Alternatives to Animal Testing Hajime Kojima 2018-12-27 This open access book presents recent advances in the pure sciences that are of significance in the quest for alternatives to the use of animals in research and describes a variety of practical applications of the three key guiding principles for the more ethical use of animals in experiments - replacement, reduction, and refinement, collectively known as the 3Rs. Important examples from across the world of implementation of the 3Rs in the testing of cosmetics, chemicals, pesticides, and biologics, including vaccines, are described, with additional information on relevant regulations. The coverage also encompasses emerging approaches to alternative tests and the 3Rs. The book is based on the most informative contributions delivered at the Asian Congress 2016 on Alternatives and Animal Use in the Life Sciences. It will be of value for those working in R&D, for graduate students, and for educators in various fields, including the pharmaceutical and cosmetic sciences, pharmacology, toxicology, and animal welfare. The free, open access distribution of Alternatives to Animal Testing is enabled by the Creative Commons Attribution license in International version 4: CC BY 4.0.

or similar pricing schemes such as emission trading systems, to implement climate mitigation strategies. It provides a quantitative framework for understanding their effects and trade-offs with other instruments and applies it to the largest advanced and emerging economies. Alternative approaches, like “feebates” to impose fees on high polluters and give rebates to cleaner energy users, can play an important role when higher energy prices are difficult politically. At the international level, the report calls for a carbon price floor arrangement among large emitters, designed flexibly to accommodate equity considerations and constraints on national policies. The report estimates the consequences of carbon pricing and redistribution of its revenues for inequality across households. Strategies for enhancing the political acceptability of carbon pricing are discussed, along with supporting measures to promote clean technology investments.

History of America Justin Winsor 1967

Amnesty International Report 2008 Amnesty International 2008 This annual report documents human rights abuses by governments and armed opposition groups in 150 countries across the world. It provides an invaluable reference guide to international human rights developments.

Implementing the Nagoya Protocol Brendan Coolsaet 2015-04-23 *Implementing the Nagoya Protocol* compares existing ABS regimes in ten European countries, including one non-EU member and one EU candidate country, and critically explores several cross-cutting issues related to the implementation of the Nagoya Protocol in the EU.

The Mindful Hand Lissa Roberts 2007 Although manual labor and theoretical invention might now seem separate ventures, they are closely linked processes. *The Mindful Hand* explores innovative areas of European society between the late Renaissance and the period of early industrialization where the enterprise of knowledge and production relied on the most intimate connections of thought and toil. It explains how philosophers and laborers collaborated to pioneer technical change alongside knowledge formation. The essays gathered here help show how these projects were pursued together, yet why, in retrospect, the very categories of science and technology emerged as seemingly distinct endeavors.

Planarian Regeneration Jochen C. Rink 2018-06-19 This volume explores the various facets of planaria as a biomedical model system and discusses techniques used to study the fascinating biology of these animals. The chapters in this book are divided into two parts: Part One looks at the biodiversity of planarian species, the molecular orchestration of regeneration, ecology of planarians in their natural habitats and their history as lab models. Part Two talks about experimental protocols for studying planarians, ranging from the establishment of a planarian research colony, to RNA and DNA extraction techniques, all the way to single stem cell transplantations or metabolomics analysis. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Comprehensive and cutting-edge, *Planarian Regeneration: Methods and Protocols* is a valuable resource for both newcomers to the field and experts within established planarian laboratories.

Earth's Magnetism in the Age of Sail A. R. T. Jonkers 2003-05-21 "A fascinating tale at the interface of geophysics, maritime history, and the history of science... A remarkable blend of scientific and historical scholarship." -- Choice

International Narcotics Control Strategy Report 1993

Transport Systems and Delivery of Cargo on East-West Routes Aleksander Śładkowski 2018-04-16

This book discusses the problems of delivering goods from East and South-East Asia to Europe, presenting the regional transport problems experienced in Italy, Slovakia, Russia, Georgia, Kazakhstan, Uzbekistan and Poland. The book is divided into two parts. The first part is devoted to the analysis of various issues in global logistics and regional transport, which operate in transport corridors. The second part of the book focuses on solutions to some of the technical and informatics problems related to the organization of transportation along the East-West routes. Intended primarily for professionals involved in various aspects of cargo delivery along the East-West routes, the book is also useful for manufacturers, technical staff at logistics companies, managers, students of transport-related subjects, as well as for a wide range of readers interested in the current state of transport in different countries.

Wonders and the Order of Nature, 1150-1750 Lorraine Daston 2001 A rich exploration of how European naturalists used wonder and wonders (oddities and marvels) to envision and explain the natural world.

The Seamans Secrets (1633) John Davis 1992

Mapping Travel Jordana Dym 2021-08-30 Drawing on a thousand years of European travel writing and mapmaking, Dym suggests that after centuries of text-based itineraries and on-the-spot directions guiding travelers and constituting their reports, maps in the fifteenth century emerged as tools for Europeans to support and report the results of land and sea travel. With each succeeding generation, these linear journey maps have become increasingly common and complex, responding to changes in forms of transportation, such as air and motor car 'flight' and print technology, especially the advent of multi-color printing. This is their story.

The Self-Made Map Tom Conley 1997

Strengthening Competitiveness In Bangladesh—Thematic Assessment Sanjay Kathuria 2016-07-25 This is volume 2 of a three-volume publication on Bangladesh's trade prospects. Bangladesh's ambition is to build on its very solid growth and poverty reduction achievements, and accelerate growth to become a middle income country by 2021, and share prosperity more widely amongst its citizens. This includes one of its greatest development challenges: to provide gainful employment to the over 2 million people that will join the labor force each year over the next decade. Moreover, only 54.1 million of its 94 million working age people are employed. Bangladesh needs to use its labor endowment even more intensively to increase growth and, in turn, to absorb the incoming labor. The Diagnostic Trade

Integration Study identifies the following actions centered around four pillars to sustain and accelerate export growth: (1) breaking into new markets through a) better trade logistics to reduce delivery lags ; as world markets become more competitive and newer products demand shorter lead times, to generate new sources of competitiveness and thereby enable market diversification; and b) better exploitation of regional trading opportunities in nearby growing and dynamic markets, especially East and South Asia; (2) breaking into new products through a) more neutral and rational trade policy and taxation and bonded warehouse schemes; b) concerted efforts to spur domestic investment and attract foreign direct investment, to contribute to export promotion and diversification, including by easing the energy and land constraints; and c) strategic development and promotion of services trade; (3) improving worker and consumer welfare by a) improving skills and literacy; b) implementing labor and work safety guidelines; and c) making safety nets more effective in dealing with trade shocks; and (4) building a supportive environment, including a) sustaining sound macroeconomic fundamentals; and b) strengthening the institutional capacity for strategic policy making aimed at the objective of international competitiveness to help bring focus and coherence to the government's reform efforts. This second volume provides in-depth analysis across seven cross-cutting themes that underpin most of the findings of pillars 1 and 2 above.

Capital Flight from Africa S. Ibi Ajayi 2015 A comprehensive thematic analysis of capital flight from Africa, it covers the role of safe havens, offshore financial centres, and banking secrecy in facilitating illicit financial flows and provides rich insights to policy makers interested in designing strategies to address the problems of capital flight and illicit financial flows.

Constructing and Representing Territory in Late Medieval and Early Modern Europe Overlaet DAMEN 2021-12-08 In recent political and constitutional history, scholars seldom specify how and why they use the concept of territory. In research on state formation processes and nation building, for instance, the term mostly designates an enclosed geographical area ruled by a central government. Inspired by ideas from political geographers, this book explores the layered and constantly changing meanings of territory in late medieval and early modern Europe before cartography and state formation turned boundaries and territories into more fixed (but still changeable) geographical entities. Its central thesis is that analysing the notion of territory in a premodern setting involves analysing territorial practices: practices that relate people and power to space(s). The book not only examines the construction and spatial structure of premodern territories but also explores their perception and representation through the use of a broad range of sources: from administrative texts to maps, from stained glass windows to chronicles.

Coordinated Portfolio Investment Survey International Monetary Fund 1997-01-01 This paper presents a coordinated portfolio investment survey guide provided to assist national compilers in the conduct of the Coordinated Portfolio Investment Survey, conducted under the auspices of the IMF with reference to the year-end 1997. The guide covers a variety of conceptual issues that a country must address when conducting a survey. It also covers the practical issues associated with preparing for a national survey. These include setting a timetable, taking account of the legal and confidentiality issues raised, developing a mailing list, and maintaining quality control checks.

Blood Ties İpek Yosmaoğlu 2013-11-27 The region that is today the Republic of Macedonia was long the heart of the Ottoman Empire in Europe. It was home to a complex mix of peoples and faiths who had for hundreds of years lived together in relative peace. To be sure, these people were no strangers to coercive violence and various forms of depredations visited upon them by bandits and state agents. In the final decades of the nineteenth century and throughout the twentieth century, however, the region

was periodically racked by bitter conflict that was qualitatively different from previous outbreaks of violence. In *Blood Ties*, İpek K. Yosmaoğlu explains the origins of this shift from sporadic to systemic and pervasive violence through a social history of the "Macedonian Question." Yosmaoğlu's account begins in the aftermath of the Congress of Berlin (1878), when a potent combination of zero-sum imperialism, nascent nationalism, and modernizing states set in motion the events that directly contributed to the outbreak of World War I and had consequences that reverberate to this day. Focusing on the experience of the inhabitants of Ottoman Macedonia during this period, Yosmaoğlu shows how communal solidarities broke down, time and space were rationalized, and the immutable form of the nation and national identity replaced polyglot, fluid associations that had formerly defined people's sense of collective belonging. The region was remapped; populations were counted and relocated. An escalation in symbolic and physical violence followed, and it was through this process that nationalism became an ideology of mass mobilization among the common folk. Yosmaoğlu argues that national differentiation was a consequence, and not the cause, of violent conflict in Ottoman Macedonia.

Marketing Mexico Fruits & Vegetables 1979

Early Christianity in Contexts William Tabbernee 2014-11-18 This major work draws on current archaeological and textual research to trace the spread of Christianity in the first millennium. William Tabbernee, an internationally renowned scholar of the history of Christianity, has assembled a team of expert historians to survey the diverse forms of early Christianity as it spread across centuries, cultures, and continents. Organized according to geographical areas of the late antique world, this book examines what various regions looked like before and after the introduction of Christianity. How and when was Christianity (or a new form or expression of it) introduced into the region? How were Christian life and thought shaped by the particularities of the local setting? And how did Christianity in turn influence or reshape the local culture? The book's careful attention to local realities adds depth and concreteness to students' understanding of early Christianity, while its broad sweep introduces them to first-millennium precursors of today's variegated, globalized religion. Numerous photographs, sidebars, and maps are included.

Haiti 1987

Grammar of the Mexican Language Horacio Carochi 2002-07-01 The primary native language of central Mexico before and after the Spanish conquest, Nahuatl was used from the mid-sixteenth century forward in an astounding array of alphabetic written documents. James Lockhart, an eminent historian of early Latin America, is the leading interpreter of Nahuatl texts. One of his main tools of instruction has been Horacio Carochi's monumental 1645 *Arte de la lengua mexicana*, the most influential work ever published on Nahuatl grammar. This new edition includes the original Spanish and an English

translation on facing pages. The corpus of examples, source of much of our knowledge about vowel quality and glottal stop in Nahuatl, is presented once in its original form, once in a rationalized manner. Copious footnotes provide explanatory commentary and more literal translations of some of Carochi's examples. The volume is an indispensable pedagogical tool and the first critical edition of the premier monument of Nahuatl grammatical literature.

Regulatory and Procedural Barriers to Trade in Armenia United Nations 2020-01-10 This study highlights the challenges faced by international traders and the types of efforts needed for greater regional and global economic integration. It will support the government at formulating trade reforms, and therefore enable the government to ensure the successful achievement of the global sustainable development goals. The recommendations were born out of consultations with the government, drawing on extensive field surveys targeting supply chain actors, legislative analysis and trade indices. The study also featured a special focus on female-owned enterprises, with a view to gaining a better understanding of the specific challenges to increasing their participation in international trade.

Handbook of Terminal Planning Jürgen W. Böse 2011-02-26 Container Terminals (CT) operate as central nodes in worldwide hub-and-spoke networks and link ocean-going vessels with smaller feeder vessels as well as with inbound and outbound hinterland transportation systems using road, rail, or inland waterways. The volume of transcontinental container flows has gained appreciably over the last five decades -- throughput figures of CT reached new records, frequently with double-digit annual growth rates. Stimulated by throughput requirements and stronger competition between terminals settled in the same region or serving a similar hinterland, respectively, cost efficiency and throughput capabilities become more and more important. Nowadays, both terminal capacity and costs have to be regarded as key indicators for CT competitiveness. In respect of this steady growth, this handbook focuses on planning activities being aimed at "order of magnitude improvements" in terminal performance and economic viability. On the one hand the book is intended to provide readership with technological and organizational CT basics for strategic planning. On the other hand this book offers methodical assistance for fundamental dimensioning of CT in terms of 'technique', 'organization' or 'man'. The former primarily considers comprehensive information about container handling technologies representing the state of the art for present terminal operations, while the latter refers to methodological support comprising in particular quantitative solutions and modeling techniques for strategic terminal decisions as well as straightforward design guidelines. The handbook includes an introductory contribution which gives an overview of strategic planning problems at CT and introduces the contributions of the volume with regard to their relationship in this field. Moreover, each paper contains a section or paragraph that describes the impact of findings investigated by the author(s) for problem-solving in long-term planning of CT (as an application domain). The handbook intends to provide solutions and insights that are valuable for both practitioners in industry who need effective planning approaches to overcome problems and weaknesses in terminal design/development and researchers who would like to inform themselves about the state of the art in methodology of strategic terminal planning or be inspired by new ideas. That is to say, the handbook is addressed to terminal planners in practice as well as to students of maritime courses of study and (application oriented) researchers in the maritime field.

Stop and Go Michael Hieslmair 2019-12-03 Investigations of people in transit across the informal hubs, terminals, and nodes that crisscross Eastern Europe and Vienna. Stop and Go is a research project by

architect and artist Michael Hieslmair and cultural historian Michael Zinganel that focuses on the transformation of the informal hubs, terminals, and nodes along Pan-European transport corridors in Eastern Europe and Vienna. Following the fall of the Iron Curtain and the expansion of the EU, the need to improve infrastructure and develop faster connections between places affected the public realm at the margins and even in the center of cities. Stop and Go investigates the people in transit across these transnational networks with descriptive text, images, and maps.

Geographic Information Science at the Heart of Europe Danny Vandembroucke 2013-05-13 For the seventh consecutive year, the AGILE promotes the publication of a book collecting high-level scientific papers from unpublished fundamental scientific research in the field of Geographic Information Science. As the agenda for Europe 2020 is currently being set, this book demonstrates how geographic information science is at the heart of Europe. The contributions open perspectives for innovative services that will strengthen our European economy, and which will inform citizens about their environment while preserving their privacy. The latest challenges of spatial data infrastructures are addressed, such as the connection with the Web vocabularies or the representation of genealogy. User generated data (through social networks or through interactive cameras and software) is also an important breakthrough in our domain. A trend to deal more and more with time, events, ancient data, and activities is noticeable this year as well. This volume collects the 23 best full papers presented during the 16th AGILE Conference on Geographic Information Science, held between 14 and 17 May 2013 in Leuven, Belgium.

Fiscal Monitor, April 2021 International Monetary Fund 2021-04-07 The April 2021 edition of the Fiscal Monitor focuses on tailoring fiscal responses to the COVID-19 pandemic and adopting policies to reduce inequality and gaps
