Sustainable Development, Leadership, and Innovations Dalia Streimikiene 2019-12-06 This book deals with the main challenges of sustainable development and the role of sustainable business and corporate social responsibility in implementing these challenges through sustainable leadership and innovations. It includes the economic, social, and environmental dimensions of sustainability and emphasizes the importance of achieving a socio-environmental balance in society. The theoretical frameworks and insights from sustainable development implementations on macro and micro levels, as well as the practical examples and case studies provided to introduce the concept of sustainable leadership and its impact on sustainable business development, are a scientific novelty in the field of sustainability. The book is comprised of six interconnected chapters that sequentially reveal the principal provisions of sustainable development, corporate social responsibility, and sustainable leadership, together with their correlations. Features: • Provides cutting-edge examples and case studies of sustainable leadership, viewed as the most significant means for the creation of sustainable organizational culture • Includes case studies on the economic, social, and environmental dimensions of sustainability • Addresses scientific aspects of sustainable development and its challenges • Discusses issues of sustainable development at different scales, ranging from macro to mirco levels • Provides policy implications for sustainable business development The theoretical framework and practical case studies presented in *Sustainable Development, Leadership, and Innovations* make it an invaluable resource and guide to both the academic and business communities. Business leaders, policy makers, and other professionals, as well as academics and graduate students, will all benefit greatly from this text.

The Routledge Handbook of Memory and Place Sarah De Nardi 2019-09-06 This Handbook explores the latest cross-disciplinary research on the inter-relationship between memory studies, place, and identity. In the works of dynamic memory, there is room for multiple stories, versions of the past and place understandings, and often resistance to mainstream narratives. Places may live on long after

their physical destruction. This collection provides insights into the significant and diverse role memory plays in our understanding of the world around us, in a variety of spaces and temporalities, and through a variety of disciplinary and professional lenses. Many of the chapters in this Handbook explore place-making, its significance in everyday lives, and its loss. Processes of displacement, where people's place attachments are violently torn asunder, are also considered. Ranging from oral history to forensic anthropology, from folklore studies to cultural geographies and beyond, the chapters in this Handbook reveal multiple and often unexpected facets of the fascinating relationship between place and memory, from the individual to the collective. This is a multi- and intra-disciplinary collection of the latest, most influential approaches to the interwoven and dynamic issues of place and memory. It will be of great use to researchers and academics working across Geography, Tourism, Heritage, Anthropology, Memory Studies, and Archaeology.

Variety and Daily Variety Television Reviews, 1993-1994 Prouty 1996-09 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficult accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

Research in Computational Molecular Biology Russell Schwartz 2020-04-21 This book constitutes the proceedings of the 24th Annual Conference on Research in Computational Molecular Biology, RECOMB 2020, held in Padua, Italy, in May 2020. The 13 regular and 24 short papers presented were carefully reviewed and selected from 206 submissions. The papers report on original research in all areas of computational molecular biology and bioinformatics.

Crystals and Crystallinity in Polymers Claudio De Rosa 2013-11-04 Provides the tools needed to master and apply the fundamentals of polymer crystallography Using core concepts in physics, chemistry, polymer science and engineering, this book sheds new light on the complex field of polymer crystallography, enabling readers to evaluate polymer crystallization data and determine the best methods to use for their investigations. The authors set forth a variety of tested and proven methods for analyzing ordered and disordered structures in polymer crystals, including X-ray diffraction, electron diffraction, and microscopy. In addition to the basics, the book explores several advanced and emerging topics in the field such as symmetry breaking, frustration, and the principle of density-driven phase formation. *Crystals and Crystallinity in Polymers* introduces two new concepts in crystallinity and crystals in synthetic polymers. First, crystallinity in polymeric materials is compatible with the absence of true three-dimensional long-range order. Second, the disorder may be described as a structural feature, using the methods of X-ray scattering and electron diffraction analysis. The book begins by introducing the basic principles and methods for building structural models for the conformation of polymer crystal chains. Next, it covers: Packing of macromolecules in polymer crystals Methods for extracting structural parameters from diffraction data Defects and disorder in polymer crystals Analytical methods for diffuse scattering from disordered polymer structures Crystal habit Influence of

crystal defects and structural disorder on the physical and mechanical properties of polymeric materials
Crystals and Crystallinity in Polymers examines all the possible types of structural disorder generally present in polymer crystals and describes the influence of each kind of disorder on X-ray and electron diffraction patterns. Its comprehensive, expert coverage makes it possible for readers to learn and apply the fundamentals of polymer crystallography to solve a broad range of problems.

Middleton's Allergy: Principles and Practice E-Book N. Franklin Adkinson Jr. 2008-11-27 This best-selling resource has a worldwide reputation as the leader in its field. Focusing on human immunology and biology, while also reporting on scientific experimentation and advancement, it provides comprehensive coverage of state-of-the-art basic science as well as authoritative guidance on the practical aspects of day-to-day diagnosis and management. This new edition includes 700 full-color illustrations and a new, more accessible format to make finding information a snap for the busy practitioner. And this Expert Consult Edition offers online access to the complete contents of the 2-volume set, fully searchable, and much more. Includes a glossary of allergy and immunology for quick and easy reference. Contains keypoints and clinical pearls highlighted to find important information quickly. links to useful online resources both for you and for your patients. Offers contributions from hundreds of international authorities for world-class expertise in overcoming any clinical challenge. Contains 400 new illustrations, 700 in all, to better illustrate complex immunology. Covers the very latest in the field, including hot topics such as food allergy and immunotherapy. Includes the latest guidelines from The National Asthma Education and Prevention Program (NAEPP). Utilizes a new, more user-friendly full-color format for easier reference. Includes online access to the entire contents of the book, fully searchable, with links to MEDLINE abstracts for all of the references.

Treaty Series 2345 United Nations Office of Legal Affairs 2012-01-20 In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche.

The Latin Dialect of the Ager Faliscus Gabriël C. L. M. Bakkum 2009 Annotation. Although the Ager Faliscus lay between the areas where Etruscan, Latin and Sabellic languages were spoken, the inscriptions from the area from before c.150 bce show that it used a speech of its own, known as Faliscan. Most scholars agree that Faliscan is linguistically very close to Latin, but the hypothesis that it is in fact a Latin dialect has not been the subject of a major publication until now. In this work, the linguistic data on Faliscan provided by the inscriptions are analyzed and compared to the languages of the surrounding areas. Sociolinguistic aspects such as language contact and local identity are discussed as well. The main conclusion is that Faliscan can indeed be regarded as a dialect of Latin. The work includes a re-edition of all inscriptions, in many cases based on autopsy. This title can be previewed in Google Books - <http://books.google.com/books?vid=ISBN9789056295622>.

Film Criticism as a Cultural Institution Huw Walmsley-Evans 2018-03-28 At the beginning of the 21st century film criticism was described as in crisis. The decline of print journalism, a series of lay-offs of prominent critics, and the rise of "amateur" reviewing online spurred a conversation about the decline, even death, of film criticism. This discourse flourished in part because film criticism has been little examined in scholarship to date. This book takes a deeper look at film criticism by focusing on its institutional contours. This is achieved through a combination of archival research and interviews with prominent film critics and stakeholders, including Adrian Martin (LOLA), Stephanie Zacharek (Time), Peter Bart (Variety), and Andrew Sarris (The Village Voice). Film Criticism as a Cultural Institution first examines the contemporary crisis conversation surrounding film criticism, comparing this to historical precedents. It then provides what today's crisis conversation does not: an account of film criticism's institutional formations. Using primarily U.S. and Australian case studies based on interviews, observation and archival research—as well as accounts from other national schools—the book maps contemporary film criticism. Across various sites, such as publications or online spaces, and organisations, such as film critics circles, it elucidates film criticism's institutional practices, tasks, compartments, and personae. Looking at the history of conversations about film criticism shows us that "crisis" has always been a leitmotif. While acknowledging the considerable changes and challenges that film criticism faces today, this book situates these within an historical context and proposes an institutional framework that allows us to move beyond crisis discourse. Looking at film criticism in this way allows us to see that the very question of what counts as film criticism is continually contested within an institutional ecology made up of distinctive critical compartments addressed to distinctive audiences.
