**Art and Aesthetics of Modern Mythopoeia V2** Ritushree Sengupta & Ashish Kumar Gupta 2021-05-15 Human culture has always weaved myths around its pattern of existence for multiple purposes. The interplay of religion and social practices have found their own space within the sphere of mythology. It is possible to read mythical texts to probe into the greater picture of human civilization. The contribution of myths towards the shaping of human beliefs, behavioural patterns are evident and assessing them often reveals a plethora of cultural histories unexplored and therefore unacknowledged before. The contribution of mythopoeia towards the construct of human socio-cultural identity has been largely accepted. Modern academia has thus taken a strong interest in revisionist literature to understand the hitherto unknown nuances of human civilization. In the edited anthology, *Art and Aesthetics of Modern Mythopoeia: Literatures, Myths and Revisionism (Vol-II)*, like the first volume, an attempt has been made to anthologize the works of a large number of authors who have talked about pertinent issues in the context of myth-making, the latent politics of mythopoeia and has taken into account several under-explored texts that are rich in mythical content. This volume offers a wide range of critical studies involving classical as well as modern myths around the globe.
