A Central Bank's Guide to International Financial Reporting Standards Mr. Rudy Wytenburg 2021-04-05 About one-quarter of the world's central banks apply IFRS with approximately a quarter more looking to IFRS for further guidance where their local standards do not provide enough guidance. Given the varied mandates and types of policy operations undertaken by central banks, there also exists significant variation in practice, style, and the extent of the financial disclosures in both the primary statements and in the note disclosures. By their nature, central banks are unique in their jurisdiction and so do not always have local practices and examples they can follow. Although the major accounting firms have created model disclosures intended for commercial banks, these are often not totally appropriate for a central bank. The application of IFRS across central banks differs based on the mandate of the central bank and the capacity of the accounting profession in the specific jurisdiction. An analysis of international practices, such as those undertaken in preparing these model statements, may help address questions about the structure of the statements themselves as well as the organization of the note disclosures. As a consequence, each central bank following IFRS has largely developed its own disclosures with only limited reference to others. Input from the external auditors has been significant, but some of this has been determined by the approach used by the specific auditor's style for commercial banks rather than central banks. Auditors do not always fully appreciate the differences between a commercial bank and a central bank, which has a different role and undertakes transactions to meet its policy objectives. This has often led to an over emphasis of items not material in the context of a central bank and insufficient disclosures on operations or accountabilities specific to the functions of the central bank.

Frequently Asked Questions in IFRS Steven Collings 2013-03-01 A concise FAQ guide to IFRS principles and practices Co-written by Steven Collings, winner of Accounting Technician of the Year at the British Accountancy Awards 2011, this book is a comprehensive guide to International Financial Reporting Standards (IFRS) which became mandatory in the EU in 2005, and they will almost certainly be adopted by most other developed countries in the near future. Unlike US-GAAP and other sets of standards, the IFRS are principles-based rather than rules-based, putting the onus of interpretation more on users than has previously been the case. Under IFRS users must understand the economic substance of operations, and they must be able to make assumptions, hypotheses, and estimations leading to an accounting treatment consistent with the general objectives of and principles behind IFRS financial reporting. In a handy, easy-to-navigate Q&A format, Frequently Asked Questions on IFRS provides accounting and finance professionals with the answers to some of the most commonly asked questions on the new standards. Covering the often complicated areas of accounting for financial instruments, tangible and intangible assets, provisions, and revenue recognition, the book also contains a valuable overview of the standards and the thinking behind them. Includes a comprehensive section on the new IFRS for small and medium enterprises Contains real-world examples from financial reports; a glossary of commonly used terms; and a 'Test Your Knowledge' section Provides a simple way to get up to speed on these often confusing, principles-based standards

Interpretation and Application of International Accounting and Financial Reporting Standards 2010

Applying International Accounting Standards Keith Alfredson 2005-02-28 Applying International Accounting Standards is an exciting new textbook written to meet the needs of accounting students and practitioners in understanding the complexities and applying the stable platform of International Accounting Standards. It does not cover all International Accounting Standards, concentrating on those that are not related to specific industries. The text offers a step-by-step introduction to the financial reporting procedures outlined within the new International Financial Reporting Standards (IFRS). With the inception of the IFRS on 1 January 2005, students studying accounting will need to possess a thorough conceptual and practical understanding of the new financial reporting requirements contained within the majority of the 41 IFRS. The focus of this text is on the interpretation, analysis, illustration and application of the scope and purpose of the new financial reporting processes of the IFRS. As the financial reporting environment will be new to most from January 2005, each chapter contains numerous illustrative examples to ensure that the student gains a deep understanding of all the reporting requirements under the respective IFRS. This textbook has been written for intermediate and advance financial reporting courses, at both undergraduate and postgraduate level, and aligns with the knowledge expectations of the accounting profession.
