The Indo-European Languages Mate Kapović 2017-01-20 The Indo-European Languages presents a comprehensive survey of the individual languages and language subgroups within this language family. With over four hundred languages and dialects and almost three billion native speakers, the Indo-European language family is the largest of the recognized language groups and includes most of the major current languages of Europe, the Iranian plateau and the Indian subcontinent. Written by an international team of experts, this comprehensive, single-volume tome presents in-depth discussions of the historical development and specialized linguistic features of the Indo-European languages. This unique resource remains the ideal reference for advanced undergraduate and postgraduate students of Indo-European linguistics and languages, but also for more experienced researchers looking for an up-to-date survey of separate Indo-European branches. It will be of interest to researchers and anyone with an interest in historical linguistics, linguistic anthropology and language development.

Laws and Rules in Indo-European Philomen Probert 2012-05-10 This book examines the operation of laws, rules, and principles in Indo-European, the language family which includes the Celtic, Germanic, Italic/Romance, and Baltic/Slavic subfamilies as well as the predominant languages of Greece, Iran, parts of Southern Asia, and ancient Anatolia. Laws and rules are crucial to Indo-European studies: they constrain the reconstructions and etymologies on which knowledge of the history and prehistory of Indo-European in particular and ancient languages more generally is based, and which allow processes of morphological change, semantic shift, and borrowing to be identified. But these laws and rules require constant reassessment in the light of new evidence,

theory, and method. Through a series of case studies re-examining specific laws and rules in the Indo-European language family, this book explores the implications of new insights into language change and of increasing opportunities for attention to chronology and detail in the treatment of primary material. The languages and language families under consideration include Celtic, Germanic, Italic and Romance, Armenian, Greek, and Indo-Iranian languages as well as Proto-Indo-European. *Laws and Rules in Indo-European* brings together leading scholars from all over the world. It makes a valuable contribution to the understanding of the history of ancient languages and the reconstruction of their ancestors, as well as to research methods.

Textile Terminologies from the Orient to the Mediterranean and Europe, 1000 BC to 1000 AD Salvatore Gaspa 2017 The papers in this volume derive from the conference on textile terminology held in June 2014 at the University of Copenhagen. Around 50 experts from the fields of Ancient History, Indo-European Studies, Semitic Philology, Assyriology, Classical Archaeology, and Terminology from twelve different countries came together at the Centre for Textile Research, to discuss textile terminology, semantic fields of clothing and technology, loan words, and developments of textile terms in Antiquity. They exchanged ideas, research results, and presented various views and methods. This volume contains 35 chapters, divided into five sections: - Textile terminologies across the ancient Near East and the Southern Levant - Textile terminologies in Europe and Egypt - Textile terminologies in metaphorical language and poetry - Textile terminologies: examples from China and Japan - Technical terms of textiles and textile tools and methodologies of classifications

New Approaches to Medieval Armenian Language and Literature Joseph Johannes Sicco Weitenberg 1995 This book offers a reevaluation of the character of medieval (12-17th century) Armenian literature and language. It contains a number of contributions by leading Armenologists (Cowe, Russell, Thomson, and Stone) and of a younger generation of scholars who attempt to confront the traditional approach of this period with the new insights gained in modern occidental medieval studies. One may call these papers New because they study the literary highlights not only of Cilician Armenia of the Crusader period, but of all Armenia and put these in a wider cultural context: the authors emphasize both inner-Armenian continuity and contemporary external (Persian, Turkish) literary and linguistic influences. The papers concern Armenian lyrical poetry, models for the evaluation of the medieval Armenian literary production (both traditional and new), and the linguistic conditions which favoured such a production. Particular attention has been given to the cultural background of Armenian grammatical studies and to the character of the first Armenian grammars printed in the Occident.

Armenologie in Deutschland Armenuhi Drost-Abgarjan 2005 "Im Jahr 2001 hat die Armenische Kirche ihr 1700. Jubiläum zusammen mit der gesamten Kulturwelt gefeiert. Im Jahre 2005 gedenkt das über die ganze Welt zerstreute armenische Volk zusammen mit dieser Kulturwelt zum 90. Male der 1,5 Mio Opfer des armenischen Genozids von 1915 im Osmanisch-Türkischen Reich, der unter den Augen des verbündeten deutschen Militärs stattfand. Beide Daten sind für die Armenologie in Deutschland, die sich in Berlin zum ersten Male in ihrer Geschichte zu einem Armenologen-Tag versammelte, unausweichlich. Und so sind die hier publizierten Beiträge bestimmt von Studien zur ältesten christlichen Nationalkultur der Welt sowie zum armenischen Völkermord, der eines der größten Traumata der Menschheit darstellt."--

Armenisch-Türkisch Uwe Bläsing 1995 Die vorliegende Untersuchung stellt einen weiteren markanten Beitrag für die Erforschung eines noch stets vernachlässigten Gebietes dar: der sprachlichen Interaktion innerhalb Anatoliens. Der sprachliche Mikrokosmos dieser Region bietet ein überaus reiches und buntes Forschungsfeld, dessen gründliche Bearbeitung erst in den letzten Jahrzehnten begonnen hat. Ein Hauptziel dieser Monographie ist es, den Mechanismus sprachlicher Interaktion anhand von armenischem und türkischem Dialektmaterial zu veranschaulichen. In vielen Punkten ist diese Arbeit daher eine Weiterführung und Vertiefung der Studien des in dieser Reihe erschienenen Bandes *Armenisches Lehngut im Türkei-Türkischen*. Einmal mehr beschreibt und etymologisiert der Autor eine große Zahl von türkeitürkischen Dialektwörtern aus dem Hem_ingebiet im NO der Türkei. Dabei beschränkt er sich aber keineswegs auf die bloße Zusammenstellung des armenischen und türkischen Materials, vielmehr wird gerade der arealen Verbreitung Rechnung getragen; es finden sich daher regelmäßig auch Ausblicke auf das Kurdische, das Griechische und die

südkaukasischen Sprachen.

Comparative Indo-European Linguistics Robert Stephen Paul Beekes 2011 This book gives a comprehensive introduction to Comparative Indo-European Linguistics. It starts with a presentation of the languages of the family (from English and the other Germanic languages, the Celtic and Slavic languages, Latin, Greek and Sanskrit through Armenian and Albanian) and a discussion of the culture and origin of the Indo-Europeans, the speakers of the Indo-European proto-language. The reader is introduced into the nature of language change and the methods of reconstruction of older language stages, with many examples (from the Indo-European languages). A full description is given of the sound changes, which makes it possible to follow the origin of the different Indo-European languages step by step. This is followed by a discussion of the development of all the morphological categories of Proto-Indo-European. The book presents the latest in scholarly insights, like the laryngeal and glottalic theory, the accentuation, the ablaut patterns, and these are systematically integrated into the treatment. The text of this second edition has been corrected and updated by Michiel de Vaan. Sixty-six new exercises enable the student to practice the reconstruction of PIE phonology and morphology.

Jews in Ancient and Medieval Armenia Michael E. Stone 2022 "It has long been the general opinion that there was no significant Jewish community in Armenia throughout the centuries. This book examines the evidence from written sources to archaeological discoveries and asserts that there were Jews in Armenia in the ancient and mediaeval periods. Tigran the Great transferred Jewish exiles to Armenia in the first century BCE. They settled in the chief cities of the land and were still there in the fourth century CE. There were Jews in the capital city Dvin in the late ninth century and Jewish tombstone inscriptions from Southern Armenia witness a community there during the Seljuk and Mongol conquests. Thus, the conventional picture must be changed"--

Comparison and Gradation in Indo-European Götz Keydana 2021-06-08 The ability to compare is fundamental to human cognition. Expressing various types of comparison is thus essential to any language. The present volume presents detailed grammatical descriptions of how comparison and gradation are expressed in ancient Indo-European languages. The detailed chapters devoted to the individual languages go far beyond standard handbook knowledge. Each chapter is structured the same way to facilitate cross-reference and (typological) comparison. The data are presented in a top-down fashion and in a format easily accessible to the linguistic community. The topics covered are similitives, equatives, comparatives, superlatives, elatives, and excessives. Each type of comparison is illustrated with glossed examples of all its attested grammatical realizations. The book is an indispensable tool for typologists, historical linguists, and students of the syntax and morphosyntax of comparison.

Armenische Studien Jan Henrik Holst 2009 Dieses Buch enthält umfangreiche neue Erkenntnisse zur altarmenischen Sprache. Die Ergebnisse konnten durch das Ausnutzen des heutigen Forschungsstandes mehrerer sprachwissenschaftlicher Disziplinen erreicht werden: Indogermanistik, Allgemeine Sprachwissenschaft, Phonetik und Kaukasistik. Die Aussprache des Altarmenischen wird erstmals

fundiert erschlossen. Ausserdem wird am prahistorischen Sprachwandel von der Loslösung von den indogermanischen Verwandten bis zum Einsetzen der Überlieferung gearbeitet. Zahlreiche Untersuchungen zur phonetischen und zur morphologischen Entwicklung präzisieren unser Bild von der armenischen Sprache. Im Zusammenhang mit den sprachwissenschaftlichen Entdeckungen wird auch die Entstehung des armenischen Volkes immer deutlicher. Die Sprache stammt ursprünglich aus Südosteuropa, doch nach ihrer Ankunft in der neuen Heimat wurde sie von vor Ort ansässigen Menschen übernommen und umgestaltet. Die Armenistik erhält durch die "Armenischen Studien" eine grosse Bereicherung.

The Sasanian World through Georgian Eyes Stephen H. Rapp Jr 2017-05-15 Georgian literary sources for Late Antiquity are commonly held to be later productions devoid of historical value. As a result, scholarship outside the Republic of Georgia has privileged Graeco-Roman and even Armenian narratives. However, when investigated within the dual contexts of a regional literary canon and the active participation of Caucasia's diverse peoples in the Iranian Commonwealth, early Georgian texts emerge as a rich repository of late antique attitudes and outlooks. Georgian hagiographical and historiographical compositions open a unique window onto a northern part of the Sasanian world that, while sharing striking affinities with the Iranian heartland, was home to vibrant, cosmopolitan cultures that developed along their own trajectories. In these sources, precise and accurate information about the core of the Sasanian Empire-and before it, Parthia and Achaemenid Persia-is sparse; yet the thorough structuring of wider Caucasian society along Iranian and especially hybrid Iranian lines is altogether evident. Scrutiny of these texts reveals, inter alia, that the Old Georgian language is saturated with words drawn from Parthian and Middle Persian, a trait shared with Classical Armenian; that Caucasian society, like its Iranian counterpart, was dominated by powerful aristocratic houses, many of whose origins can be traced to Iran itself; and that the conception of kingship in the eastern Georgian realm of K'art'li (Iberia), even centuries after the royal family's Christianisation in the 320s and 330s, was closely aligned with Arsacid and especially Sasanian models. There is also a literary dimension to the Irano-Caucasian nexus, aspects of which this volume exposes for the first time. The oldest surviving specimens of Georgian historiography exhibit intriguing parallels to the lost Sasanian *Xwadāy-nāmag*, *The Book of Kings*, one of the precursors to Ferdowsī's *Shāhnāma*. As tangible products of the dense cross-cultural web drawing the re

Cultural, Linguistic and Ethnological Interrelations In and Around Armenia Uwe Bläsing 2020-05-15 The geographical region of the Southern Caucasus, the lowlands between the Black and the Caspian Seas and the Armenian and Anatolian highlands is located on the peripheries of Europe from Asia. This region shares a common pre-history, with pre-Christian and pre-Muslim cultures and beliefs. The later periods, however, starting from the pre-Christian Iranian dominations, followed by the Arab conquest and the later campaigns of Seljuks, Mongols and Ottomans, had a heavy impact on the development of the region's various ethnic languages and cultures. Nevertheless, many similarities can be found in the languages, cultures and religious traditions of the people living

in this region. Armenia has often been a bridge between various cultures. Even though Armenians have succeeded in preserving their original language and culture through the centuries, many of their traditions and myths, their linguistic peculiarities, particularly in Armenian dialects, may be explained by an often long-lasting influence of other cultures, be it occidental (Hellenistic/Roman, later Byzantine and Medieval European) or oriental (Iranian, later Arab, Turkic, Mongolian, etc.) or even Caucasian. The Armenians have also left many traces in the languages and cultures of the Occident, Orient and the Caucasus. This volume gives an impressive approach to an interdisciplinary view of the linguistic and cultural properties which Armenians share with their neighbours.

The Ancient Languages of Asia Minor Roger D. Woodard 2008-04-10 This book, derived from the acclaimed Cambridge Encyclopedia of the World's Ancient Languages, describes the ancient languages of Asia Minor, for the convenience of students and specialists working in that area. Each chapter of the work focuses on an individual language or, in some instances, a set of closely related varieties of a language. Providing a full descriptive presentation, each of these chapters examines the writing system(s), phonology, morphology, syntax and lexicon of that language, and places the language within its proper linguistic and historical context. The volume brings together an international array of scholars, each a leading specialist in ancient language study. While designed primarily for scholars and students of linguistics, this work will prove invaluable to all whose studies take them into the realm of ancient language.

Altarmenische Kurzgrammatik Dirk van Damme 2004 Armenien liegt am Schnittpunkt zwischen Europa und Asien, zwischen Orient und Okzident. Die armenische Kultur konnte dennoch in diesem konfliktreichen Raum ihre Eigenständigkeit und Identität bewahren. Dies liegt nicht zuletzt an der besonderen Sprache und Schrift. Nachdem im 5. Chr. ein eigenes Alphabet speziell für die Bedürfnisse dieser indoeuropäischen Sprache entwickelt worden war, wurden zunächst Übersetzungen der Heiligen Schrift und anderer griechischer Werke gefertigt.
