**The Roots of Ayurveda** Various 2003-04-29 Ayurveda, the ancient art of healing, has been practiced in India for more than two thousand years and survives today as a living medical tradition whose principles are at the heart of many "alternative" therapies now used in the West. This "science of longevity" has parallels with Buddhist thought, and advocates a life of moderation through which the three humors of the body will be brought into balance. The writings selected for this volume are taken from Sanskrit medical texts written by the first Ayurvedic physicians, who lived between the fifth century b.c. and the fourteenth century a.d. Here readers will find wide-ranging and fascinating advice on the benefits of garlic therapy, prayers for protection against malevolent disease deities, surgical techniques, exercise regimens, the treatment of poisons, the interpretation of dreams, and more. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. *Accumulation in Post-Colonial Capitalism* Iman Kumar Mitra 2016-07-29 This volume looks at how accumulation in postcolonial capitalism blurs the boundaries of space, institutions, forms, financial regimes, labour processes, and economic segments on one hand, and creates zones and corridors on the other. It draws our attention to the peculiar but structurally necessary coexistence of both primitive and virtual modes of accumulation in the postcolony. From these two major inquiries it develops a new understanding of postcolonial capitalism. The case studies in this volume discuss the production of urban spaces of capital extraction, institutionalization of postcolonial finance capital, gendering of work forms, establishment of new forms of labour, formation of and changes in caste and racial identities and networks, and securitization—and thereby confirm that no study of contemporary capitalism is complete without thoroughly addressing the postcolonial condition. By challenging the established dualities between citizenship-based civil society and welfare-based political society, exploring critically the question of colonial and postcolonial difference, and foregrounding the material processes of accumulation against the culturalism of postcolonial studies, this volume redefines postcolonial studies in South Asia and beyond. It is invaluable reading for students and scholars of South Asian studies, sociology, cultural and critical anthropology, critical and praxis studies, and political science.

**Chinese and Indian Medicine Today** Md. Nazrul Islam 2017-04-04 This book discusses Asian medicine, which puts enormous emphasis on prevention and preservation of health, and examines how, in recent decades, medical schools in Asia have been increasingly shifting toward a curative approach. It offers an ethnographic investigation of the scenarios in China and India and finds that modern students and graduates in these countries perceive Asian medicine to be as important as Western medicine. There is a growing tendency to integrate Asian medicine with Western medical thought in the academic curriculum that has led to a gradual decline of Asian medical thought and practices. At the same time, there has been a massive rise in patent drugs, health products and cosmetics being sold under the brand names of Asian medicine or herbal medicine. Most of these drugs and health products do not follow the classical formulas found in the Asian medical texts. The book analyses these texts and concludes that contemporary Asian medicine rarely follows the classical texts, and in fact uses Asian medicine brands to sell Western health products and practices. With a particular focus on the formal and professional sector of Chinese herbal medicine and Indian ayurvedic medicine in urban areas, this book appeals to a broad readership, including undergraduate students and academics as well as non-experts. Md. Nazrul Islam is an Associate Professor in the General Education Office, United International College, Beijing Normal

*Yoga Ratnākara* S. Suresh Babu 2005 In an innovative cultural history of Argentine movies and radio in the decades before Peronism, Matthew B. Karush demonstrates that competition with jazz and Hollywood cinema shaped Argentina's domestic cultural production in crucial ways, as Argentine producers tried to elevate their offerings to appeal to consumers seduced by North American modernity. At the same time, the transnational marketplace encouraged these producers to compete by marketing "authentic" Argentine culture. Domestic filmmakers, radio and recording entrepreneurs, lyricists, musicians, actors, and screenwriters borrowed heavily from a rich tradition of popular melodrama. Although the resulting mass culture trafficked in conformism and consumerist titillation, it also disseminated versions of national identity that celebrated the virtue and dignity of the poor, while denigrating the wealthy as greedy and mean-spirited. This anti-elitism has been overlooked by historians, who have depicted radio and cinema as instruments of social cohesion and middle-class formation. Analyzing tango and folk songs, film comedies and dramas, radio soap operas, and other genres, Karush argues that the Argentine culture industries generated polarizing images and narratives that provided much of the discursive raw material from which Juan and Eva Pern built their mass movement.

**Depression in Kerala** Claudia Lang 2018-06-18 This book examines depression as a widely diagnosed and treated common mental disorder in India and offers a significant ethnographic study of the application of a traditional Indian medical system (Ayurveda) to the very modern problem of depression. Based on over a year of fieldwork, it investigates the Ayurvedic response to the burden of depression in the Indian state of Kerala as one of the key processes of the local appropriation or glocalization of depression. More broadly, Lang considers: What happens with the category of depression when it leaves the West and travels to South Asia? How is depression appropriated in a South Asian society characterized by medical pluralism? She explores on the level of ideas, institutions and materialities how depression interacts with and changes local worlds, clinical practice and knowledge and subjectivities. As depression travels from 'the West' to South India, its ontology, Lang argues, multiplies and thus leads to what she calls 'depression multiple'.
