Translating Humour in Audiovisual Texts Gian Luigi De Rosa 2014-12-11 Humour found in audiovisual products is, of course, performative in nature. If we consider instances of humour - any droll moment occurring in today's fare of mixed-genre products as a composite of cognition, emotion, interaction and expression - we see that the verbal code becomes just one component of four equally significant elements. And, as 'expression' is not limited to verbal output alone, humour may of course be created in absence of a verbal code. Translating humour for audiovisuals is not too different from translating verbal humour tout court. What makes humour occurring within audiovisual texts more problematic is the fact that it may be visually anchored; in other words a gag or a joke may pivot on verbal content directed at a specific element that is present within the graphic system of the same text. As the term itself suggests, audiovisuals contain two overlying structures: a visual and an auditory channel each of which contain a series of both verbal and non-verbal elements which inextricably cross-cut one another. The contributors in this collection of essays present a series of case studies from films and video-games exemplifying problems and solutions to audiovisual humour in the dubs and subs in a variety of language combinations.

**Traces** Ernst Bloch 2006 Collects aphorisms, essays, stories, and anecdotes, and enacts the author's interest in showing how attention to "traces" can serve as a mode of philosophizing. In an example of how the literary can become a privileged medium for philosophy, his chief philosophical invention is to begin with what gives an observer pause.

This ground-breaking book opens up a new field of study, bilingualism and emotions, and provides intriguing answers to these and many related questions.

**Grammatical Theory and Philosophy of Language in Antiquity** Pierre Swiggers 2002 This collective volume contains studies in the field of ancient grammar, poetics and philosophy of language. The contributions, written by specialists in the field, focus on central themes in the historiography of ancient linguistics, such as the status of grammar as a discipline in Antiquity, the relationship between poetics and grammatical theory, the constitution and development of the word class system, the descriptive format of grammars, the nature and description of specific word classes, the development of grammatical argumentation. In addition, several methodological issues in the study of ancient grammar and philosophy of language are dealt with: the problem of continuity vs. discontinuity in the history of linguistic thought, the role of schoolroom activities in the development of grammatical description and theory-formation, and problems concerning "tradition", "influence" and "originality" in ancient linguistics. The volume is rounded off with extensive indices of proper names, concepts and technical terms.

**The Jews in Mussolini's Italy** Michele Sarfatti 2006 Often overshadowed by the persecution of Jews in Germany, the treatment of Jews in fascist Italy comes into sharp focus in this volume by Italian historian Michele Sarfatti. Beginning with a history of Italian Jews in the decades before fascism--when Jews were fully integrated into Italian national life--Sarfatti provides a deft and comprehensive history from the rise of fascism in 1922 to its defeat in 1945. From the beginning of his regime, Mussolini degraded the relationship between Italian Jews and the state. In 1938, anti-Jewish legislation deprived Jews of their rights and their livelihoods--with laws that sometimes preceded the concurrent German legislation--and 1943 marked the beginning of physical persecution of Jews in areas not yet liberated by the Allies. Sarfatti's work is a vigorous condemnation of Mussolini and his regime. Available in English for the first time, this revised and expanded edition uses thorough and careful statistical evidence to document how the Italian social climate changed from relatively just to irredeemably prejudicial. Most forcefully, Sarfatti demonstrates that Rome did not simply follow the lead of Berlin. Rather, Mussolini showed the ability to independently develop a hostile relationship with Italy's Jews, one that eventually led the Italian regime to cooperate in Hitler's "Final Solution." The translation of this book has been funded by SEPS--Segretariato Europeo per le Pubblicazioni Scientifiche Outstanding Academic Title,

**The Marriage Diaries of Robert & Clara Schumann** Robert Schumann 1993 The Schumann Marriage diaries provide a vivid portrait of the unique artistic and personal union between two renowned musicians. For the first four years of their marriage, Robert and Clara Schumann kept a joint diary, recording their entries, at least initially, on alternate weeks. Begun on September 13, 1840, the day after their marriage, the diary opens with guidance from Robert: "This little book . . . has a very intimate meaning; it shall be a diary about everything that touches us mutually in our household and marriage." The diaries reflect the harmony as well as the discord in their marriage. Robert and Clara describe in intimate detail their honeymoon period, the births of their children, their busy social lives, travels throughout Europe, financial problems, separations, and reunions. The book also evokes the artistic milieu of nineteenth-century Germany. The Schumanns came in contact with many musicians, including their close friends Felix Mendelssohn and Franz Liszt, and recorded their insightful reactions to the artists and their music. The marriage diaries cover a fertile period in Robert Schumann's life, during which he wrote the Spring Symphony, the Piano Concerto, most of his chamber music, his first oratorio, "Paradise and the Peri, " and numerous songs. They reflect the frenetic pace at which he worked, as well as his growing bouts of depression, his ambivalent response to Clara's decision to return to the concert stage after a prolonged hiatus, and her anxiety in the face of Robert's changing moods. This edition includes the couple's travel book, written during their stressful concert tour of Russia in 1844, which marked the end of the marriage diaries; RobertSchumann's descriptions of Russian customs; and the poems he wrote in Moscow - all of which provide a fascinating and uniquely detailed glimpse at what it was like to travel in Russia at the time.

Beyond Leadership Scott Eacott 2017-11-06 This book systematically elaborates Scott Eacott's "relational" approach to organizational theory in education. Contributing to the relational trend in the social sciences, it first surveys relational scholarship across disciplines before providing a nuanced articulation of the relational research program and key concepts such as organizing activity, auctors, and spatio-temporal conditions. It also includes critical commentaries on the program from key figures such as Tony Bush, Megan Crawford, Fenwick English, Helen Gunter, Izhar Oplatka, Augusto Riveros, and Dawn Wallin. As such, the text models an approach to, or social epistemology for building knowledge claims in relation rather than through parallel monologues. Eacott's relational approach provides a distinctive, post-Bourdieuian variant of the relational sociological project. Shifting the focus of inquiry from entities (e.g., leaders, organizations) to organizing activity and recognizing how auctors generate - simultaneously emerging from and constitutive of - spatio-temporal conditions unsettles the orthodoxy of organizational theory in educational administration and leadership. By presenting its claims in the context of other approaches, the book stimulates intellectual debate among both relational sociologists and opponents of relational approaches. Beyond Leadership provides significant insights into the organizing of education. As it does not fit neatly into any one field, but instead blends educational administration and leadership, organizational studies, and relational sociology, among others, it charts new territory and promotes important dialogue and debate.

*Lights Out* T. S. Wiley 2002-01-18 When it comes to obesity, diabetes, heart disease, cancer, and depression, everything you believe is a lie. With research gleaned from the National Institutes of Health, T.S. Wiley and Bent Formby deliver staggering findings: Americans really are sick from being tired. Diabetes, heart disease, cancer, and depression are rising in our population. We're literally dying for a good night's sleep. Our lifestyle wasn't always this way. It began with the invention of the lightbulb. When we don't get enough sleep in sync with seasonal light exposure, we fundamentally alter a balance of nature that has been programmed into our physiology since day one. This delicate

biological rhythm rules the hormones and neurotransmitters that determine appetite, fertility, and mental and physical health. When we rely on artificial light to extend our day until 11 p.m., midnight, and beyond, we fool our bodies into living in a perpetual state of summer. Anticipating the scarce food supply and forced inactivity of winter, our bodies begin storing fat and slowing metabolism to sustain us through the months of hibernation and hunger that never arrive. Our own survival instinct, honed over millennia, is now killing us. Wiley and Formby also reveal: -That studies from our own government research prove the role of sleeplessness in diabetes, heart disease, cancer, infertility, mental illness, and premature aging -Why the carbohydrate-rich diets recommended by many health professionals are not only ridiculously ineffective but deadly -Why the lifesaving information that can turn things around is one of the best-kept secrets of our day. Lights Out is one wake-up call none of us can afford to miss.

The Linguistic Integration of Adult Migrants Jean Claude Beacco 2014 The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

*A Concise Introduction to International Law* Attila Tanzi 2019 This textbook provides an overview of the functioning international law, rather than the full knowledge of the immense developments of international law of the last decades, concerning the regulation of its subjects, sources, stateresponsibility, the means of dispute settlement and the ever increasingly problematic relation to

domestic jurisdictions and the numerous branches of substantive international law, such as the law of the sea, environmental law, human rights law, investment and trade law, international criminal law, and jurisdictional immunities, amongst others. The extreme concision book is aimed to provide an incentive for the students at first degree level to study the subject, while purporting to complement the specific syllabus, which may be chosen by the teacher of the PIL module. The basic character of the narrative is also meant to embolden domestic attorneys to realise how intertwined with international law are the rules and institutions they interpret and apply on a daily basis, and how many more arguments they could plead before a domestic court if they were aware of this.

*Doing Applied Linguistics* Daniel Perrin 2017-06-12 How can students be empowered to communicate professionally - as translators, journalists and CCOs? How can professionals engaged in crucial language interactions do the same - pilots, nurses, lawyers and many others? This volume gives answers to these questions, providing insights into critical situations and good practices from many years of research and teaching in a practice-oriented, research driven School of Applied Linguistics.

**Natural Law and Human Dignity** Ernst Bloch 1986 Ernst Bloch was one of the most original and influential of contemporary European thinkers, leaving his mark in fields ranging from philosophy and social theory to aesthetics and theology. This book represents a unique attempt to reconcile the traditional oppositions of the natural law and social utopian traditions, providing basic insights into the meaning of human rights in a socialist society.

**Reconstructing Illness** Anne Hunsaker Hawkins 1999 Serious illness and mortality, those most universal, unavoidable, and frightening of human experiences, are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times. As modern medicine has become more scientific and dispassionate, a new literary genre has emerged: pathography, the personal narrative concerning illness, treatment, and sometimes death. Hawkins's sensitive reading of numerous pathographies highlights the assumptions, attitudes, and myths that people bring to the medical encounter. One factor emerges again and again in these case studies: the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease. Pathography allows the individual person a voice - one that asserts the importance of the experiential side of illness, and thus restores the feeling, thinking, experiencing human being to the center of the medical enterprise. Recommended for medical practitioners, the clergy, caregivers, students of popular culture, and the general reader, *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human.

**The Third Teacher** OWP/P Cannon Design, Inc. 2014-07-11 Created by an international team of architects and designers concerned about our failing education system, The Third Teacher explores the critical link between the school environment and how children learn, and offers 79 practical design ideas, both great and small, to guide reader's efforts to improve our schools. Written for anyone who has school-age children in their life, from educators and education decision-makers to parents and community activists, this book is intended to ignite a blaze of discussion and initiative about environment as an essential element of learning. Including a wealth of interviews, facts, statistics, and stories from experts in a wide range of fields, this book is a how-to guide to be used to connect with the many organizations, individuals, and ideas dedicated to innovating and improving teaching and learning. Contributors include children's singer and advocate Raffi, author and creativity consultant Sir Ken Robinson, scientist and environmentalist David Suzuki, inventor James Dyson, and other experts who are working to create fresh solutions to problems and create a new blueprint for the future of education.

Grammar and Vocabulary for the Real World. Per Le Scuole Superiori Jon Hird 2015

The Social Organization of Disease Jochen Kleres 2017-07-06 Empirically, this book is a case-study analysis of dissolution processes in German AIDS organizations. Indeed, why is it that civic organizers start out with a commitment to a cause but end up dissolving their organization? This question is exactly what Kleres seeks to tackle within The Social Organization of Disease. Focusing on the emotional bases of dissolved German AIDS organizations to develop a typology of civic action and organizing, Kleres presents a perspective on non-profit organizations that analyses organizational development through the emotional sense making of individual organizers, within the light of larger political processes and cultural contexts. To this end, this volume develops and applies a new methodology for researching emotions empirically, expanding the scope of narrative analysis. However, parallel to this, The Social Organization of Disease also explores how shifting discursive processes establish emotional climates and thus impact on state policies and the evolution of AIDS organizing. The book would appeal to sociologists and political scientists working in the field of social movements and non-profit organisations: but it would also appeal to those who are interested in the sociology of emotions. It would potentially be of interest to non-profit scholars who consider community-based organizations, volunteerism and advocacy, and secondarily, to medical sociologists interested in AIDS service organizations. Sociology, International relations, Social Work, Political Science. May be of interest for NGO-activists and/or employees and leadership.

*Trends in Stochastic Analysis* Jochen Blath 2009-04-09 Presenting important trends in the field of

stochastic analysis, this collection of thirteen articles provides an overview of recent developments and new results. Written by leading experts in the field, the articles cover a wide range of topics, ranging from an alternative set-up of rigorous probability to the sampling of conditioned diffusions. Applications in physics and biology are treated, with discussion of Feynman formulas, intermittency of Anderson models and genetic inference. A large number of the articles are topical surveys of probabilistic tools such as chaining techniques, and of research fields within stochastic analysis, including stochastic dynamics and multifractal analysis. Showcasing the diversity of research activities in the field, this book is essential reading for any student or researcher looking for a guide to modern trends in stochastic analysis and neighbouring fields.

**Atheism in Christianity** Ernst Bloch 2009 "Only an atheist can be a good Christian and only a Christian can be a good atheist," wrote Ernst Bloch. Yet unlike Dawkins and Hitchens, who perceive religion as an opiate handed out by repressive priest- and mullah-run states, it was not enough for Bloch to posit religious belief as a delusion. Belief for him rested in social context. It could not simply be dismissed as "the sigh of the oppressed creature in a hostile world" without recognizing that the sigh contained the pre-illumination of a different, better world. *Atheism in Christianity* is a detailed historical study of the Bible and its long standing fascination across classes, locating its appeal in the stories that oppose the under-classes to authority and that promise transcendence. A new introduction by Terry Eagleton will bring this classic up to date for modern audiences.

**Non-Native Prosody** Jürgen Trouvain 2007-01-01 *Non-Native Prosody: Phonetic Description and Teaching Practice* is a response to the increasing interest in the field of prosody in second language acquisition and teaching. The volume presents an overview of the state of the art in second language prosody learning and teaching and brings together linguistic research on the description and modelling of non-native prosodic structures with L2 teaching methods and practices. The first part comprises descriptions of non-native prosodic structures (including intonation, stress and speech rhythm) as well as methodological considerations of research in second language acquisition written by experts in the field. These overviews of current theoretical models and results from empirical studies are presented in a format accessible to language teachers. In the second part, some of the leading teaching practitioners and developers of phonological learning materials present a variety of methods and exercises in the area of prosody. The accompanying audio examples on a CD-ROM make a useful addition illustrating the descriptions and exercises for various target and source languages.
