**Chosen Soldier** Dick Couch 2008-03-25 An unprecedented view of Green Beret training, drawn from the year Dick Couch spent at Special Forces training facilities with the Army's most elite soldiers. In combating terror, America can no longer depend on its conventional military superiority and the use of sophisticated technology. More than ever, we need men like those of the Army Special Forces—the legendary Green Berets. Following the experiences of one class of soldiers as they endure this physically and mentally exhausting ordeal, Couch spells out in fascinating detail the demanding selection process and grueling field exercises, the high-level technical training and intensive language courses, and the simulated battle problems that test everything from how well SF candidates gather operational intelligence to their skills at negotiating with volatile, often hostile, local leaders. *Chosen Soldier* paints a vivid portrait of an elite group, and a process that forges America's smartest, most versatile, and most valuable fighting force.

**The Art of Clean Up** Ursus Wehrli 2013-02-19 The modern world can get messy. Fortunately, Swiss artist Ursus Wehrli is a man of obsessive order, as he demonstrates with eye-catching surprise in *The Art of Clean Up*. Already a bestseller in Germany, this compulsive title has sold more than 100,000 copies in less than a year, and the fastidiously arranged images have garnered blog love from NPR, Brain Pickings, swissmiss, and more. Tapping into the desire for organization and the insanity of über-order, Wehrli humorously categorizes everyday objects and situations by color, size, and shape. He arranges alphabet soup into alphabetical order, sorts the night sky by star size, and aligns sunbathers' accoutrements—all captured in bright photographs sure to astonish even the pickiest of neat freaks.

*The Great Big Book of Families* Mary Hoffman 2015-03-05 What is a family? Once, it was said to be a father, mother, boy, girl, cat and dog living in a house with a garden. But as times have changed, families have changed too, and now there are almost as many kinds of families as colours of the rainbow - from a mum and dad or single parent to two mums or two dads, from a mixed-race family to children with different mums and dads, to families with a disabled member. Mary Hoffman takes a look through children's eyes at the wide varieties of family life: from homes, food, ways of celebrating, schools and holidays to getting around, jobs and housework, from extended families, languages and hobbies to pets and family trees - and she concludes that, for most people, their own family is the best one of all! With Ros Asquith's delightful pictures, this book takes a fresh, optimistic look at families of today.

**Hydrometry** Reginald W. Herschy 1999-01-26 Hydrometry is concerned with the measurements of all the variables in the hydrological (water) cycle and hydrological information is therefore necessary for the practice of efficient water management. Water will be a major issue as the world enters the third millennium where more than one quarter of its population still do not have safe drinking water. An increasing demand is therefore placed on hydrometry to provide the essential hydrometric information in order that the world's water resources may be managed more efficiently. The aim of this second edition is to continue the success of the first edition by including new chapters on weather radar, remote sensing, groundwater and tree ring analysis, important in extending hydrometric records. Chapters of the first edition have been brought up to date as necessary in accordance with new technology and care has been taken to bridge the gap between past methods in hydrometry. The book therefore provides an invaluable guide to managers as well as field personnel who have operation and decision making roles in water management. Contents: Flow measurement; Instrumentation; Long river records; Precipitation measuring radar; Satellite remote sensing; Groundwater; Tree ring analysis; Transmission of hydrometric data by satellite; Maximizing the utility of river flow data; Hydrometric data processing; Uncertainties and Measuring up to water resources assessment.

The Oxford Book of Exploration Robin Hanbury-Tenison 2005 Selected by Robin Hanbury-Tenison, whom the Sunday Times called the 'greatest explorer of the last twenty years', this is a comprehensive anthology of the writings of explorers through the ages, now fully revised and updated. The ultimate in travel writing, these are the words of those who changed the world through their pioneering search for new lands, new peoples, and new experiences. Divided into geographical sections, the book takes us to Asia with Vasco da Gama, Francis Younghusband, and Wilfred Thesiger, to the Americas with John Cabot, Sir Francis Drake, and Alexander Von Humboldt, to Africa with Dr David Livingstone and Mary Kingsley, to the Pacific with Ferdinand Magellan and James Cook, and to the Poles with Robert Peary and Wally Herbert. Driven by a desire to discover that transcends all other considerations, the vivid writings of these extraordinary people reveal what makes them go beyond the possible and earn the right to be known as explorers.

*Seven Blind Mice* Ed Young 2012-03-15 The Caldecott Honor book and modern classic now in boardbook format. Finally! Nearly twenty years ago, Ed Young translated the ancient parable of the seven blind men and the elephant into a modern children's classic, one as simple as it is profound. A lesson in colors, numbers, the days of the week and most important, knowledge, this beautifully illustrated book has stood the test of time and continues to entertain and teach. Now in board book format, even the youngest children can experience the beauty and wisdom.

**Eine Einführung in Intuitives Stillen** Suzanne Colson 2013-01-01 Die Mehrheit des Gesundheitspersonals glaubt, dass Mütter im Stillen unterwiesen werden müssen. Dieses Buch liefert neue wissenschaftliche Belege, die zeigen, dass das Wissen, wie gestillt wird, Müttern und Babys angeboren ist, und stellt ein neues Konzept vor: das Intuitive Stillen. Intuitives Stillen ist ein Sammelbegriff für optimale Verhaltenszustände

und Positionen zum Stillen, deren Aufeinandereinwirken spontane Verhaltensmuster bei Müttern und Babys auslöst, die ihnen helfen, mit dem Stillen zu beginnen. Intuitives Stillen ist schnell und einfach umzusetzen. Die meisten Mütter und Babys nehmen selbsttätig die richtige Position ein, wenn dies ohne fremdes Eingreifen von außen zugelassen wird. Die Aufgabe des Gesundheitspersonals besteht darin, die auslösenden Mechanismen zu verstehen und so zu lernen, wie sie Müttern und Babys helfen können, das zu machen, was diese intuitiv tun wollen. Dieses Buch stärkt das Vertrauen in die biologische Basis des Stillens und die angeborene Stillfähigkeit der Mütter. Dr. Suzanne Colson ist eine meiner Heldinnen, weil ihre aufmerksame und sorgfältige Forschung und die Schlussfolgerungen, die sie daraus gezogen hat, endlich gesunden Menschenverstand in die Diskussion über das Stillen gebracht hat. Ina May Gaskin, Hebamme und Autorin von *Spirituelle Hebammen, Praktische Hebammen, Die selbstbestimmte Geburt* und *Ina May's Guide to Breastfeeding* Der französische Geburtshelfer und Colsons Mentor, Michel Odent, veränderte unsere Art und Weise über die Geburt zu denken. Mit diesem Buch unternimmt Suzanne Colson dasselbe für das Stillen. Machen Sie sich bereit, viele Ihrer grundlegenden Annahmen über das Stillen zu überdenken - so, wie ich es getan habe - und lernen Sie einige revolutionäre, neue Wege, um Müttern und Babys zu helfen. Dieses Buch wird Ihr Leben verändern! Nancy Mohrbacher, IBCLC, FILCA, Co-Autorin von *Breastfeeding Answers Made Simple* und *Breastfeeding Made Simple*

*Virtues of Openness* Michael A. Peters 2015-11-17 The movement toward greater openness represents a change of philosophy, ethos, and government and a set of interrelated and complex changes that transform markets altering the modes of production and consumption, ushering in a new era based on the values of openness: an ethic of sharing and peer-to-peer collaboration enabled through new architectures of participation. These changes indicate a broader shift from the underlying industrial mode of production—a “productionist” metaphysics—to a postindustrial mode of consumption as use, reuse, and modification where new logics of social media structure different patterns of cultural consumption and symbolic analysis becomes a habitual and daily creative activity. The economics of openness constructs a new language of “presuming” and “produsage” in order to capture the open participation, collective co-creativity, communal evaluation, and commons-based production of social and public goods. Information is the vital element in the “new” politics and economy that links space, knowledge, and capital in networked practices and freedom is the essential ingredient in this equation if these network practices are to develop or transform themselves into 'knowledge cultures'. The *Virtues of Openness* investigates the social processes and policies that foster openness as an overriding educational value evidenced in the growth of open source, open access, and open education and their convergences that characterize global knowledge communities. The book argues that openness seems also to suggest political transparency and the norms of open inquiry, indeed, even democracy itself as both the basis of the logic of inquiry and the dissemination of its results. The *Virtues of Openness* examines the complex history

of the concept of the open society before beginning a systematic investigation of openness in relation to the book, the “open text” and the written word. These changes are discussed in relation to the development of new open spaces of scholarship with their impact upon open journal systems, open peer review, open science, and the open global digital economy.

*Will Alsop* Tom Porter 2010-10-04 Driven by his three tenets of architecture, Diversity, Individuality and Naughtiness. Will Alsop paints his way into architecture through a design process that acts as a conduit for the dreams and aspiration of others. Moving from public consultation to the privacy of his painting studio ù it is here, born in the liquidity of paint, the flourish of line and the serendipity of collage, that Alsop disengages from cultural baggage, discards the tyranny of taste and opens up to a world of less predictable and more diverse solutions.

**Launch** John Spencer 2016-05-15 Something happens in students when they define themselves as makers and inventors and creators. They discover powerful skills-problem-solving, critical thinking, and imagination-that will help them shape the world's future ... our future. If that's true, why isn't creativity a priority in more schools today? Educators John Spencer and A.J. Juliani know firsthand the challenges teachers face every day: School can be busy. Materials can be scarce. The creative process can seem confusing. Curriculum requirements can feel limiting. Those challenges too often bully creativity, pushing it to the side as an "enrichment activity" that gets put off or squeezed into the tiniest time block. We can do better. We must do better if we're going to prepare students for their future. LAUNCH: Using Design Thinking to Boost Creativity and Bring Out the Maker in Every Student provides a process that can be incorporated into every class at every grade level ... even if you don't consider yourself a "creative teacher." And if you dare to innovate and view creativity as an essential skill, you will empower your students to change the world-starting right now. Look, Listen, and Learn Ask Lots of Questions Understand the Problem or Process Navigate Ideas Create Highlight What's Working and Failing Are you ready to LAUNCH?

**Art of the 20th Century: Sculpture** Karl Ruhrberg 1998 An undertaking as immensely ambitious as this one deserves our attention before we even open one of its stunningly illustrated and argued twin volumes. For what Ingo Walther and his international team have done is to make sense of this most explosive of artistic centuries. Who could possibly have forecast on New Year's Eve 1899 that, one hundred years later, painting and sculpture would be only options, not prerequisite disciplines for modern artists, constantly questioning both the technical and thematic definitions of their work? The infinite laboratory of experiment that the visual arts have become over the last decades highlights not only the inherent potential for human creativity and representation, but also shows the way individuals and groups have responded to the huge social, political and technological changes of this most turbulent of times. Ranging across the full spectrum of disciplines available, including photography and new media, and thematically chaptered to highlight relationships between works and movements, this readable and encyclopaedic masterwork does just what it says on the cover. Whether you want Surrealism or Land Art, Fluxus or Bauhaus, your art book purchases can stop once you buy this. Warning: it will not fit on your coffee table!

Leather Josephine Barbe 2013 Humans are the only species known to adorn themselves with a second skin. This extra hide, leather, can be smooth, soft, and cosmetic, or robust, resistant, and protective.
