A History of Video Art Chris Meigh-Andrews 2013-11-07 A History of Video Art is a revised and expanded edition of the 2006 original, which extends the scope of the first edition, incorporating a wider range of artists and works from across the globe and explores and examines developments in the genre of artists' video from the mid 1990s up to the present day. In addition, the new edition expands and updates the discussion of theoretical concepts and ideas which underpin contemporary artists' video. Tracking the changing forms of video art in relation to the revolution in electronic and digital imaging that has taken place during the last 50 years, A History of Video Art orients video art in the wider art historical context, with particular reference to the shift from the structuralism of the late 1960s and early 1970s to the post-modernist concerns of the 1980s and early 1990s. The new edition also explores the implications of the internationalisation of artists' video in the period leading up to the new millennium and its concerns and preoccupations including post-colonialism, the post-medium condition and the impact and influence of the internet.

Artificial Hells Claire Bishop 2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as “social practice.” Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

The War Guilt Problem and the Ligue des droits de l'homme, 1914-1944 Norman Ingram 2019-01-31 The War Guilt Problem and the Ligue des droits de l'homme is a significant new volume from Norman Ingram, addressing the history of the Ligue des droits de l'homme (LDH), an organisation founded in 1898 at the height of the Dreyfus Affair and which lay at the very centre of French Republican politics in the era of the two world wars. Ingram posits that the Ligue's inability to resolve the question of war guilt from the Great War was what led to its decline by 1937, well before the Nazi invasion of May 1940. As well as developing our understanding of how the issue of war origins and war guilt transfixed the LDH from 1914 down to the Second World War, this volume also explores the aetiology of French pacifism, expanding on the differences between French and Anglo-American pacifism. It argues that from 1916 onwards, one can see a principled dissent from the Union sacrée war effort that occurred within mainstream French Republicanism and not on the syndicalist or anarchist fringes. Based on substantial research in a large number of French archives, primarily in the papers of the LDH which were repatriated to France from the former Soviet Union in late 2001, but also on considerable new research in the German archives, the book proposes a new explanatory model to help us understand some of the choices made in Vichy France, moving beyond the usual triptych of collaboration, resistance or accommodation.

Manifestos and Polemics in Latin American Modern Art Patrick Frank 2017-02-15 Bringing together sixty-five primary documents vital to understanding the history of art in Latin America since 1900, Patrick Frank shows how modern art developed in Latin America in this important new work complementing his previous book, Twentieth-Century Art of Latin America, Revised and Expanded Edition. Besides autobiographies, manifestos, interviews, and artists' statements, the editor has assembled material from videos, blogs, handwritten notes, flyers, lectures, and even an after-dinner speech. As the title suggests, many of the texts have a polemical or argumentative cast. In these documents, many of which appear in English for the first time, the artists themselves describe what they hope to accomplish and what they see as obstacles. Designed to show how modern art developed in Latin America, the documents begin with early modern expressions in the early twentieth century, then proceed through the avant-garde of the 1920s, the architectural boom of midcentury, and the Cold War years, and finally conclude with the postmodern artists in the new century.

Philosophical Issues in Psychiatry IV Kenneth S. Kendler 2017-04-06 The revisions of both DSM-IV and ICD-10 have again focused the interest of the field of psychiatry and clinical psychology on the issue of nosology. This interest has been further heightened by a series of controversies associated with the development of DSM-5 including the fate of proposed revisions of the personality disorders, bereavement, and the autism spectrum. Major debate arose within the DSM process about the criteria for changing criteria, leading to the creation of first the Scientific Review Committee and then a series of other oversight committees which weighed in on the final debates on the most controversial proposed additions to DSM-5, providing important influences on the final decisions. Contained within these debates were a range of conceptual and philosophical issues. Some of these - such as the definition of mental disorder or the problems of psychiatric " - have been with the field for a long time. Others - the concept of epistemic iteration as a framework for the introduction of nosologic change - are quite new. This book reviews issues within psychiatric nosology from clinical, historical and particularly philosophical perspectives. The book brings together a range of distinguished authors - including major psychiatric researchers, clinicians, historians and especially nosologists - including several leaders of the DSM-5 effort and the DSM Steering Committee. It also includes contributions from psychologists with a special interest in psychiatric nosology and philosophers with a wide range of orientations. The book is organized into four major sections: The first explores the nature of psychiatric illness and the way in which it is defined, including clinical and psychometric perspectives. The second section examines problems in the reification of psychiatric diagnostic criteria, the problem of psychiatric epidemics, and the nature and definition of individual symptoms. The third section explores the concept of epistemic iteration as a possible governing conceptual framework for the revision efforts for official psychiatric nosologies such as DSM and ICD and the problems of validation of psychiatric diagnoses. The book ends by exploring how we might move from the descriptive to the etiologic in psychiatric diagnoses, the nature of progress in psychiatric research, and the possible benefits of moving to a living document (or continuous improvement) model for psychiatric nosologic systems. The result is a book that captures the dynamic cross-disciplinary interactions that characterize the best work in the philosophy of psychiatry.

The Death and Life of Great American Cities Jane Jacobs 2016-07-20 Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

The Power of Black Music Samuel A. Floyd Jr. 1996-10-31 When Jimi Hendrix transfixed the crowds of Woodstock with his gripping version of "The Star Spangled Banner," he was building on a foundation reaching back, in part, to the revolutionary guitar playing of Howlin' Wolf and the other great Chicago bluesmen, and to the Delta blues tradition before him. But in its unforgettable introduction, followed by his unaccompanied "talking" guitar passage and inserted calls and responses at key points in the musical narrative, Hendrix's performance of the national anthem also hearkened back to a tradition even older than the blues, a tradition rooted in the rings of dance, drum, and song shared by peoples across Africa. Bold and original, *The Power of Black Music* offers a new way of listening to the music of black America, and appreciating its profound contribution to all American music. Striving to break down the barriers that remain between high art and low art, it brilliantly illuminates the centuries-old linkage between the music, myths and rituals of Africa and the continuing evolution and enduring vitality of African-American music. Inspired by the pioneering work of Sterling Stuckey and Henry Louis Gates, Jr., author Samuel A. Floyd, Jr, advocates a new critical approach grounded in the forms and traditions of the music itself. He accompanies readers on a fascinating journey from the African ring, through the ring shout's powerful merging of music

and dance in the slave culture, to the funeral parade practices of the early new Orleans jazzmen, the bluesmen in the twenties, the beboppers in the forties, and the free jazz, rock, Motown, and concert hall composers of the sixties and beyond. Floyd dismisses the assumption that Africans brought to the United States as slaves took the music of whites in the New World and transformed it through their own performance practices. Instead, he recognizes European influences, while demonstrating how much black music has continued to share with its African counterparts. Floyd maintains that while African Americans may not have direct knowledge of African traditions and myths, they can intuitively recognize links to an authentic African cultural memory. For example, in speaking of his grandfather Omar, who died a slave as a young man, the jazz clarinetist Sidney Bechet said, "Inside him he'd got the memory of all the wrong that's been done to my people. That's what the memory is....When a blues is good, that kind of memory just grows up inside it." Grounding his scholarship and meticulous research in his childhood memories of black folk culture and his own experiences as a musician and listener, Floyd maintains that the memory of Omar and all those who came before and after him remains a driving force in the black music of America, a force with the power to enrich cultures the world over.

Yoruba Art and Language Rowland Abiodun 2014-11-13 The Yoruba was one of the most important civilizations of sub-Saharan Africa. While the high quality and range of its artistic and material production have long been recognized, the art of the Yoruba has been judged primarily according to the standards and principles of Western aesthetics. In this book, which merges the methods of art history, archaeology, and anthropology, Rowland Abiodun offers new insights into Yoruba art and material culture by examining them within the context of the civilization's cultural norms and values and, above all, the Yoruba language. Abiodun draws on his fluency and prodigious knowledge of Yoruba culture and language to dramatically enrich our understanding of Yoruba civilization and its arts. The book includes a companion website with audio clips of the Yoruba language, helping the reader better grasp the integral connection between art and language in Yoruba culture.

Text in Context Society for Old Testament Study 2000-09-07 The scholarly study of the Old Testament is now marked by a rich diversity of approaches and concerns. In the last two decades, an interest in the text and the implications for its interpretation is no longer the preserve of a single scholarly community, while the reconstruction of the history of the people from whom it derived has been transformed by new methods. This new book published under the auspices of the Society for Old Testament Study reflects these new approaches and developments, and has a particular concentration on literary and historical study. Thus, it not only clearly recognizes the diversity now inherent in 'Old Testament study', but also welcomes the integration into its field of the wide range of approaches available in current literary and historical investigation. The study of the biblical text and how it is received and interpreted by its various readerships has a certain logical priority over the study of its historical background and authorship. Yet an ongoing investigation of issues relating to the latter cannot await definitive conclusions on the former. So, essays on the text and its reception discuss primary issues which arise in Old Testament study, while those on background and authorship reflect the continued vitality of, and the fresh perspective possible in, more traditional scholarly concerns.
