ABBA Petter Karlsson 2014-09-23 This is the first complete and authorized official visual history of ABBA, one of the greatest pop groups of the 20th century. ABBA has sold a stunning 400 million records, and in some markets has even surpassed the Beatles. This first and only official book on ABBA was created with the full cooperation of the band members themselves and containing more than 600 rare and heretofore unseen images from throughout the band's career. Publishing with the 40th anniversary of ABBA winning the Eurovision Song Contest, which is what put the band on the map, publication is being synchronized worldwide to great media attention. With a foreword and commentary throughout the book by the band's four members, this is truly the complete story of one of the most popular bands of all time.

Direct Into Chaos Aleen Solari 2021-01-12 Fiction. Art. Women's Studies. Translated by Way Film. Aleen Solari is an artist whose work is shaped profoundly by insights into various subcultures. These insights are partly drawn from her own experiences, partly borrowed from members of certain scenes who she invites to be part of her work. Her sculptural practice moves in and out of life within these groups, and is full of codes and quotations from antifa members, football hooligans, bored youth clubs or those embedded in neonazi networks. *DIRECT INTO CHAOS* is a book that dives deep into these worlds, shape-shifting between fiction, documentation and artwork.

Backjumps - the live issue #3 Don M. Zaza 2007 *BACKJUMPS - The Live Issue #3*: Since 2003, the nationally acclaimed and unique exhibition series *BackJumps - The Live Issue* has had sensational impact and successes in Berlin. The *Backjumps* team, built around curator Adrian Nabi, successfully wrapped their third major Live event, in late 2007. While gallery owners and professionals of the culture sector were left rubbing their eyes and the conservative tabloid newspapers elevated the projects profile with cries of scandal, approximately 50,000 enthusiastic art lovers made a pilgrimage to the exhibitions and numerous *Backjumps*-related side events in Kreuzberg. *BackJumps - Live Issue # 3*, the three-dimensional Live edition of the legendary *Backjumps* magazine, once again brought the street art scene together to view works of numerous international artists under one roof. In addition to the actual exhibition, several workshops, panel discussions, lectures, urban walks and partner exhibitions took place. Several large scale murals were painted throughout the

city under the Backjumps banner and of course, throughout the course of the events, the streets of Berlin were as alive and visual as ever. All this and much more can be found in the From Here To Fames newly published 320-page (catalogue-)book, BackJumps - Live Issue # 3, which, in keeping with former editions, strikes a bold note with its revolutionary design. The book gives the reader an allinclusive tour of the exhibition rooms, describing with brilliant images and thoughtful texts, the work of the 24 artists and projects. Additional information and numerous other works of each individual artist are also found in the extensive artist chapter of the catalogue. With the books retrospect of Live Issues # 1 and # 2, light is shed on the Backjumps scandal, and the impact that t

The Way of the Linguist Steve Kaufmann 2005-11 *The Way of The Linguist*, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book *The Way of The Linguist*, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

Clarinet Acoustics O. Lee Gibson 1998 Most symphonic instruments were standardized in the eighteenth and nineteenth centuries, but the design of the clarinet is still changing. O. Lee Gibson begins this first complete study of its acoustical principles with a history of the clarinet, a survey of the instruments of famous clarinetists, and the characteristics of the national schools of clarinet manufacture. He then describes the modal frequency ratios of a clarinet and the timbres of its tones, as well as its dynamic range, stability, flexibility, and responsiveness. He stresses that all the dimensions of a wind instrument - length, volume, size, weight, and material - are

interrelated. He concludes with a discussion of existing but rarely available mechanical improvements and suggests other acoustical enhancements that have not been fully utilized.

Whose Education For All? Birgit Brock-Utne 2002-06-01 Since 1990, when the phrase "education for all" was first coined at the World Bank conference in Jomtien, Thailand, a battle has raged over its meaning and its impact on education in Africa. In this thought-provoking new volume, Dr. Brock-Utne argues that "education for all" really means "Western primary schooling for some, and none for others." Her incisive analysis demonstrates how this construct robs Africans of their indigenous knowledge and language, starves higher education in Africa, and thereby perpetuates Western dominion. In Dr. Brock-Utne's words, "A quadrangle building has been erected in a village of round huts."

The Abba Guide to Stockholm Sara Russell 2010-06 The book ABBA fans all over the world have been waiting for: the first city guide book of its kind, taking readers to a selection of more than 60 important ABBA locations in and around Stockholm. Energie Bernd Diekmann 2013-11-01 In dem vorliegenden Band wird naturwissenschaftlich-physikalische Hintergrundinformation zum Thema Energie bereitgestellt, um dem Leser objektive Bewertungskriterien für die global hochaktuelle Diskussion der Zukunft unserer Energieversorgung an die Hand zu geben. Insbesondere ist es ein zentrales Anliegen, dem Leser eine Bilanzierung aller Quellen hinsichtlich der Einflussnahme ihrer Gewinnung und Verwendung auf die Umwelt zu erstellen und das jeweilige Risiko zueinander in Relation zu setzen. Nach Festlegung des Begriffes Energie und ihrer Erscheinungsformen werden globale Randbedingungen des Umgangs mit Energie aufgezeigt. Diese Randbedingungen werden sodann für Deutschland als typischem Industrieland enger eingegrenzt. Die Palette infrage kommender Quellen, fossile, erneuerbare und nukleare, wird sodann im Detail vorgestellt. Ergiebigkeit der Ressourcen sowie sonstige Möglichkeiten und Grenzen des Einsatzes werden diskutiert; alle Energiequellen werden sodann nach Definition eines energetischen Erntefaktors miteinander verglichen. Die Speicher- und Transportmöglichkeiten und - hiermit eng verbunden - die Handlungsspielräume rationellen Umgangs mit den diversen Formen der Energie bilden einen weiteren Schwerpunkt. Der an naturwissenschaftlicher Hintergrundinformation interessierte Leser findet in einem gesonderten Kapitel eine detaillierte Präsentation ausgewählter Techniken.

Scar Lover Harry Crews 1993-02-23 In a dozen novels and his non-fiction books and articles, Harry Crews has shown himself to be a true American original. With *Scar Lovers* he returns to the familiar, unmistakable "Crews territory"--a Southern landscape peopled by quirky, odd, and oddly appealing individuals--to explore the realities of redemption and the power of love without boundaries of fear.

Behavioral Controlling Utz Schäffer 2019-10-12 Jürgen Weber is known for his behavioral perspective on controlling and has made a lasting impact in German speaking countries during the past three decades. This anniversary volume compiles some of his outstanding publications from that period and presents them for the first time in English. In addition, it contains a current publication index of Jürgen Weber's entire body of work.

Theremin Albert Glinsky 2000 LEON THEREMIN led a life of flamboyant musical invention laced with daring electronic stealth. A creative genius and prolific inventor, Theremin launched the field of electronic music virtually singlehandedly in 1920 with the musical instrument that bears his name. The theremin -- the only instrument that is played without being touched -- created a sensation worldwide and paved the way for the modern synthesizer. Its otherworldly sound became familiar in sci-fi films and even in rock music. This magical instrument that charmed millions, however, is only the beginning of the story. As a Soviet scientist, Theremin surrendered his life and work to the service of State espionage. On assignment in Depression-era America, he became the toast of New York society and worked the engines of capitalist commerce while passing data on U.S. industrial technology to the Soviet apparatus. Following his sudden disappearance from New York in 1938, Theremin was exiled to a Siberian labor camp. He subsequently vanished into the top-secret Soviet intelligence machine and was presumed dead for nearly thirty years. Using the same technology that lay behind the theremin, he designed bugging devices that eavesdropped on U.S. diplomatic offices and stood at the center of a pivotal cold war confrontation. Throughout his life, Theremin developed many other electronic wonders, including one of the earliest televisions and multimedia devices that anticipated performance art and virtual reality by decades. In this first full biography of Leon Theremin, Albert Glinsky depicts the inventor's nearly one-hundred-year life span as a microcosm of the twentieth century. Theremin is seen at the epicenter of most of the major events of the century: the Russian Revolution, two world wars, America's Great Depression, Stalin's purges, the cold war, and perestroika. His life emerges as no less than a metaphor for the divergence of communism and capitalism. Theremin blends the whimsical and the treacherous into a chronicle that takes in everything from the KGB to Macy's store windows, Alcatraz to the Beach Boys, Hollywood thrillers to the United Nations, Joseph Stalin to Shirley Temple. Theremin's world of espionage and invention is an amazing drama of hidden loyalties, mixed motivations, and an irrepressibly creative spirit.

The Mother of All Questions Rebecca Solnit 2017-02-12 A collection of feminist essays steeped in "Solnit's unapologetically observant and truth-speaking voice on toxic, violent masculinity" (The Los Angeles Review). In a timely and incisive follow-up to her national bestseller *Men Explain Things to Me*, Rebecca Solnit offers sharp commentary on women who refuse to be silenced, misogynistic violence, the fragile masculinity of the literary canon, the gender binary, the recent history of rape jokes, and much more. In characteristic style, "Solnit draw[s] anecdotes of female indignity or male aggression from history, social media, literature, popular culture, and the news . . . The main essay in the book is about the various ways that women are silenced, and Solnit focuses upon the power of storytelling—the way that who gets to speak, and about what, shapes how a society understands itself and what it expects from its members. The Mother of All Questions poses the thesis that telling women's stories to the world will change the way that the world treats women, and it sets out to tell as many of those stories as possible" (The New Yorker). "There's a new feminist revolution—open to people of all genders—brewing right now and Rebecca Solnit is one of its most powerful, not to mention beguiling, voices."—Barbara Ehrenreich, *New York Times*-bestselling author of *Natural Causes* "Short, incisive essays that pack a powerful punch." —Publishers Weekly "A keen and timely commentary on gender and feminism. Solnit's voice is calm, clear, and unapologetic; each essay balances a warm wit with confident, thoughtful analysis, resulting in a collection that is as enjoyable and accessible as it is incisive." —Booklist

Liquid Reign Karl-Heinz Hasliprinz 2018-05-06 *Liquid Reign* is a work of speculative fiction, imagineering a fairly liveable future in 2051, neither dys- nor utopian. Melting the boundaries between science and fiction into a novel format, each chapter provides links to the sources of inspiration influencing it - ranging from Jean Jacques Rousseau's social contract of 1762 to blockchain startups from 2018. "A vertiginous rollercoaster of ideas and a unique take on the future of (un)governance, delivered with irrepressible, unruly energy."— Jamie King of the Pirates, Host "Steal this Show" "Tim Reutemann has become one of my favorite big brain boys over the past few months. In his book *Liquid Reign* he explores the future of democracy and civics in a way I have never seen done before... "— TheBurgerkrieg, Edgy Youtuber "Liquid Reign is a SciFi Novel about technology and our future and AI an all sorts of awesome shit and how it's gonna affect our world"— Jarred "PiG" Krensel, Ex Pro-Starcraft Player and e-Sports commentator "Woow, what a reading experience - truly immersive! A world with liquid democracy, artificial intelligence, universal basic income and a limit on wealth accumulation. After you've read the book, you have a feeling of a possible future."— Raphel Fasko, Mastermind of the Circular Economy

Lee de Forest and the Fatherhood of Radio James A. Hijiya 1992 "This book is not so much an analysis of de Forest's contribution to technology as it is a chronicle of his spiritual quest. Lee de Forest was an important inventor, and this biography attempts to explain what moved him to become one. It tries to show how - in a universe from which deity had seemingly disappeared - de Forest's devotion to invention was part of his search for a new light. The book is not a study in the history of technology but in the history of the religion of technology." "In 1906, de Forest created the "Audion," the three-electrode vacuum tube, which became the foundation of the electronics industry for half a century. He was a pioneer in radio and talking pictures, and he worked on projects ranging from television to solar energy. Holder of more than three hundred patents, he was one of the most prolific inventors in American

history." "But he was more than that. Lee de Forest had an immense curiosity that extended beyond science and engineering to politics, literature, and religion. His active and far-ranging mind became a register for many social and intellectual events during his long life: from Populism to McCarthyism, and from Darwinism to agnosticism. But while his interests were diverse, his vision was not. For him invention was not merely a vocation but a worldview. He represented a technological progressivism that advocated reform, but reform stemming less from social engineering than from real engineering. Although he favored certain improvements in law and education, he did not think that these would be the basis of social transformation. Instead, he believed that inventions - ranging from radios to war planes - would reform the human condition and that the future was more in the hands of inventors than statesmen. The millenium would be a technical innovation, with himself as one of its principal inventors." "As a young man, de Forest came to spurn conventional notions of an immortal soul; but he never ceased to seek ways to overcome death - not merely the physical death of the body but also the spiritual death of living without purpose. The fame of his inventions would, he hoped, keep him forever alive in the memory of posterity. Moreover, the good that his inventions did for humanity - his contribution to progress - would give meaning to his existence. For Lee de Forest, then, invention was a substitute for religion. By helping to build the future, he sought to become an indelible part of it."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

"The Turk and Islam in the Western Eye, 1450?750 " JamesG. Harper 2017-07-05 Unprecedented in its range - extending from Venice to the New World and from the Holy Roman Empire to the Ottoman Empire - this collection probes the place that the Ottoman Turks occupied in the Western imaginaire, and the ways in which this occupation expressed itself in the visual arts. Individual essays in this volume examine specific images or groups of images, problematizing the 'truths' they present and analyzing the contexts that shape the presentation of Ottoman or Islamic subject matter in European art. The contributors trace the transmission of early modern images and representations across national boundaries and across centuries to show how, through processes of translation that often involved multiple stages, the figure of the Turk (and by extension that of the Muslim) underwent a multiplicity of interpretations that reflect and reveal Western needs, anxieties and agendas. The essays reveal how anachronisms and inaccuracies mingled with careful detail to produce a "Turk," a figure which became a presence to reckon with in painting, sculpture, tapestry and printmaking.

Aggression in Personality Disorders and Perversions Otto F. Kernberg 1992-01-01
In this important new book, Dr. Otto F. Kernberg, one of the world's foremost psychoanalysts, explores the role of aggression in severe personality disorders and in normal and perverse sexuality, integrating new developments in psychoanalytic theory with findings from clinical work with severely regressed patients. The book also integrates Dr. Kernberg's recent studies of the descriptive, structural, and psychodynamic features of problems stemming from pathological aggression with the vicissitudes of their psychoanalytic treatment. Finally, Dr. Kernberg demonstrates the importance of differential diagnosis for effective psychoanalytically inspired treatment of these disorders, providing a rich variety of clinical illustrations. The book begins by relating the dual-drive theory of libido and aggression to contemporary developments in affect theory. Dr. Kernberg then applies this general theory of affects to aggression, which in its pathological form centers on the affect of hatred. He analyzes sado-masochistic, hysterical-hysteroid, and narcissistic-antisocial spectrums of personality disorders, emphasizing how aggression is structured in each group. Dr. Kernberg next describes and updates the theoretical frame underlying his approach to the treatment of these disorders, outlines their clinical manifestations, and illustrates their diagnosis and treatment, ranging from standard psychoanalysis with infantile personalities, to psychoanalytic psychotherapy with borderline personalities, to the psychotherapeutic approach to the treatment of psychosis and hospital milieu treatment in the management of highly regressed patients. In the final section, Dr. Kernberg links the findings from psychoanalytic approaches to personality disorders with those from the psychoanalytic study of sexual perversions.

Legal Methods Thomas M J Möllers 2020-03-05 This work provides lawyers with more than 100 legal interpretation figures that are used by lawyers worldwide to justify their legal decisions. The book puts lawyers in a position, to develop - step by step - a solution for a hitherto unsolved legal problem in such a way that it convinces the opposing party of the content of his/her solution. The book covers - legal sources - classic and modern figures of interpretation - the challenging concretisation and construction of law - influence of the constitution and European law as a higher-ranking law - determination of the limits of permissible further development of the law - and, very relevant for practice, the hermeneutics of facts The book benefits from a combination of classic and modern methodology, a lively presentation with numerous examples from literature and jurisprudence and coverage of several cases for in-depth reflection. The work will be a significant tool for all those interested in the basics of law.

Wittgenstein's Nephew Thomas Bernhard 2009 It is 1967. In separate wings of a Viennese hospital, two men lie bedridden. The narrator, named Thomas Bernhard, is stricken with a lung ailment; his friend Paul, nephew of the celebrated philosopher Ludwig Wittgenstein, is suffering from one of his periodic bouts of madness. As their once-casual friendship quickens, these two eccentric men begin to discover in each other a possible antidote to their feelings of hopelessness and mortality—a spiritual symmetry forged by their shared passion for music, strange sense of humor, disgust for bourgeois Vienna, and great fear in the face of death. Part memoir, part fiction, *Wittgenstein's Nephew* is both a meditation on the artist's struggle to maintain a solid foothold in a world gone incomprehensibly askew, and a stunning—if not haunting—eulogy to a real-life friendship.

Sowa's Ark Michael Sowa 1996-08-01 Chronicle is proud to publish the exciting paintings of widely acclaimed German artist Michael Sowa. A miniature pig splashing in a bowl of soup; a duck leading a wheelbarrow down a country lane; a woman gently stroking her daughter's face with a rabbit: take a trip into Sowa's brilliant and darkly comic imagination, where a menagerie of creatures adopt strange personae and pop up in the most unexpected places. In the same realm as Chris Van Allsburg and Maurice Sendak, Sowa's paintings take on the other-worldly look of a whacked-out fairy tale—each work full of irony, a wry Brothers Grimm for grown-ups. These witty and satirical images—a cross between Magritte and The Far Side—are sure to attract a well-deserved and passionate following in the States.
