Darwin's Theatre Marco Bakker 2019-06-15 Marco Bakker and Alexandre Blanc established their architectural firm, BABL Bakker and Blanc Architects, in Switzerland in 1992. At their offices in Lausanne and Zurich, they develop designs that are modest yet reflect the high demands of the built environment.00'Darwin's Theatre: BABL at Work' documents more than twenty-five years of the firm's work and demonstrates their vision and approach through a selection of thirty-four built and unrealized designs. Inspired by Pieter Bruegel the Elder's famous painting of the Tower of Babel, the book is conceived as a chronological spiral stairway to heaven that represents the evolution of eternal questions concerning space and time. This innovative concept reflects BABL's continuous work on recurring questions and the realization that each of their projects is an iteration of earlier ideas.

Language Universals Joseph Harold Greenberg 2005 Greenberg's Language Universals is typical of his typological-theoretical work in its stunning originality. Starting out from the observations underlying Praguian markedness, Greenberg contributes a mass of new data and generalizations and lays the foundations for a post-structuralist, usage-based theory of grammatical asymmetries. This work will continue to be influential for many years to come.

Simple Forms André Jolles 2017-01-31 A seminal text in literary theory available in English for the first time Legend, saga, myth, riddle, saying, case, memorable, fairy tale, joke: André Jolles understands each of these nine "simple forms" as the reflection in language of a distinct mode of human engagement with the world and thus as a basic structuring principle of literary narrative. Published in German in 1929 and long recognized as a classic of genre theory, *Simple Forms* is the first English translation of a significant precursor to structuralist and narratological approaches to literature. Like Vladimir Propp's *Morphology of the Folktale*, with which it is often compared, Jolles's work is not only foundational for the later development of genre theory but is of continuing relevance today. A major influence on literary genre studies since its publication, *Simple Forms* is finally available in English.

Europa Vasconica - Europa Semitica Theo Vennemann gen. Nierfeld 2003-01-01 This book presents the theory that the linguistic and cultural landscape of Europe north of the Alps and the Pyrenees was shaped in prehistoric times by the interaction of Indo-European speakers with speakers of languages related to Basque and to Semitic. These influences on the lexicon, grammar, and toponymy of the West Indo-European languages (with special focus on Germanic) are demonstrated in German and English research papers, provided here with summaries, commentaries, and a new introduction in English, and with general and etymological indexes.

Meaning and the Bilingual Dictionary Arleta Adamska-Sałaciak 2006 The topic of this book, central to the endeavours of bilingual dictionary-makers and metalexigraphers, is how to transmit meaning across languages within the confines of a lexicographic work of reference. The issues addressed -

including, among others, the status and typology of bilingual dictionaries, the different ways of overcoming lack of interlingual equivalence, and the difficulties involved in providing adequate examples of usage - are set against the background of recent theoretical perspectives on meaning and illustrated with problem cases taken from the author's own lexicographic practice.

Mitteleuropa Henry Cord Meyer 2013-03-09 Books begin as ideas. The suggestion for this one came from my mentor and friend, Hajo Holborn of Yale University. To him I am indebted for a series of challenging and rewarding experiences in the study of history. This work started as a routine dissertation on a limited subject, developed into a rejection of several generally accepted notions about German history, and finally opened out upon some broader perspectives of the modern Western world. In pursuing my topic I have tried to remain consistent and true to a fundamental conviction: that ideas cannot be dissociated from the men and situations that give birth to them, or from the changing characteristics of later men and later situations that use or affect the earlier ideological heritage. Politics by slogan is an aspect of man's activity that has its obvious, serious defects. These imperfections become more menacing when they are enshrined as history by slogan in the service of whatever cause. To counteract this tendency I have tried to tie the ideas of mid European integration clearly to specific persons or situations at every stage of development. Without such anchorage ideas will billow into slogans or evaporate into loose generalizations.

Mighty Baal Stephen C. Russell 2020 "Mighty Baal: Essays in Honor of Mark S. Smith is the first edited collection devoted to the study of the ancient Near Eastern god Baal. Although the Bible depicts Baal as powerless, the combined archaeological, iconographic, and literary evidence makes it clear that Baal was worshipped throughout the Levant as a god whose powers rivalled any deity. *Mighty Baal* brings together eleven essays written by scholars working in North America, Europe, and Israel. Essays in part one focus on the main collection of Ugaritic tablets describing Baal's exploits, the Baal Cycle. Essays in part two treat Baal's relationships to other deities. Together, the essays offer a rich portrait of Baal and his cult from a variety of methodological perspectives"--

Germania Semitica Theo Vennemann gen. Nierfeld 2012-12-06 *Germania Semitica* explores prehistoric language contact in general, and attempts to identify the languages involved in shaping Germanic in particular. The book deals with a topic outside the scope of other disciplines concerned with prehistory, such as archaeology and genetics, drawing its conclusions from the linguistic evidence

alone, relying on language typology and areal probability. The data for reconstruction comes from Germanic syntax, phonology, etymology, religious loan names, and the writing system, more precisely from word order, syntactic constructions, word formation, irregularities in phonological form, lexical peculiarities, and the structure and rules of the Germanic runic alphabet. It is demonstrated that common descent is neither a necessary nor a sufficient condition for reconstruction. Instead, lexical and structural parallels between Germanic and Semitic languages are explored and interpreted in the framework of modern language contact theory.

War and Society in Europe, 1870-1970 Brian Bond 1998 As Europe descended into an era of war and 19th century hopes for peace faded, warfare was itself transformed by the growth of nationalism and technological advances. This study assesses the influence of war on European society between 1870 and 1970.

Languages in prehistoric Europe Alfred Bammesberger 2003 Before the advent of writing and before the development of the Indo-European language, Europe enjoyed much greater linguistic diversity with a whole host of other languages (Hispanic, Baltic, Slavic, Germanic, to name but a few) which are now defunct. This collection of nineteen papers from a conference held at the Katholische Universität Eichstätt in Germany in 1999, examine this diversity from archaeological (two papers) and linguistic perspectives. Contributors include: Robert S P Beekes, Ivo Hajnal, Petri Kallio, Thomas Lindner, Oswald Panagl, Colin Renfrew, Klaus Strunk and Juergen Untermann. Papers in English and German.

Adolf Bastian and His Universal Archive of Humanity Manuela Fischer 2007 Dieser Band enthält die Beiträge des 2005 im Ethnologischen Museum Berlin abgehaltenen Symposiums aus Anlass des 100. Todestages von Adolf Bastian (1826-1905). Bastian war der Begründer der Ethnologie in Deutschland und der erste Direktor des Königlichen Museums für Völkerkunde in Berlin. Während seiner ersten Weltreise von 1850 bis 1858 stellte Bastian fest, dass die Kultur der indigenen Völker sich veränderte und im Begriff war, zu verschwinden. Er setzte sich zum Ziel, ein Menschheitsarchiv zu schaffen, um das Wissen über die Kultur dieser Völker zu erhalten sowie Anschauungsmaterial für spätere Studien bereit zu stellen. Bastian glaubte an die Einheit aller Menschen, unabhängig von

kulturellen oder sozialen Differenzierungen. Um der immensen Aufgabe, Informationen und Objekte zu beschaffen, gerecht zu werden, schuf Bastian ein weltweites Netzwerk von Forschern, Sammlern und Reisenden. Die 27 Beiträge erläutern Bastians Persönlichkeit, seine Schriften und seine Nachwirkungen. Sie beschäftigen sich mit den wissenschaftlichen Kreisen in Berlin, seiner Arbeit im Museum und der Arbeit der ihm nachfolgenden Forschergeneration. Ein großer Teil der Beiträge widmet sich seinen Reisen in verschiedene Erdteile, zwei Aufsätze behandeln zudem die Bedeutung der zu seinen Lebzeiten entstandenen Sammlung für die heutigen indigenen Völker.

The Cambridge History of Poland W. F. Reddaway 2016-09-15 Originally published in 1941, this book presents a comprehensive history of Poland from 1697 to 1935. The text was begun on the initiative of the renowned Cambridge historian Harold Temperley (1879-1939), who arranged numerous meetings with Polish and British historians in relation to the project, and was completed following his death. This book will be of value to anyone with an interest in Poland and European history.

The Carthaginian North: Semitic influence on early Germanic Robert Mailhammer 2019-10-15 This book presents a new and innovative theory on the origin of the Germanic languages. This theory presents solutions to four pivotal problems in the history of Germanic with critical implications for cultural history: the origin of the Germanic writing system (the Runic alphabet), the genesis of the Germanic strong verbs, the development of the Germanic word order, and etymologies for key elements of the Germanic lexicon. The book proposes that all four problems can be solved if it is hypothesized that over 2,000 years ago the ancestor of all Germanic languages, Proto-Germanic, was in intensive contact with Punic, a Semitic language from the Mediterranean. This scenario is explored by focusing on linguistic data, supported by an interdisciplinary mosaic of evidence. This book is of interest to anyone working on the linguistic and cultural history of the Germanic languages.

Worshipping Women Nikos E. Kaltsas 2008 This exhibition catalogue, divided into three main sections, is an essential collection of images and descriptions of each of the 155 artifacts of the exhibition, containing also scrutinizing essays on the important role women played in Classical Athens. The first

section, "Goddesses and Heroines", introduces the principal female deities of Athens and Attica, in whose cults and festivals women were most actively engaged: Athena, Artemis, Aphrodite, and Demeter and her daughter Persephone. The second section, "Women and Ritual," explores the practice of ritual acts such as dances, libations, sacrifices, processions and festivals in which women were active in classical antiquity. Here the critical role of the priestess comes to light, specifically in her function as key-bearer for the temples of the gods. The final section, "Women and the Cycle of Life," looks at how religious rituals defined moments of transition. This section focuses on nuptial rites and wedding banquets but also death, another occasion on which Athenian women took on major responsibilities, such as preparing the deceased for burial and tending the graves of family members. Contributors include, in addition to the editors, Professor Mary Lefkowitz of Wellesley College; Professor Olga Palagia of the University of Athens; Dr. Angelos Delivorrias, director of the Benaki Museum; Professor Michalis Tiverios of the Aristotelion University of Thessaloniki; Professor Joan Breton Connelly of New York University; Professor Jenifer Neils of Case Western Reserve University; and Professor John Oakley of the College of William and Mary in Virginia, among others.

This volume includes 34 papers subdivided in eight sections: General Linguistics (8), Phonetics (5), Lexicology (3), Corpus Linguistics (2), Natural Language Processing (9), Foreign Languages (3), Mass Media (2) and Art, Ethnology and Folklore (2). Adventuring in Dictionaries John Considine 2010-10-12 *Adventuring in Dictionaries: New Studies in the History of Lexicography* brings together seventeen papers on the making of dictionaries from the sixteenth century to the present day. The first five treat English and French lexicography in the sixteenth and seventeenth centuries. Heberto Fernandez and Monique Cormier discuss the outside matter of French–English bilingual dictionaries; Kusujiro Miyoshi re-assesses the influence of Robert Cawdrey; John Considine uncovers the biography of Henry Cockeram; Antonella Amatuzzi discusses Pierre Borel's use of his predecessors; and Fredric Dolezal investigates multi-word units in

the dictionary of John Wilkins and William Lloyd. Linda Mitchell's account of dictionaries as behaviour guides in the seventeenth and eighteenth centuries leads on to Giovanni Iamartino's presentation of words associated with women in the dictionary of Samuel Johnson, and Thora Van Male's of the ornaments in the Encyclopédie. Nineteenth-century and subsequent topics are treated by Anatoly Liberman on the growth of the English etymological dictionary; Julie Coleman on dictionaries of rhyming slang; Laura Pinnavaia on Richardson's New Dictionary and the changing vocabulary of English; Peter Gilliver on early editorial decisions and reconsiderations in the making of the Oxford English Dictionary; Anne Dykstra on the use of Latin as the metalanguage in Joost Halbertsma's Lexicon Frisicum; Laura Santone on the "Dictionnaire critique" serialized in Georges Bataille's Surrealist review Documents; Sylvia Brown on the stories of missionary lexicography behind the Eskimo-English Dictionary of 1925; and Michael Adams on the legacies of the Early Modern English Dictionary project. The diverse critical perspectives of the leading lexicographers and historians of lexicography who contribute to this volume are united by a shared interest in the close reading of dictionaries, and a shared concern with the making and reading of dictionaries as human activities, which cannot be understood without attention to the lives of the people who undertook them.
