass supply and consumption, remote sensing techniques as well as vital policy issues. International case studies, ranging from techniques for measuring tree volume to transporting biomass, help to illustrate step-by-step methods and are based on field work experience. Technical appendices offer a glossary of terms, energy units and other valuable resource data.

Where Have All the Textbooks Gone? Tony Read 2015-07-22 This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be

particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.

World Malaria Report 2015 World Health Organization 2016-01-30 The World Malaria Report 2015 assesses global malaria disease trends and changes in the coverage and financing of malaria control programs between 2000 and 2015. It also summarizes progress towards international targets, and provides regional and country profiles that summarize trends in each WHO region and each country with malaria. The report is produced with the help of WHO regional and country offices, ministries of health in endemic countries, and a broad range of other partners. The data presented are assembled from the 96 countries and territories with ongoing malaria transmission, and a further five countries that have recently eliminated malaria. Most data are those reported for 2014 and 2015, although in some cases projections have been made into 2015, to assess progress towards targets for 2015.

Church and State in Ethiopia: 1270 - 1527 Taddesse Tamrat 2009-12 The book by Dr. Taddesse Tamrat is an important contribution. ... In fact, the author shows his full and precise knowledge of past literature on Ethiopia, and his critical analysis of historical events is well founded on the results of recent work; but also-and this is an important novelty-he had access to hagiographical and historical documents, kept in Ethiopian monasteries, which had not previously been known to scholars. ... - Professor Enrico Cerulli, in BSOAS, Vol. 37, 1972. Once in a long while, books are written that set the standard in their discipline. Taddesse Tamrat's Church and State has been just such a book, a classic in Ethiopian historiography, unsurpassed in its painstaking reconstruction of the medieval history of Ethiopia. Few historians have used the rich historical data of the *gädl* literature as exhaustively and as meticulously as Taddesse has done, teasing out crucial information as only an Ethiopian versed in church traditions could do. Equally significant for the value of the book has been the blending of these Ethiopian traditional sources with the rich contemporary Arabic sources and the commentaries and analyses of such authorities as Carlo Conti Rossini. In short, what Taddesse has done through this masterly reconstruction is to blaze the trail that other Ethiopian historians have followed, a process that culminated in the growth and ripening of professional Ethiopian historiography. - Professor Bahru Zewde is the author of A History of Modern Ethiopia Professor Taddesse Tamrat's magisterial historical work Church and State in Ethiopia, 1270-1527, documents the rise and expansion of a new dynasty in highland Christian Ethiopia and the simultaneous growth of Ethiopian monasticism as an intellectual and cultural force. Based upon a broad range of primary sources previously either unknown or not utilized, this book remains the essential text for the history of the highland Christian state of Ethiopia during the period of its development as the dominant state in the Horn of Africa. This seminal work established the historical foundation for subsequent studies in the history of highland Ethiopia, including specialized cultural and historical analyses of theology, music and religious art. - Professor Marilyn E. The Anglo-Irish War Peter Cottrell 2014-06-06 The Anglo-Irish War has often been referred to as the war 'the English have struggled to forget and the Irish cannot help but remember'. Before 1919, the issue of Irish Home Rule lurked beneath the surface of Anglo-Irish relations for many years, but after the Great War, tensions rose up and boiled over. Irish Nationalists in the shape of Sinn Féin and the IRA took political power in 1919 with a manifesto to claim Ireland back from an English 'foreign' government by whatever means necessary. This book explores the conflict and the years that preceded it, examining such historic events as the Easter Rising and the infamous Bloody Sunday.

Seán Ó Riada Tomás Ó Canainn 2003 Sean O Riada (1931-1971) was a major factor in the rise of Irish traditional music in the second half of the twentieth century. He is one of Ireland's most fascinating and significant characters--composer, musician (jazz, classical, and traditional), director of music for the Abbey Theatre, raconteur, film-maker, and academic--and the man most influential in changing the direction, and popularity, of traditional music that set the stage for the success of bands like The Chieftains and Planxty. In this wide-ranging account of his life and work a friend and colleague looks behind the mask O Riada held up to the world and reveals the complex personality of a unique individual, the first composer of modern Ireland.

Food and Agriculture in Ethiopia Paul Dorosh 2013-02-11 The perception of Ethiopia projected in the media is often one of chronic poverty and hunger, but this bleak assessment does not accurately reflect most of the country today. Ethiopia encompasses a wide variety of agroecologies and peoples. Its agriculture sector, economy, and food security status are equally complex. In fact, since 2001 the per capita income in certain rural areas has risen by more than 50 percent, and crop yields and availability have also increased. Higher investments in roads and mobile phone technology have led to improved infrastructure and thereby greater access to markets, commodities, services, and information. Challenges, Paul Dorosh and Shahidur Rashid, along with other experts, tell the story of Ethiopia's political, economic, and agricultural transformation. The book is designed to provide empirical evidence to shed light on the complexities of agricultural and food policy in today's Ethiopia, highlight major policies and interventions of the past decade, and provide insights into building resilience to natural disasters and food crises. It examines the key issues, constraints, and opportunities that are likely to shape a food-secure future in Ethiopia, focusing on land quality, crop production, adoption of high-quality seed and fertilizer, and household income. Students, researchers, policy analysts, and decisionmakers will find this book a useful overview of Ethiopia's political, economic, and agricultural transformation as well as a resource for major food policy issues in Ethiopia. Land Tenure and Rural Development Food and Agriculture Organization of the United Nations 2002 This publication deals with key issues in land tenure, especially as they relate to food insecurity and rural development situations. Land tenure issues are frequently ignored in rural development interventions, with often long-lasting, negative results. This guide is designed to assist technical officers in governments and civil society in understanding why and how land tenure issues should be considered in rural development projects. It analyses important contexts such as environmental degradation, gender discrimination, and conflicts, where land tenure is currently of critical concern.

Marginality Joachim von Braun 2013-08-19 This book takes a new approach on understanding causes of extreme poverty and promising actions to address it. Its focus is on marginality being a root cause of poverty and deprivation. "Marginality" is the position of people on the edge, preventing their access to resources, freedom of choices, and the development of capabilities. The book is research based with original empirical analyses at local, national, and local scales; book contributors are leaders in their fields and have backgrounds in different disciplines. An important message of the book is that economic and ecological approaches and institutional innovations need to be integrated to overcome marginality. The book will be a valuable source for development scholars and students, actors that design public policies, and for social innovators in the private sector and non-governmental organizations.□

Between Two Shores Mairéad Conneely 2011 This book examines the literary, cultural and metaphorical importance of the Aran Islands through a comparative analysis of Emily Lawless's <I>Grania: The Story of an Island (1892), J. M. Synge's <I>The Aran Islands (1907), Liam Ó Flaithearta's <I>Duil (1953) and Mairtin Ó Direain's <I>Danta: 1939-1979 (1980). It draws on hypotheses from postcolonial, utopian and island studies, and focuses in particular on the power of language and the significance of the dialectic of place and space.
 The author employs a variety of approaches from the fields of cartography, history, geology and cultural studies, in order to give a comprehensive picture of the Aran Islands' importance through the centuries. In its intertextual nature, <I>Between Two Shores emphasises the significance of investigating and studying the literature of Irish and international islands, and the Aran Islands in particular. While employing an insider's approach, the

author also gives voice to the contribution of the outsider. The liminal existences described here are a testament to the cultural and interspatial identities of people and writers who negotiate both shores, both linguistic codes and both interpretations of the fixed or fluid island space. This book illuminates the versions and visions of Aran that have been written and that today help to characterise Ireland's most idealised Islands."

State and Economic Development in Africa Aaron Tesfaye 2017-07-20 This book critically assesses the impact of Ethiopia's policy of Agriculture Development Led Industrialization. Employing qualitative and quantitative analysis, it presents empirical evidence suggesting persistent economic growth. The research highlights improvements in infrastructure, health care, education, poverty alleviation as well reductions in infant mortality rate. The impact of this economic growth has however had led to only slight improvements in the plight of the poor. The author argues that, while significant steps have been achieved with measurable economic gains, there are still undeniable obstacles within the federal system: prevailing patron-client relationships, constraints on state capacity to efficiently and effectively implement policy, and bureaucratic rent-seeking in the provision of public goods. The author concludes that these problems will have to be resolved before Ethiopia's political economy can achieve the stage of sustainable development

Food at Work Christopher Wanjek 2005 This volume establishes a clear link between good nutrition and high productivity. It demonstrates that ensuring that workers have access to nutritious, safe and affordable food, an adequate meal break and decent conditions for eating is not only socially important and economically viable but a profitable business practice too. Through case studies from a variety of enterprises in 28 industrialized and developing countries, the book offers valuable and practical food solutions which can be adapted to workplaces of different sizes and with different budgets. It also addresses an often-overlooked issue in nutrition: access to clean drinking water. Relevant laws, regulations and guides pertaining to meal breaks and workplace nutrition are also highlighted in this volume, and an extensive section containing checklists and other useful resources for unions, employers and governments is included.

Just Give Money to the Poor David Hulme 2012-03-01 * Argues strongly for overlooked approach to development by showing how the poor use money in ways that confound stereotypical notions of aid and handouts * Team authored by foremost scholars in the development field Amid all the complicated economic theories about the causes and solutions to poverty, one idea is so basic it seems radical: just give money to the poor. Despite its skeptics, researchers have found again and again that cash transfers given to significant portions of the population transform the lives of recipients. Countries from Mexico to South Africa to Indonesia are giving money directly to the poor and discovering that they use it wisely – to send their children to school, to start a business and to feed their families. Directly challenging an aid industry that thrives

on complexity and mystification, with highly paid consultants designing ever more complicated projects, Just Give Money to the Poor offers the elegant southern alternative – bypass governments and NGOs and let the poor decide how to use their money. Stressing that cash transfers are not charity or a safety net, the authors draw an outline of effective practices that work precisely because they are regular, guaranteed and fair. This book, the first to report on this quiet revolution in an accessible way, is essential reading for policymakers, students of international development and anyone yearning for an alternative to traditional poverty-alleviation methods.

WHO Recommendations on Antenatal Care for a Positive Pregnancy Experience World Health Organization 2017-01-15 Within the continuum of reproductive health care, antenatal care provides a platform for important health-care functions, including health promotion, screening and diagnosis, and disease prevention. It has been established that, by implementing timely and appropriate evidence-based practices, antenatal care can save lives. Endorsed by the United Nations Secretary-General, this is a comprehensive WHO guideline on routine antenatal care for pregnant women and adolescent girls. It aims to complement existing WHO guidelines on the management of specific pregnancy-related complications. The guidance captures the complex nature of the antenatal care issues surrounding healthcare practices and delivery, and prioritizes person-centered health and well-being --- not only the prevention of death and morbidity --- in accordance with a human rights-based approach.

World Development Report 2018 World Bank Group 2017-10-16 Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make

schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.
