Canary in the Coal Mine Dr. William Cooke 2021-06-22 One doctor's courageous

fight to save a small town from a silent epidemic that threatened the community's future—and exposed a national health crisis. When Dr. Will Cooke, an idealistic young physician just out of medical training, set up practice in the small rural community of Austin, Indiana, he had no idea that much of the town was being torn apart by poverty, addiction, and life-threatening illnesses. But he soon found himself at the crossroads of two unprecedented health-care disasters: a national opioid epidemic and the worst drug-fueled HIV outbreak ever seen in rural America. Confronted with Austin's hidden secrets, Dr. Cooke decided he had to do something about them. In taking up the fight for Austin's people, however, he would have to battle some unanticipated foes: prejudice, political resistance, an entrenched bureaucracy—and the dark despair that threatened to overwhelm his own soul. *Canary in the Coal Mine* is a gripping account of the transformation of a man and his adopted community, a compelling and ultimately hopeful read in the vein of *Hillbilly Elegy*, *Dreamland*, and *Educated*.

Smart Nanovesicles for Drug Targeting and Delivery Maria Carafa 2019-05-20 We can use the short text on the SI page for the description, or you make slight modifications on it. The description/summary is only for promotion (flyer, distribution channels), and will not be included in the book You can use the short text on the SI page for the description Nanovesicles are highly-promising systems for the delivery and/or targeting of drugs, biomolecules and contrast agents. Despite the fact that initial studies in this area were performed on phospholipid vesicles, there is an ever-increasing interest in the use of other molecules to obtain smart vesicular carriers focusing on strategies for targeted delivery. These systems can be obtained using newly synthesized smart molecules, or by intelligent design of opportune carriers to achieve specific delivery to the site of action. The drug/contrast agent-containing vesicles need to be directed to precise locations within the body to obtain desired magnitude and duration of the therapeutic or diagnostic effect. This spatial control in the delivery might open new avenues to modulate drug activity while avoiding side-effects and to optimize contrast agent properties while avoiding a broad distribution in the organism. However, delivering and targeting active substances into specific tissues and cells is still a challenge in designing novel therapeutic approaches against untreatable disorders, such as tumors and degenerative diseases.

Sex Addiction as Affect Dysregulation: A Neurobiologically Informed Holistic Treatment (Norton Series on Interpersonal Neurobiology) Alexandra Katehakis

2016-09-20 Examining the neurobiological underpinnings of sex addiction. Neuroaffective science—studying the integrated development of the body, brain, and mind—has revealed mechanisms linking psychological and biological factors of mental disorders, including addiction. Indeed, its paradigm-shifting theoretical umbrella demonstrated that substance and behavioral dependencies share identical neurobiological workings, and thus that problematic repetitive behaviors are genuine addictions—a state increasingly understood as a chronic brain disorder. Clinical experience strongly suggests that sex addiction (SA) treatment informed by affective neuroscience—the specialty of Alexandra Katehakis—proves profoundly transformative. Katehakis's relational protocol, presented here, blends neurobiology with psychology to accomplish full recovery. Her Psychobiological Approach to Sex Addiction Treatment (PASAT) joins therapist and patient through a relationally-based psychotherapy—a holistic, dyadic dance that calls on the body, brain, and mind of both. Written with clarity and compassion, this book integrates cutting-edge research, case studies, verbatim session records, and patient writings and art. Katehakis explicates neurophysiological, psychological, and cultural forces priming and maintaining SA, then details how her innovative treatment restores patients' interpersonal, sexual, and spiritual relationality.

The Gaslight Effect Dr. Robin Stern 2018-01-09 In this groundbreaking guide, the prominent therapist Dr. Robin Stern shows how the Gaslight Effect works, how you can decide which relationships can be saved and which you have to walk away from—and how to gasproof your life so you'll avoid gaslighting relationship. Your husband crosses the line in his flirtations with another woman at a dinner party. When you confront him, he asks you to stop being insecure and controlling. After a long argument, you apologize for giving him a hard time. Your mother belittles your clothes, your job, and your boyfriend. But instead of fighting back, you wonder if your mother is right and figure that a mature person should be able to take a little criticism. If you think things like this can't happen to you, think again. Gaslighting is an insidious form of emotional abuse and manipulation that is difficult to recognize and even harder to break free from. Are you being gaslighted? Check for these telltale signs: 1) Does your opinion of yourself change according to approval or disapproval from your spouse? 2) When your boss praises you, do you feel as if you could conquer the world? 3) Do you dread having small things go wrong at home—buying the wrong brand of toothpaste, not having dinner ready on time, a mistaken appointment written on the calendar? 4) Do you have trouble making simple decisions and constantly second guess yourself? 5) Do you frequently make excuses for your partner's behavior to your family and friends? 6) Do you feel hopeless and joyless?

Sex for Sale Ronald John Weitzer 2010 This groundbreaking collection of essays on the sex industry contains original studies on sex work, its risks and benefits, and its political implications. Sex for Sale covers areas not commonly researched, including gay and lesbian pornography, telephone sex workers, customers of prostitutes, male and female escorts who work independently, street prostitution, sex tourism, legal prostitution, and strip clubs that cater to women. Sex for Sale also tracks various trends during the past decade, including the mainstreaming and growing acceptance of some types of sexual commerce and the growing criminalization of other types, such as sex trafficking. Sex for Sale offers a window into the lived experiences of sex workers as well as an analysis of the larger gender arrangements and political structures that shape the experiences of workers and their clients. This book contributes greatly to a growing research literature that documents the rich variation, nuances, and complexities in the exchange of sexual services, performances, and products. This book will change the way we understand sex work.

The Cigarette Century Allan Brandt 2009-01-06 From agriculture to big business, from medicine to politics, The Cigarette Century is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. The Cigarette Century shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

States of Inquiry Oz Frankel 2006-07-21 "Performing, printing, and then circulating these studies, government established an economy of exchange with its diverse constituencies. In this medium, which Frankel terms "print statism," not only tangible objects such as reports and books but knowledge itself changed hands. As participants, citizens assumed the standing of informants and readers."

Gospel According to the Klan Kelly J. Baker 2017-03-20 Shows that the Ku Klux Klan based its justifications for hatred on a particular brand of Protestantism that resonated with mainstream Americans. The Evolving Congress Congressional Research Service Library of Congress 2015-05-17 For 100 years, the Congressional Research Service (CRS) has been charged with providing nonpartisan and authoritative research and analysis to inform the legislative debate in Congress. This has involved a wide range of services, such as written reports on issues and the legislative process, consultations with Members and their staff, seminars on policy and procedural matters, and congressional testimony. The Government and Finance Division at CRS took a step back from its intensive day-to-day service to Congress to analyze important trends in the evolution of the institution-its organization and policymaking process-over the last many decades. Changes in the political landscape, technology, and representational norms have required Congress to evolve as the Nation's most democratic national institution of governance. The essays in this print demonstrate that Congress has been a flexible institution that has changed markedly in recent years in response to the social and political environment.

Biocommunication of Phages Guenther Witzany 2020-06-29 This is the first book to systemize all levels of communicative behavior of phages. Phages represent the most diverse inhabitants on this planet. Until today they are completely underestimated in their number, skills and competences and still remain the dark matter of biology. Phages have serious effects on global energy and nutrient cycles. Phages actively compete for host. They can distinguish between 'self' and 'non-self' (complement same, preclude others). They process and evaluate available information and then modify their behaviour accordingly. These diverse competences show us that this capacity to evaluate information is possible owing to communication processes within phages (intra-organismic), between the same, related and different phage species (interorganismic), and between phages and non-phage organisms (transorganismic). This is crucial in coordinating infection strategies (lytic vs. lysogenic) and recombination in phage genomes. In 22 chapters, expert contributors review current research into the varying forms of phage biocommunication and Phagetherapy. Biocommunication of Phages aims to assess the current state of research, to orient further investigations on how phages communicate with each other to coordinate their behavioral patterns, and to inspire further investigation of the role of non-phage viruses (non-lytic, non-prokaryotic) in these highly dynamic interactional networks.

God in Captivity Tanya Erzen 2017-03-07 An eye-opening account of how and why evangelical Christian ministries are flourishing in prisons across the United States It is by now well known that the United States' incarceration rate is

the highest in the world. What is not broadly understood is how cash-strapped and overcrowded state and federal prisons are increasingly relying on religious organizations to provide educational and mental health services and to help maintain order. And these religious organizations are overwhelmingly run by nondenominational Protestant Christians who see prisoners as captive audiences. Some twenty thousand of these Evangelical Christian volunteers now run educational programs in over three hundred US prisons, jails, and detention centers. Prison seminary programs are flourishing in states as diverse as Texas and Tennessee, California and Illinois, and almost half of the federal prisons operate or are developing faith-based residential programs. Tanya Erzen gained inside access to many of these programs, spending time with prisoners, wardens, and members of faith-based ministries in six states, at both male and female penitentiaries, to better understand both the nature of these ministries and their effects. What she discovered raises questions about how these ministries and the people who live in prison grapple with the meaning of punishment and redemption, as well as what legal and ethical issues emerge when conservative Christians are the main and sometimes only outside forces in a prison system that no longer offers even the pretense of rehabilitation. Yet Erzen also shows how prison ministries make undeniably positive impacts on the lives of many prisoners: men and women who have no hope of ever leaving prison can achieve personal growth, a sense of community, and a degree of liberation within the confines of their cells. With both empathy and a critical eye, *God in Captivity* grapples with the questions of how faith-based programs serve the punitive regime of the prison, becoming a method of control behind bars even as prisoners use them as a lifeline for self-transformation and dignity.
