*California Indian Languages* Victor Golla 2011-08-02 "Victor Golla has been the leading scholar of California Indian languages for most of his professional life, and this book shows why. His ability to synthesize centuries of fieldwork and writings while bringing forward new ideas and fresh ways of looking at California's famous linguistic diversity will make this the primary text for anyone interested in California languages."--Leanne Hinton, Professor Emerita of Linguistics, University of California, Berkeley and author of *How to Keep Your Language Alive* "This book is a wonderful contribution that only Golla could have written. It is a perfect confluence of author and subject matter."--Ives Goddard, Senior Linguist, Emeritus, Smithsonian Institution "Golla is a gifted polymath and *California Indian Languages* is certainly his landmark achievement, required reading for any linguist, archaeologist, ethnographer, or historian interested in aboriginal California."--Robert L. Bettinger, Professor of Anthropology, University of California Davis and author of *Hunter-Gatherer Foraging* "The preeminent figure in his field, Victor Golla has written a masterpiece filled with treasures for every audience: Indian communities working toward cultural and linguistic revival; general readers interested in the many cultures of Native California; and scholars in the fields of language, archaeology, and prehistory. The information here is so detailed that it supersedes all previous reference works."--Andrew Garrett, Professor of Linguistics, University of California Berkeley and Director, Survey of California and Other Indian Languages "This is a truly magnificent work, at once authoritative, comprehensive, accessible to a wide readership, and fascinating. Masterfully integrating linguistic, archaeological, historical, and cultural information, the author describes not just the languages, but also the major figures in the story: speakers, explorers, missionaries, and scholars. It is beautifully written, a great pleasure to read, and difficult to put down."--Marianne Mithun, author of *The Languages of Native North America*

**Chemistry** Paul Flowers 2015-03-12 "Chemistry is designed for the two-semester general chemistry course. For many students, this course provides the foundation to a career in chemistry, while for others, this may be their only college-level science course. As such, this textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world around them. The text has been developed to meet the scope and sequence of most general chemistry courses. At the same time, the book includes a number of innovative features designed to enhance student learning. A strength of Chemistry is that instructors can customize the book, adapting it to the approach that works best in their classroom."--Openstax College website.

**Fibrous Composites in Structural Design** Edward M. Leno 2012-12-06 The Fourth Conference on Fibrous Composites in Structural Design was a successor to the First-to-Third Conferences on Fibrous Composites in Flight Vehicle Design sponsored by the Air Force (First and Second Conferences, September 1973 and May 1974) and by NASA (Third Conference, November 1975) which were aimed at focusing national attention on flight vehicle applications of a new class of fiber reinforced materials, the advanced composites, which afforded weight savings and other advantages which had not been previously available. The Fourth Conference, held at San Diego, California, 14-17 November 1978, was the first of these conferences to be jointly sponsored by the Army, Navy and Air Force together with NASA, as well as being the first to give attention to non-aerospace applications of fiber reinforced composites. While the design technology for aerospace applications has reached a state of relative maturity, other areas of application such as military bridging, flywheel energy storage systems, ship and surface vessel components and ground vehicle components are in an early stage of development, and it was an important objective to pinpoint where careful attention to structural design was needed in such applications to achieve maximum structural performance payoff together with a high level of reliability and attractive economics.

*Folsom Dam Modification Project Approach Channel* United States. Army. Corps of Engineers 2012 This Final SEIS/EIR has been prepared by the U.S. Army Corps of Engineers (Corps) and the Central Valley Flood Protection Board, the non-Federal sponsor, for the proposed construction of the approach channel of the Folsom Dam auxiliary spillway. The document supplements the Final EIS/EIR and Record of Decision completed in 2007 for the Folsom Dam Safety and Flood Damage Reduction Project by providing new and additional information on the design and means to construct the auxiliary spillway approach channel which was not completely defined at the time of publication. The 2007 EIS/EIR stated that the design of the approach channel would be determined in the Corps' pre-construction, engineering, and design phase and, as needed, supplemental NEPA/CEQA documentation would be prepared. The Final SEIS/EIR evaluates the direct, indirect, and cumulative environmental effects of alternative plans for the approach channel. Mitigation measures are identified to avoid, minimize, and compensate for resource impacts. Most potential adverse effects would be either short term, or would be avoided or reduced using best management practices. Public and agency comments that were received during the DSEIS/EIR comment period are addressed in this FSEIS/EIR.
