Afterlands Steven Heighton 2010-06-11 In 1872, the USS Polaris sailed for the Arctic on a mission to hoist the U.S. flag at the North Pole. But the expedition was a failure, and half of the party – nineteen men, women and children of different nationalities—were cast adrift on an ice floe off the coast of Ellesmere Island, where they endured six desperate months of starvation, bloodshed and other horrors. *Afterlands*, a profoundly moving and gripping book, takes characters drawn from history and transforms their experiences into an absorbing tale of unrequited love, unsettled scores and the high cost of loyalty. The novel begins in 1876, when three of the survivors – George Tyson, Tukulito and Roland Kruger—are uneasily reunited four years after they were rescued from the ice. They are still inextricably connected by their ordeal—and Tyson has recently published an account of their shattering experiences which casts Kruger as a spy and villain, and disgraces Tukulito as well. What happened on the ice, as *Afterlands* explores, was far more complex. The heart of the book moves between Tyson’s diaries and a riveting narrative of Arctic survival. From the moment they are set adrift, and even before, Kruger and Tyson seem destined to clash: Kruger is an intelligent individualist, an outsider who refuses to be loyal to any one country; Tyson, meanwhile, is a flawed but sometimes brilliant leader, a man who needs to constantly be testing himself against the world. Brave but also insecure, he is unable to stop the

German contingent of his party from banding together under their national flag in an armed near-mutiny on the drifting ice. The third key character in this book, Tukulito, was the Arctic's first professional interpreter. Known also as Hannah, she moves between two worlds: expert at gutting a seal, she has also had tea with Queen Victoria. Her different roles – translator, mother, mender, marksman – keep the party from disaster, as suspicion and violence increase. And the quiet, impossible passion Kruger feels for her almost redeems their lives in a frozen hell. But *Afterlands* is also a novel about what follows the life-changing event: the long shadow it casts, as well as the conflicting stories that compete to become historical record. Back in the world, the protagonists will experience various degrees of tragedy. Tukulito's is perhaps the most personal, while Tyson, who sought only to gain the world's esteem, is disgraced by later failure. Kruger, meanwhile, attempts to disappear into Mexico, again seeking a place beyond "the colonels of the world" – but he finds himself, perhaps inevitably, drawn once more into the unending conflicts between nations, between peoples. This novel is a triumph of storytelling from one of Canada's most acclaimed writers. Gripping and beautiful, it is a scintillating exploration of the extremes of human experience. *Afterlands* brilliantly examines both a devastating encounter with the natural world and the unrelenting demands of the human heart.

Grow Home Avi Friedman 2001-02-09 With economic restructuring, demographic shifts, and lifestyle changes, the traditional family - working father, stay-at-home mother, two to three children - is no longer the norm and the need for smaller homes at moderate cost has skyrocketed. The first prototype of the Grow Home was built on the campus of McGill University in 1990 and more than one thousand units were built across North America and Europe in the first year alone. In this illustrated guide, Friedman describes the background, conception, and construction of these modest (14" x 36") homes. He details their construction for prospective owners, builders, and architects, showing how past and contemporary precedents have been transformed and how the first versions were adapted by the building industry. Visits to completed Grow Homes shed light on why such homes were purchased and the process by which they "grew." Friedman also shows how the design has been adapted for prefabrication to meet the needs of the developing world. He describes the contribution that small-unit design makes to saving valuable natural resources and shares his experiences in planning communities based on the Grow Home. The Grow Home reveals the development and history of a concept that revolutionizes the home and building industry, has been translated into over 10,000 housing units, and has received, among many accolades, the United Nations World Habitat Award.

Breaking the Ice/Briser la Glace Association of Canadian Universities for Northern Studies 2004 Topics range from fossil remnants on Axel Heiberg Island to collaborative tourism planning in the Yukon; from the influence of sea-ice and ocean circulation on arctic climate, to the differences between Inuit healing and western medicine. Yet, there is a common thread that links all of these papers. It is a place. It is the North. The importance of such a perspective is often lost in an academic world that rewards specialization by emphasizing expertise in a narrow field. But the boundaries between disciplines are becoming more and more artificial in an increasingly complex and interconnected world. An interdisciplinary approach built on 'place' provided a platform from which researchers could transcend these boundaries. The ACUNS conference, and by extension, these proceedings, helps 'break the ice'. Includes papers by Marni Amirault, Donna L. Atkinson, Johanna Bergé, Nilgun Cetin, Paul G. Myers, Suzanne de la Barre, Vasiliki Douglas, Audrey R. Giles, Sarah Giles, Brenda Guernsey, Joanna Kafarowski, Gita J. Laidler, Francis Levesque, Patrick T. Maher, Andrew C. L. Postnikoff, James F. Basinger, J. M. Ross, Michelle Schlag, Anne-Pascale Targé, Mariana Trindade, David Greene, Mike Gravel. Extended abstracts by Anna Dabros, Marcia J. Waterway, Colleen M. The Death Penalty and Sex Murder in Canadian History Carolyn Strange 2020-10-01 From Confederation to the partial abolition of the death penalty a century later, defendants convicted of sexually motivated killings and sexually violent homicides in Canada were more likely than any other condemned criminals to be executed for their crimes. Despite the emergence of psychiatric expertise in criminal trials, moral disgust and anger proved more potent in courtrooms, the public mind, and the hearts of the bureaucrats and politicians responsible for determining the outcome of capital cases. Wherever death has been set as the ultimate criminal penalty, the poor, minority groups, and stigmatized peoples have been more likely to be accused, convicted, and executed. Although the vast majority of convicted sex killers were white, Canada's racist notions of "the Indian mind" meant that Indigenous defendants faced the presumption of guilt. Black defendants were also subjected to discriminatory treatment, including near lynchings. In debates about capital punishment, abolitionists expressed concern that prejudices and poverty created the prospect of wrongful convictions. Unique in the ways it reveals the emotional drivers of capital punishment in delivering inequitable outcomes, *The Death Penalty and Sex Murder in Canadian History* provides a thorough overview of sex murder and the death penalty in Canada. It serves as an essential history and a richly documented cautionary tale for the present.

the reader through the trends and changes, many of them ill-conceived and wasteful, that have influenced residential design and construction over the last fifty years. Offering pragmatic suggestions for many problems, including the damage caused by suburban sprawl, the limits of standard single-family dwellings, and the widening gap between rich and poor, *Peeking Through the Keyhole* unravels the effects of technology and consumerism on the way we perceive and use domestic space.

Northern Exposure Thomas J. Courchene 2009 The North is an increasingly important focal point of public policy. The impact of climate change on the environment and community life underlines the urgent need for measures to slow this trend and facilitate adaptation to uncertain conditions. International events have underlined the importance of safeguarding Canada's sovereignty in its Arctic regions, and the federal government has announced a series of measures to further this objective. The result of a wide-ranging IRPP research program, this multidisciplinary volume explores the following themes: Canada in the circumpolar world - environmental, scientific and foreign-policy dimensions; First Nations, Inuit and public governance; economic development - enterprise, sustainable development and communities; sustaining people - education and human capital; and developing a northern policy for the future. Public policy specialists review the implications of the unprecedented changes in governance that have taken place in the three territories and in Aboriginal communities in northern Quebec and Labrador over the past three decades and analyze challenges that must be faced in order to strengthen economic development and quality of life for northern residents. Contributions from Inuit and First Nations leaders, former territorial premiers, and Aboriginal youth activists add further depth and perspective. Contributors include Frances Abele, Elaine Alexie, George Berthe, George Braden, Michael Bravo, Thomas J. Courchene, Nellie Cournoyea, Anne Crawford, Gordon Erlandson, James Feehan, Terry Fenge, Violet Ford, Danny Gaudet, Minnie Grey, Franklyn Griffiths, Udloriak Hanson, Jack Hicks, Tom Hoefler, Rob Huebert, Stephanie Irlbacher-Fox, Armand MacKenzie, Laura MacKenzie, Douglas McArthur, Stephen Mills, Nathan Obed, Aynslie Ogden, Tony Penikett, Hanne Petersen, Greg Poelzer, Thierry Rodon, F. Thou Shalt Do No Murder Kenn Harper 2017-05 High Arctic, 1920: Three Inuit men delivered justice to an abusive Newfoundland trader. This is a story of fur trade rivalry and duplicity, isolation and abandonment, greed and madness, and a struggle for the affections of an Inuit woman during a time of major social change in the High Arctic. Doubts over the validity of Canadian sovereignty and an official agenda to confirm that sovereignty added to the circumstances in which a guilty verdict against the leader of the Inuit accused was virtually assured. The show trial that took place in Pond Inlet in 1923 marked a collision of two cultures with vastly different conceptions of justice and conflict resolution. It marked an end to the Inuit traditional way of life and ushered in an era in which Inuit autonomy was supplanted by dependence on traders and police, and later missionaries. The author draws on a combination

of Inuit oral history, archival research, and his own knowledge acquired through 50 years in the Arctic to create a compelling story of justice and injustice in the Canadian far north. Kenn Harper lived in the Arctic for 50 years in Inuit communities in Canada and in Qaanaaq, Greenland. He has worked as a teacher, historian, linguist, and businessman. He speaks Inuktitut, and has written extensively on Northern history and language. He is a Fellow of the Royal Geographical Society and the Royal Canadian Geographical Society, a recipient of Queen Elizabeth's Diamond Jubilee Medal, and a Knight of the Order of Dannebrog (Denmark). Harper is the author of the bestselling *Minik: the New York Eskimo*.

Nunavut Generations Ann McElroy 2008 Review: "Change in arctic populations has not been a sudden phenomenon, but rather a gradual process that has occurred over a number of generations. In this longitudinal case study, McElroy introduces readers to four Baffin Island communities in the eastern Canadian Arctic and focuses on the challenges and hardships they face in transition from hunting-gathering lifestyles to wage employment and political participation in towns. Through long-term fieldwork, historical material, and life histories collected from elders, *Nunavut Generations* richly illustrates political and ecological change alongside native stability and self-determination."--BOOK JACKET

Arctic Justice Shelagh Grant 2005 Although there was no Canadian law enforcement in the Eastern High Arctic when a crazed white fur trader was killed by an Inuk, authorities put Nuqallaq and two other Baffin Island Inuit on trial. The Canadian government saw Robert Janes's death as murder; the Inuit saw it as removing a threat from their society according to custom. Nuqallaq was sentenced to ten years hard labour in Stony Mountain Penitentiary where he contracted tuberculosis. He died shortly after being returned to Pond Inlet. Shelagh Grant's award-winning *Arctic Justice* is a masterly reconstruction of these tragic events at the intersection of Inuit and Canadian justice. Combining original Inuit oral testimony with archival history, Grant sheds light on the conflicting values and perceptions of two disparate cultures. She shows how the Canadian government's decision was determined by fear and political concerns for establishing sovereignty over the Arctic. *Arctic Justice* is also a social history of North Baffin Island in the twentieth century with vivid portraits of Janes, Captain J.E. Bernier of the CGS *Arctic*, investigating RCMP officer A. H. Joy, and the remarkable Nuqallaq, his wife Ataguttiaq, and the Inuit of North Baffin Island.

Bloody Falls of the Coppermine McKay Jenkins 2006-01-10 In the winter of 1913, high in the Canadian Arctic, two Catholic priests set out on a dangerous

mission to reach a group of Eskimos and convert them. Upon reaching their destination, the priests were murdered. Over the next three years, one of the Arctic's most tragic stories became one of North America's strangest and most memorable police investigations and trials. A near-perfect parable of late colonialism, as well as a rich exploration of the differences between European Christianity and Eskimo mysticism, *Bloody Falls of the Coppermine* possesses the intensity of true crime and the romance of wilderness adventure.

Inuit and the Administration of Criminal Justice in the Northwest Territories

Harold W. Finkler 1976 "The study describes the traditional system of social control within Inuit society and traces the development of socio-legal structures in the Northwest Territories to determine their growth and the varying influence of their teaching role in enlightening Inuit about the law and the criminal justice system. The historical account serves as a frame of reference to examine the difficulties encountered by Inuit in their transition to Canadian law ways and formalized agencies of socio-legal control"--Abstract, p. 2.

Nine Dog Winter Bruce T. Batchelor 2008 *Nine Dog Winter: Winter camping with sled dogs in Canada's Yukon* by Bruce T. Batchelor is a true story, about two young Canadians who recruit nine mismatched huskies, and head out camping in the Yukon as the temperature plunges to Sixty-Eight Below. Follow this 1980-'81 winter adventure of a young couple intent on recreating the classic Yukon pioneer lifestyle. Includes dozens of photographs, maps and diagrams, plus complete instructions for building toboggans, harnesses, moccasins and other traditional winter camping equipment. Hundreds of tips gathered from native and white trappers, pioneers and others who live and thrive in the Northern bush. About the author BRUCE BATCHELOR: Though he'd lived in the Yukon for five years, the author's unfulfilled dream was to spend a winter in a remote wilderness cabin with a woman he loved, training dog teams and making long expeditions. When he teamed up with backcountry ranger Marsha McGillis in 1980, the (mis)adventures could begin Bruce Batchelor came to the Yukon in 1973, planning to stay just long enough to earn money for a trip to Europe. Instead, he fell in love with the wilderness and its people, and stayed for most of the next eight years. He has written three books about his stay in the North. Marsha McGillis, heroine of *Nine Dog Winter*, agreed to marry him in 1983. Their son, Dan, was born in 1992. They live in Victoria, BC, with a white lab-husky cross named Tyhee Too in honour of the Tyhee in this story. Bruce and Marsha

own Agio Publishing House, where he edits and directs marketing, while Marsha designs the books and Dan takes photos. REVIEWER'S COMMENT: "A real page turner. I couldn't wait to see what was around the next bend in the trail as I raced through this delightful read. An instant classic about Canada's North as experienced by two plucky southerners." -- David Pettigrew, filmmaker, adventurer and sourdough

Polar Imperative Shelagh D. Grant 2011-03-11 Based on Shelagh Grant's groundbreaking archival research and drawing on her reputation as a leading historian in the field, *Polar Imperative* is a compelling overview of the historical claims of sovereignty over this continent's polar regions. This engaging, timely history examines: the unfolding implications of major climate changes the impact of resource exploitation on the indigenous peoples the current high-stakes game for control over the adjacent waters of Alaska, Arctic Canada and Greenland the events, issues and strategies that have influenced claims to authority over the lands and waters of the North American Arctic, from the arrival of the first inhabitants around 3,000 BCE to the present sovereignty from a comparative point of view within North America and parallel situations in the European and Asian Arctic This book will become a standard reference on Arctic history and will redefine North Americans' understanding of the sovereign rights and responsibilities of Canada's northernmost region.

Quantum International Relations James Der Derian 2022-05-03 The contributors to this volume are motivated by a common apprehension and a common hope. The apprehension was first voiced by Einstein, who lamented the inability of humanity, at the individual and social level, to keep up with the increased speed of technological change brought about by the quantum revolution. As quantum science and technology fast forward into the 21st century, the social sciences remain stuck in classical, 19th century ways of thinking. Can such a mechanistic model of the mind and society possibly help us manage the fully realized technological potential of the quantum? That's where the hope appears: that perhaps quantum is not just a physical science, but a human science too. In *Quantum International Relations*, James Der Derian and Alexander Wendt gather rising scholars and leading experts to make the case for quantum approaches to world politics. As a fundamental theory of reality and enabler of new technologies, quantum now touches everything, with the potential to revolutionize how we conduct diplomacy, wage war, and make wealth. Contributors present the core principles of quantum mechanics--entanglement, uncertainty,

superposition, and the wave function--as significant catalysts and superior heuristics for an accelerating quantum future. Facing a reality which no longer corresponds to an outdated Newtonian worldview of states as billiard balls, individuals as rational actors or power as objective interest, Der Derian and Wendt issue an urgent call for a new human science of quantum International Relations. At the centenary of the first quantum thought experiment in the 1920s, this book offers a diversity of explorations, speculations and approaches for understanding geopolitics in the 21st century.
