"Why Won't You Just Tell Us the Answer?" Bruce A. Lesh 2011 Every major measure of students' historical understanding since 1917 has demonstrated that students do not retain, understand, or enjoy their school experiences with history. Bruce Lesh believes that this is due to the way we teach history -- lecture and memorization. Over the last fifteen years, Bruce has refined a method of teaching history that mirrors the process used by historians, where students are taught to ask questions of evidence and develop historical explanations. -- from publisher description.

More Like Life Itself Cory Wright-Maley 2018-10-01 John Dewey wrote in multiple places that education should be an experience of the content and processes of life itself. Too often, social studies is taught in a way that tells students about real-life, but fails to engage them in the process of life for which Dewey advocated. The core purpose of simulations is to reflect the processes, events, and phenomena expressed in a variety of real-life domains. They engage students in these reflections of real life meaningfully, as active agents who have the power to make decisions that impact the direction of events and that lead to both intended and unintended consequences. Because of the nature of simulations, students who participate in them are able to build their capacities to think in complex and critical ways. Today, despite the growing evidence that simulations have an important role to play in the teaching of social studies, they remain an underutilized and undervalued approach to the discipline. One of the key obstacles to their widespread adoption is the limited availability of training resources available to social studies teachers. Teachers need support to develop a new vision of social studies teaching and learning coupled with practical guidance necessary to implement simulations effectively. This volume provides teachers with both. When teachers are able to weave simulations effectively into the fabric of social studies

teaching and learning, they help to promote social studies experiences that are both powerful and purposeful. They offer students an experience of the discipline that is, indeed, More Like Life Itself.

Reclaiming Conversation Sherry Turkle 2016-10-04 "In a time in which the ways we communicate and connect are constantly changing, and not always for the better, Sherry Turkle provides a much needed voice of caution and reason to help explain what the f*** is going on." -Aziz Ansari, author of *Modern Romance* Renowned media scholar Sherry Turkle investigates how a flight from conversation undermines our relationships, creativity, and productivity—and why reclaiming face-to-face conversation can help us regain lost ground. We live in a technological universe in which we are always communicating. And yet we have sacrificed conversation for mere connection. Preeminent author and researcher Sherry Turkle has been studying digital culture for over thirty years. Long an enthusiast for its possibilities, here she investigates a troubling consequence: at work, at home, in politics, and in love, we find ways around conversation, tempted by the possibilities of a text or an email in which we don't have to look, listen, or reveal ourselves. We develop a taste for what mere connection offers. The dinner table falls silent as children compete with phones for their parents' attention. Friends learn strategies to keep conversations going when only a few people are looking up from their phones. At work, we retreat to our screens although it is conversation at the water cooler that increases not only productivity but commitment to work. Online, we only want to share opinions that our followers will agree with - a politics that shies away from the real conflicts and solutions of the public square. The case for conversation begins with the necessary conversations of solitude and self-reflection. They are endangered: these days, always connected, we see loneliness as a problem that technology should solve. Afraid of being alone, we rely on other people to give us a sense of ourselves, and our capacity for empathy and relationship suffers. We see the costs of the flight from conversation everywhere: conversation is the cornerstone for democracy and in business it is good for the bottom line. In the private sphere, it builds empathy, friendship, love, learning, and productivity. But there is good news: we are resilient. Conversation cures. Based on five years of research and interviews in homes, schools, and the workplace, Turkle argues that we have come to a better understanding of where our technology can and cannot take us and that the time is right to reclaim conversation. The most human—and humanizing—thing that we do. The virtues of person-to-person conversation are timeless, and our most basic technology, talk, responds to our modern challenges. We have everything we need to start, we have each other. Turkle's latest book, *The Empathy Diaries* (3/2/21) is available now.

If this is Social Studies, why Isn't it Boring? Stephanie Steffey 1994-01-01 The provocative title of this book plays on a too-familiar response from teachers and students alike. But now many teachers have begun to seek an approach to social studies that takes account of the ways children learn and that builds on their own knowledge and strengths. The authors in this book have found ways to do this. Wendy Hood writes in the Introduction that they have “. . . not only rediscovered social studies education in general, they have also

found themselves exploring the many disciplines of the social sciences that combine to make social studies . . . The issues of the disciplines are visible, the content of the disciplines is visible, and the questions central to each discipline are central in these classrooms. While the studies described began in one discipline, they branched out or melted into one or more of the others." In this contributed collection, twenty-three teachers explain their successful strategies for teaching the social studies disciplines in a whole- language context. If This Is Social Studies covers contemporary subjects (the Gulf War), traditional topics (students as historians), well-known projects (Scottish Storyline), social studies in the community, and multicultural matters. Teachers at elementary through middle and high school levels will find this book's holistic approach to social studies a refreshing departure and a source of new, practical ideas. Indeed, the diversity of ideas and styles is as broad as the book's subject!

The Knowledge Gap Natalie Wexler 2020-08-04 The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.
